BUSINESS AND STRATEGIC UPDATES

Taobao and Tmall Group

For the quarter ended March 31, 2025, our customer management revenue grew 12% year-over-year to RMB71,077 million (US\$9,794 million), primarily driven by the improvement of take rate year-over-year. Our take rate benefited from the impact of the software service fee and increasing penetration of Quanzhantui. Merchants benefit through Quanzhantui's convenience of use and improvement of marketing efficiency.

We continued to invest in user growth and other strategic initiatives such as price-competitive products, customer service, membership program benefits and AI technology applications to enhance user experience. These efforts led to stronger momentum in new consumer growth and continuous increase in orders.

On the merchant end, we remained focused on improving their operating environment and ensuring their sustainable development on our platform. In particular, we increased support of merchants that provide high-quality products and customer services, including support for marketing, new product launches and customer management.

The number of 88VIP members, our highest spending consumer group, continued to increase by double digits year-over-year, surpassing 50 million. We will continue to focus on improving the retention rate of

88VIP membership.

Alibaba International Digital Commerce Group (“AIDC”)

For the quarter ended March 31, 2025, revenue from AIDC grew 22% year-over-year to RMB33,579 million (US\$4,627 million), primarily driven by strong performance in cross-border businesses. During the quarter, AIDC continued to focus on enhancing operating and investment efficiency, leading to narrowed loss of the segment year-over-year. In particular, the unit economics of the AliExpress’ *Choice* business improved on a sequential basis.

AIDC has a diverse geographical presence, with a consistent strategic focus on key regions such as select European markets and the Gulf Region. AliExpress and Trendyol, in particular, continue to diversify and enrich their product offerings by engaging local merchants and partners, through different business models in different markets. We believe that our diverse businesses and product offerings across geographies will continue to enhance our competitive advantages in the evolving global e-commerce landscape.

Cloud Intelligence Group

For the quarter ended March 31, 2025, revenue from Cloud Intelligence Group was RMB30,127 million (US\$4,152 million), an increase of 18% year-over-year. During this quarter, the year-over-year growth of overall revenue excluding Alibaba-consolidated subsidiaries accelerated to 17%. This momentum was primarily driven by an even faster public cloud revenue growth, including the increasing adoption of AI-related products.

Notably, AI-related product revenue maintained triple-digit year-over-year growth for the seventh consecutive quarter. Our AI products are seeing broader adoption across a wide range of industry verticals including Internet, retail, manufacturing, and media, with a growing focus on value-added applications. For example, Lingma, our AI coding assistant launched last year, has seen strong adoption among enterprise customers and delivered robust revenue growth. We will continue to invest in anticipation of customer growth and technology innovation, including AI products and services, to increase cloud adoption for AI and maintain our market leadership.

In the 2025 Gartner® Innovation Guide for Generative AI Technologies, which assessed vendors across four defined submarkets, Alibaba Cloud was the only Chinese provider named an Emerging Leader in all four areas: Generative AI Model Providers, Generative AI Engineering, Generative AI Specialized Cloud Infrastructure, and AI Knowledge Management Apps/General Productivity.

We remain committed to advancing multi-modal AI technology and expanding our open-source initiatives. In April, we launched the Qwen3 series, a new generation of hybrid reasoning models that combine the capabilities of fast, simple responses and deeper chain-of-thought reasoning into a single model. The Qwen3 series covers a full range of model sizes, including two MoE (Mixture-of-Experts) models and six dense models. The flagship MoE model, Qwen3-235B-A22B, with 235 billion parameters but only 22 billion activated parameters, delivers efficiency and world-leading performance in key benchmarks such as code generation, mathematics, and general reasoning. The smaller models, including the dense models and the lightweight MoE model Qwen3-30B-A3B, are designed for ease of adoption by developers and enterprises, while delivering strong performance at lower costs. All Qwen3 models have been fully open-sourced on ModelScope, Hugging Face, and other platforms. We believe the full open-sourcing of Qwen3 will drive innovation and new applications by developers, start-ups and enterprises.

Digital Media and Entertainment Group

For the quarter ended March 31, 2025, revenue of Digital Media and Entertainment Group was RMB5,554 million (US\$765 million), an increase of 12% year-over-year, primarily driven by the strong performance of the movie and entertainment businesses and the increase in Youku's advertising revenue.

Cost of revenue – Cost of revenue in the quarter ended March 31, 2025 was RMB145,626 million (US\$20,068 million), or 61.6% of revenue, compared to RMB148,098 million, or 66.7% of revenue, in the same quarter of 2024. Without the effect of share-based compensation expense, cost of revenue as a percentage of revenue would have decreased from 66.3% in the quarter ended March 31, 2024 to 61.4% in the quarter ended March 31, 2025, primarily due to the decrease in scale of low margin direct sales businesses, and improvement in monetization and operating efficiency.

Product development expenses – Product development expenses in the quarter ended March 31, 2025 were RMB14,934 million (US\$2,058 million), or 6.3% of revenue, compared to RMB14,085 million, or 6.3% of revenue, in the same quarter of 2024. Without the effect of share-based compensation expense, product development expenses as a percentage of revenue would have increased from 5.4% in the quarter ended March 31, 2024 to 5.7% in the quarter ended March 31, 2025.

Sales and marketing expenses – Sales and marketing expenses in the quarter ended March 31, 2025 were RMB36,179 million (US\$4,985 million), or 15.3% of revenue, compared to RMB28,826 million, or 13.0% of revenue, in the same quarter of 2024. Without the effect of share-based compensation expense, sales and marketing expenses as a percentage of revenue would have increased from 12.7% in the quarter ended March 31, 2024 to 15.0% in the quarter ended March 31, 2025, primarily due to our increased investments in e-commerce businesses.

General and administrative expenses – General and administrative expenses in the quarter ended March 31, 2025 were RMB10,331 million (US\$1,423 million), or 4.4% of revenue, compared to RMB14,019 million, or 6.3% of revenue, in the same quarter of 2024. Without the effect of share-based compensation expense, general and administrative expenses as a percentage of revenue would have decreased from 4.8% in the quarter ended March 31, 2024 to 4.0% in the quarter ended March 31, 2025.

Share-based compensation expense – Total share-based compensation expense included in the cost and expense items above in the quarter ended March 31, 2025 was RMB3,435 million (US\$473 million), compared to RMB7,123 million in the same quarter of 2024.

The following table sets forth our analysis of share-based compensation expense for the quarters indicated by type of share-based awards:

	Three months ended March 31,			YoY % Change

Others ⁽³⁾	2,748	714	98	(74)%
Total share-based compensation expense ⁽⁴⁾	7,123	3,435	473	(52)%

(1) This represents Alibaba Group share-based awards granted to our employees.

(2) This represents Ant Group share-based awards granted to our employees, which is subject to mark-to-market accounting treatment.

(3) This represents share-based awards of our subsidiaries.

(4) This includes both cash and non-cash share-based compensation expenses.

Share-based compensation expense decreased in the quarter ended March 31, 2025 compared to the same quarter of 2024. This decrease was primarily due to the decrease in the number of the awards granted and the increase in long-term cash incentives granted after considering the macroeconomic environment and the general trends in the talent market.

We expect that our share-based compensation expense will continue to be affected by changes in the fair value of the underlying awards and the quantity of awards we grant in the future.

Amortization and impairment of intangible assets – Amortization and impairment of intangible assets in the quarter ended March 31, 2025 was RMB833 million (US\$115 million), a decrease of 60% from RMB2,081 million in the same quarter of 2024.

Income from operations and operating margin

Adjusted EBITDA and Adjusted EBITA

Adjusted EBITDA increased 36% year-over-year to RMB41,783 million (US\$5,758 million) in the quarter ended March 31, 2025, compared to RMB30,807 million in the same quarter of 2024. Adjusted EBITA increased 36% year-over-year to RMB32,616 million (US\$4,495 million) in the quarter ended March 31, 2025, compared to RMB23,969 million in the same quarter of 2024, primarily attributable to revenue growth and improved operating efficiency, partly offset by the increase in investments in our e-commerce businesses and technology. A reconciliation of net income to adjusted EBITDA and adjusted EBITA is included at the end of this results announcement.

Adjusted EBITA by segment

Adjusted EBITA by segment as well as a reconciliation of income from operations to adjusted EBITA are set forth in the section entitled “March Quarter Segment Results” above.

Interest and investment income, net

Interest and investment income, net in the quarter ended March 31, 2025 was a loss of RMB7,516 million (US\$1,036 million), compared to a loss of RMB5,702 million in the same quarter of 2024, primarily due to the losses arising from the disposal of subsidiaries, partly offset by the mark-to-market changes from our equity investments and the decrease in impairment of our investments.

The above-mentioned investment gains and losses were excluded from our non-GAAP net income.

Other income, net

Other income, net in the quarter ended March 31, 2025 was RMB20 million (US\$3 million), a decrease of 99% compared to RMB2,963 million in the same quarter of 2024, primarily due to the net exchange loss in this quarter compared to the net exchange gain in the same quarter last year, arising from the exchange rate fluctuation between Renminbi and U.S. dollar.

Income tax expenses

Income tax expenses in the quarter ended March 31, 2025 were RMB6,854 million (US\$945 million), compared to RMB5,722 million in the same quarter of 2024.

	Three months ended March 31,		
	2024	2025	
	RMB	RMB	US\$
		(in millions)

- Ant Group	2,570	1,763	243
- Others	358	(981)	(135)
Impairment loss	(5,403)	(43)	(6)
Others ⁽¹⁾	(733)	(385)	(53)
Total	(3,208)	354	49

(1) “Others” mainly include basis differences arising from equity method investees, share-based compensation expense related to share-based awards granted to employees of our equity method investees, as well as gain or loss arising from the deemed disposal of the equity method investees.

We record our share of results of all equity method investees one quarter in arrears. The year-over-year decrease in share of profit of Ant Group was mainly attributable to investments in new growth initiatives, partly offset by an increase in fair value of certain investments. Impairment loss decreased year-over-year as we recorded impairment losses of RMB5,403 million in the same quarter last year, primarily due to a prolonged decline in the public market value of an equity method investee against its carrying value.

Net income and Non-GAAP net income

Our net income in the quarter ended March 31, 2025 was RMB11,973 million (US\$1,650 million), compared to RMB919 million in the same quarter of 2024, primarily due to the mark-to-market changes from our equity investments, the increase in income from operations, and the decrease in impairment of equity method investments, partly offset by the losses arising from the disposal of subsidiaries.

Net income attributable to ordinary shareholders in the quarter ended March 31, 2025 was RMB12,382 million (US\$1,706 million), compared to RMB3,270 million in the same quarter of 2024, primarily due to the mark-to-market changes from our equity investments, the increase in income from operations, and the decrease in impairment of equity method investments, partly offset by the losses arising from the disposal of subsidiaries.

The decrease in free cash flow was mainly attributed to the increase in our cloud infrastructure expenditure, partly offset by year-over-year increase of adjusted EBITDA. A reconciliation of net cash provided by operating activities to free cash flow is included at the end of this results announcement.

Net cash used in investing activities

During the quarter ended March 31, 2025, net cash used in investing activities of RMB39,547 million (US\$5,450 million) primarily reflected capital expenditures of RMB24,612 million (US\$3,392 million) and an increase in other treasury investments by RMB15,248 million (US\$2,101 million).

Revenue from All others segment was RMB206,269 million (US\$28,425 million) in fiscal year 2025, an increase of 7% compared to RMB192,331 million in fiscal year 2024, primarily due to the increase in revenue from Freshippo and Alibaba Health, partly offset by the decrease in revenue from Sun Art due to its sale and deconsolidation in February 2025.

(ii) Segment adjusted EBITA

Adjusted EBITA from All others segment in fiscal year 2025 was a loss of RMB8,536 million (US\$1,176 million), compared to a loss of RMB9,160 million in fiscal year 2024, primarily due to improved operating results from Sun Art, Freshippo and Alibaba Health, partly offset by the increased investment in technology businesses.

(1) This includes both cash and non-cash share-based compensation expenses.

Cost of revenue – Cost of revenue in fiscal year 2025 was RMB598,285 million (US\$82,446 million), or 60.0% of revenue, compared to RMB586,323 million, or 62.3% of revenue, in fiscal year 2024. Without the effect of share-based compensation expense, cost of revenue as a percentage of revenue would have decreased from 62.0% in fiscal year 2024 to 59.8% in fiscal year 2025, primarily due to the decrease in scale of low margin direct sales businesses, and improvement in monetization and operating efficiency.

Product development expenses – Product development expenses in fiscal year 2025 were RMB57,151 million (US\$7,876 million), or 5.7% of revenue, compared to RMB52,256 million, or 5.6% of revenue, in fiscal year 2024. Without the effect of share-based compensation expense, product development expenses as a percentage of revenue would have increased from 4.7% in fiscal year 2024 to 5.1% in fiscal year 2025.

Sales and marketing expenses – Sales and marketing expenses in fiscal year 2025 were RMB144,021 million (US\$19,847 million), or 14.5% of revenue, compared to RMB115,141 million, or 12.2% of revenue, in fiscal year 2024. Without the effect of share-based compensation expense, sales and marketing expenses as a percentage of revenue would have increased from 12.0% in fiscal year 2024 to 14.2% in fiscal year 2025, primarily due to our increased investments in e-commerce businesses.

General and administrative expenses – General and administrative expenses in fiscal year 2025 were RMB44,239 million (US\$6,096 million), or 4.4% of revenue, compared to RMB41,985 million, or 4.5% of revenue, in fiscal year 2024. Without the effect of share-based compensation expense, general and administrative expenses as a percentage of revenue would have increased from 3.9% in fiscal year 2024 to 4.0% in fiscal year 2025.

Share-based compensation expense – Total share-based compensation expense included in the cost and expense items above in fiscal year 2025 was RMB15,577 million (US\$2,147 million), compared to RMB18,546 million in fiscal year 2024.

The following table sets forth our analysis of share-based compensation expense for the periods indicated by type of share-based awards:

Others ⁽³⁾	7,263	4,452	613	(39)%
Total share-based compensation expense ⁽⁴⁾	18,546	15,577	2,147	(16)%

(1) This represents Alibaba Group share-based awards granted to our employees.

(2) This represents Ant Group share-based awards granted to our employees, which is subject to mark-to-market accounting treatment.

(3) This represents share-based awards of our subsidiaries.

(4) This includes both cash and non-cash share-based compensation expenses.

Share-based compensation expense decreased in fiscal year 2025 compared to fiscal year 2024. This decrease was primarily due to the decrease in the number of the awards granted and the increase in long-term cash incentives granted after considering the macroeconomic environment and the general trends in the talent market.

Share-based compensation expense related to Ant Group share-based awards was a net reversal in fiscal year 2024 because we made a mark-to-market adjustment during the fiscal year relating to Ant Group share-based awards granted to our employees, reflecting a decrease in the value of Ant Group.

We expect that our share-based compensation expense will continue to be affected by changes in the fair value of the underlying awards and the quantity of awards we grant in the future.

Amortization and impairment of intangible assets – Amortization and impairment of intangible assets in fiscal year 2025 was RMB6,336 million (US\$873 million), a decrease of 71% from RMB21,592 million in fiscal year 2024. In fiscal year 2025, impairment of intangible assets of RMB634 million (US\$87 million) was recorded mainly relating to our businesses within All others segment. In fiscal year 2024, an impairment of intangible assets of RMB12,084 million was recorded relating to Sun Art within All others segment.

Impairment of goodwill – Impairment of goodwill in fiscal year 2025 was RMB6,171 million (US\$850 million), a decrease of 41% from RMB10,521 million in fiscal year 2024, which mainly related to Digital Media and Entertainment Group and All others segment.

Income from operations and operating margin

Income from operations in fiscal year 2025 was RMB140,905 million (US\$19,417 million), or 14% of revenue, an increase of 24% compared to RMB113,350 million, or 12% of revenue, in fiscal year 2024, primarily due to the decrease in impairment of intangible assets and goodwill, the decrease in non-cash share-based compensation expense and the increase in adjusted EBITA.

Adjusted EBITDA and Adjusted EBITA

Adjusted EBITDA increased 6% year-over-year to RMB202,325 million (US\$27,881 million) in fiscal year 2025, compared to RMB191,668 million in fiscal year 2024. Adjusted EBITA increased 5% year-over-year to RMB173,065 million (US\$23,849 million) in fiscal year 2025, compared to RMB165,028 million in fiscal year 2024, primarily attributable to revenue growth and improved operating efficiency, partly offset by the increase in investments in our e-commerce businesses and technology. A reconciliation of net income to adjusted EBITDA and adjusted EBITA is included at the end of this results announcement.

Adjusted EBITA by segment

Adjusted EBITA by segment as well as a reconciliation of income from operations to adjusted EBITA are set forth in the section entitled “Full Fiscal Year Segment Results” above.

Interest and investment income, net

Interest and investment income, net in fiscal year 2025 was a gain of RMB20,759 million (US\$2,861 million), compared to a loss of RMB9,964 million in fiscal year 2024, primarily due to the mark-to-market changes from our equity investments and the decrease in impairment of our investments, partly offset by the losses arising from the disposal of subsidiaries.

The above-mentioned gains and losses were excluded from our non-GAAP net income.

Other income, net

Other income, net in fiscal year 2025 was RMB3,387 million (US\$467 million), a decrease of 45% compared to RMB6,157 million in fiscal year 2024, primarily due to change in input VAT super-credit rate from 5% to 0% in calendar year 2024.

Income tax expenses

Income tax expenses in fiscal year 2025 were RMB35,445 million (US\$4,884 million), compared to RMB22,529 million in fiscal year 2024.

Share of results of equity method investees

Share of results of equity method investees in fiscal year 2025 was a profit of RMB5,966 million (US\$822 million), compared to a loss of RMB7,735 million in fiscal year 2024. The following table sets forth a breakdown of share of results of equity method investees for the periods indicated:

	Year ended March 31,		
	2024	2025	
	RMB	RMB	US\$
	(in millions)		
Share of profit (loss) of equity method investees			
- Ant Group	7,860	12,648	1,743
- Others	(2,154)	(2,276)	(314)
Impairment loss	(9,895)	(2,723)	(375)
Others ⁽¹⁾	(3,546)	(1,683)	(232)
Total	(7,735)	5,966	822

(1) “Others” mainly include basis differences arising from equity method investees, share-based compensation expense related to share-based awards granted to employees of our equity method investees, as well as gain or loss arising from the deemed disposal of the equity method investees.

We record our share of results of all equity method investees one quarter in arrears. The year-over-year increase in share of profit of Ant Group was mainly attributable to an increase in fair value of certain investments, partly offset by the investments in new growth initiatives.

Net income and Non-GAAP net income

Our net income in fiscal year 2025 was RMB125,976 million (US\$17,360 million), compared to RMB71,332 million in fiscal year 2024, primarily due to the mark-to-market changes from our equity investments and the increase in income from operations, partly offset by the losses arising from the disposal of subsidiaries.

Excluding non-cash share-based compensation expense, gains/losses of investments, impairment of goodwill and intangible assets, and certain other items, non-GAAP net income in fiscal year 2025 was RMB158,122 million (US\$21,790 million), which remained stable compared to RMB157,479 million in fiscal year 2024. A reconciliation of net income to non-GAAP net income is included at the end of this results announcement.

Net income attributable to ordinary shareholders

Net income attributable to ordinary shareholders in fiscal year 2025 was RMB129,470 million (US\$17,841 million), compared to RMB79,741 million in fiscal year 2024, primarily due to the mark-to-market changes from our equity investments and the increase in income from operations, partly offset by the losses arising from the disposal of subsidiaries.

Diluted earnings per ADS/share and non-GAAP diluted earnings per ADS/share

Diluted earnings per ADS in fiscal year 2025 was RMB53.59 (US\$7.38), compared to RMB31.24 in fiscal year 2024. Excluding non-cash share-based compensation expense, gains/losses of investments, impairment of goodwill and intangible assets, and certain other items, non-GAAP diluted earnings per ADS in fiscal year 2025 was RMB65.41 (US\$9.01), an increase of 5% compared to RMB62.23 in fiscal year 2024.

investments, impairment of goodwill and intangible assets, and certain other items, non-GAAP diluted earnings per share in fiscal year 2025 was RMB8.18 (US\$1.13 or HK\$8.86), an increase of 5% compared to RMB7.78 in fiscal year 2024.

A reconciliation of diluted earnings per ADS/share to non-GAAP diluted earnings per ADS/share is included at the end of this results announcement. Each ADS represents eight ordinary shares.

Cash and cash equivalents, short-term investments and other treasury investments

As of March 31, 2025, cash and cash equivalents, short-term investments and other treasury investments included in equity securities and other investments on the consolidated balance sheets, of which that are unrestricted for withdrawal and use, were RMB597,132 million (US\$82,287 million), compared to RMB617,230 million as of March 31, 2024. Other treasury investments consist of fixed deposits, certificates of deposit and marketable debt securities with original maturities over one year for treasury purposes. The decrease in cash and cash equivalents, short-term investments and other treasury investments during the year ended March 31, 2025, was primarily due to cash used in repurchase of ordinary shares of RMB86,662 million (US\$11,942 million), dividend payment of RMB29,077 million (US\$4,007 million), acquisition of additional equity interests in non-wholly owned subsidiaries of RMB21,949 million (US\$3,025 million), repayment of unsecured senior notes of RMB16,220 million (US\$2,235 million) and net cash outflow of RMB7,662 million (US\$1,056 million) for investment and acquisition activities, partly offset by free cash flow generated from operations of RMB73,870 million (US\$10,180 million) and net proceeds from the issuance of unsecured and convertible senior notes and the payments for capped call transactions of RMB67,032 million (US\$9,237 million).

Net cash provided by operating activities and free cash flow

Net cash provided by operating activities in fiscal year 2025 was RMB163,509 million (US\$22,532 million), a decrease of 10% compared to RMB182,593 million in fiscal year 2024. Free cash flow, a non-GAAP measurement of liquidity, was RMB73,870 million (US\$10,180 million), a decrease of 53% compared to RMB156,210 million in fiscal year 2024. The decrease in free cash flow was mainly attributed to the increase in our cloud infrastructure expenditure, partly offset by year-over-year increase of adjusted EBITDA. A reconciliation of net cash provided by operating activities to free cash flow is included at the end of this results announcement.

Net cash used in investing activities

During fiscal year 2025, net cash used in investing activities of RMB185,415 million (US\$25,551 million) primarily reflected an increase in other treasury investments by RMB126,041 million (US\$17,369 million) and capital expenditures of RMB85,972 million (US\$11,847 million), partly offset by a decrease in short-term investments by RMB23,395 million (US\$3,224 million).

Net cash used in financing activities

During fiscal year 2025, net cash used in financing activities of RMB76,215 million (US\$10,502 million) primarily reflected cash used in repurchase of ordinary shares of RMB86,662 million (US\$11,942 million), dividend payment of RMB29,077 million (US\$4,007 million) and acquisition of additional equity interests in non-wholly owned subsidiaries of RMB21,949 million (US\$3,025 million), partly offset by net proceeds from the issuance of unsecured and convertible senior notes and the payments for capped call transactions of RMB67,032 million (US\$9,237 million).

Employees

As of March 31, 2025, we had a total of 124,320 employees, compared to 204,891 as of March 31, 2024. The decrease in number of employees was mainly the result of sale and deconsolidation of Sun Art, partly offset by new hires.

SAFE HARBOR STATEMENTS

This announcement contains forward-looking statements. These statements are made under the “safe harbor” provisions of the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by terminology such as “may,” “will,” “expect,” “anticipate,” “future,” “aim,” “estimate,” “intend,” “seek,” “plan,” “believe,” “potential,” “continue,” “ongoing,” “target,” “guidance,” “is/are likely to” and similar statements. In addition, statements that are not historical facts, including statements about Alibaba Group’s new organizational and governance structure, Alibaba’s strategies and business and operational plans, Alibaba’s beliefs, expectations and guidance regarding the growth of its business, its financial results, return on investments, strategic investments and dispositions and share repurchases, and the business outlook and quotations from management in this announcement, are or contain forward-looking statements. Forward-looking statements involve inherent risks and uncertainties. A number of factors could cause actual results to differ materially from those contained in any forward-looking statement, including but not limited to: the implementation of Alibaba Group’s new organizational and governance structure; Alibaba’s ability to compete, innovate and maintain or grow its business; risks associated with sustained investments in Alibaba’s businesses; risks related to strategic transactions; fluctuations in general economic and business conditions in China and globally; uncertainties arising from competition among countries and geopolitical tensions, including national trade, investment, protectionist or other policies and export control, economic or trade sanctions; changes to our shareholder return initiatives; and assumptions underlying or related to any of the foregoing. NON-GAAP FINANCIAL MEASURES

To supplement our consolidated financial statements, which are prepared and presented in accordance with GAAP, we use the following non-GAAP financial measures: for our consolidated results, adjusted EBITDA (including adjusted EBITDA margin), adjusted EBITA (including adjusted EBITA margin), non-GAAP net income, non-GAAP diluted earnings per share/ADS and free cash flow. For more information on these non-GAAP financial measures, please refer to the table captioned “Reconciliations of Non-GAAP Measures to the Nearest Comparable U.S. GAAP Measures” in this results announcement.

We believe that adjusted EBITDA, adjusted EBITA, non-GAAP net income and non-GAAP diluted earnings per share/ADS help identify underlying trends in our business that could otherwise be distorted by the effect of certain income or expenses that we include in income from operations, net income and diluted earnings per share/ADS. We believe that these non-GAAP measures provide useful information about our core operating results, enhance the overall understanding of our past performance and future prospects and allow for greater visibility with respect to key metrics used by our management in its financial and operational decision-making. We present three different income measures, namely adjusted EBITDA, adjusted EBITA and non-GAAP net income in order to provide more information and greater transparency to investors about our operating results.

We consider free cash flow to be a liquidity measure that provides useful information to management and investors about the amount of cash generated by our business that can be used for strategic corporate transactions, including investing in our new business initiatives, making strategic investments and acquisitions and strengthening our balance sheet.

Adjusted EBITDA, adjusted EBITA, non-GAAP net income, non-GAAP diluted earnings per share/ADS and free cash flow should not be considered in isolation or construed as an alternative to income from operations, net income, diluted earnings per share/ADS, cash flows or any other measure of performance or

as an indicator of our operating performance. These non-GAAP financial measures presented here do not have standardized meanings prescribed by U.S. GAAP and may not be comparable to similarly titled measures presented by other companies. Other companies may calculate similarly titled measures differently, limiting their usefulness as comparative measures to our data.

Adjusted EBITDA represents net income before interest and investment income, net, interest expense, other income (expense), net, income tax expenses, share of results of equity method investees, certain non-cash expenses, consisting of share-based compensation expense, amortization and impairment of intangible assets, impairment of goodwill, depreciation and impairment of property and equipment, and operating lease cost relating to land use rights, and others (including provision in relation to matters outside the ordinary course of business), which we do not believe are reflective of our core operating performance during the periods presented.

Adjusted EBITA represents net income before interest and investment income, net, interest expense, other income (expense), net, income tax expenses, share of results of equity method investees, certain non-cash expenses, consisting of share-based compensation expense, amortization and impairment of intangible assets, impairment of goodwill, and others (including provision in relation to matters outside the ordinary course of business), which we do not believe are reflective of our core operating performance during the periods presented.

Non-GAAP net income represents net income before non-cash share-based compensation expense, amortization and impairment of intangible assets, gain or loss on deemed disposals/disposals/revaluation of investments, impairment of goodwill and investments, and others (including provision in relation to matters outside the ordinary course of business), and adjustments for the tax effects.

Non-GAAP diluted earnings per share represents non-GAAP net income attributable to ordinary shareholders divided by the weighted average number of outstanding ordinary shares for computing non-GAAP diluted earnings per share on a diluted basis. **Non-GAAP diluted earnings per ADS** represents non-GAAP diluted earnings per share after adjusting for the ordinary share-to-ADS ratio.

Free cash flow represents net cash provided by operating activities as presented in our consolidated cash flow statement less purchases of property and equipment (excluding acquisition of land use rights and construction in progress relating to office campuses) and intangible assets (excluding those acquired through acquisitions), as well as adjustments to exclude from net cash provided by operating activities the buyer protection fund deposits from merchants on our marketplaces. We deduct certain items of cash flows from investing activities in order to provide greater transparency into cash flow from our revenue-generating business operations. We exclude “acquisition of land use rights and construction in progress relating to office campuses” because the office campuses are used by us for corporate and administrative purposes and are not directly related to our revenue-generating business operations. We also exclude buyer protection fund deposits from merchants on our marketplaces because these deposits are restricted for the purpose of compensating buyers for claims against merchants.

The table captioned “Reconciliations of Non-GAAP Measures to the Nearest Comparable U.S. GAAP Measures” in this results announcement has more details on the non-GAAP financial measures that are most directly comparable to GAAP financial measures and the related reconciliations between these financial measures.

LIQUIDITY AND CAPITAL RESOURCES

We fund our operations and strategic investments from cash generated from our operations and through debt and equity financing. We generated RMB182,593 million and RMB163,509 million of cash from operating activities for the year ended March 31, 2024 and 2025, respectively. As of March 31, 2025, we had cash and cash equivalents, short-term investments and other treasury investments of RMB597,132 million that are unrestricted for withdrawal and use. Short-term investments include investments in fixed deposits with original maturities between three months and one year and certain investments in wealth management products, certificates of deposit, marketable debt securities and other investments whereby we have the intention to redeem within one year. Other treasury investments mainly include investments in fixed deposits, certificates of deposit and marketable debt securities with original maturities over one year for treasury purposes. The remaining maturities of these treasury investments held by us generally range from one to five years.

We believe that our current levels of cash and cash flows from operations will be sufficient to meet our anticipated cash needs for at least the next twelve months. However, we may need additional cash resources in the future if we find and wish to pursue opportunities for investment, acquisition, strategic cooperation or other similar actions, which may include investing in technology, infrastructure, including data management and analytics solutions, or related talent. If we determine that our cash requirements exceed our amounts of cash on hand or if we decide to further optimize our capital structure, we may seek to issue additional debt or equity securities or obtain credit facilities or other sources of funding.

In May 2024, we issued convertible unsecured fixed rate senior notes for an aggregate principal amount of US\$5.0 billion due on June 1, 2031. The convertible senior notes are senior unsecured obligations, and interest at an annual rate of 0.5% is payable in arrears semiannually.

In November 2024, we issued unsecured fixed rate senior notes with varying maturities, consisting of U.S. dollar-denominated notes for an aggregate principal amount of US\$2.65 billion and RMB-denominated notes for an aggregate principal amount of RMB17 billion. The senior notes are senior unsecured obligations, and interest is payable in arrears semiannually.

We monitor the Group's financial health and liquidity position by reviewing its total debts to Adjusted EBITDA ratio, calculated by dividing bank borrowings, unsecured senior notes and convertible unsecured senior notes by Adjusted EBITDA for the last twelve months. The Group's total debts to Adjusted EBITDA ratio was 0.89 and 1.14 as at March 31, 2024 and 2025, respectively.

SIGNIFICANT INVESTMENTS

Our significant investment consists of Ant Group. Ant Group provides comprehensive digital payment services and facilitates digital financial and value-added services for consumers and merchants in China and across the world. As of March 31, 2025, our equity interest in Ant Group on a fully diluted basis was 33%. During the year ended March 31, 2025, dividend received from Ant Group amounted to RMB2,630 million.

We did not hold any other significant investments as of March 31, 2025.

MATERIAL ACQUISITIONS AND DISPOSALS

Our material acquisitions and disposals of subsidiaries, associates and joint ventures in the year ended March 31, 2025 are set forth below.

In December 2024, we entered into the sale and purchase agreement with an independent purchaser, pursuant to which, among other things, the purchaser has conditionally agreed to purchase all of the equity interest in Sun Art held by the Group, representing approximately 73.66% of the total number of the ordinary shares of Sun Art in issue. Pursuant to the sale and purchase agreement, the Group was entitled to

receive approximately HKD9,698 million (RMB9,054 million), which comprised of cash considerations and deferred cash considerations. The sale of Sun Art was completed as of March 31, 2025.

In December 2024, we together with another minority shareholder agreed to sell 100% of the equity interest in Intime to a consortium of purchasers. The Group held approximately 99% of the equity interest in Intime. The cash consideration to the Group from the sale of Intime is approximately RMB7.4 billion. The sale of Intime was substantially completed as of March 31, 2025.

As at the date of this results announcement, the Group did not have detailed future plans for material investments.

PLEDGE OF ASSETS

Certain of the Group's bank borrowings are collateralized by a pledge of certain buildings and property improvements, construction in progress and land use rights in the PRC, receivables and other treasury investments with carrying values of RMB34,056 million and RMB30,213 million, as of March 31, 2024 and 2025, respectively. In addition, certain of the Group's payables are collateralized by a pledge of certain short-term investments and other treasury investments with carrying values of nil and RMB3,697 million as of March 31, 2024 and 2025, respectively.

FOREIGN EXCHANGE RISK

Foreign currency risk arises from future commercial transactions, recognized assets and liabilities and net investments in foreign operations. Although we operate businesses in different countries and regions, most of our revenue-generating transactions, and a majority of our expense-related transactions, are denominated in Renminbi, which is the functional currency of our major operating subsidiaries and the reporting currency of our financial statements. When considered appropriate, we enter into hedging activities with regard to exchange rate risk.

The value of the Renminbi against the U.S. dollar and other currencies may fluctuate and is affected by, among other things, changes in political and economic conditions and the foreign exchange policy adopted by the governments. It is difficult to predict how market forces or PRC or U.S. government policy may impact the exchange rate between the Renminbi and the U.S. dollar in the future.

To the extent that we need to convert U.S. dollars into Renminbi for our operations, appreciation of the Renminbi against the U.S. dollar would reduce the Renminbi amount we receive from the conversion. Conversely, if we decide to convert Renminbi into U.S. dollars for the purpose of making payments for dividends on our ordinary shares or ADSs, servicing our outstanding debts, or for other business purposes, appreciation of the U.S. dollar against the Renminbi would reduce the U.S. dollar amounts available to us.
