## **REASONS FOR THE PLACING AND USE OF THE PROCEEDS FROM THE PLACING**

Upon the completion of the Placing, the proceeds raised will further enhance the Group's financial strength, market competitiveness and comprehensive strength, and promote the long-term healthy and sustainable development of the Group.

Assuming all the Placing Shares are fully placed, the gross proceeds and net proceeds (after deducting the commission and estimated expenses) from the Placing are expected to be HK\$550.152 million and approximately HK\$543.55 million, respectively. On such basis, the net issue price will be approximately HK\$40.01 per Placing Share.

The net proceeds from the Placing are proposed to be used for the following purposes:

- (1) Approximately 50% of the proceeds will be used to support the Group's product upgrade and iteration, and to expand technical R&D for new product applications to enhance product competitiveness and increase the penetration rate of GaN products in end markets;
  - (a) The low and high-voltage product platforms will complete two iterations within the next 2 to 3 years to further improve product performance and enhance power density. Meanwhile, we will continue to achieve breakthroughs in specialized processes and products such as bi-directional blocking capability (VGaN), low-voltage and high-frequency applications, and 1200V and above high-voltage products to enhance our product competitiveness. We will also collaborate with packaging manufacturers to develop new packaging forms to better leverage the performance advantages of GaN power device products;
  - (b) Building on our advantages in consumer electronics applications, we plan to expand the applications of GaN power device products in fields such as humanoid robots, automotive electronics, and data centers through technical R&D and product design. These application areas are key fields for GaN power devices to leverage their product advantages and achieve business growth. Given their long product development and validation cycles and significant investment required, the Company plans to further raise the proceeds and focuses such proceeds on the above areas to accelerate breakthroughs in technology and product applications, providing strong assurance for the market expansion and rapid business growth of GaN power devices.
- (2) Approximately 25% of the proceeds will be used for repayment of existing interest-bearing bank borrowings;

Repayment of interest-bearing borrowings will improve the Company's financial position, reduce its interest-bearing debt ratio, and reduce financial expenses.

- (3) Approximately 25% of the proceeds will be used for liquidity and general operation purposes.

In terms of replenishing liquidity and for general corporate operational purposes, the Company plans to continue to use the proceeds for talent recruitment and retention, working capital and other administrative purposes to support its business operations.

In view of the above, the Directors consider that the terms of the Placing Agreement (including but not limited to the Placing Price and the Placing commission payable to the Placing Agents) are fair and reasonable and the Placing is in the interests of the Company and its Shareholders as a whole.
