**Note:**

**1. General information**

Dah Sing Banking Group Limited is a bank holding company. Its principal subsidiary is Dah Sing Bank, Limited (“DSB”), which is a licensed bank in Hong Kong. The Company together with its subsidiaries (collectively the “Group”) provide banking, financial and other related services.

The immediate and ultimate holding company is Dah Sing Financial Holdings Limited, a listed company in Hong Kong.

**2. Unaudited financial statements and accounting policies**

The information set out in this interim results announcement does not constitute statutory consolidated financial statements.

Certain financial information in this interim results announcement is extracted from the statutory consolidated financial statements for the year ended 31 December 2024 (the “2024 consolidated financial statements”) which have been delivered to the Registrar of Companies as required by section 662(3) of, and Part 3 of Schedule 6 to, the Hong Kong Companies Ordinance (Cap.622), and the Hong Kong Monetary Authority (“HKMA”).

The auditor’s report on the 2024 consolidated financial statements was unqualified; did not include a reference to any matters to which the auditor drew attention by way of emphasis without qualifying its report; and did not contain a statement under section 406(2), 407(2) or (3) of the Hong Kong Companies Ordinance (Cap.622).

**Basis of preparation and accounting policies**

Except as described below, the accounting policies and methods of computation used in the preparation of the 2025 interim condensed consolidated financial statements are consistent with those used and described in the Group’s annual audited consolidated financial statements for the year ended 31 December 2024.

**(a) New and amended standards adopted by the Group**

The following amendments to accounting standards and Hong Kong Financial Reporting Standards (hereinafter collectively referred to as “HKFRS”) that became applicable for annual reporting periods commencing on or after 1 January 2025:

- **Amendments to HKAS 21 – Lack of Exchangeability**

The above amendments require the reporting entity to assess whether or not a currency is exchangeable into another currency, and to estimate the spot exchange rate and to disclose when it concludes that a currency is not exchangeable into another currency. These amendments have no significant effect on the consolidated financial statements of the Group.

**2. Unaudited financial statements and accounting policies (Continued)**

**Basis of preparation and accounting policies (Continued)**

- (b) New and amended standards and interpretations not yet adopted

Certain amendments to accounting standards and interpretations have been published that are not yet effective from 1 January 2025 and have not been early adopted by the Group:

- (i) Amendments to the Classification and Measurement of Financial Instruments – Amendments to HKFRS 9 and HKFRS 7 (effective for annual periods beginning on or after 1 January 2026)

The Hong Kong Institute of Certified Public Accountants issued amendments to HKFRS 9 and HKFRS 7 to provide guidance as to when certain financial liabilities can be deemed settled when using an electronic payment system, and the amendments also provide further clarifications regarding the classification of financial assets that contain contractual terms that change the timing and amount of contractual cash flows, including those arising from environmental, social and governance-related contingencies, and financial assets with certain non-recourse features.

The Group does not expect these amendments to have a material impact on its operations or financial statements.

- (ii) HKFRS 18 Presentation and Disclosure in Financial Statements (effective for annual periods beginning on or after 1 January 2027)

HKFRS 18 will replace HKAS 1 Presentation of financial statements, introducing new requirements that will help achieve comparability of the financial performance of similar entities and provide more relevant information and transparency to users. Its impacts on presentation and disclosure are expected to be pervasive, in particular those related to the statement of financial performance and providing, management-defined performance measures within the financial statements.

Management is currently assessing the detailed implications of applying the new standard in the Group's consolidated financial statements.

There are no other HKFRSs or interpretations that are effective from 1 January 2025 or not yet effective that would be expected to have a material impact on the Group.

The interim condensed consolidated financial statements are presented in thousands of Hong Kong dollars (HK\$'000), unless otherwise stated, and were approved by the Board of Directors for issue on 20 August 2025.

These interim condensed consolidated financial statements have not been audited.

**9. Share of results of an associate, and impairment loss on investment in an associate**

Share of results of an associate

As at the date of this announcement, the results of the Group's associate, Bank of Chongqing ("BOCQ"), for the six months ended 30 June 2025 are not yet publicly available. The Group has determined its share of results of BOCQ for the first half of 2025 by reference to the results published by BOCQ in particular those attributable to the first quarter of 2025 ended 31 March 2025, and taking into account the financial effect of significant transactions or events in the period from 1 April 2025 to 30 June 2025 which BOCQ had made known to the public.

Impairment loss on investment in an associate

The Group assesses at the end of each reporting period whether there is any indication that the investment in BOCQ may be impaired.

At 30 June 2025 and 31 December 2024, the fair value of the Group's investment in BOCQ was higher than the carrying value. As there was no change in service potential of the investment, there was no assessment of impairment or its reversal.

At 30 June 2024, the fair value was below the carrying value. An impairment assessment was performed and the carrying value was written down to the fair value less costs of disposal and recorded an impairment charge of HK\$16 million. The fair value of the investment as at 30 June 2024 was calculated with reference to the closing market price of BOCQ's H-shares as at 30 June 2024, which was measured at the Level 1 inputs of the fair value hierarchy.

The calculation of DSB's capital adequacy does not include the retained earnings from this investment (the "Investment"), except for BOCQ cash dividend received by DSB. Provided that the Investment continues to be held at or above the original cost of the investment of HK\$1,213 million, impairment made on the Investment does not affect DSB's capital adequacy.

## 10. Taxation

Hong Kong profits tax has been provided at the rate of 16.5% (2024: 16.5%) on the estimated assessable profit for the period. Taxation on profits in Mainland China and Macau has been calculated on the estimated assessable profit for the period at the rates of taxation prevailing in the countries in which the Group operates.

Deferred taxation is calculated in full on temporary differences under the liability method at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised.

For the six months ended 30 June

HK\$'000	2025	2024
Current income tax		
- Hong Kong profits tax	244,732	154,065
- Mainland China's and Macau's taxation	991	18,968

## 11. Basic and diluted earnings per share

The calculation of basic earnings per share for the six months ended 30 June 2025 is based on earnings of HK\$1,578,850,000 (2023: HK\$1,396,074,000) and the weighted average number of 1,405,752,132 (2024: 1,405,752,132) ordinary shares in issue during the period.

The calculation of diluted earnings per share for the six months ended 30 June 2025 is based on earnings of HK\$1,578,850,000 (2024: HK\$1,396,074,000) and deducting from it the dilutive effect of our share of profits in an associate amounting to HK\$103,624,000 (2024: HK\$88,053,000) and the weighted average number of 1,405,752,132 (2024: 1,405,752,132) ordinary shares in issue during the period after adjusting for the effect of all dilutive potential ordinary shares. The share options outstanding during the period and at the period end have no dilutive effect on the weighted average number of ordinary shares.

	2025	2024
Profit attributable to shareholders (HK\$'000)	1,578,850	1,396,074

DSB as a locally incorporated bank in Hong Kong is required to maintain minimum impairment provisions in excess of those required under HKFRS in the form of regulatory reserve. The regulatory reserve, which also covers Banco Comercial de Macau, S.A. ("BCM") and Dah Sing Bank (China) Limited ("DSB China"), is maintained to satisfy the provisions of the Hong Kong Banking Ordinance and local regulatory requirements for prudential supervision purposes. The regulatory reserve restricts the amount of reserves which can be distributed to shareholders. Movements in the regulatory reserve are made directly through equity reserve and in consultation with the HKMA.

As at 30 June 2025, DSB has earmarked a regulatory reserve of HK\$455,380,000 (31 December 2024: HK\$544,500,000) first against its consolidated general reserve; and for any excess amount, the balance is earmarked against its consolidated retained earnings.

## 19. Contingent liabilities and commitments

### (a) Capital commitments

The table above shows assets where a charge has been granted to secure liabilities on a legal and contractual basis. These transactions are conducted under terms that are usual and customary to collateralised transactions including repurchase agreements and include assets pledged to cover short positions and to facilitate settlement processes with clearing houses.

**19. Contingent liabilities and commitments (Continued)**

(d) Operating lease commitments

Where a Group company is the lessor, the future minimum lease payments receivable under non-cancellable building operating leases are as follows:

HK\$'000	As at 30 Jun 2025	As at 31 Dec 2024
Within 1 year	12,673	14,747
Between 1 and 2 years	6,113	5,193

Between 4 and 5 years	1,479	1,431
Later than 5 years	5,671	6,201
	<b>30,483</b>	<b>31,884</b>

In addition, the Group has, as a lessee, entered into a number of leases that have not yet commenced. There are no aggregate lease payments payable under these leases as at 30 June 2025 (31 December 2024: HK\$5,400,000).

**20. Operating segment reporting**

Segment reporting by the Group is prepared in accordance with HKFRS 8 “Operating Segments”. Information reported to the chief operating decision maker, including the Chief Executive and other Executive Committee members, for the purposes of resource allocation and performance assessment, is determined on the basis of personal banking, corporate banking, treasury and global markets and banking businesses in Mainland China and Macau. Operating performances are analysed by business activities for local banking business, and on business entity basis for banking businesses in Mainland China and Macau.

Considering the customer groups, products and services of local businesses, the economic environment and regulations, the Group splits the operating segments of the Group into the following reportable segments:

- Personal banking business includes the acceptance of deposits from individual customers and the extension of residential mortgage lending, personal loans, overdraft, vehicle financing and credit card services, and the provision of insurance sales and investment services.
- Corporate banking business includes the acceptance of deposits from and the advance of loans and working capital finance to commercial, industrial and institutional customers, and the provision of trade financing.
- Treasury and global markets activities are mainly the provision of foreign exchange services and centralised cash management for deposit taking and lending, interest rate risk management, management of investment in securities and the overall funding of the Group.
- Mainland China and Macau banking businesses include personal banking, corporate banking business activities provided by subsidiaries in Mainland China and Macau, and the Group’s interest in a commercial bank in Mainland China.
- Others include results of operations not directly identified under other reportable segments, corporate investments and debt funding (including subordinated notes).

For the purpose of segment reporting, revenue derived from customers, products and services directly identifiable with individual segments are reported directly under respective segments, while revenue and funding cost arising from inter-segment funding operation and funding resources are allocated to segments by way of transfer pricing mechanism with reference to market interest rates. Transactions within segments are priced based on similar terms offered to or transacted with external parties. Inter-segment income or expenses are eliminated on consolidation.

All direct costs incurred by different segments are grouped under respective segments. Indirect costs and support functions’ costs are allocated to various segments and products based on effort and time spent as well as segments’ operating income depending on the nature of costs incurred. Costs related to corporate activities that cannot be reasonably allocated to segments, products and support functions are grouped under Others as unallocated corporate expenses.

### (c) Analysis of gross loans and advances to customers and overdue loans by geographical area

Loans and advances to customers by geographical area are classified according to the location of the counterparties after taking into account the transfer of risk. In general, risk transfer applies when an advance is guaranteed by a party located in an area which is different from that of the counterparty.

The following table analyses gross loans and advances to customers, impaired loans and advances to customers (Stage 3), overdue loans and advances to customers, Stage 3, and Stage 1 and Stage 2 impairment allowances by geographical area.

#### As at 30 June 2025

### (d) International claims

The information of international claims discloses exposures to foreign counterparties on which the ultimate risk lies, and is derived according to the location of the counterparties after taking into account any transfer of risk. In general, transfer of risk from one country to another is recognised if the claims against a counterparty are guaranteed by another party in a different country or if the claims are on an overseas branch of a bank whose head office is located in a different country. Only regions constituting 10% or more of the aggregate international claims after taking into account any recognised risk transfer are disclosed.

## **CORPORATE AND BUSINESS OVERVIEW**

### **HIGHLIGHTS**

Hong Kong's economic performance in the first half of 2025 continued to be positive despite multiple external challenges, including the uncertain interest rate outlook, a prolonged weak property market, and worsened geopolitical tensions. Real GDP in the second quarter grew by 3.1% over a year earlier, picking up from 3.0% in the previous quarter.

The banking sector faced a mixed operating environment in the period. The prime rate remained elevated, while the one-month Hong Kong Interbank Offered Rate (“HIBOR”) fell to a three-year low in June, following the HKMA’s injection of HKD liquidity in May after the Hong Kong dollar rose to the strong end of the peg range.

Banks in Hong Kong continued to closely monitor and manage credit risks in the domestic real estate sector, particularly relating to commercial property developers and investors. Further decline in rental rates and elevated vacancy rates of commercial properties reflected an oversupply in the market. Although the lower HIBOR provided some relief to borrowers in general, commercial property borrowers remained under pressure.

The Group managed credit related risks prudently and ensured appropriate provisioning in the current market conditions. Backed by sufficient collateral, overall asset quality remained manageable, with the impaired loan ratio improving slightly to 3.12% as at 30 June this year, compared to 3.21% as at the end of 2024. At the same time, the Group intensified efforts to control funding cost with respectable growth in current account and savings account deposits, which helped maintain a respectable net interest margin (“NIM”). Having built stronger capabilities in wealth management and treasury products and solutions over the years, the Group was able to meet strong demand from different customer segments, including satisfying diverse needs of personal customers in various life stages.

We reported a solid performance driven by higher NIM, and strong fees and trading income, which was partly offset by higher operating expenses and credit impairment charges. We reported a 13% rise in profit attributable to shareholders to approximately HK\$1.6 billion with a positive profit contribution from Bank of Chongqing of HK\$443 million.

### **BUSINESS AND FINANCIAL REVIEW**

Our interim results in 2025 demonstrated a solid performance. Net interest income grew by 9% year on year for the six months ended 30 June mainly as our funding costs decreased at a faster pace than asset yields amidst the downward pressure on HIBOR starting from May this year. This growth was supported by a 23 basis points’ expansion in NIM to 2.32% as compared to the same period last year, reflecting our disciplined funding cost management. The loan-to-deposit ratio increased slightly to 67.8% from 67.2% at the end of 2024, consistent with our mild loan growth and disciplined deposit cost management. Non-interest income increased strongly by 36%, including a 20% growth in net fee and commission income and a 102% rise in the aggregate of net trading income and other operating income.

Operating expenses increased by 7% mainly due to higher IT expenses and staff costs, including performance related compensation, whilst the Group achieved a higher profitability with increase in total operating income which more than compensated for the rise in operating expenses, and strived to remain disciplined in overall cost control. The cost-to-income ratio improved to 45.0%, compared to 48.5% in the same period last year. Additionally, credit impairment charges rose by 34% year on year, predominantly reflecting prudent provisioning for Hong Kong commercial real estate exposures and other corporate loans. Sequentially, credit impairment charges reduced by 42% compared with the second half of 2024. Having written down exposures to the Mainland China property sector in 2024 and prior years, the Group did not experience much impact from the residual credit exposures in this sector.

The Personal Banking business registered a solid performance, with operating income advancing by 13% and operating profit after impairment growing 26% year on year. The performance was mainly driven by a strong growth in wealth management income and bancassurance income. On the other hand, the Corporate Banking business reported a decline in operating income, primarily due to weakness in customer loan demand which was partly offset by a slight increase in non-interest income. The operating profit after impairment of this business fell by 55%, resulting from a lower revenue and higher credit impairment charges.

## **BUSINESS AND FINANCIAL REVIEW (CONTINUED)**

The Treasury and Global Markets business achieved a 66% increase in operating profit after impairment, benefiting from improved investment sentiment as well as increased customer needs/ business opportunities in times of market volatility. During the period, the segment saw higher positive fair value changes on securities and derivatives for trading, together with lower funding swap expenses and higher marketing and sales income. The businesses of Mainland China and Macau Banking reported a lower profit largely due to lower operating income and higher credit impairment charges. The Group continued to maintain a robust liquidity position and healthy cash flow against a challenging business environment.

Our consolidated profit for the first half of 2025 represented an annualised return on average total assets of 1.2% and an annualised return on average shareholders' funds of 9.2%, compared to 1.1% and 8.5% respectively in the same period last year. As at 30 June 2025, our consolidated Common Equity Tier 1 ratio and total consolidated capital adequacy ratio were 18.2% and 22.5% respectively, and our liquidity maintenance ratio was at 60.7%. DSB's capital and liquidity positions remained robust.

## **PROSPECTS**

The recent imposition of US tariffs on various countries has significantly heightened global market uncertainty. Uncertainties surrounding US interest rate policies also pose ongoing challenges for banks.

Shifting domestic consumption patterns, largely due to e-commerce and northbound spending, have led to a more challenging operating environment for small businesses. The HKMA has introduced relevant measures and banks in Hong Kong have generally been proactive to support SMEs through the current challenges. The Hong Kong Government has also enhanced the existing New Capital Investment Entrant Scheme since March 2025, aiming to attract more asset owners to explore their diverse investment opportunities, thereby boosting private banking and wealth management businesses.

Furthermore, Hong Kong saw a rebound in overall investment and Initial Public Offering activities during recent months, reflective of the improved investment sentiment and investor confidence. The World Competitiveness Yearbook 2025, published in June, ranked Hong Kong among the world's top three most competitive economies, marking its return to the top tier after 2019. The performance of the Hong Kong economy in 2025 reaffirms the need for adaptability and resilience in order for Hong Kong to sustain its competitiveness given the complex macro and geopolitical situation.

Looking ahead, Hong Kong's banking sector remains profitable and well-capitalised, while the Hong Kong economy evolves with changing times. Amidst external challenges and economic uncertainties, elevated credit costs are expected to persist through 2025 and business outlook is not expected to be materially different in the remaining months of the year. The Group will continue to run its businesses and operations by focusing on customer centricity, risk management and other key tenets of our Group's business model.
