Hong Kong Exchanges and Clearing Limited, The Stock Exchange of Hong Kong Limited and Hong Kong Securities Clearing Company Limited take no responsibility for the contents of this prospectus, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this prospectus.

A copy of this prospectus, having attached thereto the documents specified in "Documents Delivered to the Registrar of Companies and Available on Display" in Appendix VII to this prospectus, has been registered by the Registrar of Companies in Hong Kong as required by Section 342C of the Companies (Winding up and Miscellaneous Provisions) Ordinance, Chapter 32 of the Laws of Hong Kong. The Securities and Futures Commission of Hong Kong and the Registrar of Companies in Hong Kong take no responsibility as to the contents of this prospectus or any other documents referred to above.

The Offer Price is expected to be determined by agreement between the Overall Coordinators (for themselves and on behalf of the Underwriters) and us on the Price Determination Date. The Price Determination Date is expected to be on or before Thursday, December 18, 2025 (Hong Kong time) and, in any event, not later than 12:00 noon on Thursday, December 18, 2025 (Hong Kong time). The Offer Price will not be more than HK\$16.00 and is currently expected to be not less than HK\$12.00 per Offer Share. If, for any reason, the Offer Price is not agreed between the Overall Coordinators (for themselves and on behalf of the Underwriters) and us by 12:00 noon on Thursday, December 18, 2025 (Hong Kong time), the Global Offering will not proceed and will lapse.

The Overall Coordinators (for themselves and on behalf of the Underwriters) may, with our consent, reduce the number of Offer Shares and/or the indicative Offer Price range that is stated in this prospectus at any time on or prior to the morning of the last day for lodging applications under the Hong Kong Public Offering. See "Structure of the Global Offering" and "How to Apply for Hong Kong Offer Shares" for further details.

The obligations of the Hong Kong Underwriters under the Hong Kong Underwriting Agreement are subject to termination by the Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters) if certain grounds arise prior to 8:00 a.m. on the Listing Date. See "Underwriting – Underwriting Arrangements and Expenses – Hong Kong Public Offering – Grounds for Termination" for further details.

The Offer Shares have not been and will not be registered under the U.S. Securities Act or any state securities law in the United States and may be offered and sold only outside the United States in offshore transactions in accordance with Regulation S under the U.S. Securities Act.

December 12, 2025

IMPORTANT

IMPORTANT NOTICE TO INVESTORS: FULLY ELECTRONIC APPLICATION PROCESS

We have adopted a fully electronic application process for the Hong Kong Public Offering. We will not provide printed copies of this prospectus to the public.

This prospectus is available at the website of the Stock Exchange at www.hkexnews.hk under the “*HKEXnews > New Listings > New Listing Information*” section, and our website at www.nanhua.net. If you require a printed copy of this prospectus, you may download and print from the website addresses above.

To apply for the Hong Kong Offer Shares, you may:

- (a) apply online through the **White Form eIPO** service at www.eipo.com.hk; or
- (b) apply electronically through the **HKSCC EIPO** channel and cause HKSCC Nominees to apply on your behalf by instructing your **broker** or **custodian** who is a HKSCC Participant to give **electronic application instructions** via HKSCC’s FINI system to apply for the Hong Kong Offer Shares on your behalf.

We will not provide any physical channels to accept any application for the Hong Kong Offer Shares by the public. The contents of the electronic version of this prospectus are identical to the printed prospectus as registered with the Registrar of Companies in Hong Kong pursuant to Section 342C of the Companies (Winding Up and Miscellaneous Provisions) Ordinance.

If you are an **intermediary, broker or agent**, please remind your customers, clients or principals, as applicable, that this prospectus is available online at the website addresses stated above.

See “*How to Apply for Hong Kong Offer Shares*” for further details of the procedures through which you can apply for the Hong Kong Offer Shares electronically.

IMPORTANT

Your application through the **White Form eIPO** service or the **HKSCC EIPO** channel must be for a minimum of 500 Hong Kong Offer Shares and in multiples of that number of Hong Kong Offer Shares as set out in the table below. No application for any other number of Hong Kong Offer Shares will be considered and such an application is liable to be rejected.

If you are applying through the **White Form eIPO** service, you may refer to the table below for the amount payable for the number of Shares you have selected. You must pay the respective amount payable on application in full upon application for Hong Kong Offer Shares.

If you are applying through the **HKSCC EIPO** channel, your broker or custodian may require you to pre-fund your application in such amount as determined by the broker or custodian, based on the applicable laws and regulations in Hong Kong. You are responsible for complying with any such pre-funding requirement imposed by your broker or custodian with respect to the Hong Kong Offer Shares you applied for.

6,000	96,968.15	45,000	727,261.20	600,000	9,696,816.00		

(1) Maximum number of Hong Kong Offer Share you may apply for.

(2) The amount payable is inclusive of brokerage, SFC transaction levy, the Stock Exchange trading fee and AFRC transaction levy. If your application is successful, brokerage will be paid to the Exchange Participants (as defined in the Listing Rules) and the SFC transaction levy, the Stock Exchange trading fee and AFRC transaction levy are paid to the Stock Exchange (in the case of the SFC transaction levy, collected by the Stock Exchange on behalf of the SFC; and in the case of the AFRC transaction levy, collected by the Stock Exchange on behalf of the AFRC).

EXPECTED TIMETABLE

If there is any change in the following expected timetable of the Hong Kong Public Offering, we will issue an announcement to be published on the website of the Stock Exchange at www.hkexnews.hk and our Company's website at www.nanhua.net.

Date⁽¹⁾

Hong Kong Public Offering commences 9:00 a.m. on Friday, December 12, 2025

Latest time for completing electronic applications
under **White Form eIPO** service through
the designated website www.eipo.com.hk⁽²⁾ 11:30 a.m. on Wednesday, December 17, 2025

Application lists of
the Hong Kong Public Offering open⁽³⁾ 11:45 a.m. on Wednesday, December 17, 2025

Latest time for (a) completing payment of **White Form eIPO**
applications by effecting internet banking transfer(s) or
PPS payment transfer(s) and (b) giving
electronic application instructions to HKSCC⁽⁴⁾ 12:00 noon on Wednesday, December 17, 2025

If you are instructing your **broker** or **custodian** who is a HKSCC Participant to give **electronic application instructions** via HKSCC's FINI system to apply for the Hong Kong Offer Shares on your behalf, you are advised to contact your **broker** or **custodian** for the latest time for giving such instructions which may be different from the latest time as stated above.

Application lists of
the Hong Kong Public Offering close⁽³⁾ 12:00 noon on Wednesday, December 17, 2025

Expected Price Determination Date⁽⁵⁾ by 12:00 noon on Thursday, December 18, 2025

(1) Announcement of the Offer Price, the level of indications of interest in the International Offering, the level of applications in the Hong Kong Public Offering and basis of allocation of the Hong Kong Offer Shares under the Hong Kong Public Offering to be published on the website of the Stock Exchange at www.hkexnews.hk and our Company's website at www.nanhua.net⁽⁶⁾ no later than, 11:00 p.m. on Friday, December 19, 2025

(2) Results of allocations in the Hong Kong Public Offering (with successful applicants' identification document numbers, where appropriate) to be available through a variety of channels, including:

- in the announcement to be posted on our website and the website of the Stock Exchange at www.nanhua.net and www.hkexnews.hk, respectively no later than 11:00 p.m. on Friday, December 19, 2025

EXPECTED TIMETABLE

- from the designated results of allocations website at www.iporeresults.com.hk (alternatively: www.eipo.com.hk/eIPOAllotment) with a “search by ID” function from 11:00 p.m. on Friday, December 19, 2025 to 12:00 midnight on Thursday, December 25, 2025
- the allocation results telephone enquiry by calling +852 2862 8555 between 9:00 a.m. and 6:00 p.m. on Monday, December 22, 2025, Tuesday, December 23, 2025, Wednesday, December 24, 2025 and Monday, December 29, 2025

H Share certificates in respect of wholly or partially successful applications pursuant to the Hong Kong Public Offering to be dispatched or deposited into CCASS on or before⁽⁷⁾⁽⁹⁾ Friday, December 19, 2025

White Form e-Refund payment instructions/refund checks in respect of (i) wholly or partially successful applications if the final Offer Price is less than the price payable on application (if applicable) and (ii) wholly or partially unsuccessful applications pursuant to the Hong Kong Public Offering to be dispatched/collected on or before⁽⁸⁾⁽⁹⁾ Monday, December 22, 2025

Dealings in the H Shares on the Stock Exchange expected to commence At 9:00 a.m. on Monday, December 22, 2025

Notes:

- (1) All dates and times refer to Hong Kong SAR local time, except as otherwise stated.
- (2) You will not be permitted to submit your application through the designated website at www.eipo.com.hk after 11:30 a.m. on the last day for lodging applications. If you have already submitted your application and obtained an application reference number from the designated website prior to 11:30 a.m., you will be permitted to continue the application process (by completing payment of application monies) until 12:00 noon on the last day of lodging applications, when the application lists close.
- (3) If there is a tropical cyclone warning signal number 8 or above, or a “black” rainstorm warning and/or Extreme Conditions in force in Hong Kong SAR at any time between 9:00 a.m. and 12:00 noon on Wednesday, December 17, 2025, the application lists will not open or close on that day. See “How to Apply for the Hong Kong Offer Shares – E. Severe Weather Arrangements”.
- (4) Applicants who apply for the Hong Kong Offer Shares by instructing their **broker** or **custodian** who is HKSCC Participant to give **electronic application instructions** to HKSCC through HKSCC’s FINI system should refer to the section headed “How to Apply for the Hong Kong Offer Shares – A. Application for Hong Kong Offer Shares – 2. Application Channels”.

EXPECTED TIMETABLE

- (5) The Price Determination Date is expected to be on or before Thursday, December 18, 2025, and, in any event, not later than 12:00 noon on Thursday, December 18, 2025. If, for any reason, the Offer Price is not agreed by 12:00 noon on Thursday, December 18, 2025 between us and the Overall Coordinators (for themselves and on behalf of the Underwriters), the Global Offering will not proceed and will lapse.
- (6) None of the websites or any of the information contained on the websites forms part of this prospectus.
- (7) H Share certificates for the Hong Kong Offer Shares are expected to be issued on Friday, December 19, 2025 but will only become valid evidence of title provided that the Global Offering has become unconditional in all respects, and neither of the Underwriting Agreements has been terminated in accordance with its terms, prior to 8:00 a.m. on the Listing Date, which is expected to be on or around Monday, December 22, 2025. Investors who trade H Shares on the basis of publicly available allocation details before the receipt of share certificates or before the share certificates becoming valid evidence of title do so entirely at their own risk.
- (8) **White Form** e-Refund payment instructions/refund checks will be issued in respect of wholly or partially unsuccessfully applications and in respect of successful applications if the Offer Price is less than the price payable on application. Part of your Hong Kong identity card number/passport number, or, if you are joint applicants, part of the Hong Kong identity card number/passport number of the first-named applicant, provided by you may be printed on your refund check, if any. Such data would also be transferred to a third party to facilitate your refund. Your banker may require verification of your Hong Kong identity card number/passport number before encashment of your refund check. Inaccurate completion of your Hong Kong identity card number/passport number may lead to delay in the encashment of your refund check or may invalidate your refund check. See “How to Apply for the Hong Kong Offer Shares”.
- (9) Applicants being individuals who are eligible for personal collection may not authorize any other person to collect on their behalf. Individuals must produce evidence of identity acceptable to our H Share Registrar at the time of collection.

Applicants who have applied for Hong Kong Offer Shares through **HKSCC EIPO** channel should refer to the section headed “How to Apply for the Hong Kong Offer Shares – D. Despatch/collection of H share certificates and refund of application monies” for details.

Applicants who have applied through the **White Form eIPO** service and paid their applications monies through single bank accounts may have refund monies (if any) dispatched to the bank account in the form of **White Form** e-Refund payment instructions. Applicants who have applied through the **White Form eIPO** service and paid their application monies through multiple bank accounts may have refund monies (if any) dispatched to the address as specified in their application instructions in the form of refund checks by ordinary post at their own risk.

Any uncollected H Share certificates and/or refund checks will be dispatched by ordinary post, at the applicants’ risk, to the addresses specified in the relevant applications.

See “How to Apply for the Hong Kong Offer Shares – D. Despatch/collection of H share certificates and refund of application monies” for further information.

The above expected timetable is a summary only. See “Structure of the Global Offering” and “How to Apply for the Hong Kong Offer Shares” for details of the structure of the Global Offering, including the conditions of the Global Offering, and the procedures for application for the Hong Kong Offer Shares.

If the Global Offering does not become unconditional or is terminated in accordance with its terms, the Global Offering will not proceed. In such case, the Company will make an announcement as soon as practicable thereafter.

SUMMARY

This summary aims to give you an overview of the information contained in this prospectus. As this is a summary, it does not contain all the information that may be important to you. Moreover, there are risks associated with any investment. Some of the particular risks of investing in the Offer Shares are set out in “Risk Factors.” You should read the entire prospectus carefully before you decide to invest in the Offer Shares. Various expressions used in this section are defined in “Definitions” and “Glossary of Technical Terms.”

OVERVIEW

We are a leading futures company in the PRC, providing global financial services to clients. According to the F&S Report, we ranked 8th among all futures companies in the PRC by total revenue in 2024, and 1st among all non-financial institution-related futures companies in the PRC by total revenue in 2024. The principal focus of our Group lies in the provision of futures and derivatives services, both within the PRC and in international markets. Leveraging our understanding of the needs of both Chinese and overseas clients developed through our decades of experience, coupled with our insights into global financial and derivatives markets, we offer comprehensive and customized derivatives and risk management services to industrial clients, financial institutions, and individual investors; and we also strive to offer more diverse wealth management services to investors both in China and abroad.

Founded in 1996 and headquartered in Hangzhou, China, we have, over the years, focused on business development, the application of technology, the delivery of professional services and the strengthening of internal controls. We began as a PRC futures brokerage service provider, and have since developed into a comprehensive, global financial services platform. Our offerings include PRC futures brokerage, PRC risk management service, PRC wealth management, and overseas financial services, covering the value chain of futures and derivatives.

We believe that futures and derivatives markets play a crucial role in the economy and financial system by facilitating price discovery, risk management, and resource allocation. These markets are intricately linked to enterprises, investors, and consumers, contributing to operational stability, commodity circulation, and the stabilization of supply and prices. The PRC government actively encourages the utilization of futures and derivatives markets to support the real economy by optimizing commodity futures for agriculture, manufacturing, and green development, enhancing financial futures to stabilize capital markets, and promoting international market expansion.

We have executed a diversification strategy encompassing various service types, cross-national coverage, and diverse asset classes. This strategy has culminated in forming a comprehensive financial services product network under a globalized framework. Specifically:

- **Global Network:** Since 2006, we have been one of the first PRC futures companies to implement an internationalization strategy. Leveraging our overseas branch network in major financial hubs, we extend our reach across Asia, North America, and Europe, delivering round-the-clock cross-market trading services. By integrating our PRC and overseas platforms, we manage to mitigate the impact of any single market on our operations.

SUMMARY

- **Diverse Business Mix:** We maintain a comprehensive and diversified business layout, covering the key value chains of the futures and derivatives markets. Our product mix covers a diverse range of asset classes, including futures and spot commodities (including agricultural, industrial, energy and chemical, and metals) as well as equity and fixed-income securities. From trade execution to risk management, and from wealth management to overseas financial services, we provide end-to-end coverage of these value chains, building a robust business framework.
- **Exchange-traded and OTC Products.** We integrate exchange-traded and OTC transactions to cater for diverse client needs, demonstrating our capability to consolidate and allocate a wide range of products, accurately identify market and client demands, and deliver professional, customized risk management services.
- **Mutual funds and Private Products.** We offer both mutual fund products and asset management services. By combining publicly and privately offered products under our wealth management umbrella, we strive to serve clients with varying risk appetites and investment needs.
- **Futures and Spot Products.** Our PRC risk management services business plays a pivotal role in supporting the real economy through its integrated spot and futures operations. We operate within the industrial value chain through our service offerings, helping enterprises manage market risks.
- **Online and Offline.** We offer seamless customer experience by integrating online platforms with our branch network. Clients benefit from personalized services at branches while enjoying convenient access to trading and support through our online channels.

We were among the first companies established in China's futures industry, contributing to its evolution from early stages to a mature market. Compared with overseas financial service providers, we enjoy strong trust among Chinese industrial and institutional clients in cross-border derivatives. The number of corporate registered clients of our PRC futures brokerage business increased steadily from 4,266 as of December 31, 2022 to 4,672 as of December 31, 2023, representing year-on-year growth of 9.5%. This further increased to 5,089 as of December 31, 2024, representing year-on-year growth of 8.9%, and to 5,279 in the six months ended June 30, 2025, representing a growth of 3.7%. The number of financial institution registered clients of our PRC futures brokerage business increased from 1,140 as of December 22, 2022 to 1,488 as of December 31, 2023, representing year-on-year growth of 30.5%. This further increased to 1,770 as of December 31, 2024, representing year-on-year growth of 19.0%, and to 1,872 in the six months ended June 30, 2025, representing a growth of 5.8%. As of December 31, 2024, client equity of our PRC futures brokerage reached RMB31.6 billion, up 65.4% from that of December 31, 2022, as compared to a CAGR of 1.9% of the China's futures industry. As of December 31, 2022, 2023 and 2024 and June 30, 2025, total client equity from our overseas futures, securities, and leveraged foreign exchange brokerage services stood at approximately HK\$11.9 billion, HK\$12.5 billion, HK\$13.8 billion, and HK\$17.8 billion, respectively, while our overseas asset management business had an AUM of approximately HK\$2.0 billion, HK\$2.3 billion, HK\$2.5 billion, and HK\$3.4 billion, respectively.

SUMMARY

We have established a IT infrastructure that is pivotal in our business operations, corporate governance, and risk management. We have been recognized with accolades that highlight our leadership in leveraging technology for excellence and innovation. Our technology infrastructure offers significant advantages, notably the client-centric Nanhua Futures App. We leverage innovative systems such as the fifth-generation NHTD trading system and the Ruihua Risk Management Services Business Risk Control System for high-frequency monitoring and robust risk management. Additionally, our global data center network comprises over 150 server cabinets, ensuring secure and efficient trading. Our resilient data center architecture, featuring a “two-location, three-center” setup, enhances operational stability and cybersecurity.

With our cross-national network, our business mix and our technology capabilities, we have achieved financial growth over the Track Record Period. Our profit for the year rose from RMB245.9 million in 2022 to RMB458.0 million in 2024, reflecting a CAGR of 36.5%. Our profit for the period remained stable, amounting to RMB230.5 million for the six months ended June 30, 2024 and RMB231.3 million for the six months ended June 30, 2025. Our weighted average ROE demonstrated improvement and continued resilience during the Track Record Period, reaching 7.75%, 11.46%, 11.71%, 6.03%, and 5.51% in 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, respectively.

OUR COMPETITIVE STRENGTHS

We believe the following competitive strengths contribute to our success:

- Established Presence in Futures and Derivatives Industry Driven by Early Moves in China and Our Global Capabilities
- Benefitting from the Growing Demand for Futures and Derivatives both in China and Overseas
- Acclaimed Technological Capabilities and a Comprehensive Risk Management Framework
- Highly Efficient Client Acquisition and Strong Service Capabilities
- Diversified Business Model and Disciplined, Flexible Resource Allocation
- Management Team with Deep Industry Experience and a Market-Oriented Incentive Mechanism

OUR STRATEGIES

We aim to serve the real economy (such as agricultural and industrial sectors) with specialized PRC and overseas financial services, empowering Chinese enterprises to achieve sustainable growth, and becoming a trusted partner to investors. To accomplish this , we plan to implement the following strategies:

- Enhancing Our Capital Base and Service Capabilities Overseas
- Expanding Our Global Client Base

SUMMARY

- Strengthening Our Overseas Marketing Capabilities
- Advancing Technological Infrastructure and Research and Development Capabilities

OUR PRODUCTS AND SERVICES

Our principal products and services include:

Business Lines	Main Products and Services	Our Business and Revenue Model
PRC futures brokerage	Brokerage	We provide futures brokerage service for both commodity futures and financial futures. Our futures brokerage business generates income from the commissions fees we charge our clients as well as the interest income on margin deposits and settlement reserve funds.
PRC risk management services	OTC derivatives	We offer our counterparty clients non-standardized financial contracts such as options, swaps, and forwards. We manage the associated market risk by conducting hedging transactions on futures, securities and other markets.
	Basis trading	We engage in spot commodity trades with our clients while executing commodity futures trades to hedge risks, thereby earning basis income.
	Market making	We provide continuous buy and sell quotes for the designated futures and options products as required by the exchanges. We generate revenue by capturing the gains from the price differences between the bid price buyers are willing to purchase the asset and the ask price sellers are willing to sell the asset.
PRC wealth management	Mutual funds	We offer mutual fund services, providing fund management, fund sales, asset management, and discretionary portfolio management services encompassing various funds spanning equity funds, fixed-income instruments funds, and mixed-type funds. We generate income through the collection of management fees.

SUMMARY

Business Lines	Main Products and Services	Our Business and Revenue Model
Overseas financial services	Asset management	Our asset management products offerings include both collective and targeted asset management schemes, encompassing investment varieties recognized by the CSRC such as stocks, funds, bonds, futures, options and other financial derivatives. We generate income through collection of management fees and, in some cases, performance fees as stipulated in the fund documents.
	Agency sale of funds	We act as agent for fund managers to sell securities investment funds to investors and receive commission from the sales of securities investment funds.
	Futures services	Our futures services include brokerage, clearing, and delivery. We facilitate trades of futures products on exchanges overseas and are qualified to assist overseas investors to trade futures products in three futures exchanges in China. We generate income from commission earned on executing and clearing trades as well as interest income on client balances.
	Asset management	We provide a diverse range of investment products including equities, fixed income, and alternative investments, and alternative investments cross international markets. We generate income from management fees and performance-based fees for our overseas asset management services.
	Securities services	We primarily provide overseas securities services through our subsidiary HGNH International Securities to assist clients on trading and dealing a diverse range of securities investment products, including Hong Kong-listed equities, callable bull/bear contracts, derivative warrants, equity-linked instruments, primary offerings, and exchange-traded funds. We generate income from commission earned on securities trades.
	Leveraged forex trading	We primarily provide overseas leveraged forex trading services through Nanhua Singapore, encompassing forex products including currency pair CFDs. We generate income from commission earned on leveraged forex trades.

SUMMARY

MARKET AND COMPETITION

PRC Futures Market: After 30 years of growth, the PRC futures industry faces significant opportunities driven by policy and market demand. It is the world's largest commodities market, covering agriculture, energy and metals with over 140 products for 41 industrial sectors, according to the F&S Report. With a futures-spot price correlation over 90%, it serves as a key pricing benchmark. China operates six futures exchanges offering various futures and options. By the end of 2024, there were 146 listed products: 125 commodity products (73 futures, 52 options), 20 financial products (8 futures, 12 options), and one index futures.

In China, futures companies can be categorized into two types based on the background of the controlling shareholder: financial institution-affiliated futures companies and non-financial institution-related futures companies. Financial institution-affiliated futures companies are connected to or are part of the same financial group such as securities firms and banks. Non-financial institution-related futures companies include independent futures companies and those controlled by large-scale enterprises. For more details on the competitive landscape of the industry in which we operate, see "Industry Overview".

Overseas Derivatives Market. An increasing number of Chinese companies are actively pursuing a "going global" strategy. According to the F&S Report, A-share listed companies achieved overseas business revenue of approximately RMB3.8 trillion in the first half of 2024, reflecting a year-on-year increase of 12.8%. There is growing demand for Chinese companies to engage in global financial markets, including futures and derivatives markets. China-based futures companies with strong international presence can stand to benefit for this trend.

According to the F&S Report, in China, we ranked:

- 8th among all futures companies and ranked the 1st among all non-financial institution-related futures companies in terms of total revenue in 2024;
- 16th among all futures companies and ranked the 1st among all non-financial institution-related futures companies in terms of futures brokerage commission revenue in 2024;
- 1st among all Chinese futures companies in terms of overseas revenue in 2024; and
- 3rd among all 53 listed securities and futures companies in China and 2nd among all futures companies in terms of ROE in 2024.

For our PRC futures brokerage business, we compete with both financial institution-affiliated and non-financial institution-related futures companies. For PRC risk management services, our main competitors are the risk management subsidiaries of other PRC futures firms. For PRC wealth management, we face competition from mutual fund companies and the asset management departments or subsidiaries of other financial institutions. In overseas financial services, we primarily compete with China-funded entities qualified in futures and derivatives. Our competition centers on brand recognition, marketing, service quality, financial strength, pricing, talent, IT, and research capabilities.

KEY FINANCIAL AND OPERATING DATA

SUMMARY

- (1) The negative operating income under market making from PRC risk management services was primarily due to volatile market conditions, the increasing competition for the market making business, and less favorable results from our trading strategies and business team. In response, we have engaged a new team and designed and upgraded our trading strategies. See “– PRC Risk Management Services”.
- (2) Other services of PRC risk management services primarily include product sales, involving agricultural products such as soybeans, and pre-packaged foods like rice and oil, as well as consulting services. See “Business – Our Business – PRC Risk Management Services – Other Services”.
- (3) Other services of overseas financial services primarily include leveraged forex trading, covering a wide range of forex products including currency pair CFDs such as EUR/USD, GBP/USD, and USD/JPY. See “Business – Our Business – Overseas Financial Services – Other Services”.

The significant increase in operating income under other services from overseas financial services in 2023 was primarily attributable to Nanhua USA’s investments in U.S. Treasury securities or certain designated currency funds. Benefiting from favorable overseas markets conditions, investment income and fair value gains from such investments were notably higher compared to the previous year.

- (4) The investment advisory business offers risk management advisory services, including the development of risk policies and specialized training. We provide research and analysis by collecting market data, analyzing trends, and delivering timely insights. We also assist with trading advisory include designing investment strategies and formulating trading plans tailored to client needs. Additionally, we offer educational services to help clients understand the futures market.

The table below sets out the key operating data of our businesses during the Track Record Period.

PRC Futures Brokerage

The operating profit generated from our PRC futures brokerage decreased from RMB122.8 million in 2022 to RMB106.0 million in 2023, primarily due to increasing staff costs which was partially set off by the increasing income resulting from the rise of average brokerage commission rates from 0.275 bps in 2022 to 0.334 bps in 2023. The operating profit further decreased to RMB35.8 million in 2024, primarily due to the decrease of operating income as a result of the decrease of average brokerage commission rates from 0.334 bps in 2023 to 0.225 bps in 2024. The operating profit generated from our PRC futures

SUMMARY

brokerage amounted to RMB43.3 million for the six months ended June 30, 2024, while decreased to RMB11.7 million for the six months ended June 30, 2025, primarily due to (i) the decrease of interest income and (ii) the decrease of average brokerage commission rates from 0.265 bps for the six months ended June 30, 2024 to 0.158 bps for the six months ended June 30, 2025. The decrease in average brokerage commission rates was primarily due to changes in the product mix traded by our clients in the six months ended June 30, 2025 as compared to the six months ended June 30, 2024, which were: (i) a shift in our clients' trading activity toward products with lower commission rates and (ii) a higher proportion of trading of products charged under a volume-based commission model instead of a value-based commission model.

We plan to take the measures below to improve profitability in our PRC futures brokerage business:

- **Expanding client base:** We will actively grow our equity base and strengthen collaboration across different business lines to attract a broader range of clients, particularly institutional clients such as financial institutions, listed companies, and industry leaders. We will deepen our relationships with securities firms, private funds, and other financial institutions to further expand our institutional client segment with our Alpha Star Private Fund Program (阿爾法星私募計劃) and Nanhua Jinji Innovation Hub (南華金機創融匯). We aim to leverage wealth management resources to enhance investment management, and grow our asset management business, thereby driving new growth for our brokerage operations. We will also enhance channel integration and marketing efforts to attract and acquire new clients. Our flagship brand campaigns, such as Nanhua Huinong (南華惠農) applying the “insurance + futures” model and our Star Cloud platform (南華星雲匯) bridging industrial and financial resources, will deepen links between financial services and the real economy, support rural revitalization, improve listed companies' risk management, promote research, and connect industry and financial capital, with the aim to improve our industry influence.
- **Enhancing client services:** We will improve staff expertise to boost service quality and continue to upgrade the functionalities of our IT systems. Using the NHTD5 trading system, we will deliver efficient and stable trading, while the NHTA platform will offer comprehensive modules to better serve diverse client needs. For strategic clients, we will continue to host different events to create opportunities for us to reach out to them, understand their needs and deepen our relationships. Furthermore, we will optimize the functionality of our mobile app to improve user experience, increase our user base, and boost user engagement and activity levels.

We derived a majority of our futures brokerage commission fee income from our business in Zhejiang and Guangdong Provinces and Shanghai. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, 78.0%, 77.1%, 65.5%, 69.3%, and 56.9% respectively, of our PRC commission fee income originated from Zhejiang and Guangdong Provinces and Shanghai. For further details, see “Risk Factors – Risks Relating to Our PRC Futures Brokerage Business – Our PRC futures brokerage business is concentrated in Zhejiang and Guangdong provinces, as well as Shanghai, and our business, financial condition and results of operations may be materially and adversely affected by a significant deterioration in our PRC futures brokerage business in Zhejiang and Guangdong Provinces and Shanghai.”

SUMMARY

PRC Risk Management Services

The operating profit generated from our PRC risk management services amounted to RMB47.7 million in 2022 while we incurred operating losses of RMB26.2 million in 2023, primarily due to the decrease of operating income from our market making business as a result of volatile market conditions, the increasing competition for the market making business, and less favorable results from our trading strategies and business team. In 2024, we generated operating profit of RMB9.6 million, primarily due to the increase of income from our OTC derivatives business. The operating losses from our PRC risk management services amounted to RMB0.3 million for the six months ended June 30, 2024, while the operating profit amounted to RMB13.4 million for the six months ended June 30, 2025, primarily due to the increased income from OTC derivatives business as a result of the commodity price volatility caused by the U.S. tariff policies in 2025, which led to an increase in volatility long positions.

On July 8, 2025, the accounting department of MOF issued the Implementation Q&A on Accounting Treatment for Standard Warehouse Receipt Transactions (《標準倉單交易相關會計處理實施問答》) (“**Implementation Q&A**”). The Implementation Q&A provides guidance on the accounting treatment of certain standard warehouse receipts trading transactions at futures exchanges that we carry out as part of our risk management services. For in-scope standard warehouse receipt transactions under the Implementation Q&A, the required shift in accounting treatment resulted in a reclassification of amounts previously reported as sales revenue to investment income, and a reclassification of period-end holdings from inventory to other current assets. The adoption of Implementation Q&A aligns with the Rules for the Management of Commodity Risk Management Business of Futures Risk Management Companies (《期貨風險管理公司大宗商品風險管理業務管理規則》) issued by the China Futures Association. See “Financial Information – Material Accounting Policies and Estimates – Material Accounting Policies – Contracts for the Purchase or Sale of Non-financial Items that are within the Scope of Financial Instruments Accounting Standards” for details.

We have established a new market making team comprising experienced and qualified personnel in IT and trading. We have also designed and upgraded our trading strategies to improve performance by relying on quantitative futures strategies, machine learning models, and using advanced tools such as the Orc’s options and market making system.

PRC Wealth Management

The operating losses incurred from our PRC wealth management decreased from RMB11.6 million in 2022 to RMB9.2 million in 2023, primarily due to the increase of operating income reflecting the growth of our PRC asset management and mutual fund services. The operating losses further decreased to RMB3.3 million in 2024, primarily due to the decrease of operating expenses in line with the reduced AUM under our asset management operations as a result of our initiation of a clean-up of bond-related business under our asset management operations out of prudence. The operating losses from our PRC wealth management amounted to RMB4.7 million for the six months ended June 30, 2024, and further increased to RMB10.9 million for the six months ended June 30, 2025. Such was primarily due to the decline of operating income as a result of the reduction of average AUM of our PRC asset management and mutual fund businesses.

SUMMARY

The PRC wealth management business has not yet achieved sustained profitability primarily because the current scale of the business is not sufficient to cover the fixed costs required to support ongoing operations. These fixed costs include essential expenditures for licensing, compliance, and IT infrastructure. While these costs have contributed to operating losses during the Track Record Period, we believe they represent essential investments that will establish a foundation for future profitability as the business scales. See “Risk Factors – Risks Relating to Our PRC Wealth Management Business – Our ability to achieve profitability in our PRC wealth management business is subject to various risks and uncertainties and we may continue to incur operating losses in connection with our PRC wealth management business.” We expect our PRC wealth management business to achieve profitability in the next one to two years.

Overseas Financial Services

The operating profit generated from overseas financial services increased from RMB132.3 million in 2022 to RMB397.1 million in 2023, primarily driven by higher operating income resulting from rising overseas interest rates. The growth in operating income was also attributable to (i) an increase in client equity from our overseas brokerage services and (ii) higher trading volumes in our overseas futures brokerage business. The operating profit further increased to RMB466.2 million in 2024, primarily due to the increases in (i) client equity from our overseas brokerage services and (ii) trading volume for our futures brokerage in the overseas markets. The operating profit from our overseas financial services remained relatively stable for the six months ended June 30, 2024 and 2025, which amounted to RMB228.7 million and RMB241.3 million, respectively.

For further details, see “Financial Information – Summary Segment Results”.

Improving PRC Futures Brokerage Business

Our PRC futures brokerage business is the core of our operations. In 2025, we aim to expand our scale and enhance collaboration across segments for competitive advantages. We will maintain a client-focused strategy, offering risk management for industrial clients, wealth management for institutional clients, and internet user experience for individuals. This ensures tailored services and boosts our brokerage effectiveness.

For industrial clients, we believe risk management is the primary reason for their involvement in the derivatives market, and fulfilling the functional role of the futures market is a critical mission for the industry’s advancement. In 2025, we intend to further bolster the synergy between our risk management and PRC futures brokerage operations, enhance the expertise of our personnel, and deliver superior services to increase client loyalty and our influence within the industry value chain.

SUMMARY

For institutional clients, we will continue to strengthen our collaboration with securities firms, private funds, and other institutions, aiming to significantly expand our institutional client base. Concurrently, we will leverage our wealth management resources to actively improve our investment management capabilities. By expanding our asset management business, we anticipate generating additional growth for our PRC futures brokerage business.

We evaluated the commission rate charged by our PRC futures brokerage business during the Track Record Period against those of our peers listed on the SEHK and/or the industry average and found no significant discrepancy. We will continue to monitor market trends and adjust our commission rates as necessary to remain competitive and support our long-term growth. See “Business – Our Business – PRC Futures Brokerage – Commission and Interest Income”.

Improving PRC Wealth Management Business

For our PRC wealth management business, we have secured multiple financial licenses for mutual funds, asset management, and agency sales of funds. By 2025, we aim to balance development with risk prevention, expanding through enhanced investment management, multi-license synergies, and overall growth. For mutual funds, we will collaborate with banks, trusts, private funds, and others to grow rapidly, making them key profit contributors. This involves improving personnel, systems, product design, fund manager capabilities, channels, and risk management. In asset management, we will boost active management and future asset management through CTA strategy development, high-quality products, services, and strong branding. For agency sales of funds, we will refine the whitelist system, optimize third-party product selection, emphasize our own products, and enhance sales incentives to drive growth. These initiatives will help improve performance, reduce losses, and achieve sustainable growth in our PRC wealth management business.

Improving PRC Risk Management Services

Our PRC risk management services will continue to focus on the three core areas of OTC derivatives, basis trading, and market making, driving the steady development of each segment. For OTC derivatives, we will leverage our strengths in commodity-linked OTC products that are closely integrated with the real economy, control the scale of higher-risk activities, enhance product design and innovation, launch new varieties to meet diverse risk management needs, coordinate with other departments for client development and investor education, improve risk control and hedging effectiveness, and boost profitability. In basis trading, we will promote the application of basis trading across different industry chains while maintaining robust risk controls, steadily explore combinations of spot and various options to expand scenarios for embedded option trading, and provide tailored hedging solutions and trading strategies to serve the real economy, large enterprises, SMEs, and agricultural clients. For market making, we will focus on consolidating our current market-making products, enhance the efficiency of our strategies through talent recruitment and development, and increase revenue from market-making activities.

SUMMARY

RISK FACTORS

Our operations and the Global Offering involve certain risks and uncertainties, some of which are beyond our control and may affect your decision to invest in us and/or the value of your investment. Other risk and uncertainties we face can be categorized into: (i) risks relating to our business and industry; and (ii) risks relating to the Global Offering. Some of the major risks we face include: (i) significant interest rate fluctuations could affect our financial condition and results of operations; (ii) our historical growth rates may not be indicative of our future growth, which makes it difficult to evaluate our future prospects; (iii) our business may be materially and adversely affected by global and regional market and economic conditions and other factors beyond our control; (iv) commission fees from our PRC futures brokerage business constitute a significant portion of our operating income. Any decline or slowdown in our commission fee income may materially and adversely affect our business, financial condition and results of operations; (v) if we lose access to any of the futures exchanges that we are a member of, our ability to undertake some or all of our clearing services would be affected; (vi) our operations may be adversely affected if we fail to obtain or renew necessary licenses, permits and approvals for conducting a particular business or offering specific products. The suspension or termination of any of our licenses, permits or approvals may have a negative impact on our business; (vii) the financial services industry is highly competitive, and we face intense competition in all of our business lines; (viii) fluctuations in exchange rates could result in foreign currency exchange losses and could materially reduce the value of your investment; (ix) if we fail to fully comply with the relevant regulatory requirements applicable to us, our reputation could be harmed and our business, financial condition and results of operation could be adversely affected; and (x) we may not be successful in expanding our business, and the expansion of our business may not produce the intended results. See “Risk Factors” for details of our risk factors.

BUSINESS NAME IN HONG KONG

Our Chinese corporate name is “南華期貨股份有限公司” and we have been carrying on our business under the name “南華期貨” and/or its variations in the PRC. We are not in any way connected with or related to South China Financial Holdings Limited (南華金融控股有限公司, a company listed in Hong Kong, stock code: 00619) or any of its associates (including South China Commodities Limited (南華期貨有限公司)). To minimize any potential risks of legal proceedings, the Group carries on business as “橫華國際” in Hong Kong and have taken certain measures for this purpose. For more details, see “Business – Intellectual Property Rights”.

SUMMARY OF KEY FINANCIAL INFORMATION

The following tables set forth a summary of our consolidated financial information for the Track Record Period, extracted from the Accountant’s Report set out in Appendix I. The summary of consolidated financial data set forth below should be read together with, and is qualified in its entirety by reference to, the consolidated financial statements in this prospectus, including the related notes. Our consolidated financial information has been prepared in accordance with IFRSs.

SUMMARY

Summary Consolidated Statements of Profit or Loss

SUMMARY

Recent Regulatory Guidance on Accounting Treatment for Risk Management Companies

Implementation Q&A on Accounting Treatment for Standard Warehouse Receipt Transactions

On July 8, 2025, the accounting department of MOF issued the Implementation Q&A on Accounting Treatment for Standard Warehouse Receipt Transactions (《標準倉單交易相關會計處理實施問答》) (“**Implementation Q&A**”). The Implementation Q&A clarifies that where an enterprise frequently buys and sells standard warehouse receipts at futures exchanges to earn price spreads without taking physical delivery, such contracts should be treated as financial instruments and accounted for in accordance with China Accounting Standard for Business Enterprises No. 22 – Financial Instruments: Recognition and Measurement. Under this treatment, the difference between the consideration received and the carrying amount of standard warehouse receipts sold is recognized as investment income rather than sales revenue, and standard warehouse receipts held at period end are presented as other current assets rather than inventory. Accordingly, we had adopted such treatment when preparing the financial statements as at and for years ended December 31, 2022, 2023 and 2024 and the six months ended June 30, 2024 and 2025 included in this prospectus. The change resulted in a reclassification of amounts previously reported as sales revenue to investment income, and a reclassification of period-end holdings from inventory to other current assets. See “Financial Information – Material Accounting Policies and Estimates – Material Accounting Policies – Contracts for the Purchase or Sale of Non-financial Items that are within the Scope of Financial Instruments Accounting Standards” for details.

China Futures Association’s Rules for the Management of Commodity Risk Management Business of Futures Risk Management Companies

On November 14, 2024, the China Futures Association issued the Rules for the Management of Commodity Risk Management Business of Futures Risk Management Companies (《期貨風險管理公司大宗商品風險管理業務管理規則》) (the “**New RM Rules**”), which was amended on May 13, 2025. The New RM Rules requires a futures company’s risk management subsidiary to recognize revenue on a net basis for certain type of trading transactions. Accordingly, we adopted a net recognition method for reporting operating income associated with certain trading businesses based on the New RM Rules when preparing the financial statements as at and for years ended December 31, 2022, 2023 and 2024 and the six months ended June 30, 2024 and 2025 included in this prospectus.

SUMMARY

Our operating profit increased from RMB296.0 million in 2022 to RMB486.9 million in 2023 and further increased to RMB518.6 million in 2024. Our operating profit remained relatively stable for the six months ended June 30, 2024, compared to the six months ended June 30, 2025, amounting to RMB270.3 million and RMB258.6 million, respectively. Operating profit growth during the Track Record Period was driven by our continued international expansion, which resulted in increases in our client base, trading activities and client equity, particularly in the overseas market.

The following table sets forth the key measurements of our profitability for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	<i>(RMB'000, except for %)</i>				
	<i>(unaudited)</i>				
Operating profit	296,044	486,923	518,568	270,344	258,563
Operating margin ⁽¹⁾	31.0%	37.7%	38.3%	40.1%	43.6%
Profit for the year/period	245,912	402,822	458,037	230,476	231,327
Net margin ⁽²⁾	25.8%	31.2%	33.8%	34.1%	39.0%

(1) Operating profit as divided by operating income.

(2) Profit for the year/period as divided by operating income.

Our profit for the year increased from RMB245.9 million for the year ended December 31, 2022 to RMB402.8 million for the year ended December 31, 2023, primarily due to (i) reduced loss from PRC wealth management, as a result of growth of PRC asset management and mutual fund services and (ii) increased profits from overseas financial services, as a result of growth in client equity from our overseas brokerage services and trading volume for our futures brokerage in the overseas markets.

Our profit for the year further increased to RMB458.0 million for the year ended December 31, 2024 from RMB402.8 million for the year ended December 31, 2023. Such increase was primarily attributable to the increases of income from our OTC derivatives business from our PRC risk management services, which turned operating losses into profits in 2024, and our overseas financial services, in line with our growing overseas market.

Our profit for the period remained stable, amounting to RMB230.5 million for the six months ended June 30, 2024 and RMB231.3 million for the six months ended June 30, 2025.

For further details, see “Financial Information”.

SUMMARY

Summary Consolidated Statements of Financial Position

The following table sets forth the selected data of our statement of financial position as of the dates indicated:

	As of December 31,			As of June 30,
	2022	2023	2024	2025
	(RMB'000)			
Total current assets	33,698,976	35,822,142	48,402,123	46,390,865
Total non-current assets	490,209	503,380	461,274	487,296
Total assets	<u>34,189,185</u>	<u>36,325,522</u>	<u>48,863,397</u>	<u>46,878,161</u>
Total current liabilities	30,310,368	32,082,363	44,204,847	41,854,601
Total non-current liabilities	553,774	530,240	533,710	731,703
Total liabilities	<u>30,864,142</u>	<u>32,612,603</u>	<u>44,738,557</u>	<u>42,586,304</u>
Net current assets	<u>3,388,608</u>	<u>3,739,779</u>	<u>4,197,276</u>	<u>4,536,264</u>
Total equity	<u>3,325,043</u>	<u>3,712,919</u>	<u>4,124,840</u>	<u>4,291,857</u>
Non-controlling interests	<u>8,484</u>	<u>9,542</u>	<u>9,585</u>	<u>9,690</u>

Our net current assets increased from RMB3,388.6 million as of December 31, 2022 to RMB3,739.8 million as of December 31, 2023, primarily due to increases in financial assets at fair value through profit or loss and bank balances held for clients, which was partially set off by a decrease of deposits with exchange-clearing organizations and an increase of accounts payable to brokerage clients. Our net current assets further increased to RMB4,197.3 million as of December 31, 2024, primarily due to increases in deposits with exchange-clearing organizations and bank balances held for clients and a decrease of trade and other payables, which was partially offset by an increase in accounts payable to brokerage clients. Our net current assets increased to RMB4,536.3 million as of June 30, 2025, primarily due to an increase in deposits with exchange-clearing organizations and a decrease of accounts payable to brokerage clients, which was partially offset by a decrease of bank balances held for clients.

SUMMARY

Our net assets increased from RMB3,325.0 million as of December 31, 2022 to RMB3,712.9 million as of December 31, 2023, primarily due to profit for the year of RMB402.8 million and other comprehensive income for the year of RMB19.1 million, partially offset by dividends declared of RMB34.2 million. Our net assets further increased to RMB4,124.8 million as of December 31, 2024, primarily due to profit for the year of RMB458.0 million and other comprehensive income for the year of RMB44.2 million, which was partially offset by dividends declared of RMB40.3 million and repurchase of shares of RMB50.1 million. Our net assets slightly increased to RMB4,291.9 million as of June 30, 2025, primarily due to profit for the period of RMB231.3 million, which was partially offset by dividends declared of RMB45.9 million and other comprehensive loss for the period of RMB18.4 million.

For further details, see “Financial Information”.

Summary Consolidated Statements of Cash Flows

The following table sets forth our cash flows for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)	
Net cash inflow/(outflow) from operating activities	557,980	1,152,500	(700,408)	63,488	(442,036)
Net cash (outflow)/inflow from investing activities	(1,450,928)	(462,987)	1,342,952	485,355	531,855
Net cash inflow/(outflow) from financing activities	691,015	(414,862)	(381,579)	(167,847)	110,072
Net (decrease)/increase in cash and cash equivalents	(176,903)	278,177	266,204	381,792	199,280
Cash and cash equivalents at beginning of the year/period	671,359	494,456	772,633	772,633	1,038,837
Cash and cash equivalents at end of the year/period	<u>494,456</u>	<u>772,633</u>	<u>1,038,837</u>	<u>1,154,425</u>	<u>1,238,117</u>

For the six months ended June 30, 2025, our net outflow used for operating activities was RMB442.0 million. The net cash outflow was primarily due to cash outflows related to net increase in deposits with exchange-clearing organizations of RMB3,025.6 million and net increase in accounts payables to brokerage clients of RMB2,321.2 million, caused by changes in client equity.

SUMMARY

In 2024, our net outflow used for operating activities was RMB700.4 million. The cash outflow was primarily due to (i) cash outflows related to other operating liabilities of RMB1,264.2 million, primarily caused by the repayment of clients' derivative financial instrument performance margins that were previously included under trade and other payables of current liabilities, with a total repayment amount of approximately RMB1,184.8 million, resulting in a decrease in margin received from clients of our OTC derivatives business and (ii) profit before income tax of RMB574.1 million from cash-related operating items.

The cash flow changes relating to operating activities in 2024 were primarily influenced by the deposits made with banks, exchanges, and third-party entities to fulfill margin requirements. When our clients engage in futures trading, they are required to deposit margin funds with us, which results in cash inflows from operating activities. Conversely, when we deposit margins with exchanges on behalf of clients or refunds margin funds to clients, such results in cash outflows from operating activities. Our operating cash flow at the year-end is affected by the timing of client margin deposits or refunds, which may present either inflows or outflows. These variations, however, do not have a material impact on our overall annual operating activities.

In 2023, our net cash inflow from operating activities was RMB1,152.5 million. The cash inflow was primarily due to (i) net cash inflows related to futures brokerage clients of RMB239.8 million, mainly due to changes in the scale of client equity related to futures brokerage; (ii) profit before income tax from cash-related operating items of RMB449.6 million; and (iii) cash inflows related to other operating liabilities of RMB591.9 million, mainly resulting from an increase in margin received from clients of our OTC derivatives business.

In 2022, our net cash inflow from operating activities was RMB558.0 million. The cash inflow was primarily due to (i) cash inflows related to other operating liabilities of RMB550.0 million, mainly resulting from an increase in margin received from clients of our OTC derivatives business; and (ii) profit before income tax from cash-related operating items of RMB300.8 million; and these inflows were partially offset by net cash outflows related to brokerage clients of RMB361.6 million.

REGULATORY NON-COMPLIANCE AND INSPECTIONS

We operate in China, Hong Kong, Singapore, the UK and the US and are, therefore, subject to various regulatory requirements and guidelines promulgated by regulatory authorities and exchanges in these jurisdictions, such as the CSRC, SFC, MAS, FCA, CFTC, as well as HKCC and CME Group. During the Track Record Period and up to the Latest Practicable Date, regulatory actions have not identified any significant risks or non-compliance events but have found some deficiencies in our business operations and risk management practices. While these issues have not materially affected our business, financial position, or operational results, we have implemented measures to prevent similar incidents in the future. See “Business – Legal and Regulatory.”

SUMMARY

RECENT DEVELOPMENTS

Publication and Summary of Quarterly Results

As a public company listed on the Shanghai Stock Exchange, we are required to disclose unaudited financial results prepared under PRC GAAP for the nine months ended September 30, 2025 pursuant to the relevant PRC securities laws and regulations. We published our quarterly results on October 24, 2025 and we will continue to make periodic financial disclosure in compliance with the relevant laws and regulations.

We have included our unaudited interim consolidated financial information for the nine months ended September 30, 2025 in Appendix IA to this prospectus. The unaudited interim consolidated financial information for the nine months ended September 30, 2025 has been reviewed by our reporting accountant in accordance with Hong Kong Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” as issued by the Hong Kong Institute of Certified Public Accountants. For details, see Appendix IA to this prospectus.

Our operating income slightly decreased from RMB1,025.7 million for the nine months ended September 30, 2024 to RMB940.4 million for the nine months ended September 30, 2025. Our operating expenses also decreased by 10.7% from RMB611.0 million for the nine months ended September 30, 2024 to RMB545.5 million for the nine months ended September 30, 2025, primarily due to the decrease of other operating expenses. As a result, our operating profit slightly decreased from RMB414.7 million for the nine months ended September 30, 2024 to RMB394.9 million for the nine months ended September 30, 2025. Our profit for the period remained stable, amounting to RMB358.5 million and RMB351.8 million, for the nine months ended September 30, 2024 and 2025, respectively. Our total assets increased by 31.1% from RMB48,863.4 million as of December 31, 2024 to RMB64,079.0 million as of September 30, 2025, primarily due to increases of deposits with exchange-clearing organizations and bank balances held for clients. Our net current assets remained stable at RMB4,449.3 million as of September 30, 2025 compared to RMB4,197.3 million as of December 31, 2024. See “Appendix IA – Unaudited Interim Condensed Consolidated Financial Information” for details.

Changes in Macroeconomy

The global financial markets have experienced significant volatility and uncertainty in recent months, driven by a combination of geopolitical tensions, economic policy shifts, and trade disruptions. Futures markets have also been affected, with heightened volatility and risk aversion among investors. Our Directors confirm that, as of the date of this prospectus, market fluctuations have not had a material adverse impact on our client’s trading activities and business operations.

The global interest rate environment has experienced pronounced volatility in recent years, driven by macroeconomic shocks and policy responses. In the United States, the Federal Reserve cut the federal funds rate from 1.5%–1.75% to 0%–0.25% in early 2020 and launched quantitative easing to stabilize markets during the pandemic. As inflation surged, the Federal Reserve implemented 11 consecutive rate hikes totaling 525 basis points, raising the rate to 5.25%–5.5% by 2023. With inflation receding in 2024, the Federal Reserve paused hikes and began a cautious easing cycle, lowering the rate to 4.25%–4.5% by

SUMMARY

year-end. In early 2020, China's 1-year LPR was 4.15%, but the PBOC gradually reduced it to 3.65% by 2022 through liquidity injections and policy easing. In 2023, the PBOC further cut the LPR to 3.45% and implemented additional reserve requirement ratio reductions. By late 2024, the LPR declined to 3.10%. These significant and often abrupt changes – driven by inflation, fiscal pressures, and global capital flows – directly affect our net interest income. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, our interest income from client funds amounted to RMB313.0 million, RMB537.0 million, RMB644.1 million, RMB333.6 million and RMB243.8 million, respectively, our interest income from client funds in the PRC amounted to RMB194.4 million, RMB164.2 million, RMB195.5 million, RMB100.7 million and RMB81.1 million, respectively, and our interest income from client funds overseas amounted to RMB118.6 million, RMB372.8 million, RMB448.7 million, RMB232.9 million and RMB162.7 million, respectively. However, interest rate movements are entirely outside our control and remain subject to frequent policy shifts. Such fluctuations may materially affect our profitability and financial condition. See “Risk Factors – Significant interest rate fluctuations could affect our financial condition and results of operations.”

Recent tariff changes and geopolitical tensions have a multi-dimensional impact on our business, affecting our PRC futures brokerage, PRC risk management services, and overseas financial services. In our PRC futures brokerage, frequent tariff adjustments and geopolitical risks increase price volatility in commodities such as agricultural products, metals, and energy. Clients respond by increasing their hedging and trading activities, which helps to drive an increase in higher agency trading volumes and fee income, but also raises the number of forced liquidations due to margin shortfalls. This volatility necessitates robust risk control, prompting us to identify, warn, and manage risks early to maintain transaction stability. For PRC risk management services, tariff shocks heighten clients' exposure to exchange rate and raw material cost volatility. We address rising demand for risk hedging and customized risk management solutions, such as OTC derivatives and basis trading, leading to growth in our notional principal in OTC derivatives business since the new US tariff policies in April 2025. In overseas financial services, with a similar effect on the PRC businesses, tariff changes drive global commodity volatility and increase clients' demand for hedging and global asset allocation. Overall, while these factors stimulate demand for our futures and derivatives services, they also necessitate enhanced risk management. Our comprehensive risk management system is designed to strengthen risk control measures in volatile markets through real-time monitoring and prompt responsiveness, covering different products and business lines rather than focusing on any single area. We continuously track price trends, position changes, and margin levels across all commodities. By calculating hedge thresholds and dynamically adjusting position sizes, we control our exposure and avoid adverse market movements. We use stop-loss points and real-time asset price monitoring to manage risk as conditions change. When volatility increases, we proactively adjust margin requirements, increase the frequency of intraday risk testing and stress tests, and strengthen communication between our risk and business teams as well as with clients. This allows us to identify and address potential issues early, effectively preventing risk events. If we detect increased risk, we notify clients to add margin. If clients do not respond, we act quickly to liquidate positions and limit potential losses. We maintain a whitelist for counterparties and apply stricter requirements for those with higher risk profiles. After significant market events, we review our positions and exposures to avoid excessive concentration in any single commodity. See “Business – Risk Management – Monitoring and Management of Major Risks.”

SUMMARY

In the short term, we do not anticipate tariffs or geopolitical tensions to have a material adverse impact on our performance.

Our Directors confirm that, up to the date of this prospectus, there has been no material adverse change in our financial, operational and trading positions or prospects since June 30, 2025, being the end date of the periods reported on in the Accountant's Report included in Appendix I to this prospectus, and there had been no event since June 30, 2025, that would materially affect the information shown in the Accountant's Report set out in Appendix I to this prospectus.

HISTORICAL IMPACT OF THE COVID-19 PANDEMIC

Since the end of December 2019, the outbreak of a novel strain of coronavirus, or COVID-19, has impacted the global economy. While we faced various challenges due to the impact of COVID-19, neither our operations nor our financial performance were materially and adversely affected during the Track Record Period. For further details, see "Business – Historical Impacts of the COVID-19 Pandemic."

OUR CONTROLLING SHAREHOLDERS

Given that, upon completion of the Global Offering (assuming that (i) there will be no change of shareholding between the Latest Practicable Date and the Listing Date and (ii) the Over-allotment Option is not exercised), (i) Dongyang Hengdian Association will directly and indirectly hold 70% equity interests in Hengdian Holdings; (ii) Hengdian Holdings will directly and indirectly hold approximately 65.43% interests in our Company, a group of Controlling Shareholders of our Company (as defined in the Listing Rules) will be comprised of the following entities: Hengdian Holdings, Dongyang Henghua LLP, Hengdian DMEGC Magnetics, Hengdian Import and Export, Dongyang Zhuowei, Dongyang Hengdian Association, Dongyang Chuangxiang and Dongyang Hengchuang. See "Relationship with Our Controlling Shareholders".

DIVIDEND

After the completion of the Global Offering, we may distribute dividends in the form of cash or by other means that we consider appropriate. Any proposed distribution of dividends shall be formulated by our Board and will be subject to our Shareholders' approval. A decision to declare or to pay any dividends in the future, and the amount of any dividends, will depend on a number of factors, including our results of operations, cash flows, financial condition, capital adequacy ratio, payments by our subsidiaries of cash dividends to us, business prospects, statutory, regulatory and contractual restrictions on our declaration and payment of dividends and other factors that our Board may consider important.

According to the relevant PRC laws and regulations governing A-share listed companies and our Articles of Association, our annual profit distributed in cash shall not be less than 10% of our distributable profit realized in that year. We do not have a fixed dividend distribution ratio. Any proposed distribution of dividends is subject to the discretion of our Board and approval at our Shareholders' meetings. In 2022, 2023 and 2024, we distributed cash dividends of RMB24.4 million, RMB34.2 million and RMB40.3 million to our Shareholders, respectively. A dividend of RMB45.9 million for the year ended December 31, 2024 was distributed on May 23, 2025. No other dividend was paid during the Track Record Period. Dividends paid in prior periods shall not be indicative of future dividend payment.

SUMMARY

GLOBAL OFFERING

This prospectus is published in connection with the Hong Kong Public Offering as part of the Global Offering. The Global Offering comprises:

- the Hong Kong Public Offering of 10,766,000 Shares (subject to reallocation) for subscription by the public in Hong Kong as described in “Structure of the Global Offering – The Hong Kong Public Offering”; and
- the International Offering of 96,893,000 Shares (subject to reallocation and the Over-allotment Option) outside the United States (including professional and institutional investors within Hong Kong) in offshore transactions in reliance on Regulation S, as described in “Structure of the Global Offering – the International Offering.”

The Offer Shares will represent approximately 15.0% of the total Shares in issue of our Company immediately after completion of the Global Offering, assuming the Over-allotment Option is not exercised. If the Over-allotment Option is exercised in full, the Offer Shares will represent approximately 16.9% of the total Shares in issue of our Company immediately after completion of the Global Offering and the exercise of the Over-allotment Option.

OFFERING STATISTICS

	Based on an Offer Price of HK\$12.00 per Offer Share	Based on an Offer Price of HK\$16.00 per Offer Share
Market capitalization of our Shares ⁽¹⁾	HK\$13,989.1 million	HK\$14,419.8 million
Market capitalisation of our H Shares ⁽²⁾	HK\$1,291.9 million	HK\$1,722.5 million
Unaudited pro forma adjusted net tangible assets per Offer Share ⁽³⁾	HK\$8.23	HK\$8.80

(1) The calculation of the market capitalization is based on 107,659,000 H Shares expected to be in issue immediately after completion of the Global Offering (assuming the Over-allotment Option is not exercised) and on the assumption that 604,384,659 A Shares (excluding 5,681,234 A Shares as treasury shares) have been in issue with an average closing price of RMB19.10 during the five trading days of A Shares immediately preceding the Latest Practicable Date.

(2) The calculation of market capitalization is based on the assumption that 107,659,000 H Shares are expected to be in issue immediately after completion of the Global Offering.

(3) The unaudited pro forma adjusted net tangible assets per Offer Share has been arrived at after adjustments referred to in “Appendix II – Unaudited Pro Forma Financial Information” and on the basis that 717,724,893 Shares were in issue at the respective Offer Price of HK\$12.00 and HK\$16.00, assuming that the Shares issued pursuant to the Global Offering were issued on June 30, 2025, which does not take into account (i) any Share which may be allotted and issued upon the exercise of the Over-allotment Option, or (ii) any Share which may be allotted and issued or repurchased by our Company under the general mandates for the allotment and issue or repurchase of Shares granted to our Directors.

(4) No adjustment has been made to reflect any trading results or other transactions of the Group entered into subsequent to June 30, 2025.

For further details, see “Financial Information – Unaudited Pro Forma Adjusted Net Tangible Assets” and “Appendix II – Unaudited Pro Forma Financial Information – A. Unaudited Pro Forma Adjusted Consolidated Net Tangible Assets”.

SUMMARY

FUTURE PLANS AND USE OF PROCEEDS

Assuming an Offer Price of HK\$14.00 per Offer Share (being the mid-point of the indicative Offer Price Range of between HK\$12.00 and HK\$16.00 per Offer Share), we estimate that we will receive net proceeds of approximately HK\$1,409.6 million from the Global Offering after deducting the underwriting commissions and other estimated expenses in connection with the Global Offering and assuming that the Over-allotment Option is not exercised. We intend to allocate all net proceeds from the Global Offering to HGNH International, which plans to enhance the capital base of our overseas subsidiaries in Hong Kong, the United Kingdom, the United States, and Singapore. This initiative aims to expand our overseas operations, optimize our overseas business structure, and enhance our competitiveness and risk resilience in global markets. See “Future Plans and Use of Proceeds” for further details.

LISTING EXPENSES

We expect to incur listing expenses of approximately RMB88.7 million (assuming an Offer Price of HK\$14.0 per H Share, being the mid-point of the indicative Offer Price range as stated in this prospectus, and assuming the Over-allotment Option is not exercised), accounting for approximately 6.5% of the estimated gross proceeds of the Global Offering accruing to us. Our estimated listing expenses include (i) underwriting-related expenses, representing underwriting commission and fees of approximately RMB53.2 million; and (ii) non-underwriting-related expenses, comprising professional fees to the legal advisors and reporting accountant of approximately RMB17.3 million for their services rendered in relation to the Global Offering and the Listing, and other fees and expenses of approximately RMB18.2 million. We incurred listing expenses of approximately RMB17.1 million during the Track Record Period. We expect to further incur listing expenses of approximately RMB71.6 million upon completion of the Global Offering, out of which approximately RMB7.5 million is expected to be charged to our consolidated statements of comprehensive income and approximately RMB64.1 million is expected to be accounted for as a deduction from equity. The listing expenses above are the latest practicable estimate for reference only, and the actual amount may differ from this estimate. We do not expect such expenses to have a material adverse impact on our results of operations for the year ending December 31, 2025.

DEFINITIONS

In this prospectus, unless the context otherwise requires, the following terms shall have the meanings set forth below. Certain technical terms are explained in “Glossary of Technical Terms.”

Unless otherwise indicated, futures brokerage trading volume and value data in this prospectus are presented on a bilateral comparable basis.

FORWARD-LOOKING STATEMENTS

This prospectus includes forward-looking statements. All statements other than statements of historical facts contained in this prospectus, including, without limitation, those regarding our future financial position, our strategy, plans, objectives, goals, targets, and future developments in the markets where we participate or are seeking to participate, and any statements preceded by, followed by, or that include the words “believe,” “expect,” “estimate,” “predict,” “aim,” “target,” “intend,” “will,” “may,” “plan,” “consider,” “anticipate,” “seek,” “should,” “could,” “would,” “continue,” or similar expressions or the negative thereof, are forward-looking statements. These forward-looking statements involve known and unknown risks, uncertainties, and other factors, some of which are beyond our control, which may cause our actual results, performance or achievements, or industry results, to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. These forward-looking statements are based on numerous assumptions regarding our present and future business strategies and the environment in which we will operate in the future. Important factors that could cause our actual performance or achievements to differ materially from those in the forward-looking statements include, among others, the following:

- our ability to successfully implement our business plans and strategies;
- future developments, trends, and conditions in the industry and markets in which we operate or into which we intend to expand;
- our business operations and prospects;
- the actions and developments of our competitors;
- our financial condition and performance;
- capital market developments;
- our dividend policy;
- any changes in the rules, regulations and policies of the relevant governmental authorities relating to any aspect of our business and our business plans;
- general political and economic conditions in the jurisdictions in which we have or intend to have business operations;
- changes or volatility in interest rates, foreign exchange rates, equity prices, or other rates or prices, including those pertaining to the industry and markets in which we operate;
- various business opportunities that we may pursue; and
- changes in the global economic conditions and material volatility in the global financial markets.

FORWARD-LOOKING STATEMENTS

Additional factors that could cause our actual performance or achievements to differ materially include, but are not limited to, those discussed in “Risk Factors” and elsewhere in this prospectus. We caution you not to place undue reliance on these forward-looking statements, which reflect our management’s view only as of the date of this prospectus. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise. In light of these risks, uncertainties, and assumptions, the forward-looking events discussed in this prospectus might not occur. All forward-looking statements contained in this prospectus are qualified by reference to the cautionary statements set out in this section.

RISK FACTORS

An investment in our H Shares involves various risks. You should carefully consider all the information in this prospectus, including the risks and uncertainties described below, before making an investment in our H Shares. These risks could materially and adversely affect our business, financial condition, and results of operations. The trading price of our H Shares could decline due to any of these risks and uncertainties, and you may lose all or part of your investment. Additional risks and uncertainties not presently known to us, or not expressed or implied below, or that we deem immaterial, could also harm our business, financial condition and results of operations.

These factors are contingencies that may or may not occur, and we are not in a position to express a view on the likelihood of any such contingency occurring. The information given will not be updated after the date hereof and is subject to the cautionary statements in the section headed “Forward-looking Statements” in this prospectus. You should seek professional advice from relevant advisors regarding your prospective investment in the context of your particular circumstances.

RISKS RELATING TO OUR BUSINESS AND INDUSTRY

Significant interest rate fluctuations could affect our financial condition and results of operations.

We earn interest income on client funds as well as from our own funds. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, our net interest income was RMB326.5 million, RMB545.4 million, RMB681.8 million, RMB350.8 million, and RMB253.3 million, respectively, representing 34.2%, 42.2%, 50.3%, 52.0% and 42.7% of our operating income for the same periods, respectively. Interest rates are influenced by national monetary policy and prevailing market interest rates. In China, the PBOC can adjust interest rates to manage inflation. Significant changes in the PBOC’s monetary policy can result in variations in interest rates. Furthermore, China’s economic environment, encompassing factors such as GDP growth rates and inflation, can influence interest rates. In early 2020, China’s 1-year LPR was 4.15%, but the PBOC gradually reduced it to 3.65% by 2022 through liquidity injections and policy easing. In 2023, the PBOC further cut the LPR to 3.45% and implemented additional reserve requirement ratio reductions. By late 2024, facing ongoing growth challenges, the LPR declined to 3.10%. On the international stage, interest rate policies established by major central banks, including the U.S. In early 2020, the Federal Reserve cut the federal funds rate to 0%-0.25% and began quantitative easing to stabilize liquidity. As the economy recovered and inflation surged, the Federal Reserve started raising rates in March 2022, implementing 11 consecutive increases totaling 525 bps. By 2023, the rate reached 5.25%-5.5%. In 2024, the Federal Reserve paused hikes and then cut rates thrice, reducing the federal funds rate to 4.25%-4.5% by December. Federal Reserve and the European Central Bank, have the potential to impact global financial markets. Adjustments in these interest rates can influence foreign exchange rates, investment flows, and overall market conditions. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, our interest income from client funds amounted to RMB313.0 million, RMB537.0 million, RMB644.1 million, RMB333.6 million, and RMB243.8 million, respectively, our interest income from client funds in the PRC amounted to RMB194.4 million, RMB164.2 million, RMB195.5 million, RMB100.7 million, and RMB81.1 million, respectively, and our interest income from client funds overseas amounted to RMB118.6 million, RMB372.8 million, RMB448.7 million, RMB232.9 million, and RMB162.7 million, respectively. A decline in interest rates may have a negative impact on

RISK FACTORS

our interest income and could adversely affect our financial condition and results of operations. For further details of how interest rates can affect our business, please see “Financial Information – Factors Affecting Our Results of Operations – Interest Rates.”

Our historical growth rates may not be indicative of our future growth, which makes it difficult to evaluate our future prospects.

Founded in 1996 and headquartered in Hangzhou, China, we are a leading futures company in the PRC, providing global financial services to clients. Our operating income in 2022, 2023 and 2024 and for the six months ended June 30, 2024 and 2025 amounted to RMB954.4 million, RMB1,292.9 million, RMB1,354.8 million, RMB674.9 million, and RMB593.1 million, respectively. Our operating profit increased by 64.5% from 2022 to 2023, and further by 6.5% in 2024. For the six months ended June 30, 2024 and 2025, our operating profit remained relatively stable, amounting to RMB270.3 million and RMB258.6 million, respectively. However, our historical growth rates may not be indicative of future growth, and we cannot assure you that we will maintain similar growth rates. Our efforts may prove more costly than anticipated, potentially hindering our ability to increase operating income sufficiently to offset higher expenses.

We may face challenges in managing our expansion effectively. Continuous growth could increase the complexity of our business and strain our management, operations, technical systems, financial resources, and internal control functions. Our current and planned personnel, systems, resources, and controls may not be sufficient to support and manage our future operations effectively.

You should consider our business and prospects in light of the risks and uncertainties that growing companies in an evolving and extensively regulated industry may encounter. These risks and challenges include, among other things, our ability to:

- Sustaining growth in the future
- Navigating a complex and evolving regulatory environment as well as economic condition and fluctuation
- Offering competitive financial services
- Offering attractive commission rates while fostering business growth and profitability
- Maintaining and enhancing relationships with business partners
- Enhancing our technological infrastructure to support business expansion while ensuring security and confidentiality
- Improving operational efficiency

RISK FACTORS

- Attracting, retaining and motivating talented employees to support business growth
- Defending against legal and regulatory actions

As we continue to grow, especially with international expansion, we may face challenges in maintaining our culture to meet the needs of our future and evolving operations. Failure to maintain our culture could have a material adverse effect on our business.

Our business may be materially and adversely affected by global and regional market and economic conditions and other factors beyond our control.

Our business is dependent on the market and economic conditions in the jurisdictions where we operate and across the globe, as substantially all of our revenue is derived from the financial markets in China, Hong Kong, the United States, Singapore, and the United Kingdom. Our business is subject to macroeconomic and monetary policies of the jurisdictions we operate in, legislation and regulations affecting the financial services industry, volatility in the futures, derivatives, commodities and other financial markets, fluctuations in the value of the portfolio investment funds we invested in, upward and downward trends in the financial sectors, import and export volumes, inflation, currency fluctuations, availability of short-term and long-term market funding sources, cost of funding and the level and volatility of interest rates. Our businesses are also directly affected by the risks inherent in the financial markets, such as market volatility, investment sentiments, fluctuations in trading volumes, and supply of liquidity. As the global financial market conditions may adversely affect financial market conditions in the jurisdictions we operate, any sudden and dramatic changes in global and local financial market conditions could materially and adversely affect our results of operations and financial condition.

Downturns in general economic conditions and adverse market conditions in the jurisdictions where we operate may result in declines in trading volume and turnovers by our clients and general trading activities in the financial markets, which could adversely affect our income. General global economic and market conditions may materially affect the general economic and market conditions in the PRC and in turn affect the PRC futures market and hence our operations and financial condition. Recent trade frictions have introduced a degree of volatility into the global finance market, which may impact our business. These changes can lead to increased costs for businesses and a slowdown in economic growth, all of which could affect market sentiment and trading volumes. In particular, heightened trade tensions may result in fluctuations in commodity prices and increased market volatility, creating challenges for our operations. Consequently, our ability to execute trades effectively and manage client positions might be impacted, potentially leading to decreased revenue and profitability in our business. The interconnectedness of global markets suggests that these disruptions could have a cascading effect, further complicating the challenges we face in the financial markets where we operate.

In addition, under unfavorable financial or economic conditions, the value of our wealth management portfolio may be adversely affected, which may, in turn, reduce the management fees and performance-based compensation we could earn from our wealth management business. Furthermore, we may be faced with an influx of client redemptions in our wealth management portfolio, which, in turn, could also adversely affect the revenue from our wealth management business. Moreover, our commodity trading and risk management services business may also be adversely affected by the reduction in the value of our trading and investment positions.

RISK FACTORS

Commission fees from our PRC futures brokerage business constitute a significant portion of our operating income. Any decline or slowdown in our commission fee income may materially and adversely affect our business, financial condition and results of operations.

In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, net commission and fee income from our PRC futures brokerage business amounted to RMB350.4 million, RMB404.3 million, RMB300.0 million, RMB155.3 million, and RMB113.1 million, respectively, representing approximately 36.7%, 31.3%, 22.1%, 23.1% and 18.9% of our operating income for the same periods, respectively. Our commissions fee income is directly influenced by our commission rates and the futures trading volume of our clients. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, our average brokerage commission rates in the PRC futures brokerage business amounted to 0.275 bps, 0.334 bps, 0.225 bps, 0.265 bps, and 0.158 bps, respectively. There is no assurance that our commission rate may not decrease in the future. The development in China's futures industry and rising competition in futures brokerage are causing a decline in fee rates. We may also fail to adapt to new technologies, particularly, the internet trading that keeps evolving and affecting the overall competitive landscape of the futures industry. Trading volume is subject to various factors beyond our control, including, among others, general economic conditions, macro-economic and monetary policies in China and overseas, volatility of commodity markets and securities market conditions, fluctuations in interest rates and investor behavior. Adverse changes in these factors can lead to a futures market downturn, reduced activity, and lower investor confidence, resulting in decreased trading volume. While we intend to further diversify our business portfolios, we expect that the brokerage commission fees income will continue representing a substantial portion of our revenue. As a result, any decline in brokerage commission fees we generate materially and adversely affect our business, financial condition and results of operations.

If we lose access to any of the futures exchanges that we are a member of, our ability to undertake some or all of our clearing services would be affected.

We have membership to all six of the futures exchanges in China and 16 of the overseas exchanges. Our memberships with these futures exchanges allow us to generate revenue through commissions earned on executing and clearing trades. In order to maintain these memberships, we are required to comply with the rules of the relevant exchanges. We have in the past been, and may in the future be, subject to inquiries or actions by exchanges for non-compliance with applicable rules. If we fail to comply with such rules or default on our membership obligations (for example, by failing to pay the required margin), we may be subject to potential actions from such exchanges including warnings, monetary penalties, suspension or cancellation of membership. If we lose some or all of our memberships, or if any of the relevant exchanges cease their operations, we would lose access to these revenue streams.

If any exchange implements structural changes, such as adverse fee structures or higher margin requirements, our business could be adversely affected. If the exchanges relax membership requirements, certain of our clients may decide to become members, and the demand for our services may decline as a result, in turn adversely affecting our business, financial condition, results of operations and prospects.

RISK FACTORS

Our operations may be adversely affected if we fail to obtain or renew necessary licenses, permits and approvals for conducting a particular business or offering specific products. The suspension or termination of any of our licenses, permits or approvals may have a negative impact on our business.

We operate in a highly regulated financial industry where many aspects of our business depend upon obtaining and maintaining the necessary approvals, licenses, permits or qualifications from relevant PRC and overseas regulators. We are required to comply with the relevant regulatory requirements when applying for approvals, licenses or permits for conducting new business or offering new products. As the legal system and financial services industry in the jurisdictions where we operate continue to evolve, it is difficult for us to comply with the changing regulatory requirements. In addition, further regulatory approvals, licenses, permits or qualifications may be required in the future, and some of our current approvals, licenses, permits or qualifications are subject to periodic renewal. If any of our business activities fail to meet the regulatory requirements, or if we fail to obtain or renew the required permits, licenses, approvals or qualifications, our business, financial condition and results of operations may be materially adversely affected.

The following are risks associated with each of our four business segments: PRC futures brokerage business, PRC risk management services, PRC wealth management business and overseas financial services.

Risks Relating to Our PRC Futures Brokerage Business

Operating income from our PRC futures brokerage business constitutes an important component of our operating income.

Operating income from our PRC futures brokerage business was an important component of our operating income during the Track Record Period. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, operating income from our PRC futures brokerage business represented 56.2%, 44.2%, 36.5%, 38.1%, and 32.1% of our operating income for the same periods, respectively. This revenue source is dependent on client trading volumes. A decrease in trading volumes could adversely affect our business and results of operations.

The trading volume of futures and derivatives transactions is affected by a number of market factors, including those described under “– Our business may be materially and adversely affected by global and regional market and economic conditions and other factors beyond our control.” Factors affecting trading volume on the futures and derivatives market are complex and difficult to predict. For example, trading volume on futures exchanges tends to increase during periods of market uncertainties due to increased hedging activities and the needs to manage the risks associated with, or to speculate on, volatility in the commodity markets. In addition, the introduction of new futures and derivatives products on the market may also increase trading volume. However, a slowdown in futures and derivatives trading activities due to reduced volatility of commodity prices, changes in trading rules or other factors could cause futures trading volume to decrease. Any reduction in trading volumes could have a material and adverse effect on our business, financial condition and results of operations.

RISK FACTORS

While we continue to diversify our business and expand overseas, our futures brokerage business is expected to remain our important component of revenue and cash flow in the near future. As a result, any decline or slowdown in our futures brokerage business could have a material and adverse effect on our results of operations, financial condition and prospects.

Our PRC futures brokerage business is concentrated in Zhejiang and Guangdong provinces, as well as Shanghai, and our business, financial condition and results of operations may be materially and adversely affected by a significant deterioration in our PRC futures brokerage business in Zhejiang and Guangdong Provinces and Shanghai.

Our business originated in, and has historically been focused on, Zhejiang Province, and further expanded to Guangdong Province and Shanghai, and other provinces, municipalities, and autonomous regions in China and overseas. As of June 30, 2025, we had 39 branch companies and branch offices (comprising 28 branch offices and 11 branch companies) in China, among which 10 were located in Zhejiang Province, five were located in Guangdong Province, and three were located in Shanghai. We derived a majority of our PRC futures brokerage commission fee income from our business in Zhejiang and Guangdong Provinces and Shanghai. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, 78.0%, 77.1%, 65.5%, 69.3%, and 56.9%, respectively, of our PRC commission fee income originated from Zhejiang and Guangdong Provinces and Shanghai.

The significant change of the businesses and the financial conditions of our customers in Zhejiang and Guangdong Provinces and Shanghai will affect their ability and willingness to trade in the futures markets. If our presence in Zhejiang and Guangdong Provinces and Shanghai weakens or if we cannot compete against other futures companies in these locations, may be challenged by loss in our commission fee income and reduction of client equity. Our business, financial condition and results of operations may be materially and adversely affected as a result.

We may face financial losses and regulatory risks if we fail to exert our risk management measures in relation to futures brokerage business.

We face risks associated with futures brokerage business in client account opening and trading activities. While we have established risk management systems in line with legal requirements such as the suitability principles for the account opening process, there is no guarantee that such measures will be complied with all the time during daily operation. Failure to exert our internal control measures may subject us to reputation damages or inspections, fines and penalties imposed by competent authorities.

Furthermore, we require our clients to maintain margin deposits in their accounts opened with us for futures trading. We also require the client margin rate for a particular futures product to be greater than the minimum margin rate set by the futures exchanges. At the end of each trading day, the client's account is adjusted to reflect the client's gain or loss, a practice referred to as "marking to market" the account. If the balance in the client's brokerage account falls below the margin balance as calculated against our margin requirements, we issue a margin call and request that the client either brings the account balance up to the margin requirement, or closes out the position voluntarily. If the clients do not fulfill the margin call in a timely manner, we may under our brokerage service contracts with the clients close out the position by executing a reverse transaction that neutralizes the existing contract.

RISK FACTORS

Our ability to close our client positing under such circumstances is affected by market volatilities. In case of thin trading, marked by a limited number of market participants and an imbalance between buy and sell orders, we may face challenges in locating a counterparty willing to assume the opposite position. Due to the lack of market liquidity, we may be unable to timely and effectively implement a series of risk control measures such as forced liquidation when a client has insufficient margin and is unable to add more margin. In this case, we need to initially cover the client's insufficient margin, but if the client is unwilling or unable to return the funds advanced by us on their behalf according to the contract, it may result in us facing potential losses. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, we used RMB5,902.7, nil, RMB490,557.9, nil, and nil, respectively, from the risk reserve to cover the loss from a margin call. In addition, such mandatory liquidation mechanism may trigger disputes between us and our clients and subject us to litigation risks.

Risks Relating to Our PRC Risk Management Services

In our PRC risk management business, we generate income from transactions on derivatives and investment gains from hedging under OTC derivatives, from spread between the purchase and sale of commodities or assets and investment gains on derivatives instruments under basis trading, and receive revenue by capturing the gains from the price differences between the bid price buyers are willing to purchase the asset and the ask price sellers are willing to sell the asset under market making. We are challenged by various risks associated with our PRC risk management businesses, which may materially and adversely affect our results of operations, financial condition and prospects:

We may suffer losses from market risks, operation risks, credit risks, and liquidity risks in our OTC derivatives business.

In our OTC derivatives business, we offer our counterparty clients non-standardized financial contracts such as options, swaps, and forwards. We face market risk when hedging OTC derivatives. Unfavorable asset price movements can lead to losses. We also face operation risks from employee errors during the transaction due to inadequate training or system failures. We encounter credit risks if a counterparty defaults and default risks may arise from events or circumstances that are difficult to detect or foresee. We may also fail to receive all relevant information with respect to the credit risks of our clients and counterparties. We are also challenged by liquidity risks when market illiquidity prevents effective hedging. If the market lacks sufficient liquidity for our hedging instruments, trading at desired prices or quantities may not be possible, leading to higher hedging costs or under-hedging.

RISK FACTORS

We may suffer losses from market risks, operation risks, credit risks, and inventory risks in our basis trading business.

In our basis trading business, we analyze commodity and futures markets to hedge risks and seize arbitrage opportunities for gains. Our success relies on market price forecasts and investment experience, driven by human judgment and assumptions. If our decisions fail to minimize losses or our predictions are inaccurate, our hedging and arbitrage may not succeed. If we cannot match the categories and structure of futures and derivatives with the existing basis trading strategy, we will be unable to fully implement the investment strategy set for basis trading, which may lead to losses during the trading process. Similar to our OTC derivatives business, we face operation risks from employee errors or misconduct, as well as credit risks if counterparties are unable to fulfill their obligations due to financial instability or intentional default.

Separately, we engage in physical commodity trades with our clients in our basis trading business, under which we hold legal titles to commodities before delivery to counterparties pursuant to relevant contracts. If there is any loss to the commodities as a result of various factors, such as storage losses, fire and natural disaster, we may be unable to meet our contractual obligations to counterparties and may be subject to legal liabilities and material losses. In addition, the insurance for such commodities may not be sufficient to cover our losses.

We may suffer losses from model risks, operation risks, and liquidity risks in our market making business.

In our market making business, we provide continuous or responsive quotes for specific futures, options, and other derivative contracts, in accordance with the relevant exchange regulations. We may experience significant trading losses from our market making activities. Our trading model is used to provide continuous buy and sell quotes for on-exchange futures and options, which are subject to price volatility. Discrepancies between the assumptions of our trading model and actual market conditions, or flaws in the model's implementation, may lead to inaccurate predictions of market behavior, affecting our trading decisions and profitability. Additionally, similar to our OTC derivatives and basis trading businesses, we face operation risks when employees make errors or improperly handle the information technology systems used for market making. We also face liquidity risks if we are unable to execute trades at desired prices or quantities in a thin trading market.

Our broad-based and generic product offering may result in lower premium income or investment returns compared to peers with a more focused product portfolio.

We have developed a broad-based product portfolio that covers multiple sectors, including energy and chemicals, ferrous metals, agricultural products, and non-ferrous metals. This differs from certain peers who focus on specific commodities. It exposes us to competition from a wide array of financial services firms, including niche competitors who maintain a specific focus on high-margin, specialized markets. The competition for general products and services may place downward pressure on pricing and could limit our ability to command higher premiums. As a result, our diversified product strategy may limit our ability to achieve higher premium income or investment returns that can be associated with more specialized or in-demand products, such as lithium carbonate or nickel.

RISK FACTORS

There is no assurance that our approach will consistently deliver returns comparable to those of market participants with a targeted focus on particular commodities. A specialized strategy may, at times, lead to higher profitability overall. As a result, our financial performance and investment returns could be lower than those of peers with a more concentrated strategy, which may adversely affect our overall profitability and competitive position.

Risks Relating to Our PRC Wealth Management Business

Increased competition, unsatisfactory performance of or a significant reduction in our AUM, reduced fee rates, or compliance risk may affect the profitability of our mutual funds business.

We face increased competition in mutual funds business. As of August 31, 2025, there were over 150 companies licensed to carry out mutual funds business in China. Market participants also include securities companies, insurance asset management companies, and asset management institutions specializing in the management of privately raised securities investment funds which may engage in mutual funds business under certain circumstances, which intensifies market competition. Our profitability is also affected by market fluctuations, poor investment choices, and inadequate management, impacting the scale and performance of our operations. As of December 31, 2022, 2023 and 2024 and June 30, 2025, we had under our management 14, 15, 19 and 20 mutual fund products, with an AUM of RMB11,697.6 million, RMB17,254.7 million, RMB14,804.8 million, and RMB21,526.9 million, respectively, and our management fee rate for the mutual fund products ranged from 0.1‰ to 1.7% of the AUM. We are exposed to operation risks arising from potential failures in internal procedures, personnel, or systems, as well as external events. Furthermore, there may occur violations of laws, regulations, fund contracts, or internal policies by us or our employees due to inadequate internal controls, insufficient employee training, or a lack of awareness of regulatory requirements. This may result in legal sanctions, regulatory penalties, significant financial losses, and reputational damage.

Unsatisfactory performance of or a significant reduction in our AUM may materially and adversely affect our asset management business.

We receive fees based on the size of each asset management scheme and may earn performance fees for certain schemes. As of December 31, 2022, 2023 and 2024 and June 30, 2025, we had under our management 17, 24, 14 and 20 asset management schemes, with an AUM of RMB732 million, RMB1,283 million, RMB159 million, and RMB255 million, respectively, and our management fee rate for the asset management schemes ranged from 0.2% to 2.0% of the AUM. Investment performance affects our AUM, client retention, and new business acquisition. Factors such as market fluctuations, investment risks, and decisions can cause products to underperform, affecting client trust and business revenue. Our asset management performance also depends on our personnel's skills, internal systems, and external events. The expertise and judgment of our employees influence investment outcomes. Operational failures due to negligence or misconduct can lead to losses and underperformance. The departure of key investment managers can diminish our capabilities, causing clients to redeem investments and reducing our revenue.

RISK FACTORS

The following factors could adversely affect our asset management business and revenue:

- Clients may withdraw funds, reducing our management fees;
- Growth of new clients might fall short of expectations;
- Clients may demand lower fees for our services; and
- Performance fees, based on investment returns, could decline.

Our asset management business faces challenges due to limitations in client reach, assets under management, distribution channels, and capital strength compared to other financial institutions. Increased competition from various financial entities in China may lower our asset management performance and impact revenue. Market volatility, adverse economic conditions, failure to outperform competitors, or regulatory changes could reduce our AUM and affect the performance of managed assets, thereby affecting our management or performance fees.

Our failure to identify and disclose the risks in third parties in our wealth management business may have adverse effect on our client relationships and business and may expose us to significant reputational and legal risks.

We use qualified financial intermediaries to market our wealth management products to a broader client base. We have limited control over the conduct of our intermediaries as they are third parties that are not fully under our supervision and management. If our intermediaries mislead customers, execute unauthorized trades, or conduct other illegal or improper activities that are difficult to detect and deter and which may result in great losses to customers, we may be subject to legal disputes and regulatory investigations even though we do not control our intermediaries' activities.

Furthermore, we sell publicly and privately issued securities investment funds developed by third-party financial institutions. These investment funds may have complex structures and involve various risks, including credit, interest, liquidity and other risks. Our risk management policies and procedures may not be fully effective in identifying the risks inherent in these investment funds, and our employees may fail to fully disclose such risks to our customers. These factors may cause our clients to suffer significant losses as a result of their investment in securities investment funds that are too risky for their risk tolerance and investment preferences. This may subject us to regulatory measures and fines, client complaints and litigations, which in turn could harm our reputation, client relationships, business and prospects.

As such, if we fail to identify the risks in intermediaries or disclose risks associated with third-party securities investment funds, there may be adverse effect on our business and may expose us to significant reputational and legal risks.

RISK FACTORS

Our ability to achieve profitability in our PRC wealth management business is subject to various risks and uncertainties and we may continue to incur operating losses in connection with our PRC wealth management business.

We may continue to incur operating losses in connection with our PRC wealth management business. Our PRC wealth management business recorded operating losses of RMB11.6 million, RMB9.2 million, RMB3.3 million, RMB4.7 million and RMB10.9 million in 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, respectively. Our ability to achieve and sustain profitability is subject to various risks and uncertainties, including but not limited to:

- **Changes in AUM:** Our operating income is dependent on the level of AUM in both our asset management and mutual fund services. A significant reduction in AUM, whether as a result of market fluctuations, client redemptions, or changes in client risk preferences, may materially and adversely affect our revenues.
- **Changes in Number of Funds or Schemes under Management:** A decrease in the number of asset management schemes or mutual and target funds under our management directly impacts our fee income and operating results.
- **Strategic Adjustments and Business Clean-up:** Our decision to prudently clean up or exit certain business lines, such as bond-related operations under the PRC asset management business, may lead to a temporary or prolonged decline in operating income under the PRC wealth management business.
- **Substantial Fixed Costs:** We incur significant fixed costs to support our ongoing business operations, including costs associated with licensing, compliance, IT infrastructure, staff, and office expenses. If our business scale or AUM does not increase sufficiently to absorb these fixed costs, we may continue to experience operating losses.

As a result of the above factors, there can be no assurance that we will not incur further operating losses in the future. Our inability to effectively manage these risks could have a material adverse effect on our business, financial condition, and results of operations.

Risks Relating to Our Overseas Financial Services

We provide overseas financial services business through HGNH International and its subsidiaries in Hong Kong, the United States, Singapore, and the United Kingdom. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, operating income from our overseas financial services business amounted to RMB231.1 million, RMB567.3 million, RMB654.2 million, RMB321.0 million, and RMB326.9 million, respectively. Below sets forth risks associated with our overseas financial services business:

RISK FACTORS

Operating in international markets increases our operational, regulatory and other risks.

Our provision of overseas financial services and plan to continue expanding our international operations expose us to additional risks, including, but not limited to, the following:

- difficulties in managing international operations, including complying with various regulatory and legal requirements of different jurisdictions, and obtaining approvals and necessary licenses;
- litigation risks, reputational damage to our brand image, and financial damage due to failure of our overseas subsidiaries to comply with local regulatory and legal requirements;
- operation risks due to failure to follow client instructions or investment strategies;
- challenges in keeping up with the constantly changing international financial market landscape and the competitive dynamics of the global financial services industry;
- challenges in providing products, services and support, in recruiting in these overseas markets, and in managing our sales channels and any overseas distribution networks effectively;
- differences in accounting treatment in different jurisdictions, potential adverse tax implications and foreign exchange losses;
- our failure to recover the margin we advanced for clients;
- inability to effectively enforce contractual or legal rights; and
- changes in laws, regulations and policies as well as political, economic and market instability or civil unrest in the relevant jurisdictions.

Our overseas financial services businesses are subject to diverse regulatory frameworks, market practices, and client bases, which may expose us to unique factors absent in the domestic market. Fluctuations in the performance of our overseas financial services businesses, particularly the overseas futures business, could adversely impact our revenue. If we are unable to effectively manage these risks, our ability to expand our international business will be impaired, which could have a material and adverse effect on our business, financial condition and results of operations. See “– General Risks Relating to Our Business and Industry – We may not be successful in expanding our business, and the expansion of our business may not produce the intended results.”

RISK FACTORS

Geopolitical tensions could have a material adverse effect on our overseas business.

Given our strategy of global expansion, changes in geopolitical relationships could have a significant impact on our business, financial condition, results of operations, and prospects. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, operating income from our overseas financial services business amounted to RMB231.1 million, RMB567.3 million, RMB654.2 million, RMB321.0 million, and RMB326.9 million, respectively, representing 24.2%, 43.9%, 48.3%, 47.6% and 55.1% of our operating income during those periods, respectively. Segment operating profit from our overseas financial services amounted to RMB132.3 million, RMB397.1 million, RMB466.2 million, RMB228.7 million, and RMB241.3 million, representing 44.7%, 81.6%, 89.9%, 84.6%, and 93.3% of our operating profit in 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, respectively. As geopolitical relationships become more strained, we may face difficulties in expanding overseas and experience higher costs in enlarging our client base. Businesses and investors may prefer to work with companies based in countries they view as being more politically aligned with their own, potentially affecting our growth and market share.

As we expand our overseas business, we might encounter some regulatory scrutiny and varying treatment from local companies. In certain countries, governments may implement stricter regulations or establish barriers for foreign companies, reflecting a protective stance. This could be manifested in several ways:

- *Geographical Limitations:* Geopolitical tensions may influence our operational landscape, potentially affecting the types of services we can offer and the markets we can access. This could present challenges to our business expansion in foreign jurisdictions.
- *Decreased Collaboration with Overseas Clients:* Increased geopolitical tensions may affect the willingness of local clients overseas to collaborate with non-local companies. This could lead to fewer partnerships and potentially limit business opportunities in international markets.
- *Decreased Demand for Overseas Financial Services:* As non-local companies face greater scrutiny and challenges when expanding internationally, there may be a decrease in the number of businesses seeking overseas financial services. This shift in demand could affect our revenue and growth potential in international markets.
- *Licensing Difficulties:* We might face some challenges in obtaining or renewing the necessary licenses to operate in certain countries. Regulatory bodies could experience delays in approvals, apply stricter conditions, or occasionally deny our applications, regardless of our qualifications.
- *Operational Restrictions:* There could be limitations on the types of services we can offer, the clients we can serve, or the manner in which we conduct our business in particular jurisdictions.

RISK FACTORS

- *Increased Compliance Costs:* We may need to allocate additional time and resources to comply with new or changing regulations specifically targeting non-local companies or companies operating in certain sectors.

These regulatory challenges could elevate our operating costs, restrict our ability to expand into new markets, and potentially harm our reputation.

General Risks Relating to Our Business and Industry

The use of our Chinese name in this prospectus and the use of it in the course of trade or business in Hong Kong may be challenged due to potential trademark infringement and passing off.

We commenced our business in 1996 under the name of “浙江南華期貨經紀有限責任公司”, which we changed to “南華期貨經紀有限公司” in August 2005, to “南華期貨有限公司” in April 2009, and further changed to “南華期貨股份有限公司” in October 2012. We established the subsidiary Nanhua Futures (Hong Kong) Co., Limited (南華期貨(香港)有限公司), which was approved by SFC to engage in Type 2 regulated activity (dealing in futures contracts) in October 2007 and further approved by SFC to engage in Type 5 regulated activity (advising on futures contracts) in November 2010. We had used the company names with “南华,” “南華,” “Nanhua,” and variances in Hong Kong, covering the services of our business in Hong Kong, including futures services, securities brokerage, and asset management.

On December 10, 2014, South China Financial Holdings Limited, a Hong Kong company listed on the Stock Exchange (SEHK: 00619), and its subsidiaries (the “**South China**”) initiated a lawsuit in the Hong Kong High Court against our subsidiaries, formerly known as Nanhua Futures (Hong Kong) Co., Ltd., Nanhua Asset Management (Hong Kong) Corporation Limited (南華資產管理(香港)有限公司), Nanhua Forex (Hong Kong) Company Limited (南華外匯(香港)有限公司), Nanhua Securities (Hong Kong) Company Limited (南華證券(香港)有限公司), Nanhua Investment Advisory (Hong Kong) Company Limited (南華投資顧問(香港)有限公司), Nanhua Commodity (Hong Kong) Company Limited (南華商貿(香港)有限公司) and our Company on December 10, 2014 and January 15, 2015, respectively, seeking to prohibit our subsidiaries from using the name “南华” and “Nanhua” and any variances in the company names in Hong Kong. South China Financial Holdings Limited and its group of companies will herein be referred to as “South China”. In 2015, Nanhua Futures (Hong Kong) Co., Limited changed its name to HGNH International Finance Co., Limited and further changed its name to HGNH International Futures Co., Limited, Nanhua Asset Management (Hong Kong) Corporation Limited to HGNH International Asset Management Co., Limited, Nanhua Forex (Hong Kong) Company Limited to HGNH International Forex Co., Limited, Nanhua Securities (Hong Kong) Company Limited to HGNH International Securities, Nanhua Investment Advisory (Hong Kong) Company Limited to HGNH International Investment Advisory Company Limited and further to HGNH International Financial Corporation Limited, and Nanhua Commodity (Hong Kong) Company Limited to HGNH International Commodity Co., Limited. In December 2015, we reached settlement with South China and paid the compensation and litigation costs, and cancelled the relevant registered trademarks in full and final settlement of the lawsuit.

RISK FACTORS

To minimize any potential risks of legal proceedings, the Group carries on business in Hong Kong as “橫華國際” and have taken certain measures, such as:

- (i) not making use of the name comprising “南华”, “南華” or “Nanhua” in the course of any business carried on by us in Hong Kong save and except for using such words or equivalent phrases for the purpose of identifying that certain subsidiaries are group companies of our Group and/or part of our Group based in Chinese mainland;
- (ii) the registration of “橫華國際” as our business name in Hong Kong; and
- (iii) we have also provided guidelines to our employees that they should introduce our Company to our potential clients in the name of “橫華國際” in Hong Kong; and they should use the name of “橫華國際” for all external communication in Hong Kong;

there is no guarantee that even with the steps and measures as described above, South China will not make any future claim against us. Intellectual property rights litigation can be costly and time-consuming, and could divert our management’s attention from business operations. In addition, should we be held liable for trademark infringement, our reputation as well as our business, financial condition and results of operations may be materially and adversely affected. Separately, by adopting a business name in Hong Kong that is different from our corporate names in Chinese mainland, we may not be able to benefit from our well-known brand name in China.

The financial services industry is highly competitive, and we face intense competition in all of our business lines.

The financial services industry is highly competitive, and we expect competition to continue to intensify in the future, especially if the PRC government and the governments of other jurisdictions where we operate relax the relevant regulatory requirements. As of August 31, 2025, there were over 150 futures firms in China.

We have encountered intensive competition in all our business lines. Our competitors in China include, but not limited to, other futures companies, securities companies, fund management companies, and investment banks. We face competition in terms of pricing, geographic coverage of branch networks and the financial strengths and market positions of controlling shareholders. Our competitors in our overseas markets include large financial groups, wealth management institutions, and specialized derivative brokerage firms operating globally in a mixed business model. We face competition in terms of brand recognition, marketing and distribution capacity, service quality, financial strength, pricing, talent, information technology and research capabilities. Price competition may lead to an industry-wide trend of decreasing brokerage commission rates, which may force us to lower our commission rates and adjust our other fee structures to maintain our customer base and market share.

RISK FACTORS

We also face increasing competition because of new trading technology currently being developed or which may be developed in the future by both our existing competitors as well as new market entrants. We cannot accurately predict how emerging and future technological changes in Internet trading will affect our operation or the competitiveness of our services. The current mode of our business operations may be subject to intense competition from new technologies that emerge in the future, and if we are unable to adapt to new technological changes in the industry and improve our trading services quickly, we may lose market share and competitive advantage, and our business and prospects may be materially and adversely affected.

Fluctuations in exchange rates could result in foreign currency exchange losses and could materially reduce the value of your investment.

Our operating income from our overseas financial services was RMB231.1 million, RMB567.3 million, RMB654.2 million, RMB321.0 million, and RMB326.9 million, in 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, respectively, accounting for 24.2%, 43.9%, 48.3%, 47.6%, and 55.1% of our operating income for the same periods, respectively. Segment operating profit from our overseas financial services amounted to RMB132.3 million, RMB397.1 million, RMB466.2 million, RMB228.7 million, and RMB241.3 million, representing 44.7%, 81.6%, 89.9%, 84.6%, and 93.3% of our operating profit in 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, respectively. As a result, we are subject to risks associated with fluctuations in foreign exchange rates. We convert our operating income in foreign currencies into Renminbi from time to time. Any appreciation or depreciation of Renminbi against foreign currencies could result in gains or losses from foreign currency conversion transactions.

Moreover, we prepare our consolidated financial statements in RMB for reporting purposes. Assets and liabilities denominated in foreign currencies are translated into RMB amounts at the exchange rate effective at the end of the reporting period. This translation process can lead to recognized gains or losses in our statement of profit or loss, directly affecting our results of operations. In 2022, 2023, and 2024 and for the six months ended June 30, 2024, we recorded exchange losses of RMB10.6 million, RMB1.7 million, RMB8.1 million and RMB3.8 million, respectively, and exchange gains of RMB9.2 million for the six month ended June 30, 2025. We cannot guarantee that future fluctuations in foreign exchange rates would not have a material adverse impact on our financial condition and results of operations. Unfavorable fluctuations may result in consolidated financial statements reflecting significant adverse period-over-period changes, which could adversely affect our results of operations. In addition, to manage our exposure to exchange rate risk, we may need to enter into hedging arrangements and incur relevant costs from time to time. However, there is no assurance that we will be able to mitigate the risk of foreign exchange loss through these arrangements effectively or at reasonable cost.

RISK FACTORS

We may suffer significant losses from credit risks in our main business lines.

We face credit risks from counterparties not fulfilling their contractual obligations across our business lines, including PRC futures brokerage, PRC risk management services, PRC wealth management, and overseas financial services businesses. In PRC futures brokerage business, our clients may fail to meet margin calls due to insufficient balances, forcing us to advance funds, which could lead to losses if our clients do not reimburse us. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, we used RMB5,902.7, nil, RMB490,557.9, nil, and nil, respectively, from the risk reserve to cover the loss from a margin call, respectively. In PRC risk management services business, particularly in OTC derivatives and basis trading, contract defaults by our counterparties may occur because of their financial distress or intentional breaches. In 2022, 2023 and 2024 and for the six months ended June 30, 2024 and 2025, losses over stage three changes amounted to RMB-217,786.9, RMB495,090.2, RMB1,724,040.2, RMB-23,424.97, and RMB402,310.66, respectively. In PRC wealth management business, poor asset selection or management strategies by us or our employees may deteriorate the credit of our investments, lowering yields and impacting our competitiveness against our competitors. We face similar risks in our overseas financial services business but with added complexity in assessing international clients' and counterparties' creditworthiness, especially upstream brokers, due to diverse regulations and varying transparency levels. There is no assurance that we can detect and the credit risks, default risk and risk of fraud of our counterparties, which may result in material and adverse impact on our financial position.

Our investment may not always be profitable and could incur loss.

We generate investment income from various investment activities, such as gains from holding and disposal of contracts in OTC derivatives and basis trading, long-term equity investment, and treasury management. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, we generated net investment gains of RMB101.8 million, RMB94.9 million, RMB70.3 million, RMB30.0 million, and RMB80.0 million, respectively. However, past performance is not indicative of future results, and there can be no assurance that we will achieve investment objectives or maintain profitability in these areas. There is a risk that the profitability of these investments may decline due to market volatility, economic downturns, or unfavorable regulatory changes and such declines in investment performance could result in financial losses for us, affecting our overall financial condition and operational results.

We had net cash outflows from operating activities in the past, which we may continue to experience in the future.

We had net cash outflow from operating activities of RMB700.4 million in 2024 which was primarily caused by the repayment of approximately RMB1,184.8 million of clients' derivative financial instrument performance margins, which were previously included under trade and other payables of current liabilities, resulting in a decrease in margin received from clients of our OTC derivatives business. In the six months ended June 30, 2025, we had net cash outflow from operating activities of RMB442.0 million. This was primarily caused by cash outflows related to net increase in deposits with exchange-clearing organizations and net increase in bank balances held for clients, due to changes in client equity. We cannot assure you that we will not experience liquidity problems in the future. If we fail to maintain sufficient cash, we may not have adequate cash flows to fund our business, operations and capital expenditures, which could have a material and adverse impact on our business, results of operations and financial condition.

RISK FACTORS

We are subject to capital requirements, including the Net Capital requirement, which may restrict our business activities.

According to the CSRC's requirements, our Net Capital may not be less than RMB30 million, the ratio between our Net Capital and risk capital reserves may not be less than 100%, the ratio between our Net Capital and net assets may not be less than 20%, the ratio between our current assets and current liabilities may not be less than 100%, and the ratio between our liabilities and net assets may not be over 150%. Our overseas financial services business is primarily conducted through subsidiaries in Hong Kong, Singapore, London, and Chicago, and we adhere to the regulatory requirements of each jurisdiction. Foreign regulatory authorities may impose various requirements on us, including capital requirements. If we fail to meet regulatory capital requirements, regulatory authorities may impose penalties on us or limit the scope of our business, which could, in turn, have a material and adverse effect on our business, financial condition and operating results. For additional details, see "Regulatory Overview."

A significant decrease in our liquidity could negatively affect our business and reduce client confidence in us.

Maintaining adequate liquidity is crucial to maintaining and expanding our business operations as the majority of our business activities have substantial cash requirements. We meet our liquidity needs primarily through cash generated from operating activities. Reduced liquidity could affect our ability to develop our business, reduce the confidence of our clients or counterparties in us, and result in a loss of business and customer accounts.

Factors that may adversely affect our liquidity position include a significant increase in capital requirements for our businesses, more stringent regulatory requirements for capital, substantial investments, loss of market or client confidence, and other regulatory changes. When cash generated from our operating activities is not sufficient to meet our liquidity or regulatory capital needs, we may need to seek external financing. If the conditions in the credit and capital markets are not favorable, or if there are changes in the regulatory environment, potential sources of external financing could be limited, and our borrowing costs could increase and financing may not be available on terms acceptable to us or at all.

The outflow of client funds could significantly reduce our client equity, which may adversely impact the revenue and profitability of our futures brokerage businesses.

The outflow of client funds would lead to a decrease in our client equity base. This would not only reduce our interest income but could also lead to lower trading volumes, thereby decreasing our commission revenues. Lower client equity may decrease our ability to generate interest income from idle client funds. As of December 31, 2022, 2023 and 2024 and June 30, 2025, client equity in our PRC futures brokerage business stood at RMB19.1 billion, RMB21.2 billion, RMB31.6 billion, and RMB27.3 billion, respectively. As of December 31, 2022, 2023 and 2024 and June 30, 2025, total client equity from our overseas brokerage services (covering securities, futures, and foreign exchange) amounted to approximately HK\$11.9 billion, HK\$12.5 billion, HK\$13.8 billion, and HK\$17.8 billion, respectively.

RISK FACTORS

There is no assurance that we will be able to maintain or grow our client equity. Clients may redeem their funds for various reasons, including periods of significant market volatility or downturns, dissatisfaction with our services, a loss of confidence in our Group or the futures markets in general, or changes in their own investment strategies or financial condition. Consequently, any significant outflow of client funds across our PRC or overseas futures brokerage businesses could have a material adverse effect on our business, financial condition, and results of operations.

Our operational results, financial condition and future outlook may vary due to changes in the fair value of our financial assets at fair value through profit or loss (“FVPL”). This variability is attributed to the inherent uncertainty in use of significant unobservable inputs.

During the Track Record Period, our financial assets at FVPL primarily represented debt securities, financing products and equity instruments. As of December 31, 2022, 2023 and 2024 and June 30, 2025, such financial assets at FVPL amounted to RMB1,476.5 million, RMB2,754.1 million, RMB1,968.1 million, and RMB1,668.7 million, respectively. In valuing these financial assets, we employ significant unobservable inputs such as discount rates, risk-free interest rates, and volatility. Fluctuations in the fair value of these instruments can substantially impact our financial standing and performance. Such valuations necessitate considerable estimates that are subject to change, introducing a degree of uncertainty. External factors, including economic conditions, market interest rate shifts, and capital market stability, which are beyond our control, can significantly influence these estimates. Any divergence from our estimates to actual outcomes could materially and negatively affect our financial results. See “Financial Information – Liquidity and Capital Resources – Assets and Liabilities – Financial Assets at Fair Value through Profit or Loss.”

Operational failure of our employees may expose us to risk of loss.

We face the risk of operational failure caused by employees, such as human errors occurring during the daily operations. Our employees may wrongly input instructions when executing orders and lead to trading losses. In our business, human errors or mistakes may happen when processing orders placed by clients or trading futures and derivatives in our hedging and arbitrage activities. Upon discovery of any human error, we may have to take immediate action to close out any resulting erroneous trade positions. We may also bear losses arising from such erroneous trades. It may not be possible to completely prevent or detect every instance of operational failure in a timely manner with our current internal control measure. Future operational failures could negatively impact our business and reputation, as well as our ability to execute transactions, service clients, and manage exposure to various risks.

Our business is susceptible to the operational failure of third parties.

We face the risk of operational failure or termination of any of the futures exchanges, custodians or other financial intermediaries we use to facilitate our futures trading transactions. Any operational failure or termination of a particular financial intermediary that we use could adversely affect our ability to execute transactions, serve our clients and manage our exposure to various risks. Any disputes or difficulties in cooperating with these financial intermediaries could adversely affect our business operations.

RISK FACTORS

We face increasing risks as a result of business innovation, the failure of which may materially and adversely affect our business, financial condition and results of operations.

We may continue to diversify and grow our business lines and offer new products and services within our traditional and new business lines in response to changes in market trends, market conditions, and regulations in the jurisdictions where we operate. However, there are greater risks and uncertainties associated with innovative business lines and new products or services, particularly in instances where the markets are not fully developed, which may have different operational parameters and risk profiles from our established existing businesses. As a result, these innovative business lines and new products or services may expose us to further potentially challenging risks. For example:

- Due to little historical information and insufficient data about the new market, we may have poor business judgment and inaccurate predictions about profit and loss;
- Due to little historical data and insufficient experience or expertise in offering new products and services and dealing with new counterparties and clients, we may be subject to disputes with or complaints from our customers;
- Initial timetables for the introduction and development of new lines of business and new products or services may not be achieved, and pricing and profitability targets may not prove feasible;
- We may be subject to greater regulatory scrutiny and increased credit risks, market risks and operational risks;
- We may suffer from reputational concerns or even legal disputes with counterparties and clients due to deficiencies in our new products and inadequate levels of services, or due to our dealing with counterparties and clients lacking credibility or experience;
- Our internal controls and risk management may prove to be ineffective with respect to any new lines of business and new products or services;
- We may not be able to hire additional competent qualified personnel to design and manage the offering of a broader range of products and services;
- Our new products and services may not be accepted by our clients or meet our expectation about profitability; and
- We may not be able to obtain sufficient financing from internal and external sources to support our business expansion.

Should any of the risks discussed above occur, our business, financial condition and results of operations, as well as our reputation and prospects may be materially and adversely affected.

RISK FACTORS

We may not be successful in expanding our business, and the expansion of our business may not produce the intended results.

We have established branches in 18 provinces, municipalities, and autonomous regions in China and have established overseas presence to provide our overseas financial services. We have expanded, and intend to further expand, our operations both in China and overseas. We also intend to transition from on-site to online client facing. Such expansion may expose us to additional risks, including, but not limited to:

- We may not be able to establish a presence in saturated markets where our competitors have already established a historical presence and large market shares;
- We may not be able to anticipate competitive conditions in new markets that are different from those in our existing markets, such as market saturation;
- We may be unfamiliar with the local cultural, commercial and operating environments of our new markets;

Our overseas expansion may expose us to below risks, in particular:

- We may experience currency exchange restrictions or costs and exchange rate fluctuations;
- We may face exposure to local economic instability, threatened or actual acts of terrorism and security concerns in general;
- We may not attract sufficient number of new clients due to our limited presence and brand recognition, and particularly in the international market, due to preferences by local populations for local service providers;
- We may experience difficulties in recruiting and retaining qualified personnel, especially in certain international markets, due to increased complexity, distance, time zones, language and cultural differences;
- We may experience economic instability and recessions in the new markets;
- We may have difficulties managing our expanding overseas operations, including compliance with various legal and regulatory provisions in new and unfamiliar foreign jurisdictions;
- We may be exposed to risks of fluctuations in overseas financial markets;
- We may not be able to anticipate potential adverse tax consequences; and
- We may face uncertainty regarding liability for services and content, including ambiguity due to local laws and lack of precedent, which poses challenges, and may encounter difficulties effectively enforcing contractual or legal rights.

RISK FACTORS

See “– Risks Relating to Our Overseas Financial Services – Operating in international markets increases our operational, regulatory and other risks.”

If we are unable to effectively avoid or mitigate these risks, we may have difficulty expanding our business in China and/or overseas, which could have a material and adverse effect on our business, financial condition, operating results and prospects.

If we cannot successfully maintain and increase our client base, our business, financial condition and results of operations could be materially and adversely affected.

Our ability to maintain the size of our client base and the level of client satisfaction with our products and services are critical to our future success. Clients in the financial services industry are sensitive to, among other things, the costs of trading futures and derivatives through us, the quality of our products and services, the availability and security of online trading, the speed and reliability of order execution and breadth and effectiveness of the information we provide. Our service quality, online trading systems, the speed and reliability of order execution, the industry information and analysis we provide, and our product innovation abilities may no longer be satisfactory to our clients. In addition, we may be unable to provide competitive brokerage rate to our clients.

In addition, our clients are not bound to use our products and services and can freely switch to other financial services companies and decrease their trading activities conducted through us at any time. As a result, we may lose our existing clients to our competitors or fail to attract new clients. If any of the foregoing events happen, our business, financial condition and results of operations may be materially and adversely affected.

Any legal or regulatory proceedings against us could be costly and time-consuming to defend or settle and could harm our reputation.

Our business is subject to a variety of litigation and legal compliance risks. The results of legal and regulatory proceedings can be difficult to assess or quantify. Regardless of merit, legal and regulatory proceedings may be both time-consuming and disruptive to our operations and could divert the attention of our management and key personnel from our business operations. Such proceedings could also generate significant adverse publicity and have a negative impact on our reputation and brand image, regardless of the existence or amount of liability. Claimants in such proceedings may seek recovery of large or indeterminate amounts, and the magnitude of potential losses relating to such disputes may remain unknown for a substantial period of time. The cost of defending ourselves in legal disputes or proceedings may be significant and could negatively affect our results of operations. As a result, any significant disputes or proceedings could adversely affect our business, results of operations, financial condition, and reputation.

RISK FACTORS

We may not be able to detect and prevent fraud or other misconduct committed by our clients or other third parties on a timely basis, which may materially and adversely affect our reputation, business, financial condition and results of operations.

We may be exposed to fraud or other misconduct committed by our clients or other third parties, including, among other things, misusing or disclosing confidential information, providing false information, forging corporate seals, misappropriation of client deposits, illegal fundraising, and misrepresentation to clients. These incidents of misconduct could subject us to financial losses and sanctions imposed by governmental authorities, as well as adversely affect our reputation. If such fraud or other misconduct does occur, it may cause negative publicity as a result. Our failure to detect and prevent fraud and other misconduct may have a material adverse effect on our business reputation, financial condition and results of operations.

Our future success depends on our ability to attract, retain and motivate our senior management and key personnel.

The success of our business depends, to a large extent, on the continued services of our senior management and key personnel who possess in-depth knowledge and understanding of, and extensive working experience in, the futures and other financial markets in which we operate. These personnel include members of our core management, experienced brokerage and asset managers, OTC derivatives experts, industry analysts, IT specialists, sales staff and other key employees. We devote considerable resources in recruiting and retaining these personnel. However, the market for quality professionals is highly competitive and we face increasing competition in recruiting and retaining these individuals as other futures companies and financial institutions are competing for the same pool of talent. Intense competition may require us to offer higher compensation and other benefits in order to attract and retain qualified professionals, which could result in additional expenditures. We may be unable to attract or retain these personnel and the failure to do so could severely disrupt our business and prospects.

Some of our employees may resign at any time to join our competitors and may seek to divert client relationships that they have developed while working for us. We cannot guarantee that we will be able to recruit staff in sufficient numbers or with sufficient experience, or that competition in recruitment will not lead to increases in our employment costs. The loss of the services of any of our management team and key personnel or the inability to identify, recruit and retain a sufficient number of qualified staff in the future could materially and adversely affect our business, financial condition and results of operations.

In addition, due to the rapid development of the PRC futures industry, our current professionals' knowledge and skills may be insufficient to meet our needs for product and service innovations, which may adversely affect the development of our business.

Our insurance coverage may not sufficiently cover all losses or potential claims that could affect our business, results of operations and financial condition.

We face various risks in connection with our business and maintain insurance policies to safeguard against these risks and unexpected events related to our operations. Our current insurance coverage complies with mandatory requirements under applicable laws and regulations and aligns with industry

RISK FACTORS

practice. See “Business – Insurance” for the insurances we provide. However, there can be no assurance that our insurance coverage will be adequate to fully protect against all our risk exposures and prevent us from incurring losses. In addition, there is no guarantee that we will be able to successfully claim on our current insurance policies in a timely manner or at all, due to possible exclusions and limitations on coverage. If our insurance coverage is unavailable or insufficient to address any such exposures, we may face substantial costs and resources diversion, which, in turn, could materially and adversely affect our business, results of operations, and financial condition.

Any future force majeure events, natural disasters, acts of war or terrorism, pandemic outbreak, or occurrence of other incidents that are beyond our control may adversely affect our business, results of operations and financial condition.

With operations in multiple jurisdictions, we face various risks and potential interruptions beyond our control in these geographical regions, including natural disasters such as fires, earthquakes, hurricanes, floods, tornadoes, and other severe weather conditions, as well as risks related to pandemic outbreaks, global health emergencies, terrorist acts, or disruptive global political events. The unpredictable nature of these events makes it difficult to predict their frequency, timing, and severity. Any of these occurrences could have a material and adverse impact on our business operations and financial performance. Public health emergencies in any market where we operate, such as swine flu, avian influenza, severe acute respiratory syndrome, or SARS, Ebola, Zika, COVID-19, could cause material fluctuations in the local financial markets, decrease demand for our services, impact the productivity of our workforce, or disrupt the public infrastructure we rely upon in our business, thereby adversely affecting our business and results of operations.

RISKS RELATED TO THE GLOBAL OFFERING

Our A Shares are listed on the Shanghai Stock Exchange, and the characteristics of the A Share and H Share markets may differ.

Our A Shares are listed on the Shanghai Stock Exchange. Following the Global Offering, our A Shares will continue to be traded on the Shanghai Stock Exchange and our H Shares will be traded on the Stock Exchange. Under the current PRC laws and regulations, without the approval from the relevant regulatory authorities, our H Shares and A Shares are neither interchangeable nor fungible, and there is no trading or settlement between the H Share and A Share markets. With different trading characteristics, the H-Share and A-Share markets have divergent trading volumes, liquidity and investor bases, as well as different levels of retail and institutional investor participation. As a result, the trading performance of our H Shares and A Shares may not be comparable. Nonetheless, fluctuations in the price of our A Shares may adversely affect the price of our H Shares, and vice versa. Furthermore, due to the different characteristics of the H Share and A Share markets, the historical prices of our A Shares may not be indicative of the performance of our H Shares. You should therefore not place undue reliance on the trading history of our A Shares when evaluating the investment decision in our H Shares.

RISK FACTORS

There has been no prior public market for our H Shares and there can be no assurance that an active market will develop or be sustained after the Global Offering.

Prior to this Global Offering, there was no public market for our H Shares. The Offer Price is the result of negotiations between us and the Overall Coordinators (for themselves and on behalf of the Underwriters) and may differ significantly from the market price of our H Shares following the Global Offering. We have applied for the listing of, and permission to deal in, our H Shares on the Stock Exchange. A listing on the Stock Exchange, however, does not guarantee that an active and liquid trading market for our H Shares will develop, or if it does develop, will be sustained following the Global Offering or that the market price of our H shares will not drop below the Offer Price at any time after the completion of the Global Offering.

The liquidity and market price of our H Shares may be volatile.

The market price and trading volume of our H Shares may be volatile and fluctuate materially due to various factors, such as the following:

- actual or anticipated fluctuations in our revenues and results of operations;
- news regarding the recruitment or loss of key personnel by ourselves or our competitors;
- announcements of competitive developments, acquisitions, or strategic alliances in our industry;
- changes in earnings estimates or recommendations by financial analysts, regardless of the accuracy of the information on which their estimates are based;
- potential litigations;
- general market conditions or other developments affecting us or our industry;
- the operating and stock price performance of other companies, other industries and other events or factors beyond our control; and
- sales or perceived sales of additional H Shares by us or other Shareholders.

Moreover, the Stock Exchange and other securities markets have from time to time experienced material price and volume fluctuations that were unrelated, or not directly related, to the operating performance of specific companies. These broad market and industry fluctuations may have a material and adverse effect on the market price and trading volume of our H Shares. In addition, the volatility in the trading price and volume of our H Shares may negatively impact our ability to raise capital in the future through the issuance of additional equity securities.

RISK FACTORS

You will incur immediate and substantial dilution and may experience further dilution if we issue additional H Shares in the future.

As the Offer Price of our H Shares is higher than the consolidated net tangible assets per Share immediately prior to the Global Offering, purchasers of our H Shares in the Global Offering may experience an immediate dilution in the pro forma consolidated net tangible asset value. To expand our business, we may consider offering and issuing additional H Shares in the future. Purchasers of the Offer Shares may also experience dilution in the net tangible asset value per Share of their H Shares if we issue additional H Shares in the future at a price lower than the net tangible asset value per Share at that time.

Future sales or the market perception of sales of a substantial number of our H Shares on the public market could adversely affect the trading price of our H Shares.

After the completion of the Global Offering, future sales of a substantial number of our H Shares or other securities relating to our H Shares on the public market, the issuance of new H Shares or other securities relating to our H Shares, or the market perception that such sales or issuances may occur, could adversely affect the market price of our H Shares and our ability to raise future capital at a favorable time and price. We cannot predict the effect of any future sales or market perception of sales of a substantial number of our H Shares on the public market on the market price of our H Shares.

You may experience difficulties in effecting service of legal process and enforcing judgments against us and our management.

The ability to enforce foreign judgments differs across the world. A judgment of a court of another jurisdiction may be reciprocally recognized or enforced if the jurisdiction has a treaty with China or if there are reciprocal relationships between China and such jurisdiction. The recognition and enforcement in China of a court judgment obtained in other jurisdictions related to any matter that is not subject to a binding arbitration provision may be difficult or impossible. We are established under the laws of China, and most of our assets are located in China. In addition, our Directors and senior management reside within China, and most of their assets are located within China. As a result, if a foreign legal action is brought against us, our Directors or senior management, there is no guarantee that such foreign judgment will be enforceable in our home jurisdiction.

On July 14, 2006, the Supreme People's Court of China and Hong Kong entered into the Arrangement on Reciprocal Recognition and Enforcement of Judgments in Civil and Commercial Matters by the Courts of the Mainland and of the Hong Kong Special Administrative Region Pursuant to Choice of Court Agreements between Parties Concerned (《關於內地與香港特別行政區法院相互認可和執行當事人協議管轄的民商事案件判決的安排》) (the “**2006 Arrangement**”). Pursuant to such arrangement, a party with a final judgment rendered by a Hong Kong court requiring payment of money in a civil and commercial case according to a choice of court agreement in writing may apply for recognition and enforcement of the judgment in China, and vice versa. However, it is subject to the parties in the dispute agreeing to enter into a choice of court agreement in writing under the 2006 Arrangement. On January 18, 2019, the Supreme People's Court of China and Hong Kong entered into the Arrangement on Reciprocal Recognition and Enforcement of Judgments in Civil and Commercial Matters by the Courts of the Mainland and of the Hong Kong Special Administrative Region (《關於內地與香港特別行政區法院相互認可和執行民商事案件判決的安排》) (the “**2019 Arrangement**”), which took effect

RISK FACTORS

in January 2024. The 2019 Arrangement will supersede the 2006 Arrangement and afford greater clarity and certainty for reciprocal recognition and enforcement of judgments in civil and commercial matters. The 2006 Arrangement will remain applicable to a “choice of court agreement in writing” entered into before the 2019 Arrangement taking effect. However, there remain uncertainties as to the outcome of any applications to recognize and enforce such judgments and arbitral awards in China.

Although we will be subject to the Hong Kong Listing Rules and the Hong Kong Codes on Takeovers and Mergers and Share Repurchases upon the Listing of our H Shares on the Hong Kong Stock Exchange, the holders of H Shares will not be able to bring actions on the basis of violations of the Hong Kong Listing Rules and must rely on the Hong Kong Stock Exchange to enforce its rules. The Hong Kong Listing Rules and Hong Kong Codes on Takeovers and Mergers and Share Repurchases do not have the force of law in Hong Kong.

We cannot guarantee the accuracy of facts, forecasts, and other statistics obtained from official government sources contained in this prospectus.

Certain facts, forecasts, and other statistics in this prospectus are derived from various official government resources. However, our Directors cannot guarantee the quality or reliability of such source materials. We believe that the sources of the said information are appropriate sources for such information and have taken reasonable care in extracting and reproducing such information. We have no reason to believe that such information is false or misleading or that any fact has been omitted that would render such information false or misleading. Nevertheless, information from official government sources has not been independently verified by us, the Sole Sponsor, the Overall Coordinators, the Joint Global Coordinators, the Joint Bookrunners, the Joint Lead Managers, the Underwriters or any of their respective affiliates or advisers and, therefore, we make no representation as to the accuracy of such facts and statistics. Furthermore, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy as similar statistics presented elsewhere. In all cases, you should consider carefully how much weight or importance should be attached to or placed on such facts or statistics.

You should read the entire prospectus carefully and only rely on the information included in this prospectus to make your investment decision. We strongly caution you not to rely on any information contained in press articles or other media coverage relating to us or the Global Offering.

We strongly caution our investors not to rely on any information contained in press articles or other media coverage regarding us or the Global Offering. Prior to the publication of this prospectus, there may be press and media coverage regarding us, our business, our industry, and the Global Offering. Such press and media coverage may include references to certain information that does not appear in this prospectus, including certain operating and financial information and projections, valuations, and other information. We have not authorized the disclosure of any such information in the press or media and do not accept any responsibility for any such press or media coverage or the accuracy or completeness of any such information or publication. We make no representation as to the appropriateness, accuracy, completeness, or reliability of any such information or publication. To the extent that any such information is inconsistent or conflicts with the information contained in this prospectus, we disclaim responsibility for it, and you should not rely on such information.

RISK FACTORS

We cannot assure you whether and when we will declare and pay dividends in the future.

Our ability to pay dividends will depend on whether we are able to generate sufficient earnings. Distribution of dividends shall be decided by our Board of Directors at their discretion and will be subject to the approval of shareholders at the meeting. A decision to declare or to pay dividends and the amount thereof depend on various factors, including but not limited to our results of operations, cash flows and financial position, operating and capital expenditure requirements, distributable profits as determined under the relevant generally accepted accounting principles, our Articles of Association and other constitutional documents, the PRC Company Law and any other applicable PRC laws and regulations, market conditions, our strategy and projection for our business, contractual restrictions and obligations, taxation, regulatory restrictions, and any other factors from time to time deemed by our Board of Directors as relevant to the declaration or suspension of dividends. As a result, there can be no assurance whether, when, and in what form we will pay dividends in the future. Subject to any of the above constraints, we may not be able to pay dividends in accordance with our dividend policy. See “Financial Information – Dividend”.

Under existing foreign exchange regulations, following the completion of the Global Offering, we will be able to pay dividends in foreign currencies without prior approval from SAFE by complying with certain procedural requirements. However, we cannot assure you that there will be no future changes to these foreign exchange policies regarding payment of dividends in foreign currencies.

Forward-looking statements contained in this prospectus are subject to risks and uncertainties.

This prospectus contains forward-looking statements with respect to our business strategies, operating efficiencies, competitive positions, growth opportunities for existing operations, plans and objectives of management, certain pro-forma information and other matters. The words “aim”, “anticipate”, “believe”, “could”, “predict”, “potential”, “continue”, “expect”, “intend”, “may”, “might”, “plan”, “seek”, “will”, “would”, “should” and the negative of these terms and other similar expressions identify a number of these forward-looking statements. These forward-looking statements, including, amongst others, those relating to our future business prospects, capital expenditure, cash flows, working capital, liquidity and capital resources are necessarily estimates reflecting the best judgment of our Directors and management and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a result, these forward-looking statements should be considered in light of various important factors, including those set out in this section. Accordingly, such statements are not a guarantee of future performance, and investors should not place undue reliance.

RISK FACTORS

You should not place any reliance on any information released by us in connection with the listing of our A Shares on the Shanghai Stock Exchange.

As our A Shares are listed on the Shanghai Stock Exchange, we have been subject to periodic reporting and other information disclosure requirements in China. As a result, from time to time, we publicly release information relating to us on the Shanghai Stock Exchange or other media outlets designated by the CSRC. However, the information announced by us in connection with our A Shares listing is based on regulatory requirements of the securities authorities, industry standards and market practices in China, which are different from those applicable to the Global Offering. The presentation of financial and operational information for the Track Record Period disclosed on the Shanghai Stock Exchange or other media outlets may not be directly comparable to the financial and operational information contained in this prospectus. As a result, prospective investors in our H Shares should be reminded that, in making their investment decisions as to whether to purchase our H Shares, they should rely only on the financial, operating and other information included in this prospectus. By applying to purchase our H Shares in the Global Offering, you will be deemed to have agreed that you will not rely on any information other than that contained in this prospectus and any formal announcements made by us in Hong Kong with respect to the Global Offering.

Holders of our H Shares may be subject to PRC income tax on dividends from us or any gains realized on the transfer of our H Shares.

Under the PRC EIT Law and its implementation rules, subject to any applicable tax treaty or similar arrangement between China and your jurisdiction of residence that provides for a different income tax arrangement, PRC withholding tax at the rate of 10% is normally applicable to dividends from PRC sources payable to investors that are non-PRC resident enterprises, which do not have an establishment or place of business in China, or which have an establishment or place of business in China if the relevant income is not effectively connected with such establishment or place of business. Any gains realized on the transfer of shares by such investors are subject to a 10% (or a lower rate) PRC income tax rate if such gains are regarded as income from sources within China unless a treaty or similar arrangement provides otherwise.

Under the PRC Individual Income Tax Law (《中華人民共和國個人所得稅法》) and its implementation rules, dividends from sources within China paid to foreign individual investors who are not PRC residents are generally subject to a PRC withholding tax at a rate of 20% and gains from PRC sources realized by such investors on the transfer of shares are generally subject to a 20% PRC income tax rate, in each case, subject to any reduction or exemption set forth in applicable tax treaties and PRC laws. It is unclear whether dividends we pay with respect to our H Shares, or the gains realized from the transfer of our H Shares, would be treated as income derived from sources within China and as a result be subject to PRC income tax. If PRC income tax is imposed on gains realized from the transfer of our H Shares or on dividends paid to our non-PRC resident investors, the value of your investment in our H Shares may be affected. Furthermore, our Shareholders whose jurisdictions of residence have tax treaties or arrangements with China may not qualify for benefits under such tax treaties or arrangements.

WAIVERS FROM STRICT COMPLIANCE WITH THE LISTING RULES

In preparation for the Global Offering, we have applied for the following waivers from strict compliance with the relevant provisions of the Listing Rules.

MANAGEMENT PRESENCE IN HONG KONG

Rule 8.12 of the Listing Rules requires an issuer to have sufficient management presence in Hong Kong. This normally means that at least two of the issuer's executive directors must be ordinarily resident in Hong Kong. Currently, none of our executive director resides in Hong Kong. Rule 19A.15 of the Listing Rules further provides that the requirement in Rule 8.12 may be waived by having regard to, among other considerations, the applicant's arrangements for maintaining regular communication with the Hong Kong Stock Exchange.

Since our principal business and operations are in China, our executive Director is based in China as the Board believes it would be more effective and efficient for its executive Director to be based in a location where our operations are conducted. It would be practically difficult and commercially unnecessary for us to relocate our executive Director to Hong Kong for the purpose of satisfying the requirements under Rule 8.12 of the Listing Rules. Therefore, we do not and, for the foreseeable future, will not have executive Director who is ordinarily resident in Hong Kong for the purposes of satisfying the requirements of Rules 8.12 and 19A.15 of the Listing Rules.

Accordingly, we have applied to the Stock Exchange for, and the Stock Exchange has granted us, a waiver pursuant to Rule 19A.15 of the Listing Rules from strict compliance with Rule 8.12 of the Listing Rules, subject to, among other conditions, our appointment of:

- two authorized representatives, Dr. Luo Xufeng and Mr. Zhong Yiqiang, who will act at all times as our principal channel of communication with the Stock Exchange; and
- our compliance adviser, Innovax Capital Limited, who will act as our principal channel of communication with the Stock Exchange, in addition to our authorized representatives, pursuant to Rule 3A.19 of the Listing Rules.

We have made arrangements to maintain effective communication with the Stock Exchange as follows:

- we have appointed Dr. Luo Xufeng and Mr. Zhong Yiqiang as our authorized representatives pursuant to Rule 3.05 of the Listing Rules to serve as the principal channel of communication with the Stock Exchange on our behalf and will be readily contactable by telephone, facsimile and e-mail, and if required, will be able to meet with the Stock Exchange in Hong Kong to discuss any matters in relation to us within a reasonable time frame upon the request of the Stock Exchange;

WAIVERS FROM STRICT COMPLIANCE WITH THE LISTING RULES

- each of our Directors has provided his or her mobile phone number, office phone number, facsimile number and e-mail address to our authorized representatives and the Stock Exchange. In the event that a Director expects to travel and/or otherwise be out of office, he or she will provide the phone number of the place of his or her accommodation to our authorized representatives or maintain an open line of communication via his or her mobile phone. Therefore, our authorized representatives have means of contacting all Directors (including the independent non-executive Directors) promptly at all times as and when the Stock Exchange wishes to contact our Directors for any matters;
- each of our Directors who is not ordinarily resident in Hong Kong possesses or can apply valid travel documents to visit Hong Kong and is able to meet with the Stock Exchange within a reasonable period of time, when required;
- pursuant to Rule 3A.19 of the Listing Rules, we have appointed Innovax Capital Limited as our compliance adviser to serve as an additional channel of communication of us with the Stock Exchange for the period from the Listing Date to the date on which we comply with Rule 13.46 of the Listing Rules in respect of its financial results for the first full financial year commencing after the Listing. The compliance adviser will have access at all times to our authorized representatives, our Directors and other officers of our Company to ensure that they are in a position to provide prompt responses to any queries or requests from the Stock Exchange with respect to us;
- meetings between the Stock Exchange and our Directors could be arranged through our authorized representatives or the compliance adviser, or directly with our Directors within a reasonable time frame. We will also inform the Stock Exchange promptly in respect of any change in the compliance adviser;
- we will also appoint professional advisors (including legal advisors and accountants) after the Listing, if necessary, to assist us in dealing with any questions or queries raised by us and to ensure that there will be efficient communication with the Stock Exchange; and
- the compliance advisor will also advise on the on-going compliance requirements and other issues arising under the Listing Rules and other applicable laws and regulations in Hong Kong after the Listing.

WAIVERS FROM STRICT COMPLIANCE WITH THE LISTING RULES

APPOINTMENT OF JOINT COMPANY SECRETARIES

According to Rule 8.17 of the Listing Rules, the issuer must appoint a company secretary who satisfies Rule 3.28 of the Listing Rules.

According to Rule 3.28 of the Listing Rules, the secretary must be a person who, by virtue of his/her academic or professional qualifications or relevant experience, is, in the opinion of the Stock Exchange, capable of discharging the functions of company secretary. The Stock Exchange considers the following academic or professional qualifications to be acceptable:

- (a) a member of The Hong Kong Chartered Governance Institute;
- (b) a solicitor or barrister (as defined in the Legal Practitioners Ordinance, Chapter 159 of the Laws of Hong Kong); and
- (c) a certified public accountant (as defined in the Professional Accountants Ordinance, Chapter 50 of the Laws of Hong Kong).

In assessing “relevant experience”, the Stock Exchange will consider the individual’s:

- (a) length of employment with the issuer and other issuers and the roles played;
- (b) familiarity with the Listing Rules and other relevant law and regulations including the Securities and Future Ordinance, the Companies Ordinance, the Companies (Winding up and Miscellaneous Provisions) Ordinance and the Codes on Takeovers and Mergers and Share Buy-backs;
- (c) relevant training taken and/or to be taken in addition to the minimum requirement under Rule 3.29 of the Listing Rules; and
- (d) professional qualifications in other jurisdictions.

We have appointed Mr. Zhong Yiqiang (“**Mr. Zhong**”) and Ms. Zhang Xiao (“**Ms. Zhang**”) as joint company secretaries. Mr. Zhong joined our Company in July 2007 and is responsible for ordinary business management of the Board, information disclosure and investor relations management of our Company. Mr. Zhong has a thorough understanding of the operations of the Board and our Company, and has gained experience in handling corporate governance and general administrative matters relating to our Company. Since Mr. Zhong does not possess the professional or academic qualifications as stipulated in Rule 3.28 of the Listing Rules, we appointed Ms. Zhang, who is a Hong Kong resident and possesses the qualification and relevant experience as stipulated under Rule 3.28 of the Listing Rules, as the joint company secretary. For more details of the biographies of Mr. Zhong and Ms. Zhang, see “Directors and Senior Management – Joint Company Secretaries”

WAIVERS FROM STRICT COMPLIANCE WITH THE LISTING RULES

Over a period of three years from the Listing Date, we will implement the following to assist Mr. Zhong to become a company secretary with the requisite qualifications or relevant experience as required under the Listing Rules:

- (a) Mr. Zhong will endeavor to attend relevant training courses, including briefings on the latest changes to the relevant applicable Hong Kong laws and regulations and the Listing Rules which will be organized by our Hong Kong legal advisors on an invitation basis and seminars organized by the Stock Exchange or other relevant organizations for listed issuers from time to time, in addition to the 15 hours minimum requirement under Rule 3.29 of the Listing Rules;
- (b) Ms. Zhang will communicate regularly with Mr. Zhong on matters relating to corporate governance, the Listing Rules and any other laws and regulations which are relevant to our Company and its affairs. Ms. Zhang will also work closely with, and provide assistance to, Mr. Zhong in the discharge of his duties as a joint company secretary, including organizing our Board meetings and Shareholders' meetings, as well as to enable Mr. Zhong to acquire the relevant experience (as required under Rule 3.28 of the Listing Rules); and
- (c) in addition, Mr. Zhong will also be assisted by our compliance adviser, particularly in relation to Hong Kong corporate governance practices and compliance issues, and the Hong Kong legal advisors of our Company, on matters concerning our ongoing compliance with the Listing Rules and the applicable laws and regulations upon Listing.

We have applied to the Stock Exchange for, and the Stock Exchange has granted us, a waiver from strict compliance with the requirements of Rules 3.28 and 8.17 of the Listing Rules, provided that Ms. Zhang will act as a joint company secretary and provide assistance to Mr. Zhong. The waiver is valid for an initial period of three years commencing from the Listing Date, and will be revoked immediately if Ms. Zhang ceases to provide assistance and guidance to Mr. Zhong or if there are material breaches of the Listing Rules by our Company. Prior to the expiry of the initial three-year period, we will re-evaluate the qualifications and experiences of Mr. Zhong. We will demonstrate and seek the Stock Exchange's confirmation before the expiry of the initial three-year period to enable it to assess whether Mr. Zhong, having had the benefit of Ms. Zhang's assistance for three years, has acquired relevant experience within the meaning of Rule 3.28 of the Listing Rules so that a further waiver will not be necessary.

WAIVERS FROM STRICT COMPLIANCE WITH THE LISTING RULES

ALLOCATION OF OUR H SHARES TO EXISTING MINORITY SHAREHOLDERS AND THEIR CLOSE ASSOCIATES

Rule 10.04 of the Listing Rules requires that a person who is an existing shareholder of a listing applicant may only subscribe for or purchase any securities for which listing is sought that are being marketed by or on behalf of a listing applicant either in his/her/its own name or through nominees if the conditions in Rule 10.03 of the Listing Rules are fulfilled, namely that (i) no securities are to be offered to the existing shareholders on a preferential basis and no preferential treatment is given to them in the allocation of the securities; and (ii) the minimum prescribed percentage of public shareholders required by Rule 8.08(1) of the Listing Rules is achieved. Paragraph 1C(2) of Appendix F1 to the Listing Rules states that, without the prior written consent of the Stock Exchange, no allocations will be permitted to be made to directors or existing shareholders of a listing applicant or their close associates, unless the conditions set out in Rules 10.03 and 10.04 are fulfilled.

Chapter 4.15 of the Guide for New Listing Applicants provides that the Stock Exchange will consider giving consent, pursuant to paragraph 1C(2) of Appendix F1 to the Listing Rules, and granting waiver from Rule 10.04 of the Listing Rules to an applicant's existing shareholders or their close associates to participate in an initial public offering if any actual or perceived preferential treatment arising from their ability to influence the applicant during the allocation process can be addressed.

Our A Shares have been listed on the Shanghai Stock Exchange since August 2019 (stock code: 603093). As such, our A Shares are widely held and actively traded.

We have applied to the Stock Exchange for, and the Stock Exchange has granted to us, a waiver from strict compliance with the requirements under Rule 10.04 of, and a consent under paragraph 1C(2) of Appendix F1 to the Listing Rules, to permit H Shares in the International Offering to be placed to certain existing minority A Shareholders who (i) hold less than 5% of the total number of A Shares of our Company in issue prior to the completion of the Global Offering; and (ii) are not and will not become (upon the completion of the Global Offering) core connected persons of our Company or the close associates of any such core connected persons (collectively, the **"Existing Minority A Shareholders"**, and each an **"Existing Minority A Shareholder"**), subject to the following conditions:

- (a) each Existing Minority A Shareholder to whom our Company may allocate H Shares in the International Offering is interested in less than 5% of the total number of A Shares of our Company in issue prior to the completion of the Global Offering;
- (b) each Existing Minority A Shareholder is not, and will not be, a core connected person of our Company or any close associate of any such core connected person upon completion of the Global Offering;
- (c) none of the Existing Minority A Shareholders has the right to appoint any Director and/or any other special rights;
- (d) allocation to the Existing Minority A Shareholders and/or their close associates will not affect our ability to satisfy the public float requirement as prescribed by the Stock Exchange under Rule 19A.13A(2) of the Listing Rules;

WAIVERS FROM STRICT COMPLIANCE WITH THE LISTING RULES

- (e) each of our Company, the Sole Sponsor and the Overall Coordinators shall confirm to the Stock Exchange in writing that, to the best of its knowledge and belief, it has no reason to believe that the Existing Minority A Shareholders or their close associates received any preferential treatment in any allocation in the International Offering by virtue of their relationship with our Company;
- (f) our Company will confirm to the Stock Exchange in writing that no preferential treatment has been, nor will be, given to the Existing Minority A Shareholders or their close associates, nor is the Existing Minority A Shareholder in a position to exert influence on our Company to obtain actual or perceived preferential treatment, by virtue of their relationship with our Company in any allocation in the placing tranche;
- (g) the Overall Coordinators will confirm to the Stock Exchange (in the form satisfactory to the Stock Exchange) that, to the best of their knowledge and belief, no preferential treatment has been, nor will be, given to the Existing Minority A Shareholders or their close associates by virtue of their relationship with our Company in any allocation in the placing tranche; and
- (h) the Sole Sponsor confirms to the Stock Exchange in writing that based on (i) its discussions with our Company and the Overall Coordinators; and (ii) the confirmations provided to the Stock Exchange by our Company and the Overall Coordinators, and to the best of their knowledge and belief, they have no reason to believe that any of the Existing Minority A Shareholders or their close associates received any preferential treatment, or is in a position to exert influence on our Company to obtain actual or perceived preferential treatment in the allocation as a placee by virtue of their relationship with our Company, and details of the allocation to the Existing Minority A Shareholders holding more than 1% of the issued share capital of our Company immediately prior to the completion of the Global Offering will be disclosed in this prospectus and/or the allotment results announcement, as the case may be.

We expect to satisfy all the conditions set out in paragraph 13 of Chapter 4.15 of the Guide for New Listing Applicants so that no actual or perceived preference will be given to the Existing Minority A Shareholders or their close associates due to their existing shareholdings in our Company.

Allocation to the Existing Minority A Shareholders and/or their close associates will not be disclosed in our Company's allotment results announcement unless such Existing Minority A Shareholders are interested in 1% or more of the issued share capital of our Company after the Global Offering, as our A Shares are listed and trading on the Shanghai Stock Exchange, and there are practical difficulties for our Company to ascertain all the Existing Minority A Shareholders.

INFORMATION ABOUT THIS PROSPECTUS AND THE GLOBAL OFFERING

DIRECTORS' RESPONSIBILITY FOR THE CONTENTS OF THIS PROSPECTUS

This prospectus, for which our Directors collectively and individually accept full responsibility, includes particulars given in compliance with the Hong Kong Listing Rules, the Companies (Winding Up and Miscellaneous Provisions) Ordinance and the Securities and Futures (Stock Market Listing) Rules (Chapter 571V of the Laws of Hong Kong) for the purpose of giving information with regard to our Group. Our Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this prospectus is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this prospectus misleading.

RESTRICTIONS ON OFFER AND SALE OF H SHARES

Each person acquiring the Hong Kong Offer Shares under the Hong Kong Public Offering will be required to, or be deemed by his acquisition of Hong Kong Offer Shares to, confirm that he is aware of the restrictions on the offer and sale of the Hong Kong Offer Shares described in this prospectus.

No action has been taken to permit a public offering of the H Shares or the distribution of this prospectus in any jurisdiction other than Hong Kong. Accordingly, and without limitation to the following, this prospectus may not be used for the purpose of, and does not constitute, an offer or invitation in any jurisdiction or in any circumstances in which such an offer or invitation is not authorized or to any person to whom it is unlawful to make such an offer or invitation for subscription. The distribution of this prospectus and the offering and sale of the Offer Shares in other jurisdictions are subject to restrictions and may not be made except as permitted under the applicable securities laws of such jurisdictions pursuant to registration with or authorization by the relevant securities regulatory authorities or an exemption therefrom. In particular, the Offer Shares have not been publicly offered and sold, and will not be offered and sold, directly or indirectly, in Chinese mainland or the U.S.

CSRC FILING

We have filed the required documents with the CSRC, and we received a filing notice from the CSRC dated September 19, 2025, confirming our completion of the filing procedures pursuant to the new filing regime introduced by the new regulations on filing for the Global Offering and the application for listing of the H Shares on the Stock Exchange.

INFORMATION ON THE GLOBAL OFFERING

This prospectus is published solely in connection with the Hong Kong Public Offering. For applications under the Hong Kong Public Offering, this prospectus contains the terms and conditions of the Hong Kong Public Offering. The Global Offering comprises the Hong Kong Public Offering of initially 10,766,000 Offer Shares and the International Offering of initially 96,893,000 Offer Shares (assuming the Over-allotment Option are not exercised and subject, in each, to reallocation on the basis as set out in “**Structure of the Global Offering**”).

INFORMATION ABOUT THIS PROSPECTUS AND THE GLOBAL OFFERING

The Offer Shares are offered solely on the basis of the information contained and representations made in this prospectus and on the terms and subject to the conditions set out herein and therein. No person is authorized to give any information in connection with the Global Offering or to make any representation not contained in this prospectus, and any information or representation not contained herein must not be relied upon as having been authorized by our Company, the Sole Sponsor, the Overall Coordinators, the Joint Global Coordinators, the Joint Lead Managers, the Joint Bookrunners, the Underwriters, the Capital Market Intermediaries, any of our or their affiliates or any of their respective directors, officers, employees, advisers, agents or representatives, or any other persons or parties involved in the Global Offering. Neither the delivery of this prospectus nor any subscription or acquisition made under it shall, under any circumstances, create any implication that there has been no change in our affairs since the date of this prospectus or that the information in this prospectus is correct as of any subsequent time.

UNDERWRITING

The Listing is sponsored by the Sole Sponsor and the Global Offering is managed by the Overall Coordinators. The Hong Kong Public Offering is fully underwritten by the Hong Kong Underwriters subject to the terms and conditions of the Hong Kong Underwriting Agreement and is subject to us and the Overall Coordinators (for themselves and on behalf of the Underwriters) agreeing on the Offer Price. The International Offering is expected to be fully underwritten by the International Underwriters, subject to the terms and conditions of the International Underwriting Agreement. See “Underwriting” for further details on the Underwriters and the underwriting arrangements.

APPLICATION FOR LISTING OF THE H SHARES ON THE HONG KONG STOCK EXCHANGE

We have applied to the Hong Kong Stock Exchange for the granting of listing of, and permission to deal in, our H Shares to be issued pursuant to the Global Offering (including any H Shares which may be issued pursuant to the exercise of the Over-allotment Option). Dealings in the H Shares on the Hong Kong Stock Exchange are expected to commence on Monday, December 22, 2025. Except for the A Shares that have been listed on the Shanghai Stock Exchange and our pending application to the Hong Kong Stock Exchange for the listing of, and permission to deal in, the H Shares, no part of our shares or debt securities is listed on or dealt in on the Hong Kong Stock Exchange or any other stock exchange and no such listing or permission to list is being or proposed to be sought in the near future.

Under section 44B(1) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance, any allotment made in respect of any application will be invalid if the listing of, and permission to deal in, the H Shares on the Hong Kong Stock Exchange is refused before the expiration of three weeks from the date of the closing of the application lists, or such longer period (not exceeding six weeks) as may, within the said three weeks, be notified to our Company by or on behalf of the Hong Kong Stock Exchange.

INFORMATION ABOUT THIS PROSPECTUS AND THE GLOBAL OFFERING

H SHARES WILL BE ELIGIBLE FOR ADMISSION INTO CCASS

Subject to the granting of listing of, and permission to deal in, the H Shares on the Hong Kong Stock Exchange and our compliance with the stock admission requirements of HKSCC, the H Shares will be accepted as eligible securities by HKSCC for deposit, clearance and settlement in CCASS with effect from the date of commencement of dealings in the H Shares on the Hong Kong Stock Exchange or any other date as determined by HKSCC. Settlement of transactions between participants of the Hong Kong Stock Exchange is required to take place in CCASS on the second settlement day after any trading day. All activities under CCASS are subject to the General Rules of HKSCC and the HKSCC Operational Procedures in effect from time to time. All necessary arrangements have been made for the H Shares to be admitted into CCASS. Investors should seek the advice of their stockbroker or other professional advisers for the details of the settlement arrangements as such arrangements may affect their rights and interests.

REGISTER OF MEMBERS AND STAMP DUTY

All of the H Shares issued pursuant to applications made in the Global Offering will be registered on our H Share register to be maintained in Hong Kong by our H Share Registrar, Computershare Hong Kong Investor Services Limited. Our principal register of members will be maintained by us at our headquarters in Chinese mainland.

Dealings in the H Shares registered in our H Share Register will be subject to Hong Kong stamp duty.

DIVIDENDS PAYABLE TO HOLDERS OF H SHARES

Unless determined otherwise by our Company, dividends payable in Hong Kong dollars in respect of our H Shares will be paid to the shareholders as recorded on the H Share Register of our Company in Hong Kong and sent by ordinary post, at the shareholders' risk, to the registered address of each shareholder of our Company.

PROFESSIONAL TAX ADVICE RECOMMENDED

You should consult your professional advisers if you are in any doubt as to the taxation implications of subscribing for, purchasing, holding, disposal of, dealing in or the exercise of any rights in relation to our H Shares. None of our Company, the Sole Sponsor, the Overall Coordinators, the Joint Global Coordinators, the Joint Lead Managers, the Joint Bookrunners, the Underwriters, the Capital Market Intermediaries, any of our or their affiliates or any of their respective directors, officers, employees, advisers, agents or representatives, or any other persons or parties involved in the Global Offering accepts responsibility for any tax effects on, or liabilities of, any person resulting from the subscription, purchase, holding, disposal of, dealing in, or the exercise of any rights in relation to, our H Shares.

INFORMATION ABOUT THIS PROSPECTUS AND THE GLOBAL OFFERING

LANGUAGE

If there is any inconsistency between this prospectus and its Chinese translation, this prospectus shall prevail. For ease of reference, the names of the Chinese laws and regulations, government authorities, institutions, natural persons or other entities (including certain of our subsidiary) have been included in this prospectus in both the Chinese and English languages. In the event of any inconsistency, the Chinese version shall prevail.

ROUNDING

Certain amounts and percentage figures, such as share ownership and operating data, included in this prospectus may have been subject to rounding adjustments. Accordingly, figures shown as totals in certain tables may not be an arithmetic aggregation of the figures preceding them.

EXCHANGE RATE CONVERSION

Solely for your convenience, this prospectus contains translations of certain RMB amounts into Hong Kong dollars at a specified rate. Unless we indicate otherwise, the translations of RMB into Hong Kong dollars and vice versa have been made at the rate of RMB1.00 to HK\$1.0957 in this prospectus.

No representation is made that any amount in RMB or Hong Kong dollars can be or could be, or have been, converted at the above rate or any other rate or at all.

INDUSTRY OVERVIEW

The information contained in this section, unless otherwise indicated, has been derived from various official government publications and other publications and the market research report prepared by Frost & Sullivan which we commissioned (the “F&S Report”). We engaged Frost & Sullivan for preparing the F&S Report in respect of the Global Offering. We have taken reasonable care in extracting and reproducing such information. We have no reason to believe that such information is false or misleading in any material respect or that any fact has been omitted that would render such information false or misleading in any material respect. We have not, nor have any of the Sole Sponsor, Overall Coordinators, the Joint Global Coordinators, the Joint Bookrunners, the Joint Lead Managers, the Capital Market Intermediaries, any of the Underwriters, or any of their respective directors, officers or representatives or any other parties involved in the Global Offering, independently verified the information in the various official government publications nor give any representation as to the accuracy or completeness of such information. As of the Latest Practicable Date, our Directors confirm that, after taking reasonable care, there has been no material adverse change in the market information presented in this section.

OVERVIEW OF THE CHINA FUTURES MARKET

After over 30 years of development, China’s futures industry, driven by policy and market demand, faces significant opportunities. In 2022, the “Futures and Derivatives Law” took effect, providing a legal foundation for high-quality market growth. In 2024, the CSRC and six other departments issued guidelines to enhance regulation, mitigate risks, and promote market development, with a focus on serving the real economy, ensuring the prudent expansion of financial futures, and advancing market opening.

China’s futures market, the world’s largest for commodities, covers agriculture, energy, metals, and others with over 140 products serving 41 industrial sectors. Futures – spot price correlation exceeds 90%, making it a key pricing benchmark. Notably, China’s financial futures market has been experiencing a remarkably rapid growth rate, with trading volumes and values at an accelerating pace, reflecting its increasing significance in the global financial derivatives landscape. Future products will align with national strategies like agricultural and manufacturing strength, and green development, expanding their service scope.

The market participants in Chinese futures industry refers to financial institutions and service institutions engaged in futures contract trading and related businesses, mainly including futures exchanges, futures companies, clearing houses, etc. Its main businesses cover services such as futures trading, settlement, delivery, and risk management. The development of the futures industry is closely related to the commodity market, financial market, and the macro-economy. By providing functions such as price discovery, hedging, and risk management, it helps enterprises and investors manage risks and optimize resource allocation, playing an important role in stabilizing the operation of enterprises, invigorating the circulation of commodities, and ensuring supply and stabilizing prices.

INDUSTRY OVERVIEW

China currently operates six futures exchanges: the Shanghai Futures Exchange, Shanghai International Energy Exchange, Dalian Commodity Exchange, Zhengzhou Commodity Exchange, China Financial Futures Exchange, and Guangzhou Futures Exchange. These exchanges offer a diverse range of futures and options. By the end of 2024, the total number of listed futures and options products reached 146, comprising 125 commodity products (73 futures and 52 options), 20 financial products (8 futures and 12 options), and 1 index product. These products span critical sectors of the national economy, including agricultural products, metals, energy, chemicals, building materials, shipping, and finance, with option coverage exceeding 80% for mature commodity futures.

CHINA FUTURES MARKET INDUSTRY CHAIN

The futures market is a complex and integrated ecosystem. The upstream technical support system provides the necessary technological foundation, the midstream core operating entities ensure the normal operation and regulation of the market, and the downstream diversified participants bring vitality and various demands to the market. All these elements interact and cooperate with each other, jointly promoting the development, innovation, and stability of the futures market, playing an important role in resource allocation, risk management, and price discovery in the modern financial system.

Source: Frost & Sullivan

CHINA FUTURES MARKET SIZE

From 2020 to 2024, the Chinese futures market experienced various trends. In 2020, the global pandemic triggered widespread economic uncertainties, driving a year-on-year increase of over 35% in trading volumes across major exchanges worldwide. Meanwhile, China's futures market saw trading activity surge by nearly 50%, significantly expanding its share of the global market. In 2021, sharp commodity price rises, especially in coal and ferrous metals, drove a 22.1% and 32.8% year-on-year growth in national futures market trading volume and transaction value respectively, with new listed

INDUSTRY OVERVIEW

varieties adding vitality. In 2022, due to commodity fundamentals, competition, and macro policy expectations, the national futures market trading volume and value decreased by 9.9% and 8.0% respectively. In 2023, the economy was gradually recovering and product replenishment boosted the market, with new energy and metals being popular, and the national futures market trading volume and value increased by 25.6% and 6.3% respectively. In 2024, the global economic slowdown which IMF forecasts growth at 3.2%, down 0.1 percentage points from 2023 and the Fed's cumulative 100 basis points rate cuts amplified market uncertainties. Resulting in lower risk appetite, reduced trading volume, and more cautious market behaviour compared to 2023.

The expansion of China's futures market is driven by several key factors. The launch of diverse futures products, including financial derivatives and emerging assets, has broadened market participation across industries. Corporations increasingly use futures to hedge against price volatility – such as agricultural firms managing input costs and metal producers securing output prices – bringing in substantial capital and strengthening risk management functions. Institutional investors like securities firms, asset managers, and hedge funds are using futures for hedging, arbitrage, and portfolio allocation, improving market liquidity and depth. Meanwhile, growing financial literacy and more accessible trading platforms have encouraged retail investor participation, further boosting liquidity. Together, product innovation, corporate hedging, institutional strategies, and retail engagement are creating a strong, synergistic force that supports the sustained development of China's futures market.

Trading Volume of China Futures (by exchanges), China, 2020–2029E

Source: CFA, Frost & Sullivan

INDUSTRY OVERVIEW

Trading Value of China Futures (by exchanges), China, 2020–2029E

Note: Include trading volume and value of futures and options.

Source: CFA, Frost & Sullivan

From 2020 to 2024, the total client's equity in China's futures market grew significantly from RMB824.7 billion to RMB1,538.7 billion, with a CAGR of 16.9%. The government's stimulus and supportive policies boosted market confidence and trading volumes. New trading mechanisms and products attracted more players by offering risk management and portfolio diversification tools. Regulatory support, like stronger supervision and innovation encouragement, promoted the market's healthy development.

For 2024 to 2029, the total client's equity is projected to increase to RMB3,579.3 billion, with an estimated CAGR of 18.4%. Heightened external uncertainties have fueled significant commodity price volatility, driving increased corporate demand for risk management solutions, as evidenced by rising penetration rates of hedging instruments across industries. Government steering and facilitation or market stability will further fuel market growth.

INDUSTRY OVERVIEW

Total Client's Equity of Futures Market, China, 2020–2029E

Source: CFA, Frost & Sullivan

From 2020 to 2024, total revenue of China's futures market grew from RMB35.3 billion to RMB41.3 billion, with a CAGR of 4.0%. Stable economic growth, spurred by government policies, lifted trading. New trading mechanisms and products attracted more investors. Regulatory support, including supervision and innovation incentives, increased market confidence.

Looking ahead to the period from 2024 to 2029, the total revenue of China's futures market is expected to rise from RMB41.3 billion to RMB53.5 billion, with an estimated CAGR of 5.3%. The continuous economic growth, coupled with the expansion of the technology sector and the increasing interest of investors in the stock market, will further drive the trading in the futures market. In terms of technology, advancements such as the development of more advanced artificial intelligence in trading will improve market efficiency and attract more participants. The diversification of China's futures market through expanded listings of globally aligned contracts has catalyzed heightened participation from international investors, driven by enhanced product accessibility and hedging efficiency. The phased relaxation of QFII quotas and streamlined cross-border collateralization rules will lower entry barriers for global institutional participants, directly stimulating trading liquidity.

INDUSTRY OVERVIEW

Total Revenue of Futures Market (by business segments), China, 2020–2029E

Note: Total revenue refers to revenues of the parent companies of futures firms; Commission revenues include revenues from brokerage, investment advisory and asset management; Others include investment profit.

Source: CFA, Frost & Sullivan

COMPETITION LANDSCAPE OF CHINA FUTURES MARKET

Based on the background of the controlling shareholder, futures companies in China can be categorized into two types: financial institution-affiliated futures companies, and non-financial institution-related futures companies.

Financial institution-affiliated futures companies are closely linked to or within the same financial group such as securities firms and banks. They can share customer resources, funding channels, and financial license advantages, offering clients comprehensive financial services. Non-financial institution-related futures companies include independent futures company and futures companies controlled by large-scale entity enterprises. They have its own strengths, including independent decision-making and vitality, and it possesses a deeper understanding of the industry and sector.

Ranking of Futures Companies

In terms of total revenue in 2024, the leading futures companies in China were mainly financial institution-affiliated futures companies.

INDUSTRY OVERVIEW

Ranking of Futures Companies (by total revenue), China, 2024

Rank	Company Name	Revenue* (RMB Billion)	Market Share	Types
1	Company A	21.7	8.1%	Financial institution-affiliated
2	Company B	14.6	5.4%	Financial institution-affiliated
3	Company D	12.4	4.6%	Financial institution-affiliated

Company OO: Established in 1991, headquartered in Shenzhen, listed on the Shanghai Stock Exchange and Hong Kong Stock Exchange.

Source: Company Data, Frost & Sullivan

Overall, Nanhua Futures is one of the major futures companies in China in terms of business scale. Its key competitive strengths lie in its continuous innovation in products and services, high operational efficiency, and proactive strategy for expanding into overseas markets.

INDUSTRY OVERVIEW

DRIVERS OF CHINA FUTURES MARKET

Growth in Real Economy Demand: With the transformation and upgrading of China's economic structure, enterprises' demand for risk management has significantly increased. The futures market provides enterprises with hedging tools to cope with price fluctuation risks in the fields of metals, agricultural products, and energy. Chinese enterprises' overseas expansion enhances global industrial integration and international competitiveness. This globalization also drives financial innovation in cross-border risk management and strengthens multilateral cooperation in green and digital transformation, bolstering both domestic and global economic resilience.

Continuous Product Diversification: The China futures market continuously introduces new trading products to meet diverse needs. Derivatives such as options and futures enrich investment strategies, and the application of financial technology enhances trading efficiency, risk management capabilities, and market transparency.

Policy Support and Regulatory Improvement: The government attaches great importance to the futures market and provides legal safeguards for the market by promulgating supporting laws and policies such as the Futures and Derivatives Law. Regulatory agencies have improved the regulatory framework, promoted market standardization and transparency, and enhanced investor confidence.

Accelerated Internationalization Process: The China futures market is gradually opening up to the outside world. Some products have attracted overseas participants, and the influence on the pricing of international bulk commodities has been enhanced. This has attracted more international participants and deepened cooperation with international exchanges, promoting market connectivity.

DEVELOPMENT TRENDS OF CHINA FUTURES MARKET

Enhancing the Ability to Serve the Real Economy: In the future, China's futures market will provide various risk management tools (such as hedging) and innovative financial products. This will assist enterprises in the agricultural, energy, chemical, and other industrial chains in dealing with price fluctuation risks and enhancing operational stability. This trend is reflected not only in the diversification of futures products and the optimization of trading mechanisms but also in the deep integration with the real economy. It helps enterprises reduce costs, improve efficiency, and thus promotes high-quality economic development.

Accelerated Internationalization Process: China's futures market will further open up to foreign investors and promote the internationalization of more futures products denominated in RMB (such as crude oil, iron ore, etc.). This trend will enhance China's futures market's say in the global pricing of bulk commodities, attract international capital participation, and increase market liquidity and influence.

Widespread Application of Financial Technology: Technologies such as artificial intelligence, and big data will be widely applied in the fields of trading, clearing, risk control, and regulation. This aims to enhance market operation efficiency, reduce trading costs, strengthen risk management and regulatory capabilities, and promote the extensive application of intelligent services such as algorithmic trading and advisory.

INDUSTRY OVERVIEW

Promoting Green Finance and Sustainable Development: The development trend includes the introduction of futures products related to the environment (such as carbon emission rights, green electricity, etc.) to facilitate the application of relevant principles in the futures market. This supports the national “dual carbon” goals, aids the development of the green economy, and meets the market’s demand for sustainable investment tools.

ENTRY BARRIERS OF CHINA FUTURES MARKET

Regulatory Barriers: The China futures market is subject to strict regulation by the CSRC. New entrants must meet complex compliance requirements, including capital adequacy, risk management capabilities, and information technology systems. Futures companies are required to obtain relevant business licenses, and the licensing process is intricate and time-consuming, creating a high barrier for new entrants.

Capital Barriers: Futures companies are required to maintain high levels of registered capital and net capital to manage market risks and client margin requirements. Building the necessary technological systems, risk control frameworks, and talent teams for the futures market demands significant financial investment, particularly for the high-cost technical infrastructure needed for derivatives businesses.

Technological Barriers: The futures market places extremely high demands on the stability, speed, and security of trading systems, requiring new entrants to invest substantial resources in developing or acquiring advanced trading systems. The high-leverage nature of the futures market necessitates robust risk management and settlement capabilities, which rely on long-term technological accumulation and system optimization. Leading futures companies have already widely adopted technologies such as artificial intelligence and big data, potentially leaving new entrants at a technological disadvantage.

Market and Brand Barriers: Established futures companies have built long-term partnerships with numerous enterprises, financial institutions, and individual investors, making it difficult for new entrants to gain client trust in the short term. Leading futures firms hold significant brand influence and market reputation, requiring new entrants to invest substantial resources in brand development.

OVERVIEW OF THE KEY COST

Labor cost is the key cost in China futures industry. The futures market is an important part of China financial sector. Here, the income levels of employees in the financial industry are used as a proxy to reflect the income situation of employees in futures industry. From 2020 to 2024, the annual average salary of employees in the financial industry increased from RMB133.4 thousand to RMB201.9 thousand.

INDUSTRY OVERVIEW

Annual Average Salary of Financial Industry Employees, China, 2020-2024

Source: NBS, Frost & Sullivan

OVERVIEW OF THE GLOBAL INTEREST RATE ENVIRONMENT

In early 2020, the Federal Reserve swiftly cut the federal funds rate and launched quantitative easing to stabilize market liquidity. As the economy recovered and inflation surged – with U.S. year-on-year CPI beginning to rise in 2021 and peaking in June 2022 – the Fed initiated a rate-hiking cycle in March 2022, implementing 11 consecutive increases. By 2023, the federal funds rate had risen to 5.25%-5.5%. Concurrently, the 10-year U.S. Treasury yield climbed from a 2020 low of 0.5% to a 2023 peak of 5.0%. In 2024, with U.S. inflation retreating to approximately 3.3%, the Fed paused rate hikes before initiating its first rate cut in September 2024, followed by two additional cuts in November and December.

Looking ahead, markets anticipate further cuts below 4% in 2025, but the Fed maintains a cautious tone, wary of potential inflationary risks from policy shifts, which could constrain the pace and magnitude of easing.

DRIVER OF THE GLOBAL INTEREST RATE ENVIRONMENT

Inflation and Policy Objectives: From 2021 to 2023, supply chain disruptions, and fiscal stimulus exacerbated inflation, compelling the Federal Reserve to implement rate hikes. After inflation cooled in 2024, the policy focus shifted to balancing economic soft landing. The Federal Reserve is likely to maintain “wait-and-see” policy adjustments over a longer horizon, employing data-driven gradual rate cuts and balance sheet reduction to strike a dynamic balance between curbing inflationary resurgence and avoiding an economic recession. Meanwhile, it must remain vigilant against risks such as weakening labor market resilience.

Debt and Fiscal Pressures: The U.S. government debt-to-GDP ratio exceeded 120%, with high interest rates intensifying debt servicing pressures. The 2024 rate cuts were partially driven by the need to alleviate fiscal burdens. While the debt scale may gain temporary respite as interest rates decline, the U.S. still needs to reduce long-term debt risks through structural fiscal reforms to avoid falling into a “low-interest-rate stimulus – high-debt dependency” vicious cycle.

INDUSTRY OVERVIEW

Global Economic Interconnectedness: Dollar appreciation from 2022 to 2023 attracted capital repatriation, but 2024 rate-cut expectations triggered capital flows to emerging markets. As the global de-dollarization trend progresses, emerging economies are likely to accelerate foreign exchange reserve diversification and local currency settlement pilots to buffer against cross-border capital flow shocks from Fed policy fluctuations. Concurrently, the international community's demand for strengthened monetary policy coordination and the establishment of a new global financial safety net may further increase.

OVERVIEW OF THE DOMESTIC INTEREST RATE ENVIRONMENT

In early 2020, China maintained a prudent yet flexible monetary policy, with the 1-year Loan Prime Rate (LPR) set at an initial benchmark level. To stabilize the economy, the People's Bank of China (PBOC) acted to stabilize the economy by injecting liquidity through measures such as reserve requirement ratio (RRR) cuts and Medium-Term Lending Facility (MLF) operations, guiding the 1-year LPR lower over subsequent years through multiple adjustments. In 2023, amid a fragile economic recovery, the central bank continued its proactive stance with additional RRR reductions and further guided the 1-year LPR downward.

By 2024, facing persistent growth headwinds, the PBOC shifted toward accommodative policies. Under a scenario of more aggressive easing, the central bank might implement significant cuts to the MLF rate, which would transmit to the lending rate system, potentially driving the 1-year LPR lower through phased reductions. Concurrently, deposit rates would likely continue their downward trend, encouraging capital deployment into the real economy. The yield on 10-year government bonds could also decline notably, reflecting market expectations of sustained monetary easing.

China's policy rates remained at historically low levels, with markets anticipating continued targeted rate adjustments in the coming year to support economic recovery. A key challenge will be balancing the pressures on banks' net interest margins, as the deepening of interest rate liberalization is likely to drive deposit rate declines at a faster pace than loan rate adjustments. This dynamic underscores the need for a nuanced approach to monetary policy, ensuring sustained liquidity support for the real economy while maintaining financial sector stability amid ongoing market-oriented reforms.

DRIVER OF THE DOMESTIC INTEREST RATE ENVIRONMENT

Steady Growth and Risk Mitigation: China's monetary policy has prioritized targeted support for the real economy through tools like RRR and LPR adjustments, balancing short-term stimulus with long-term deleveraging in sectors like real estate while reviving household consumption.

External Constraints and Rate Asymmetry: A global tightening pause allowed limited monetary easing, but inverted China-foreign yield spreads posed currency stability risks, prompting a mix of rate cuts and capital flow management to balance domestic growth and financial stability.

Structural Challenges and Policy Transmission: Demographic shifts and slowing productivity have pressured natural interest rates, while credit allocation inefficiencies and bank risk aversion limited rate cut effectiveness, necessitating prudent adjustments and complementary supply-side reforms.

INDUSTRY OVERVIEW

OVERVIEW OF THE CHINA RISK MANAGEMENT MARKET

From 2020 to 2024, the cumulative new notional principal of risk management companies' OTC derivatives business surged from RMB845.7 billion to RMB2,991.1 billion, achieving a compound annual growth rate of 37.1%. Meanwhile, basis trading volumes grew moderately from RMB444.9 billion to RMB524.9 billion, driven by regulatory reforms, rising demand for bespoke hedging tools, and cross-border product innovation.

With the evolution of the market, risk management companies will further optimize their business structures based on their own strengths and market demands. Innovative segments such as market-making business, warehouse receipt and OTC derivatives are expected to continue expanding, while traditional operations will also undergo continuous model innovation to enhance service quality and efficiency.

Looking ahead, the risk management market will become more closely integrated with the real economy, delivering more precise and efficient risk management services to enterprises across industries. By facilitating industrial upgrading, stabilizing industrial and supply chains, and improving resource allocation capabilities, the sector is poised to play an increasingly vital role in supporting high-quality economic development in China.

As of March 31, 2025, a total of 92 futures companies had registered with the Association to establish 95 risk management companies, of which 94 risk management companies had filed for pilot businesses. In the competitive landscape of risk management businesses, 91 companies were registered for basis trading business, with 77 actually operating in this field, making it the most common business with high participation and full competition; 72 companies were registered for over-the-counter derivatives business, with 64 conducting such business; and 51 companies were registered for market-making business, with 39 engaged in it. Overall, basis trading business remains the mainstream with extensive competition, OTC derivatives business is efficiently conducted, market-making business has low participation, and a differentiated competition landscape is emerging.

The continuous expansion of the risk management market scale is primarily driven by the synergistic effects of three core factors.

First, with the increasing complexity of global industrial chains and the rise of emerging industries, the product categories covered by the market are accelerating their expansion from traditional commodities to new energy materials financial derivatives, and other fields. These diversified risk hedging underlying assets attract participation from a broader range of industries, directly expanding the market's basic trading volume.

Second, the innovative iteration of product types has significantly enhanced market depth. In addition to standardized futures and options, new product forms such as over-the-counter derivatives and cross-border risk management tools are continuously emerging, satisfying the differentiated needs of diverse client groups.

INDUSTRY OVERVIEW

Third, against the backdrop of escalating global economic uncertainties, enterprises' awareness of managing risks such as price volatility, exchange rate risks, and supply chain disruptions has significantly increased. The hedging penetration rate among real economy enterprises has continued to rise, while the demand for asset-liability risk management among financial institutions has expanded simultaneously, forming a stable market increment.

OVERVIEW OF THE CHINA ASSET MANAGEMENT MARKET

As of the end of 2024, the asset management market presents a competition pattern dominated by public funds and private funds. Public funds, with a total scale of RMB32.8 trillion, cover retail and institutional clients through standardized products, ranking first in scale. Private funds, with a total scale of RMB19.9 trillion, focus on high-net-worth individuals and institutional clients.

All market participants engage in diversified competition around client groups, product types, and service scenarios. Public and private funds serve as the core scale drivers, while licensed institutions form differentiated layouts based on their resource endowments. This synergy collectively propels the market toward professionalization, refinement, and diversification, with each segment carving out distinct competitive edges to meet varied market demands.

The total AUM of China's public offered asset management industry shows an upward trend from 2020 to 2024, from RMB19.9 trillion by the end of 2020 to RMB32.8 trillion by the end of 2024. Nanhua Fund Management is the first public offering fund management company in China that is wholly owned and controlled by a futures company. As the end of 2024, the total management scale of public offering funds under Nanhua Fund was RMB14.8 billion.

Amid this growth, the industry is witnessing a rising demand for rights-embedded products and specialized asset management solutions, derivatives-linked strategies, and customized risk-return profiles. Nanhua Fund, leveraging its unique positioning under a futures conglomerate, is poised to capitalize on this trend by integrating commodity futures expertise with innovative asset management tools, catering to high-net-worth individuals and institutional clients seeking alpha generation in volatile markets. This shift underscores the broader evolution toward professionalized asset management, marked by technology-driven portfolio optimization, ESG integration, and cross-asset allocation capabilities.

The primary drivers of growth in the asset management market include the recovery of global and domestic economies combined with policy support, which strengthens market liquidity and investor confidence, driving the accelerated entry of long-term capital such as pension funds and laying a solid foundation for the market's long-term growth. Meanwhile, there has been a significant transformation in investor behavior and demand structures: with the deepening of financial education, individual investors have shifted from short-term speculation to long-term asset allocation, fueling the continuous expansion of public funds. Concurrently, the diversified needs of high-net-worth individuals and institutional clients for risk-return balance have spurred the rapid growth of private funds.

INDUSTRY OVERVIEW

ANALYSIS OF DERIVATIVES MARKETS IN SELECTED OVERSEAS REGIONS

An increasing number of Chinese companies are actively adopting a “going global” strategy, for example, in the first half of 2024, A-listed companies achieved overseas business revenue of around RMB3.8 trillion, representing a year-on-year increase of 12.8%. Under this context, there is also increasing demand for Chinese companies to participate in the global derivative markets, including futures and options markets, in which overseas futures subsidiaries of Chinese companies with a strong global presence could be a strong support.

In terms of overseas revenue by Chinese futures companies in 2024, Nanhua ranked the 1st among all futures companies, with a total revenue of RMB654.2 million.

Ranking of Chinese Futures Companies (by overseas revenue), China, 2024

Rank	Company Name	Revenue (RMB Million)	Types
1	Nanhua Futures (南華期貨)	654.2	Non-financial institution-related
2	Company E	647.5	Financial institution-affiliated
3	Company H	470.3	Financial institution-affiliated
4	Company A	430.1	Financial institution-affiliated
5	Company D	124.1	Financial institution-affiliated

Note: Overseas revenue refers to revenues of overseas futures subsidiaries of Chinese futures companies.

Overview of North America Derivatives Market

The major futures exchanges in North America primarily include the CME Group and Intercontinental Exchange (ICE). CME Group, the world’s largest derivatives exchange, offers a wide range of futures and options products, such as S&P 500 index futures, gold futures, and crude oil futures. ICE specializes in energy, agricultural commodities, and financial derivatives trading, with its Brent crude oil futures and natural gas futures holding significant global prominence.

Trading volumes in North America’s futures markets have shown sustained growth in recent years. From 2020 to 2024, contract volumes increased from 12.9 billion to 19.8 billion, representing a CAGR of 11.3%. Projections for 2024 to 2029 anticipate further expansion to 32.0 billion contracts, maintaining a CAGR of 10.1%. This growth has been primarily driven by heightened market volatility and increased participation from both institutional and retail investors.

Looking ahead, North America’s futures market is poised for continued growth. Technological advancements in high-frequency trading and automation, institutional hedging demand for interest rates and commodities, and retail investor diversification via commission-free platforms will drive this growth.

INDUSTRY OVERVIEW

Total Volume of Futures and Options, North America, 2020–2029E

Source: FIA, Frost & Sullivan

CME Group as one of major derivatives marketplaces in North America and a top global futures and options marketplace worldwide, was founded in 1898 and is based in Chicago. Its trading members include CME, CBOT, COMEX, and NYMEX, forming a large trading network across financial and commodity markets. CME Group offers six categories of financial derivatives, such as interest rate, stock index, foreign exchange, agricultural, energy, and precious metal futures. In trading innovation, CME Group's Globex electronic trading platform supports 24/7 global trading and processes millions of high-frequency trades daily, boosting trading efficiency and market activity. CME Group provides global companies with a powerful risk-management tool through its broad product range. For example, energy companies use crude oil futures to hedge price-fluctuation risks. CME Group holds a key position in the global financial market. Its gold and crude oil prices are global benchmarks, and its federal funds interest rate futures are a major indicator of Federal Reserve policy. CME Group has a strict clearing mechanism and is supervised by the CFTC, ensuring transaction security and market order.

Given global macro-economic fluctuations and dramatic price changes in agricultural and energy markets, CME Group leads in agricultural and energy futures and options trading. Investors urgently need CME Group's tools for risk hedging. CME Group's advanced trading system, CME Globex, has attracted global investors, increasing the number of contracts from 4.8 billion in 2020 to 6.6 billion in 2024, with an 8.3% annual growth rate.

With loose global monetary policies and increased market liquidity, prices of assets like energy, agricultural products, and precious metals on CME Group have risen sharply, driving the contract total value from USD1,468.6 trillion to USD2,511.5 trillion at a higher annual growth rate.

As climate change concern grows, CME Group's upcoming climate derivatives are expected to attract new investors for environmental risk management. Amid the digital-asset boom, CME Group plans to expand related futures and options products to explore new growth, with the total futures and options contracts volume expected to reach 10.5 billion by 2029 and the total value to increase to USD5,003.3 trillion.

INDUSTRY OVERVIEW

In trading types, futures contracts outnumber and exceed options in total value. Futures are widely used in traditional commodities like agriculture and energy, with a familiar trading mechanism for large-scale asset allocation and risk management. Options, being more complex, require greater investor expertise and risk tolerance.

INDUSTRY OVERVIEW

Overview of Europe Derivatives Market

The Europe futures market is dominated by several major exchanges, including Eurex, the LME, and Euronext. Eurex, one of Europe's largest derivatives exchanges, offers a broad range of financial derivatives trading services, such as German DAX index futures and Euro Stoxx 50 index futures. The LME specializes in metal futures and serves as the global hub for metal futures trading. Euronext, Europe's largest stock market, also provides diverse financial derivative trading services. These exchanges ensure high liquidity and trading efficiency through advanced electronic trading systems and extensive networks of market participants.

From 2020 to 2024, trading volumes in the Europe futures market remained largely stable with minor fluctuations, reflecting a CAGR of -0.05%. Market fluctuations during this period were primarily due to global economic uncertainties, geopolitical risks, and evolving regulatory policies.

From 2024 to 2029, the Europe futures market is projected to achieve a CAGR of 2.5%, with contract volumes rising from 5.6 billion in 2024 to 6.3 billion by 2029. This growth is expected to be driven by regulatory tech compliance (e.g., MiFID II), increased engagement with euro-denominated derivatives from emerging market participants, and hedging demands arising from EU energy transition and post-Brexit financial realignments.

Total Volume of Futures and Options, Europe, 2020–2029E

Source: FIA, Frost & Sullivan

Eurex, a leading European derivatives exchange, was established in 1998 through the merger of Switzerland's SOFFEX and Germany's DTB, and is now part of the Deutsche Börse Group. It ranks among the world's largest venues for derivatives trading, particularly dominant in interest rate products that shape global fixed-income markets.

INDUSTRY OVERVIEW

Because of increased volatility in global financial markets and growing hedging needs of institutional investors, the volume of futures and options contracts traded on the Eurex variably increased from 1,861.4 million in 2020 to 2,080.0 million in 2024, with a CAGR of 2.8%. Driven by the trend toward global asset allocation diversification and the continuous launch of innovative products by the exchange, it is expected that the total volume of futures and options contracts will reach 2,595.0 million in 2029.

Total Volume of Futures and Options, Eurex, 2020–2029E

Source: FIA, Frost & Sullivan

The LME as one of major derivatives exchange in Europe, was founded in 1877 and acquired by HKEX in 2012, which is the world's largest and most historic non-ferrous metal trading market, with dominant influence on global non-ferrous metal pricing. The LME's core trading items cover industrial metals like copper, aluminum, lead, zinc, nickel, tin, and London Gold. The daily Official Settlement Prices are the benchmark for global metal trading, with about 70% of global copper transactions using the LME prices.

From 2020 to 2022, the pandemic caused a decline in the LME's metal futures and options contracts due to reduced demand. After 2022, with economic recovery and the LME's efforts in optimizing services and introducing new-energy metal futures and options, the trading volume grew. The volume of futures and options contracts rose from 154.9 million in 2020 to 178.5 million in 2024, with a 3.6% CAGR. The total value also increased.

With the growth of the global new energy industry, demand for rare metals like lithium and cobalt is up. The LME is improving its rare metal futures and options product system, attracting new energy industry chain enterprises and investors. The LME is also promoting digital transformation to enhance efficiency, security, and market share. The total futures and options contracts volume is expected to reach 262.8 million in 2029, with a total value of USD21.2 trillion.

Overview of Asia Derivatives Market

The Asia futures market is dominated by several major exchanges. In addition to the exchanges in China mainland, it also includes the HKFE, the SGX, and the Tokyo Commodity Exchange (TOCOM), etc. The HKFE, Hong Kong's premier derivatives exchange, offers a wide array of financial futures products, notably including Hang Seng Index futures and stock index derivatives tied to Hong Kong and international markets. The SGX, one of Asia's leading derivatives exchanges, provides a diverse range of financial and commodity futures, such as FTSE Singapore Straits Times Index futures and FTSE China A50 Index futures. TOCOM, Japan's primary commodity futures exchange, offers a variety of metal and energy futures products.

Asia's futures markets have demonstrated robust growth in trading volumes in recent years. From 2020 to 2024, contract volumes surged from 20.1 billion to 169.2 billion, reflecting a CAGR of 70.2%. This remarkable expansion has been fueled by rising demand for risk management tools, maturation of financial derivatives markets, and increased participation from emerging market players.

INDUSTRY OVERVIEW

From 2024 to 2029, Asia's futures market is projected to achieve a CAGR of 15.5%, with contract volumes rising from 169.2 billion in 2024 to 347.7 billion by 2029. This growth is expected to be driven by domestic policy reforms, such as market liberalization in China and India, fintech-enabled retail engagement across Southeast Asia, and hedging needs stemming from RCEP trade integration and industrialization in emerging regional economies. Moving forward, the Asian futures market will continue to provide investors with diversified risk management tools and investment opportunities, reinforcing its role as a critical hub in the global derivatives landscape.

Total Volume of Futures and Options, Asia, 2020–2029E

Source: FIA, Frost & Sullivan

The HKFE as one of major derivatives exchange in Asia, being a key part of Hong Kong Exchanges and Clearing Limited (HKEX), is one of the long-standing derivative trading platforms in the Asia-Pacific region, which was established in 1976. It attracts many international investors with Hong Kong's status as a global financial center and offers a wide range of trading products, including stock index, commodity, interest rate, and foreign exchange futures, such as the Hang Seng Index Futures and gold futures. The SFC of Hong Kong enforces strict, high-level regulations to ensure fair, transparent trading, reduce market manipulation risks, and boost investor confidence. The HKFE uses an advanced electronic trading system and real-time clearing mechanism, supporting trading across Asian, European, and American hours, enhancing efficiency, security, and global trading.

From 2020 to 2024, the emergence and recession of pandemic led to market fluctuations, driving up the risk-aversion demand of institutions. Concurrently, the HKFE continuously rolled out mechanism optimization and product innovation initiatives, such as holiday trading services and the introduction of various option contracts. These measures attracted more investors to engage in futures and options market trading. As a result, the total volume of futures and options contracts traded on the HKFE increased from 282.2 million in 2020 to 383.7 million in 2024, registering a compound annual growth rate of 8.0% over this period. However, given the slowdown in global economic growth, the price fluctuations of major trading varieties like the Hang Seng Index and the RMB exchange rate moved downward, reducing the value of contract underlying assets. Even with the rise in trading volume, the nominal value of contracts was negatively impacted. Over the same period, the nominal value of futures and options contracts decreased from USD13.2 trillion to USD11.6 trillion, with a compound annual growth rate of -3.2%.

INDUSTRY OVERVIEW

With the deepening of cross-border connectivity, growth of climate-finance products, digital trading upgrade, expansion of emerging-market demand, popularization of digital tools and sustained growth in risk-management needs, the total futures and options contracts volume is projected to reach 623.3 million by 2029, with a nominal value of USD13.0 trillion. In contract volume, futures are expected to reach parity with options in 2028. In nominal value, futures exceed options. This is because futures are mainly linked to bulk commodities and financial indices with big trading units and high price bases, while options are more flexible and price-sensitive for individual investors' risk management.

Total Volume and Nominal Value of Futures and Options, HKEX, 2020–2029E

Source: FIA, Frost & Sullivan

The SGX is another major derivatives exchange in Asia. The SGX was established in 1999 through a merger, which is the first comprehensive joint-stock exchange in the Asia-Pacific region integrating securities, derivatives, and commodity trading, and went public in 2000. The SGX's product system is highly diversified, covering stocks, bonds, commodity futures, and derivatives. It has a dominant position in Asian stock index futures, offering related products across multiple markets to meet global investors' risk-management and investment needs. The SGX uses an efficient electronic trading system supporting 24-hour global trading, with strong security and order processing capabilities. It also has strict capital adequacy requirements, comprehensive real-time monitoring, and a sound risk early-warning mechanism to maintain market stability.

In 2024, the number of futures and options contracts on the SGX was 298.3 million, up from 247.1 million in 2020, with a 5.2% CAGR. The Singapore economy and global factors affected the contract numbers in different years. Looking ahead, the total futures and options contracts volume projected to reach 432.0 million in 2029.

ENTRY BARRIERS OF OVERSEAS FUTURES MARKET

Regulatory Barriers: Policy regulatory barriers in global futures markets represent the primary restrictive factor. Countries establish strict access mechanisms through measures such as license management, cross-border transaction restrictions, and compliance reviews, creating significant difficulties for foreign capital entry. Additionally, emerging markets commonly impose foreign exchange controls and foreign ownership restrictions – for example, China used to impose long-term restrictions on foreign direct participation in crude oil futures trading and has only gradually opened up specific products in recent years. Furthermore, emerging businesses such as high-frequency trading and algorithmic strategies must comply with the EU’s MiFID II framework’s high transparency requirements, incurring substantial compliance costs; new entrants must invest significant resources to build compliance systems.

Capital Barriers: Capital investment constitutes a core threshold for futures market operations. Establishing infrastructure such as trading systems and risk control platforms requires substantial financial outlays – for instance, a single investment by high-frequency trading firms to build low-latency data centers can reach hundreds of millions of yuan. Exchanges’ margin requirements and liquidity demands further inflate costs, as new institutions must reserve sufficient capital to handle extreme market conditions. Moreover, the ongoing operational costs for futures companies are high, including fixed expenses such as costly Bloomberg terminals, clearing fees, and compliance audits, creating long-term financial pressures.

INDUSTRY OVERVIEW

Technological Barriers: Technological barriers manifest in three key areas: algorithmic models, data infrastructure, and risk control systems. Leading institutions rely on proprietary algorithms, requiring teams with top talent in both financial engineering and computer science, with R&D cycles spanning 3–5 years. Real-time processing of order flow data from dozens of global exchanges demands distributed computing architectures with latency controlled at the microsecond level, a technical standard that new enterprises struggle to achieve in the short term. Risk control systems must possess AI-powered real-time monitoring capabilities, featuring extremely high technological complexity that forms an insurmountable moat.

Customer Recognition Barriers: Customer recognition barriers are embodied in three critical elements: track record, brand equity, and customized service capabilities. Large asset management institutions typically require suppliers to have a stable performance history of over five years, leaving new enterprises unable to pass due diligence due to lack of historical data. Established exchanges like CME (Chicago Mercantile Exchange) monopolize trading in core products through century-old credit endorsements, requiring new platforms to prove long-term security to gain trust. Additionally, top clients demand value-added services such as personalized clearing and hedging solutions, which can only be met by relying on deep industry expertise and resource networks.

DRIVERS OF OVERSEAS FUTURES MARKET

Policy Regulations and Market Liberalization: The liberalization of global futures markets and regulatory coordination are key drivers. Major economies like the U.S. and EU have revised derivatives regulations (e.g., the European Market Infrastructure Regulation) to reduce cross-border trade barriers. Chinese enterprises leverage these policies to expand overseas operations. For instance, Nanhua Futures established branches in Singapore and participated in the LME contract design to promote iron ore and copper trading. Additionally, China’s “Belt and Road” initiatives have facilitated mutual recognition agreements with Southeast Asian and Middle Eastern exchanges, enhancing market accessibility. Moreover, in the domain of futures-related trade, the easing of tensions in areas such as regulatory cooperation and market access between China and the US has created more stable market conditions. This enables Chinese enterprises to more effectively leverage the liberalization of the global futures market.

Global Expansion of Chinese Enterprises: Chinese enterprises’ global operations directly stimulate overseas futures demand. New energy firms like CATL hedge raw material price volatility through the LME nickel futures, while cross-border e-commerce giant SHEIN uses the CME forex futures to manage currency risks. State-owned enterprises like COFCO have increased their share in the CBOT soybean trading to 12%, reshaping global agricultural pricing dynamics. These activities inject liquidity into overseas markets, driving diversification of contract types.

Strategic Expansion of Chinese Financial Institutions: Chinese financial giants are expanding overseas futures trading capabilities to support corporate clients. They establish subsidiaries in global hubs and acquire stakes in foreign exchanges. Additionally, the CSRC encourages domestic futures brokers to obtain overseas licenses, enabling firms like Nanhua Futures to offer cross-border hedging solutions.

INDUSTRY OVERVIEW

Technological Innovation and Digitalization: AI and big data are revolutionizing trading efficiency. The CME’s smart contracts reduced commodity settlement cycles, while ICE’s big data analytics increased trading accuracy in energy futures. Chinese firms also contribute to market liquidity through cross-border arbitrage models (e.g., time-zone spread strategies). Quantum computing is emerging in cross-border position monitoring, as seen in CME-SHFE’s AI risk-control platform.

DEVELOPMENT TRENDS OF OVERSEAS FUTURES MARKET

Globalization expansion: In recent years, the overseas futures market has shown an expansion trend driven by the global layout. For instance, the North American market continues to take the lead, relying on its mature financial infrastructure and the ability to iterate products. Leading exchanges have achieved efficient cross-time zone docking through electronic trading systems, and the trading activity of interest rate and energy derivatives has significantly increased. The Southeast Asian market, on the other hand, has benefited from regional economic integration and the penetration of digital technologies. The trading scale of agricultural products and metal futures has expanded rapidly. Internet platforms and cross-border capital flows have further stimulated the hedging demands of retail investors and enterprises.

Accelerated International Strategic Expansion: Global Network Building via Overseas Subsidiaries and Clearing Qualifications. Leading Chinese futures firms such as Nanhua Futures are deepening their global presence by establishing overseas subsidiaries. This strategy not only drives the “going global” initiative for Chinese futures companies but also facilitates the “bringing in” of international investors, establishing dual-service capabilities. Furthermore, the “three-step” internationalization strategy for securities firms, including securing qualifications, capital expansion, and talent acquisition, has strengthened market penetration in emerging regions such as Southeast Asia.

Product Innovation and Cross-Border Services: Globalization of China-Led Futures Products. China’s futures market is enhancing its global pricing influence through innovative product offerings. For instance, the Containerized Freight Index Futures, launched by the Shanghai International Energy Exchange, is the world’s first shipping index futures product. With RMB-denominated pricing and cash settlement mechanisms, it has attracted significant international participation. Concurrently, the expansion of QFII/RQFII-eligible products has drawn foreign capital into China’s market, fostering cross-border arbitrage and strategic innovation.

Policy Liberalization and Foreign Capital Inflows: Two-Way Opening Deepens Market Integration. China’s six major futures exchanges further expanded QFII/RQFII trading access, introducing new products such as industrial silicon and lithium carbonate to attract global industrial capital. This liberalization aligns domestic market rules with international standards through optimized margin management and dynamic risk control frameworks while encouraging foreign investors to engage in onshore hedging activities, thereby enhancing price discovery efficiency.

INDUSTRY OVERVIEW

Technology-Driven Globalization: Digitalization and Risk Management Capabilities. Chinese futures firms are leveraging AI and large-scale modeling technologies to bolster global competitiveness. To meet overseas investor demands, companies like Nanhua Futures are strengthening compliance frameworks and technical services, including customized settlement data solutions, multilingual trading systems, and global supply chain analysis reports for key sectors (e.g., new energy, shipping indices). These advancements address international clients' needs for sophisticated risk management tools.

SOURCES OF INFORMATION

We commissioned Frost & Sullivan to conduct a detailed research and analysis of retail cloud solution industry in which we operate. Frost & Sullivan is an independent global market research and consulting company which was founded in 1961 and is based in the United States. Services provided by Frost & Sullivan include market assessments, competitive benchmarking, and strategic and market planning for a variety of industries. We have agreed to pay a fee of RMB400,000 to Frost & Sullivan in connection with the preparation of the F&S Report. We are of the view that the payment of such fee does not impair the fairness of the conclusions drawn in the F&S Report. The commissioned report was prepared by Frost & Sullivan independent of the influence of the Company and other interested parties. We have extracted certain information from the F&S Report in this section, as well as in the sections headed "Summary," "Risk Factors," "Business," "Financial Information" and elsewhere in this prospectus to provide our potential investors with a more comprehensive presentation of the industry in which we operate. Except as otherwise noted, all of the data and forecasts contained in this section are derived from the F&S Report.

Frost & Sullivan prepared its report based on its in-house database, independent third party reports and publicly available data from reputable industry organizations. Where necessary, Frost & Sullivan contacts companies operating in the industry to gather and synthesize information in relation to the market, prices and other relevant information. Frost & Sullivan believes that the basic assumptions used in preparing the F&S Report, including those used to make future projections, are factual, correct and not misleading. Frost & Sullivan has independently analyzed the information, but the accuracy of the conclusions of its review largely relies on the accuracy of the information collected. Frost & Sullivan's research may be affected by the accuracy of these assumptions and the choice of these primary and secondary sources.

During the preparation of the F&S Report, Frost & Sullivan performed both primary and secondary research, and obtained knowledge, statistics, information on and industry insights into global and China's futures industry, derivatives industry, and asset management industry in which we operate. Primary research involved interviewing industry participants, competitors, downstream customers and recognized third-party industry associations. Secondary research involved reviewing corporate annual reports, databases of relevant official authorities, as well as the in-house database established by Frost & Sullivan. The F&S Report was compiled based on the following assumptions: (1) the social, economic and political conditions in global markets discussed will remain stable during the forecast period; (2) government policies on global and China futures market will remain consistent during the forecast period; and (3) futures market will be driven by the factors which are stated in this report.

REGULATORY OVERVIEW

PRC REGULATORY ENVIRONMENT

Overview

We are a financial institution established in China to engage in futures business. All our business activities in China are subject to the supervision and administration of the CSRC and other relevant authorities as well as self-regulatory organizations in the industry. Our business operations are strictly governed by the prevailing laws, regulations, rules, and other normative instruments of the PRC. The following sets forth a summary of the principal laws and regulations applicable to our business operations, encompassing market access requirements, business supervision frameworks, corporate governance and risk control mechanisms as well as other general regulatory compliance obligations, including but not limited to foreign exchange, anti-money laundering, and foreign investment market access. This summary does not purport to be an exhaustive description of all laws and regulations with which we are required to comply.

Major Regulatory Authorities

Our business operations are primarily governed and overseen by the following Chinese government authorities, industry associations, futures exchanges, other relevant authorities, as well as other self-regulatory organizations in the industry. In addition, certain business activities conducted by us are also subject to the supervision of the PBOC, the SAFE, and the National Financial Regulatory Administration (NFRA), among other regulatory authorities.

CSRC

The CSRC, in accordance with laws, regulations and the authorization of the State Council, exercises centralized supervision and administration over the national securities and futures markets to maintain market order and ensure their lawful operation. The CSRC has established dispatched offices, which perform regulatory duties in accordance with laws, administrative regulations, and authorization of the CSRC.

Pursuant to the Futures and Derivatives Law and the Regulations on the Administration of Futures Trading (《期貨交易管理條例》), the CSRC exercises regulatory oversight over the futures market and performs the following statutory functions:

- To formulate rules and regulations pertaining to the supervision and administration of the futures market, and conduct examinations and approvals, verifications, registrations and record-filing in accordance with the law;
- To exercise regulatory oversight over futures trading and related activities, including but not limited to the listing, trading, settlement, and delivery of commodities;

REGULATORY OVERVIEW

- To supervise and regulate the futures business activities of market participants, including futures operating institutions, futures trading venues, futures clearing institutions, futures service institutions, and non-futures operating institutions acting as clearing participants;
- To establish codes of conduct for futures practitioners and oversee their implementation;
- To oversee and regulate the disclosure of futures trading-related information;
- To safeguard the lawful rights and interests of traders and conduct trader education;
- To investigate and penalize violations of futures regulations;
- To monitor, prevent, and manage risks in the futures market;
- To supervise fintech applications and information security in the futures industry;
- To guide and oversee the self-regulatory activities of the futures association; and
- Other duties prescribed by laws and administrative regulations.

CFA

The China Futures Association (CFA) is a self-regulatory organization of the futures industry, established as a non-profit social organization with legal person status. It operates under the professional guidance and supervision of both the CSRC and the national social organization registration authority.

Pursuant to the Futures and Derivatives Law and the Regulations on the Administration of Futures Trading (《期貨交易管理條例》), futures companies and other institutions specialized in futures business shall join the CFA. The CFA shall perform the following duties:

- To formulate and implement self-regulatory rules for the industry; supervise and inspect the business activities of its members and the professional conduct of practitioners; impose disciplinary sanctions or adopt other self-regulatory measures in accordance with applicable provisions against violations of laws and administrative regulations, relevant State provisions, the Association's Articles of Association, or self-regulatory rules;
- To be responsible for the recognition, management, and revocation of qualifications for futures practitioners;
- To accept the clients' complaints relating to the futures business, and to mediate disputes arising between members or between members and traders;
- To safeguard the lawful rights and interests of members in accordance with the law, and present members' proposals and requests to the futures regulatory authority under the State Council;

REGULATORY OVERVIEW

- To organize professional training for futures practitioners and facilitate business exchanges among members;
- To educate members and futures practitioners on compliance with futures laws, regulations, and policies, promote integrity within the industry, and establish incentive and restraint mechanisms to uphold ethical standards;
- To conduct investor education and protection initiatives, oversee members' implementation of investor suitability management systems, and promote public awareness of the futures market;
- To implement self-regulatory oversight of members' information security practices, ensuring adherence to national and industry-specific information security regulations and technical standards;
- To organize members to conduct research on the development, operation and related topics of the futures industry, collect, compile and disseminate futures-related information, provide member services, facilitate industry exchanges, and guide industry innovation and development;
- Other duties stipulated in the CFA's Articles of Association.

Futures Exchanges

Pursuant to the Regulations on the Administration of Futures Trading (《期貨交易管理條例》) and the Measures for the Administration of Futures Exchanges (《期貨交易所管理辦法》), futures exchanges shall provide venues and facilities for centralized futures trading; organize and oversee futures trading activities; and operate on a non-profit basis while implementing self-regulation in accordance with their Articles of Association. Futures exchanges shall perform the following duties:

- To provide trading venues, facilities and services;
- To organize futures trading clearing and delivery;
- To establish and enforce the exchange's trading rules;
- To design futures contracts and standardized option contract products, and arrange the listing of futures contracts and standardized option contract products;
- To perform real-time market oversight and risk monitoring of futures transactions;
- To release market information;
- To provide inquiry services related to futures trading clearing and delivery;

REGULATORY OVERVIEW

- To conduct self-discipline management over members, traders and futures service institutions in accordance with the Articles of Association and trading rules;
- To conduct investor education and market development initiatives;
- To ensure the security and stability of information technology systems;
- To investigate and penalize violations; and
- Other duties stipulated by the CSRC.

AMAC

Pursuant to the Securities Investment Fund Law of the People's Republic of China (《中華人民共和國證券投資基金法》), the Asset Management Association of China (AMAC) shall function as a self-regulatory organization governing China's securities investment fund industry and a social organization with legal person status. Its primary duties include:

- To educate and organize members to comply with the relevant laws and administrative regulations on securities investment, while safeguarding investors' legitimate rights;
- To safeguard the lawful rights and interests of members in accordance with the law, and present members' proposals and requests;
- To formulate and implement self-regulatory rules for the industry; supervise and inspect the professional conduct of members and practitioners; impose disciplinary sanctions in accordance with applicable provisions against violations of self-regulatory rules and the Association's Articles of Association;
- To establish professional practice standards and operational guidelines, while administering licensing examinations, credentialing, and continuing education for fund industry practitioners;
- To deliver membership services, facilitate industry exchanges, drive innovation initiatives, and implement investor outreach and investor education programs;
- To mediate disputes arising from fund-related business between members, or between members and their clients;
- To conduct registration and filing of privately offered funds in accordance with the law; and
- Other duties stipulated in AMAC's Articles of Association.

REGULATORY OVERVIEW

China Futures Market Monitoring Center Co., Ltd.

China Futures Market Monitoring Center Co., Ltd. is a futures margin depository and monitoring entity established by the futures regulatory authority under the State Council pursuant to the Regulations on the Administration of Futures Trading (《期貨交易管理條例》), aiming to establish and improve the margin deposit and monitoring system. Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》) and the Regulations on the Administration of Futures Trading (《期貨交易管理條例》), its core mandate is to supervise the safety of margin funds pursuant to applicable rules, perform day-to-day verification, and promptly notify the futures regulatory authority under the State Council of any irregularities.

Provisions on Foreign Investment Market Access

Pursuant to the Catalogue of Encouraged Industries for Foreign Investment (2022 Edition) (《鼓勵外商投資產業目錄(2022年版)》) and the Special Administrative Measures for Foreign Investment Access (Negative List) (2024 Edition) (《外商投資准入特別管理措施(負面清單)(2024年版)》) issued jointly by the National Development and Reform Commission of the People's Republic of China (NDRC) and the Ministry of Commerce of the People's Republic of China (MOFCOM), together with the Foreign Investment Law of the People's Republic of China (《中華人民共和國外商投資法》) and its implementing regulations and ancillary regulation, China implements a pre-establishment national treatment regime with negative list management for foreign investment. For sectors prohibited from investment under the Negative List, foreign investors shall not make any investments. For sectors with restricted investment under the Negative List, foreign investors shall comply with the specified conditions set forth in the Negative List when making investments. For sectors not listed in the Negative List, management shall be implemented under the principle of equal treatment for domestic and foreign investment. The competent government authorities shall formulate the Catalogue of Encouraged Industries for Foreign Investment, specifying specific industries, sectors, and regions where foreign investment is encouraged and guided, based on the needs of national economic and social development.

Pursuant to the Implementing Regulations of the Foreign Investment Law of the People's Republic of China (《中華人民共和國外商投資法實施條例》), for sectors with restricted investment under the Negative List, foreign investors shall comply with the special administrative measures for market access specified therein, including but not limited to equity requirements and senior management qualifications. The registration of foreign-invested enterprises shall be processed by the market supervision and administration department of the State Council or its authorized local counterparts in accordance with the law. Foreign investors or foreign-invested enterprises shall submit investment information to the competent commerce authority through the enterprise registration system and the National Enterprise Credit Information Publicity System (NECIPS).

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), futures companies with foreign shareholding shall apply to the competent commerce department of the State Council and the foreign exchange administrative authorities for completing relevant procedures in accordance with applicable laws and administrative regulations. The term “relevant procedures” referred to therein shall mean the general provisions of the PRC laws and regulations for domestic investment by foreign shareholders, which currently include but not limited to applications to the foreign exchange

REGULATORY OVERVIEW

administrative authorities for foreign exchange registration, opening of the capital account and the related foreign exchange settlement and purchase formalities, and the submission of investment information to the competent commerce department via the enterprise registration system and the national enterprise credit information publicity system.

PROVISIONS ON INDUSTRY ACCESS

Establishment

The Regulations on the Administration of Futures Trading (《期貨交易管理條例》) and the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》) stipulate the establishment requirements for futures companies. The establishment of a futures company shall be registered with the company registration authority and approved by the futures regulatory authority under the State Council. To establish a futures company, the applicant shall comply with the Company Law and meet the following requirements:

- The minimum registered capital shall be not less than RMB100 million;
- Directors, supervisors, and other senior management personnel shall possess requisite qualifications, and all practitioners shall hold valid futures practice qualifications;
- The company shall have Articles of Association that comply with the provisions of laws and administrative regulations;
- Major shareholders and de facto controllers shall demonstrate sustained profitability, maintain a good reputation, and have no record of material violations of laws or regulations over the past three (3) years;
- The company shall possess qualified business premises and operational facilities;
- The company shall have sound risk management and internal control systems;
- The company shall have no fewer than 15 personnel holding valid futures practice qualifications;
- The company shall have at least 3 senior management personnel meeting requisite qualification standards; and
- Other conditions prescribed by the futures regulatory authority under the State Council.

Additionally, the futures regulatory authority under the State Council may, based on prudential supervision principles and the risk levels of business activities, raise the minimum registered capital requirements. The registered capital shall be paid-in capital. Shareholders shall make capital contributions in monetary form or non-monetary assets essential to the futures company's operations, with the monetary contribution ratio not less than 85%.

REGULATORY OVERVIEW

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), where a major shareholder of a futures company is a legal person or unincorporated organization, such shareholder shall satisfy the following requirements:

- Both paid-in capital and net assets shall be not less than RMB100 million;
- Net assets shall be not less than 50% of the paid-in capital, or liabilities shall be below 50% of net assets, with no other risks that may materially affect the financial condition;
- The shareholder shall possess sustainable profitability, having operated for more than three (3) full fiscal years, with consecutive profits in the most recent three (3) fiscal years;
- The investment amount shall not exceed the shareholder's net assets, with legitimate and verified funding sources. Capital contributions shall not be made using entrusted funds, debt financing, or similar means;
- The shareholder shall demonstrate sound creditworthiness, standardized corporate governance, a well-defined organizational structure, and transparent ownership arrangements, with its core business being relevant to futures operations;
- The shareholder shall have no significant overdue debts outstanding;
- The shareholder has not been subject to any administrative penalties or criminal sanctions for material legal or regulatory violations over the past three (3) years;
- The shareholder is neither under investigation by competent authorities nor subject to compulsory measures for suspected material legal or regulatory violations;
- The shareholder has not engaged in any acts of bad faith such as abuse of shareholder rights or evasion of shareholder obligations as a shareholder or de facto controller of the company (including financial institutions) over the past three (3) years; and
- No other circumstances exist that would render the shareholder unsuitable to hold equity in a futures company as determined by the CSRC under prudential supervision principles.

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), where a major shareholder, controlling shareholder, or largest shareholder of a futures company is a foreign shareholder, in addition to meeting the aforementioned requirements, the futures company shall also satisfy the following requirements:

- It is a financial institution duly established and validly existing under the laws of its jurisdiction of incorporation;
- All financial and regulatory metrics have complied with the legal provisions and regulatory requirements of its home jurisdiction over the past three (3) years;

REGULATORY OVERVIEW

- The home jurisdiction maintains a comprehensive legal and supervisory framework for futures trading, and its designated futures regulatory authority has executed a Memorandum of Regulatory Cooperation (MORC) with the CSRC, with sustained effective supervisory collaboration;
- The total foreign shareholding or equity interest in a futures company (including both direct and indirect holdings) shall not exceed the limits committed by China's futures industry in its market access commitments to foreign entities or to the Hong Kong, Macao, and Taiwan of China; Foreign shareholders shall make capital contributions in freely convertible currencies or lawfully obtained RMB funds; and
- Such other requirements as may be prescribed by the CSRC under prudential supervision principles.

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), a major shareholder and the largest shareholders of futures companies shall not only meet the requirements applicable to major shareholders of futures companies but also satisfy the following conditions:

- Net capital of no less than RMB500 million; net assets of no less than RMB1 billion for shareholders not subject to net capital or similar metrics;
- Strong advantages in technical capabilities, management services, personnel training, or marketing channels;
- Capability to provide ongoing capital replenishment to the futures company and the ability to properly address risks that may render the futures company unable to operate normally;
- Such other requirements as may be prescribed by the CSRC under prudential supervision principles.

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), where a major shareholder of a futures company is a natural person, or where a natural person indirectly holds 5% or more of the futures company's equity, such shareholder shall satisfy the following requirements:

- The personal financial assets shall be not less than RMB30 million;
- The shareholder shall demonstrate sound creditworthiness, with no record of being directly responsible for business failures or material regulatory violations of invested enterprises within the preceding three (3) years;
- The investment amount shall not exceed the shareholder's net assets, with legitimate and verified funding sources. Capital contributions shall not be made using entrusted funds, debt financing, or similar means;
- The shareholder shall have no significant overdue debts outstanding;

REGULATORY OVERVIEW

- The shareholder has not been subject to any administrative penalties or criminal sanctions for material legal or regulatory violations over the past three (3) years;
- The shareholder is neither under investigation by competent authorities nor subject to compulsory measures for suspected material legal or regulatory violations;
- The shareholder has not engaged in any acts of bad faith such as abuse of shareholder rights or evasion of shareholder obligations as a shareholder or de facto controller of the company (including financial institutions) over the past three (3) years; and
- No other circumstances exist that would render the shareholder unsuitable to hold equity in a futures company as determined by the CSRC under prudential supervision principles.

Additionally, pursuant to the Provisions on the Governance of Controlling and Non-controlling Shareholdings in Futures Companies (《關於規範控股、參股期貨公司有關問題的規定》), no single entity may control or hold equity in more than two futures companies, of which only one may be a controlled entity.

Establishment of Branches

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), a futures company applying to establish domestic branches shall file a report with the local CSRC office at its domicile within five (5) business days after completing the relevant industrial and commercial registration, and satisfy the following requirements:

- The company shall maintain robust corporate governance with an internal control system that is both compliant with applicable regulations and rigorously enforced;
- The company shall comply with the risk supervision metrics standard for the three (3) months prior to the application date;
- The company shall comply with all applicable rules governing client asset protection and the segregated custody monitoring of futures margins;
- The company is not under investigation by competent authorities for suspected illegal or irregular business operations, or has not been subject to any administrative penalties or criminal sanctions due to illegal or irregular business operations over the past year;
- The company shall develop a branch establishment plan aligned with business development needs and a stable operational plan; and
- Such other requirements as may be prescribed by the CSRC under prudential supervision principles.

REGULATORY OVERVIEW

A futures company establishing a domestic branch shall submit the required filing materials to the local CSRC office at its domicile, with duplicate filings to the local CSRC office at the target branch location. Upon establishment of the branch, the futures company shall make a public announcement on media designated by the CSRC.

In addition, pursuant to the Futures and Derivatives Law, the Regulations on the Administration of Futures Trading (《期貨交易管理條例》), the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), and other relevant laws, regulations, and rules, the CSRC shall exercise supervisory authority over overseas branches of domestic futures companies.

Establishment of Risk Management Subsidiaries

Pursuant to the Guidelines for the Pilot Operation of Risk Management Subsidiaries of Futures Companies (《期貨公司風險管理公司業務試點指引》), a futures company shall satisfy the following requirements for filing a risk management subsidiary:

- At the time of registration, the futures company's latest classification rating shall be not lower than Class B Grade BB, and its net capital shall be not less than RMB300 million;
- All of its risk supervision metrics have consistently complied with regulatory requirements over the past year, and will continue to satisfy applicable standards following the establishment of the risk management subsidiary;
- The company shall have sound corporate governance with well-established internal control and risk management systems;
- The company shall have a complete management system in place, capable of overseeing the business activities of the risk management subsidiary and ensuring proper risk isolation;
- The company, over the past three (3) years, has not incurred any administrative regulatory sanctions specified under Article 55(2) of the Regulations on the Administration of Futures Trading (《期貨交易管理條例》), or subject to any administrative penalties or criminal sanctions for material legal or regulatory violations;
- The company has not incurred any administrative regulatory sanctions attributable to deficiencies in corporate governance, internal control mechanisms, or risk management systems over the past year; it is not currently undergoing any rectification process related to such deficiencies; it is neither under investigation by competent authorities nor subject to compulsory measures for suspected material legal or regulatory violations; and
- Such other requirements as may be prescribed by the China Futures Association under the prudential principle.

REGULATORY OVERVIEW

The futures company shall submit the required filing materials to the CFA within five (5) business days after the completion of the industrial and commercial registration of its risk management subsidiary. Furthermore, where there are changes to the management policies of the risk management subsidiary, the futures company shall report such changes to the CFA within five (5) business days.

The risk management subsidiary shall also submit the required filing materials to the CFA within five (5) business days after the completion of the industrial and commercial registration. Where there are changes to the basic information, equity structure, personnel information, the articles of association and basic management systems of the risk management subsidiary, the subsidiary shall report such changes to the CFA within five (5) business days. For changes involving industrial and commercial registration updates, the reporting timeline shall be calculated from the date of completion of such updates.

The Guidelines for the Pilot Operation of Risk Management Subsidiaries of Futures Companies (《期貨公司風險管理公司業務試點指引》) impose additional restrictions on futures companies failing to satisfy prescribed requirements. Where a futures company with an established risk management subsidiary either: (1) fails to maintain the required classification rating for two consecutive years, or (2) receives a latest classification rating of Class D or below, the competent regulatory authority shall, from the date of receiving the latest rating: (a) impose scaling limits on the risk management subsidiary's pilot business operations; (b) prohibit new business initiation; and (c) require termination of existing transactions upon maturity. Where the futures company's classification rating is restored to the required tier, the aforementioned scaling limits shall be lifted from the date of receiving the updated rating. For the risk management subsidiary engaged in single-stock over-the-counter (OTC) derivatives business: if the futures company's classification rating falls below the required tier, the competent regulatory authority shall, from the date of receiving the latest rating, (a) impose scaling limits on the risk management subsidiary's business operations; (b) prohibit new business initiation; and (c) require termination of existing transactions upon maturity.

Material Changes

Pursuant to the Regulations on the Administration of Futures Trading (《期貨交易管理條例》), futures companies shall obtain approval from the futures regulatory authority under the State Council for the following matters:

- Merger, division, termination, dissolution, or bankruptcy;
- Alteration of business scope;
- Amendment of the registered capital and Adjustment of the shareholding structure;
- Addition of shareholders obtaining more than 5% equity or change in controlling shareholders; and
- Other matters prescribed by the futures regulatory authority under the State Council.

REGULATORY OVERVIEW

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》) and the administrative licensing implementation guidelines issued by the CSRC, futures companies shall submit application materials through the CSRC's online service platform and obtain prior approval from the CSRC under any of the following circumstances:

- Change of the controlling shareholders or the largest shareholder; or
- Where the shareholding of a single shareholder or affiliated shareholders exceeds 5% and involves foreign shareholders.

Except for the aforementioned circumstances, any increase in shareholding causing a single shareholder or affiliated shareholders to exceed 5% ownership requires prior approval from the local CSRC office where the futures company is domiciled.

According to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), without the approval of CSRC or its local offices, if any individuals or entities or affiliated persons hold shareholding of the futures companies amounts to over 5% without authorization or become the shareholders of the futures companies by providing false application materials and so forth, CSRC or its local branch can order them to transfer the shareholdings within the limited period. The shareholding excludes voting power and dividend right before being transferred.

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), where a futures company proposes to change its legal representative, the proposed representative shall satisfy the requisite qualifications. The futures company shall, within five (5) business days after completing the relevant industrial and commercial registration amendments, submit the required filing materials to the local CSRC office at its domicile. For change of the company's domicile or business premises, the futures company shall submit the required filing materials the local CSRC office at the proposed new location. For establishing, acquiring, or taking equity stakes in overseas entities, the futures company shall, within 5 working days from the effective date of the company's resolution, file with the CSRC, and shall submit the required filing materials to the CSRC within five (5) business days after obtaining approval documents from the relevant overseas regulatory authority. Futures companies shall make public announcements on media designated by the CSRC for the following matters: (1) incorporation, modification, suspension of operations, dissolution, bankruptcy, or revocation of futures business licenses; or (2) establishment, modification, or termination of their branches.

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), in the event of any of the following circumstances, the futures company shall submit a written report to the local CSRC office at its domicile within five (5) business days:

- Changing the company's name, form, or Articles of Association;
- Proportional capital increase or decrease;
- Changes in equity or registered capital that without introducing new shareholders holding 5% or more equity;

REGULATORY OVERVIEW

- Changes in branch managers or business premises;
- Material resolutions such as business termination;
- Being under investigation by competent authorities or subject to compulsory measures;
- Occurrence of a material event, which affects or may potentially affect the operational management, financial condition, or the safety of client assets of the futures company; and
- Other matters stipulated by the CSRC.

Where the aforementioned matters involve the branch(es) of the futures company, the futures company shall concurrently submit a written report to the local CSRC office of the branch's jurisdiction.

Business Regulation

The Regulations on the Administration of Futures Trading (《期貨交易管理條例》) establish a licensing regime for futures companies, requiring them to obtain operational permits issued by the futures regulatory authority under the State Council based on their approved business categories, including commodity futures and financial futures. In addition to domestic futures brokerage, futures companies may also apply to engage in overseas futures brokerage, futures investment consulting, and other futures-related business approved by the futures regulatory authority under the State Council.

Futures companies are prohibited from conducting futures proprietary trading business, either directly or indirectly. Futures companies may, in accordance with regulations, use their own funds to invest in stocks, investment funds, bonds, and other financial assets, as well as business-related equity and other activities stipulated by the CSRC, but shall not engage in any business prohibited by the Regulations on the Administration of Futures Trading (《期貨交易管理條例》).

Futures Brokerage

The Regulations on the Administration of Futures Trading (《期貨交易管理條例》) and the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》) establish a licensing regime for futures companies, requiring them to obtain operational permits issued by the futures regulatory authority under the State Council based on their approved business categories, including commodity futures and financial futures. Futures trading shall strictly implement the margin system. Futures exchanges shall collect margins from their members, and futures companies from their clients, at rates no lower than the standards prescribed by the futures regulatory authority under the State Council and the relevant futures exchanges. Such margins shall be segregated from proprietary funds and deposited in separately designated accounts. When conducting brokerage business, futures companies shall accept client authorizations and execute futures transactions in their own name as agent for clients, with trading results borne by the clients.

REGULATORY OVERVIEW

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), a futures company qualifying for a financial futures brokerage license shall meet the following requirements:

- The risk supervision metrics have remained in compliance with regulatory standards for two consecutive months immediately preceding the application date;
- The company shall have sound corporate governance, risk management systems, and internal control systems, and implementing such systems effectively;
- The company shall comply with the CSRC's rules governing the segregated custody monitoring of futures margins;
- The business facilities and technical systems shall comply with relevant technical specifications and maintain sound operational conditions;
- The senior managers have not been subject to any criminal sanctions over the past two (2) years, have not been subject to any administrative sanctions due to illegal or irregular business operations, have no unfavorable credit record, and are not under investigation by competent authorities for suspected illegal or irregular business operations;
- The company has not been subject to any regulatory sanctions specified under Article 55(2) and Article 56 of the Regulations on the Administration of Futures Trading as imposed by the CSRC or its local offices;
- There is no ongoing investigation by competent authorities for suspected violations of laws and regulations;
- The futures company has not been subject to any administrative penalties or criminal sanctions for violations of laws and regulations over the past two (2) years. However, if the controlling shareholders or de facto controllers of the futures company change or if the proportion of senior managers changes by more than 50%, the senior managers and business leaders responsible for such changes are no longer employed by the company, and rectification has been completed and approved by the local CSRC office at the company's domicile, this restriction may not apply; and
- Such other requirements as may be prescribed by the CSRC under prudential supervision principles.

The Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》) further prohibit futures companies from accepting client authorizations for futures trading from the following restricted parties: state organs and public institutions; employees of the CSRC and its local offices, futures exchanges, futures margin monitoring and custodian institution, or the CFA, and their spouses; futures company employees and their spouses; persons prohibited from securities/futures market participation; entities or individuals that fail to submit required account-opening materials, and other parties prohibited from engaging in futures trading under the CSRC regulations.

REGULATORY OVERVIEW

Furthermore, pursuant to the Interim Measures for the Administration of Trading in Domestic Specific Futures Products by Overseas Traders and Overseas Brokerage Institutions (《境外交易者和境外經紀機構從事特定品種期貨交易管理暫行辦法》), overseas traders may engage in trading of domestic specific futures products by appointing onshore futures companies. An overseas brokerage institution, upon accepting a valid trading authorization from an overseas trader, may appoint an onshore futures company as its agent for domestic specific futures products. The onshore futures company shall conduct trading activities in its own name as authorized.

Wealth Management

The wealth management business we conduct consist of asset management business, public fund business and securities investment fund distribution business.

Asset Management

Pursuant to the Supervisory Measures for Futures Companies (《期貨公司監督管理辦法》), futures companies may engage in asset management business in accordance with the law, whereby they accept duly authorized client mandates and invest client assets. Investment returns shall belong to the customers, and losses shall be borne by the customers. Futures companies engaging in asset management business shall complete statutory registration and filing procedures.

Pursuant to the Measures for the Private Asset Management Business of Securities and Futures Institutions (《證券期貨經營機構私募資產管理業務管理辦法》), securities and futures operators engaging in private asset management business shall obtain approval from the CSRC and satisfy the following requirements:

- Financial and risk indicators, including net assets and net capital, shall comply with applicable laws, administrative regulations and CSRC provisions;
- The company shall maintain sound corporate governance with comprehensive internal control, compliance management, and risk management systems;
- The company shall have compliant senior management and no fewer than three (3) qualified investment managers;
- The company shall set up an investment research department with no fewer than three (3) full-time research professionals;
- The company shall have business premises, security facilities, and information technology systems that meet regulatory requirements;

REGULATORY OVERVIEW

- The company has not been subject to any administrative penalties or criminal sanctions for material legal or regulatory violations over the past two (2) years; the company has not been subject to administrative regulatory measures imposed by regulators due to material violations of laws or regulations over the past year, nor is it currently under investigation by regulators or competent authorities for suspected material violations; and
- Such other requirements as may be prescribed by the CSRC under prudential supervision principles.

In addition, futures companies engaging in asset management business shall also comply with the Filing Administration Rules for Futures Companies' Asset Management Business (《期貨公司資產管理業務備案管理規則》).

Public Fund Business

In China, we conduct public fund offering, distribution, asset management, specific client asset management, and other business permitted by the CSRC through Nanhua Fund.

Pursuant to the Securities Investment Fund Law of the People's Republic of China (《中華人民共和國證券投資基金法》), a company intending to establish a fund management company to manage publicly offered funds shall meet the following conditions and obtain the approval from the securities regulatory body under the State Council:

- It shall have in place the articles of association that comply with the Securities Investment Fund Law of the People's Republic of China (《中華人民共和國證券投資基金法》) and the Company Law;
- Its registered capital is no less than RMB100 million, being fully paid-up monetary capital;
- Its major shareholders shall possess proven experience in operating financial businesses or managing financial institutions, sound financial conditions, good social credibility, and asset scale meeting standards prescribed by the State Council, with no violations of laws or regulations in the past three years;
- It has a legally required number of qualified personnel with fund practice qualifications;
- Its directors, supervisors and senior management personnel shall meet corresponding qualification requirements;
- It shall possess qualified business premises, security facilities and other facilities related to fund management operations;

REGULATORY OVERVIEW

- It has developed a sound internal governance structure, well-established internal audit and monitoring systems and risk control systems; and
- Other conditions stipulated by laws, administrative regulations and requirements prescribed by the securities regulatory authority under the State Council with its approval.

When applying to raise a fund, the fund manager shall submit application materials pursuant to the Securities Investment Fund Law of the People's Republic of China (《中華人民共和國證券投資基金法》) and CSRC regulations. Fund units may be offered only after successful registration of the fund offering with the regulatory authority. The offering of fund units shall be conducted by the fund manager or a fund distribution institution duly authorized by such manager.

Pursuant to the Supervisory Measures for Publicly Offered Securities Investment Fund Managers (《公開募集證券投資基金管理人監督管理辦法》), funds management companies may engage in private asset management and other related business subject to prior approval or formal accreditation by the CSRC.

In addition, fund management companies shall also comply with the Measures for the Private Asset Management Business of Securities and Futures Institutions (《證券期貨經營機構私募資產管理業務管理辦法》).

Securities Investment Fund Distribution Business

Pursuant to the Measures for the Supervision and Administration of Distributors of Publicly Offered Securities Investment Funds (《公開募集證券投資基金銷售機構監督管理辦法》), futures companies engaging in fund distribution business shall apply to the local CSRC office for the registration of fund distribution business qualification and obtain the Securities and Futures Business Permit. Futures companies applying for the registration of fund distribution business qualification shall satisfy the following conditions:

- The company shall maintain sound financial condition and standardized operations;
- The company shall possess business premises and security facilities compatible with fund distribution business, with an information management platform complying with CSRC requirements;
- The company shall establish and maintain robust business administration and risk governance systems; AML/CFT/FATCA compliance programs fully aligned with statutory requirements; fund sales settlement fund management, investor suitability management, and internal control systems fully complying with the provisions of the CSRC;
- The company shall have no fewer than twenty (20) personnel holding valid fund practice qualifications;

REGULATORY OVERVIEW

- The company has not been subject to criminal penalties or material administrative sanctions over the past three (3) years;
- The company has not been subject to significant administrative regulatory measures concerning comparable business activities over the last year;
- The company is not subject to any ongoing rectification requirements arising from material legal/regulatory violations, or has no active investigations by competent authorities for suspected material breaches;
- There have been no material adverse changes, legal proceedings, arbitrations, or other events that have affected or may affect the company's normal operations;
- The company shall have a dedicated department for fund distribution business;
- Financial risk monitoring and other supervision metrics of the company shall comply with the requirements of the national financial regulatory authorities;
- The company shall staff the department with $\geq 50\%$ personnel with valid fund practice qualifications, and the department head shall possess the fund practice qualification as well as two (2) years of fund business experience or five (5) years of experience in financial institutions;
- The heads of fund distribution business at branch offices shall hold valid fund practice qualifications; and
- Such other requirements as may be prescribed by the CSRC.

Risk Management Business

Pursuant to the Guidelines for Business Pilot Programs by the Risk Management Companies of Futures Companies (《期貨公司風險管理公司業務試點指引》), a futures company shall satisfy the following requirements for filing a risk management subsidiary:

- At the time of registration, the futures company's latest classification rating shall be not lower than Class B Grade BB, and its net capital shall be not less than RMB300 million;
- All of its risk supervision metrics have consistently complied with regulatory requirements over the past year, and will continue to satisfy applicable standards following the establishment of the risk management subsidiary;
- The company shall have sound corporate governance with well-established internal control and risk management systems;

REGULATORY OVERVIEW

- The company shall have a complete management system in place, capable of overseeing the business activities of the risk management subsidiary and ensuring proper risk isolation;
- The company, over the past three (3) years, has not incurred any administrative regulatory sanctions specified under Article 55(2) of the Regulations on the Administration of Futures Trading (《期貨交易管理條例》), or subject to any administrative penalties or criminal sanctions for material legal or regulatory violations;
- The company has not incurred any administrative regulatory sanctions attributable to deficiencies in corporate governance, internal control mechanisms, or risk management systems over the past year; it is not currently undergoing any rectification process related to such deficiencies; it is neither under investigation by competent authorities nor subject to compulsory measures for suspected material legal or regulatory violations; and
- Such other requirements as may be prescribed by the Association under the prudential principle.

Pursuant to the Guidelines for Business Pilot Programs by the Risk Management Companies of Futures Companies (《期貨公司風險管理公司業務試點指引》), a risk management company filing to conduct risk management services shall satisfy the following requirements:

- The classification rating of the futures company shall be not lower than Class B Grade BB;
- The company shall possess sound corporate governance structures with clearly defined decision-making hierarchies and authorization systems as well as robust internal control mechanisms;
- The company shall maintain sufficient capital for its pilot operations, with paid-in capital no less than RMB100 million;
- The company shall possess business premises, qualified professionals, technical systems, and sound compliance/risk control mechanisms commensurate with pilot operations, with no fewer than five (5) personnel holding valid futures practice qualifications; and
- The company shall implement comprehensive client interest protection measures.

In addition, a risk management company shall satisfy the following requirements for filing to conduct OTC derivatives business:

- The classification rating of the futures company shall be not lower than Class B Grade BBB; and
- The OTC derivatives business of the risk management company shall establish dedicated compliance, legal, trading, risk control, and settlement positions, with strict segregation of duties among personnel holding these positions.

REGULATORY OVERVIEW

Pursuant to the Guidelines for the Pilot Operation of Risk Management Subsidiaries of Futures Companies (《期貨公司風險管理公司業務試點指引》), risk management companies may conduct the following pilot business: basis trading, warehouse receipt services, cooperative hedging, OTC derivatives services, market making, and other risk management-related business. The CFA exercises self-regulatory oversight over pilot business activities of futures companies and their risk management subsidiaries, with such activities subject to prior completion of CFA filing procedures before implementation.

The Rules for the Management of Commodity Risk Management Business of Futures Risk Management Companies (《期貨風險管理公司大宗商品風險管理業務管理規則》) promulgated by the China Futures Association on November 15, 2024 and amended on May 13, 2025 specify the business types of commodity risk management and business income recognition methods. The business management of futures risk management companies shall be strengthened by regulating business activities, sorting out business risks and intensifying main responsibilities.

CORPORATE GOVERNANCE AND RISK CONTROL

Corporate governance

The PRC Company Law, the Measures for the Supervision and Administration of Futures Companies (《期貨公司監督管理辦法》), and other applicable laws, regulations, and normative documents have established explicit corporate governance requirements. The Measures for the Administration of Futures Practitioners (《期貨從業人員管理辦法》) have strengthened qualification management and regulate the professional practices of futures practitioners. Futures practitioners shall comply with all applicable laws, administrative regulations, and CSRC provisions; adhere to the self-regulatory rules established by the Association and futures exchanges; refrain from participating in, or facilitating others to engage in, any unlawful conduct including fraud, insider trading, manipulation of futures trading prices, or fabrication and dissemination of false information regarding futures transactions.

Pursuant to the Regulations on the Administration of Futures Trading (《期貨交易管理條例》) and the Measures for the Supervision and Administration of Futures Companies (《期貨公司監督管理辦法》), futures companies shall implement strict separation from their shareholders, de facto controllers, and other related parties in terms of operations, personnel, assets, and financial management, ensuring independent operation and accounting.

Administrative Measures for Appointment of Directors, Supervisors and Senior Executives of Futures Companies (《期貨公司董事、監事和高級管理人員任職管理辦法》), and other senior management personnel of futures companies through eligibility standards, filing procedures for appointments, conduct rules, regulatory supervision, and legal liabilities.

REGULATORY OVERVIEW

Risk Control

Pursuant to the Measures for the Supervision and Administration of Futures Companies (《期貨公司監督管理辦法》) and the Regulation on the Administration of Futures Trading (《期貨交易管理條例》), where a futures company operates both brokerage and other futures business, it shall maintain complete separation between different business lines and funds, with no commingling of operations allowed. The futures regulatory authority under the State Council shall establish risk supervision metrics for futures companies, including ongoing compliance rules, net capital to net asset ratios, net capital to business scale ratios (covering domestic/overseas brokerage), and current asset to liability ratios, and mandate operational requirements for futures companies and their branches regarding business conditions, risk management, internal control, margin custody, and related-party transactions. Futures companies shall establish risk management departments or positions to administer and control operational risks, as well as compliance review departments or positions to conduct reviews and audits of business operations and their adherence to applicable laws and regulations. Futures companies shall implement centralized management of their branches, and be prohibited from jointly operating branches with third parties or from contracting, leasing, or entrusting branch management to third parties.

Pursuant to the Administrative Provisions on Chief Risk Officers of Futures Companies (《期貨公司首席風險官管理規定》), the CRO, as a senior manager of the futures company, shall oversee and examine the legality of the futures company's operations and the risk management status; and conduct inquiries and investigations into potential regulatory violations and risk exposures in the futures company's operational and managerial activities. The inspection shall prioritize verifying whether the futures company has established and enforced systems essential for its sustained and sound operations – including client asset protection and transaction security – in compliance with applicable laws, administrative regulations, and rules.

Pursuant to the Measures for the Administration of Risk-Based Regulatory Indicators of Futures Companies (《期貨公司風險監管指標管理辦法》) Companies, futures companies shall maintain continuous compliance with the following risk supervision metrics:

- Minimum net capital of RMB30 million;
- Net capital to risk capital reserve ratio $\geq 100\%$;
- Net capital to net assets ratio $\geq 20\%$;
- Current assets to current liabilities ratio $\geq 100\%$;
- Liabilities to net assets ratio $\leq 150\%$; and
- Required minimum settlement reserves.

REGULATORY OVERVIEW

The Guidelines for the Preparation and Submission of Risk Supervision Reports by Futures Companies (《期貨公司風險監管報表編製與報送指引》) stipulate that futures companies shall submit monthly risk supervision reports within seven (7) business days following month-end and annual risk supervision reports (audited by a qualified accounting firm) within four (4) months after year-end, through the Futures Industry Supervision System (FISS). We have duly submitted the required monthly and annual risk supervision reports in compliance with the above risk supervision indicator requirements.

Classified Evaluation

Pursuant to the Provisions on the Classified Evaluation of Futures Companies (《期貨公司分類評價規定》), the CSRC shall establish a review mechanism for the categorized evaluation of futures companies, and classifies futures companies into five categories with eleven tiers – A (AAA, AA, A), B (BBB, BB, B), C (CCC, CC, C), D, and E – based primarily on their continuous compliance status and risk management capabilities, supplemented by their market competitiveness and ability to serve the real economy among others. The classification serves as the basis for differentiated regulatory treatment including the allocation of regulatory resources, the implementation of regulatory policies, the frequency of on-site and off-site inspections. The classification results of futures companies may serve as the prudential consideration for business expansion by futures companies and their subsidiaries; the prudential consideration for determining pilot scopes for new business, prioritizing business rollouts, and the basis of differential contribution rates to the Futures Investors Protection Fund; key references for the CSRC and its local offices, the China Futures Monitoring Center (CFMC), and the self-regulatory organizations for securities and futures industry.

OTHER REGULATORY PROVISIONS

Exchange control

Pursuant to the Regulations on Foreign Exchange Administration of the People's Republic of China (《中華人民共和國外匯管理條例》), international payments and transfers shall be classified into current account transactions and capital account transactions. China maintains full convertibility for current account international payments and transfers, while capital account transactions require prior approval from the SAFE and subsequent registration with the foreign exchange regulatory authorities. Foreign exchange earnings from current account transactions may be retained or sold to authorized financial institutions conducting foreign exchange settlement and sale business in accordance with relevant regulations of the State. Foreign exchange earnings from capital account transactions may be retained or sold to authorized financial institutions conducting foreign exchange settlement and sale business only upon approval by the foreign exchange regulatory authorities, unless exempted under relevant State provisions. Domestic institutions and individuals engaging in overseas direct investments or the issuance and trading of overseas negotiable securities and derivatives shall register in accordance with the regulations of the foreign exchange administration authority under State Council. If the State mandates prior approval or filing with the relevant competent authorities, such procedures shall be completed before the foreign exchange registration.

REGULATORY OVERVIEW

Pursuant to the Notice of the State Administration of Foreign Exchange on Issues Concerning Foreign Exchange Management for Overseas Listings 《國家外匯管理局關於境外上市外匯管理有關問題的通知》, the SAFE, its local branches and foreign exchange regulatory departments shall supervise, administer and inspect the business registration, account opening and usage, cross-border receipts and payments and currency exchange relation to overseas listings of domestic companies. A domestic company shall complete the overseas listing registration with the local SAFE branch at its incorporation place by submitting required documents within fifteen (15) business days after the closing of its overseas offering. Proceeds raised by a domestic company through overseas listing may either be repatriated to China or retained offshore, provided that their use strictly conforms to the purposes disclosed in the offering prospectus or bond issuance documents, shareholder circulars, and Board meeting/shareholders' meeting resolutions.

Pursuant to the Notice on Further Simplifying and Improving Foreign Exchange Management Policies for Direct Investment (《關於進一步簡化和改進直接投資外匯管理政策的通知》), banks shall directly review and process foreign exchange registration for inbound direct investment (FDI) and outbound direct investment (ODI). The SAFE and its local branches shall exercise indirect supervision over foreign exchange registration for direct investment through banks.

Pursuant to the Notice of the State Administration of Foreign Exchange on Reforming and Regulating the Policies for the Administration of Foreign Exchange Settlement under the Capital Account (《國家外匯管理局關於改革和規範資本項目結匯管理政策的通知》), domestic institutions may use their foreign exchange income under capital accounts and the RMB funds obtained from its settlement for current account expenditures within their business scope and capital account expenditures permitted by applicable laws and regulations.

Information Disclosure

The Provisions on the Administration of Information Disclosure by Futures Companies (《期貨公司信息披露管理規定》) specify detailed requirements regarding the methods, standards, and content of information disclosure by futures companies. Futures companies shall disclose the basic information about the futures company and its branches, details of senior management and practitioners, shareholder information, integrity records, and other information prescribed by the CSRC. A futures company shall appoint a designated senior manager to oversee information disclosure compliance, and establish a dedicated department responsible for information disclosure and ongoing updates, with such arrangements filed with the local CSRC office at the company's registered domicile.

Anti-Money Laundering and Counter-Terrorist Financing

Futures companies shall comply with anti-money laundering (AML) requirements under the Anti-Money Laundering Law of the People's Republic of China (《中華人民共和國反洗錢法》), Measures for the Supervision and Administration of the Combat of Financial Institutions Against Money Laundering and Financing of Terrorism (《金融機構反洗錢和反恐怖融資監督管理辦法》), and the Measures for the Administration of Customer Identity Identification, Customer Identity Data and Transaction Records Preservation by Financial Institutions (《金融機構客戶身份識別和客戶身份資料及交易記錄保存管理辦法》) jointly issued by PBOC, the China Banking Regulatory Commission, the CSRC, and the China

REGULATORY OVERVIEW

Insurance Regulatory Commission. On August 12, 2022, the CSRC amended the Implementation Measures for Anti-Money Laundering in the Securities and Futures Industry ((《證券期貨業反洗錢工作實施辦法》), further specifying AML rules for the sector. Securities and futures business institutions shall fulfill AML obligations in their business activities, and establish and improve internal AML control mechanisms.

Pursuant to the Notice on Issuing the ‘Guidelines for Anti-Money Laundering and Counter-Terrorist Financing Risk Management by Legal Person Financial Institutions (Trial) (《關於印發<法人金融機構洗錢和恐怖融資風險管理指引(試行)>的通知》)’ issued by PBOC, legal person financial institutions shall establish a sound, well-structured, and clearly-defined AML risk management framework. This framework shall define the respective responsibilities of the Board, the Supervisory Committee, senior management, business departments, the AML compliance department, the internal audit department, the human resources department, the IT department, domestic and overseas branches, and relevant subsidiaries; and establish a tiered, coordinated, and effective operational mechanism to govern AML risk management.

Pursuant to the Administrative Measures for the Reporting of Large-Value and Suspicious Transactions by Financial Institutions (《金融機構大額交易和可疑交易報告管理辦法》), financial institutions, including futures companies, shall fulfill reporting obligations for large-value and suspicious transactions, establish internal management systems and operational procedures for reporting such transactions, and develop and maintain robust monitoring systems for such transactions. In addition, the PBOC has issued the Notice on the Implementation Requirements for the ‘Administrative Measures for the Reporting of Large-Value and Suspicious Transactions by Financial Institutions (《關於<金融機構大額交易和可疑交易報告管理辦法>有關執行要求的通知》)’, which further specifies detailed implementation rules.

Taxation Provisions

Enterprise income tax

Pursuant to the Enterprise Income Tax Law of the People’s Republic of China (《中華人民共和國企業所得稅法》) and the Implementation Regulations of the Enterprise Income Tax Law of the People’s Republic of China (《中華人民共和國企業所得稅法實施條例》), PRC resident enterprises typically pay enterprise income tax at the rate of 25%, unless otherwise eligible for preferential tax treatments under specific industries or projects. Qualifying small and low-profit enterprises shall be subject to a reduced enterprise income tax rate of 20%.

Value-added tax (VAT)

Pursuant to the Interim Regulations on Value-Added Tax of the People’s Republic of China (《中華人民共和國增值稅暫行條例》) and the Implementing Rules for the Interim Regulations on Value-Added Tax of the People’s Republic of China (《中華人民共和國增值稅暫行條例實施細則》), entities and individuals that engage in any of the following activities within the territory of China shall be VAT taxpayers and pay tax on value added through production, sales or service supply: sale of goods; provision of processing, repair, and replacement services; sale of services, intangible assets, and real estate; and importation of goods.

REGULATORY OVERVIEW

Pursuant to the Notice on the Nationwide Implementation of the Pilot Program to Replace Business Tax with Value-Added Tax (《關於全面推開營業稅改征增值稅試點的通知》), effective May 1, 2016, the pilot program to replace Business Tax (BT) with VAT was implemented nationwide, encompassing all former BT taxpayers in the construction, real estate, financial services, and consumer service sectors, who were thereafter subject to VAT obligations instead of BT.

Pursuant to the Notice of the Ministry of Finance and the State Administration of Taxation on Adjusting Value-Added Tax Rates (《財政部、國家稅務總局關於調整增值稅稅率的通知》) (effective May 2018), for taxpayers engaged in VAT-taxable transactions or importing goods that were previously subject to 17% or 11% tax rates, the applicable rates have been adjusted to 16% and 10% respectively. Pursuant to the Announcement of the Ministry of Finance, the State Taxation Administration, and the General Administration of Customs on Deepening Value-Added Tax (VAT) Reform Policies (《財政部、稅務總局、海關總署關於深化增值稅改革有關政策的公告》) (effective April 2019), for general VAT taxpayers engaged in VAT-taxable transactions or importing goods that were previously subject to 16% or 10% tax rates, the applicable rates have been adjusted to 13% and 9% respectively.

Provisions on Labor, Social Insurance, and Housing Provident Fund

Pursuant to the Labor Law of the People's Republic of China (《中華人民共和國勞動法》), the Labor Contract Law of the People's Republic of China (《中華人民共和國勞動合同法》), and the Regulations for the Implementation of the Labor Contract Law of the People's Republic of China (《中華人民共和國勞動合同法實施條例》), an employer shall strictly observe all applicable national standards, provide requisite training to employees, and safeguard their labor rights while ensuring the fulfillment of labor obligations. The employer shall conclude a written labor contract with the employee. The wages paid by the employer to the employee shall not be lower than the local minimum wage standard. The employer shall establish a comprehensive occupational health and safety (OHS) management system, rigorously implement applicable national OHS standards, and provide relevant training to employees. Violations of the aforementioned labor and social security laws and regulations shall be subject to fines and other administrative liabilities. In cases of severe violations, criminal liabilities may be pursued.

Pursuant to the Social Insurance Law of the People's Republic of China (《中華人民共和國社會保險法》) and the Interim Regulations on the Collection of Social Insurance Contributions (《社會保險費徵繳暫行條例》), enterprises in China shall make mandatory social insurance contributions for their employees, covering pension, unemployment, maternity, work-related injury, and basic medical insurance, based on the statutory contribution base and prescribed contribution rates. Where an employer fails to make full payment of the relevant contributions to the competent local authorities by the statutory deadline, it may be ordered to make rectification and/or be subject to fines. Meanwhile, regulations including the Work-Related Injury Insurance Regulations (《工傷保險條例》), the Unemployment Insurance Regulations (《失業保險條例》), and the Interim Measures on Maternity Insurance for Enterprise Employees (《企業職工生育保險試行辦法》) contain specific provisions governing different types of social insurance. Enterprises governed by these regulations shall make statutory contributions to the respective social insurance programs for their employees.

REGULATORY OVERVIEW

Pursuant to the Regulations on the Management of Housing Provident Fund (《住房公積金管理條例》), employers shall register with the Housing Provident Fund Management Center for mandatory housing fund contributions and complete the account opening procedures for their employees. Where an employer fails to complete housing provident fund registration, or establish employee housing provident fund accounts, the Housing Provident Fund Management Center shall order rectification within a prescribed period. Failure to comply shall result in an administrative fine ranging from RMB10,000 to RMB50,000. Employers shall contribute to the housing provident fund in full and on time. If an employer fails to make full housing provident fund contributions or underpays, the Housing Provident Fund Management Center shall order rectification within a specified period. Should the employer persist in non-compliance beyond the deadline, the Center may apply to the People's Court for compulsory enforcement.

Provisions on Information Security and Privacy Protection

Pursuant to the Cybersecurity Law of the People's Republic of China (《中華人民共和國網絡安全法》), promulgated by the National People's Congress Standing Committee (the "NPCSC") on November 7, 2016 and effective as of June 1, 2017, and last amended on October 28, 2025 and will take effect on January 1, 2026, network operators shall not collect personal information irrelevant to their services, or collect/use such information in violation of laws or user agreements. Network operators shall process retained personal information in accordance with applicable laws, administrative regulations, and contractual terms agreed with users. Where the individual identifies inaccuracies in the information collected or stored by the operator, the individual shall have the right to demand rectification. The network operator shall take measures to delete or correct such information. No individual or organization shall obtain personal information through theft or other unlawful means, nor shall they illegally sell or provide such information to others.

Pursuant to the Data Security Law of People's Republic of China (《中華人民共和國數據安全法》) promulgated by the NPCSC on June 10, 2021 and effective as of September 1, 2021, the data processing activities shall comply with laws and regulations, respect social mores and ethics, comply with commercial ethics and professional ethics, be honest and trustworthy, perform obligations to protect data security, and undertake social responsibility; and it shall not endanger national security, the public interest, or individuals' and organizations' lawful rights and interests. Each organization or individual collecting data shall adopt legal and proper methods, and shall not steal or obtain data by any illegal methods.

Pursuant to the Personal Information Protection Law of the People's Republic of China (《中華人民共和國個人信息保護法》), promulgated by the NPCSC on August 20, 2021 and effective as of November 1, 2021, prior to processing personal information, the processor shall inform the individual of the following matters in a conspicuous manner and in plain language, ensuring that the disclosure is truthful, accurate and exhaustive: the name and contact information of the processor; the purpose of personal information processing, processing method, types of personal information processed and the retention period; the methods and procedures for individuals to exercise their rights as stipulated in the Personal Information Protection Law of the People's Republic of China (《中華人民共和國個人信息保護法》); and other information required to be disclosed under applicable laws and administrative regulations. Personal information processors shall take the measures stipulated by applicable laws or administrative regulations based on the processing purpose, methods, types of personal information involved, potential

REGULATORY OVERVIEW

impact on individuals' rights and interests and possible security risks, to ensure compliance with laws and administrative regulations, and to prevent unauthorized access, leakage, alteration or loss of personal information. The processing of personal information shall serve a clearly defined and reasonable purpose and shall be directly relevant to such purpose, while minimizing impact on individuals' rights and interests. Personal information shall only be collected to the extent strictly necessary for the specified processing purpose, with any excessive collection expressly prohibited. The processor shall be accountable for its personal information processing activities and shall adopt necessary measures to ensure the security of processed personal information. No organization or individual shall illegally collect, use, process, or transmit others' personal information; illegally trade, provide, or disclose others' personal information; or engage in personal information processing activities that endanger national security or public interests.

Lease-Related Provisions

Under the Civil Code of the People's Republic of China (《中華人民共和國民法典》), the owner of real estate or movable property shall, in accordance with law, enjoy the rights to possess, use, reap profits from, and dispose of such property. The lessee may sublease the leased premises to a third party with the lessor's consent. In case of sublease by the lessee, the original lease agreement between the lessee and lessor shall remain valid. However, the lessor shall have the right to terminate the lease agreement if the sublease is conducted without the lessor's prior consent. Notwithstanding any transfer of ownership of the leased premises during the lessee's occupancy period pursuant to the lease terms, such transfer shall not invalidate the lease agreement. Pursuant to the Civil Code of the People's Republic of China (《中華人民共和國民法典》), where the leased property was lawfully leased prior to mortgage creation and is subsequently transferred, the pre-existing leasehold interest shall take priority over the subsequently created mortgage interest.

Pursuant to the Administrative Measures for the Leasing of Commercial Residential Housing (《商品房屋租賃管理辦法》), the lessor and lessee shall jointly file the lease registration with the municipal/county-level construction (real estate) authority in the jurisdiction where the leased property is located within thirty (30) days following the execution of the lease contract. Where a company fails to comply with the aforementioned requirements, it shall be ordered to rectify within a prescribed period; and if rectification is not made, a fine ranging from RMB1,000 to RMB10,000 per lease agreement may be imposed.

Intellectual Property Provisions

Trademark

Pursuant to the Trademark Law of the People's Republic of China (《中華人民共和國商標法》) and the Implementing Regulations of the Trademark Law of the People's Republic of China (《中華人民共和國商標法實施條例》), trademarks approved for registration by the Trademark Office shall be registered trademarks, including goods trademarks, service trademarks, collective trademarks, and certification trademarks. The trademark registrant shall enjoy the exclusive right to use the registered trademark, which is protected by law. Any natural person, legal entity, or other organization that requires trademark protection for its goods or services in commercial activities shall file a trademark application with the CNIPA Trademark Office. China adopts the "first-to-file" principle for trademark registration. A

REGULATORY OVERVIEW

trademark registration application shall be rejected if the applied-for mark is identical or similar to, and designates the same or similar goods/services as a prior registered or preliminarily approved trademark of another party. No applicant for trademark registration shall infringe upon any existing prior rights of others or maliciously preempt the registration of a trademark that has been used by others and has acquired certain influence through improper means. A registered trademark shall be valid for ten (10) years, renewable for subsequent ten-year periods upon request by the trademark owner. Any trademark license agreement shall be recorded with the CNIPA Trademark Office for registration. Any of the following acts undertaken without the trademark owner's authorization shall constitute infringement of exclusive trademark rights: using a trademark identical or confusingly similar to a registered mark, and applying such mark to identical or similar goods/services. In such case, the infringer shall be ordered to immediately cease the infringing acts, and be subject to administrative fines. The infringer shall also be liable for compensating the right holder's damages. The compensation amount shall equal either the infringer's illegal gains derived from the infringement or the right holder's actual losses caused by the infringement, including reasonable expenses incurred by the right holder to stop the infringement.

Copyright

Pursuant to the Copyright Law of the People's Republic of China (《中華人民共和國著作權法》) and its implementing regulations, Chinese citizens, legal entities, or other organizations shall enjoy copyright in their works (whether published or not) in accordance with the law. Such works shall include, but not be limited to literary works, oral works, musical, dramatic, and quyi (Chinese folk performance art) works, choreographic and acrobatic art works, fine art and architectural works, photographic works, audiovisual works, computer software, and other intellectual creations meeting the characteristics of works. Unless otherwise provided in the Copyright Law, any of the following acts undertaken without the copyright owner's authorization shall constitute copyright infringement: reproduction or distribution of the works; public performance, screening, or broadcasting; compilation; or communication to the public through information networks.

Pursuant to the Regulations on the Protection of Computer Software (《計算機軟件保護條例》), the copyright owner of software may register the software with a software registration authority recognized by the Copyright Administration Department of the State Council. The registration certificate issued by the software registration authority shall constitute prima facie evidence of the registration. The licensee shall not exercise any rights not expressly licensed in the software copyright license agreement. Where no written contract is executed or the contract does not explicitly stipulate an exclusive license, the licensed rights shall be deemed non-exclusive.

Domain Name

Pursuant to the Administrative Measures for Internet Domain Names (《互聯網域名管理辦法》), the Ministry of Industry and Information Technology shall exercise regulatory oversight over Internet domain names in China, assigning domain names to applicants under the "first-to-file" registration principle. Upon completion of the registration procedures, the applicant shall be officially recognized as the registrant of the domain name. Any use of registered domain names for Internet information services shall comply with all applicable laws, administrative regulations, and regulatory requirements issued by the telecommunications authority, and not facilitate or engage in any unlawful activities.

REGULATORY OVERVIEW

Convertible Corporate Bonds Provisions

Pursuant to the Securities Law, the Measures for the Administration of Convertible Corporate Bonds (《可轉換公司債券管理辦法》) and the Administrative Measures for Sponsorship Business of Securities Issuance and Listing (《證券發行上市保薦業務管理辦法》), where an issuer applies to issue convertible corporate bonds through a legally mandated underwriting process, it shall engage a securities company qualified for sponsorship business to fulfill sponsorship duties.

A listed company shall meet the following requirements for issuing corporate bonds convertible into shares: maintain sound and well-functioning corporate governance structures; have average distributable profits over the last three (3) years sufficient to cover one (1) year's bond interest payments; and fulfill additional requirements promulgated by the State Council. In addition to meeting the aforementioned requirements, the listed company shall maintain sustainable operating capacity.

Funds raised through public corporate bond offerings shall be exclusively used for the purposes specified in the bond offering documents, and require a bondholders' meeting resolution for any alteration of use. Funds raised through public corporate bond offerings shall not be used for covering operating losses or non-productive expenditures.

The Administrative Measures for Securities Issuance and Underwriting (《證券發行與承銷管理辦法》) set forth provisions governing the participation of issuers, securities companies, and investors in bookbuilding and pricing, securities offering, securities underwriting, and information disclosure. These Measures shall apply to the following activities conducted within China: issuing shares or convertible corporate bonds, securities underwriting business conducted by securities companies, and subscription of domestically issued securities by investors. Pursuant to these Measures, where a listed company conducts the public offering of shares or public issuance of convertible corporate bonds to unspecified investors, it may implement a preferential allocation mechanism for existing shareholders (in whole or in part), subject to mandatory disclosure of the exact allocation percentage in the offering prospectus.

Pursuant to the Administrative Measures for the Issuance and Trading of Corporate Bonds (《公司債券發行與交易管理辦法》), the issuance of corporate bonds may incorporate terms such as equity warrants and convertibility into underlying shares. Listed companies may issue corporate bonds incorporating terms that allow exchange for their listed shares. Commercial banks and other financial institutions may issue corporate bonds to replenish capital in accordance with applicable regulations. A listed company issuing corporate bonds incorporated with terms such as equity warrants and convertibility into shares shall comply with all applicable regulations governing securities issuance by listed companies.

REGULATORY OVERVIEW

PROVISIONS ON OVERSEAS SECURITIES OFFERINGS AND LISTINGS BY DOMESTIC ENTERPRISES

Securities Laws and Regulations

The Securities Law comprehensively regulates activities in China's securities market, including securities issuance and trading, listed company governance, stock exchange operations, acquisitions of securities firms, and duties of securities regulatory authorities. The Securities Law further provides that domestic enterprises issuing securities overseas, whether directly or indirectly, or listing securities on overseas markets, shall comply with the relevant regulations of the State Council, and that specific measures governing the subscription and trading of domestic company shares in foreign currencies shall be separately prescribed by the State Council. The CSRC, a securities regulatory authority established by the State Council, shall supervise and administer the securities market in accordance with the law, maintain market order, and ensure lawful market operations. The issuance and trading of H shares are currently governed by administrative regulations promulgated by the State Council, departmental rules issued by the CSRC, and normative documents.

Overseas Listing

Pursuant to the Interim Measures for the Administration of Overseas Securities Offering and Listing by Domestic Enterprises (《境內企業境外發行證券和上市管理試行辦法》) and its five supporting regulatory guidelines, China has comprehensively reformed its regulatory regime for overseas listings – whereby domestic enterprises, either directly or indirectly, issue securities overseas or list their securities on overseas markets – by implementing a unified filing-based framework. Pursuant to the Trial Measures of Overseas Securities Offering and Listing, domestic Chinese companies seeking to issue or list securities on overseas markets – whether through direct or indirect structures – shall file required documents with the CSRC within three (3) business days after submitting their overseas listing application.

Pursuant to the Interim Measures for the Administration of Overseas Securities Offering and Listing by Domestic Enterprises (《境內企業境外發行證券和上市管理試行辦法》), for direct overseas listings by domestic enterprises, the issuer shall complete filing procedures with the CSRC. Overseas securities offering and listing shall be prohibited under any of the following circumstances:

- Where listing and financing are expressly prohibited by laws, administrative regulations, or other relevant State provisions;
- Where the relevant competent authorities of the State Council determine, upon examination in accordance with law, that the overseas securities offering and listing may endanger national security;
- Where, within the preceding three (3) years, a domestic enterprise or its controlling shareholders or de facto controllers has been convicted of criminal offenses including corruption, bribery, embezzlement, misappropriation of property, or disruption of socialist market economic order;

REGULATORY OVERVIEW

- Where a domestic enterprise is currently under official investigation for suspected criminal offenses or material regulatory violations pursuant to law, and no definitive determination has yet been rendered; and
- Where material ownership disputes exist regarding: shares held by the controlling shareholders or shares held by shareholders under the control of such controlling shareholders and/or the de facto controllers.

Pursuant to the Provisions on Strengthening Confidentiality and Archives Management for Overseas Securities Offerings and Listings by Domestic Enterprises (《關於加強境內企業境外發行證券和上市相關保密和檔案管理工作的規定》), where a domestic enterprise provides or discloses to securities firms, securities service institutions, overseas regulatory authorities, or other entities/individuals any documents or materials containing State secrets or confidential government information, it shall obtain prior approval from the competent regulatory authority with jurisdictional power, and subsequently file the approval with the confidentiality administration department at the corresponding administrative level. The working papers generated within the territory of the PRC by securities companies and securities service institutions providing services for the overseas issuance and listing of domestic enterprises shall be stored within the PRC. Any cross-border transfer of such working papers shall be subject to examination and approval procedures in accordance with the relevant provisions of the State.

OVERVIEW OF THE LAWS AND REGULATIONS RELATING TO OUR BUSINESS AND OPERATIONS IN HONG KONG

As we provide overseas financial services from our subsidiaries in Hong Kong, our business operations are subject to the laws of Hong Kong. The key laws and regulations which relate to our business and operations in Hong Kong are summarized as follows:

Introduction

The SFO, including its subsidiary legislation, is the principal legislation regulating the securities and futures industry in Hong Kong, including the regulation of securities, futures and leveraged foreign exchange markets, the offering of investments to the public in Hong Kong, and intermediaries and their conduct of regulated activities. In particular, Part V of the SFO deals with licensing and registration matters.

The SFO is administered by the Securities and Futures Commission of Hong Kong (“SFC”) which is an independent statutory body in Hong Kong set up to regulate the securities and futures markets and the non-bank leveraged foreign exchange market in Hong Kong.

In addition, the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Chapter 32 of the Laws of Hong Kong) (“CWUMPO”), including its subsidiary legislation provides that the SFC is responsible for authorizing the registration of prospectuses for offerings of shares and debentures in Hong Kong and/or granting exemptions from strict compliance with the provisions in the CWUMPO. The SFO provides that the SFC is also responsible for authorizing certain securities (including the relevant offering documents) that are not shares or debentures.

REGULATORY OVERVIEW

The Hong Kong securities and futures industry (with respect to listed instruments) is also governed by the rules and regulations introduced and administered by the Hong Kong Stock Exchange and the Hong Kong Futures Exchange.

Types of regulated activities

The SFO provides a licensing regime where a person needs to obtain a license to carry on a business in any of the following regulated activities as defined in Schedule 5 to the SFO:

License	Regulated Activity
Type 1:	Dealing in securities
Type 2:	Dealing in futures contracts
Type 3:	Leveraged foreign exchange trading
Type 4:	Advising on securities
Type 5:	Advising on futures contracts
Type 6:	Advising on corporate finance
Type 7:	Providing automated trading services
Type 8:	Securities margin financing
Type 9:	Asset management
Type 10:	Providing credit rating services
Type 11:	Dealing in OTC derivative products or advising on OTC derivative products
Type 12:	Providing client clearing services for OTC derivative transactions
Type 13:	Providing depositary services for SFC-authorized collective investment schemes

As of the date of this prospectus, below subsidiaries were licensed under the SFO to conduct the following regulated activities:

Regulated Activities by Type of License

HGNH International Futures	Type 2, Type 5
HGNH International AM	Type 4 with a licensing condition to only provide services to professional investors (the term “ professional investor ” is as defined in the SFO and its subsidiary legislation), Type 9 with a licensing condition to only provide services to professional investors
HGNH International Securities	Type 1, Type 4

REGULATORY OVERVIEW

Overview of Licensing Requirements under the SFO

Under the SFO, any person who carries on a business in a regulated activity or holds itself out as carrying on a business in a regulated activity must be licensed under the relevant provisions of the SFO to carry on that regulated activity, unless any exemption under the SFO applies. This applies to a corporation carrying on a business in a regulated activity and to any individuals acting on behalf of that corporation in carrying on such activities, as further described below. It is an offense for a person to conduct any regulated activity without the appropriate license issued by the SFC.

Further, if a person (whether by itself or another person on his behalf, and whether in Hong Kong or from a place outside of Hong Kong) actively markets to the public in Hong Kong any services that it provides and such services, if provided in Hong Kong, would constitute a regulated activity, then that person is also subject to the licensing requirements under the SFO.

Responsible Officers

In order for a licensed corporation to carry on any of the regulated activities, it must appoint no less than two Responsible Officers (“**Responsible Officers**”) for each regulated activity conducted by a licensed corporation, at least one of whom must be an executive director, to supervise each regulated activity.

An “executive director” of a licensed corporation is defined as a director of the corporation who (a) actively participates in or (b) is responsible for directly supervising, the business of a regulated activity or activities for which the corporation is licensed. Every executive director of the licensed corporation who is an individual must apply to the SFC to be approved as a Responsible Officer of such licensed corporation in relation to the regulated activities.

Managers-in-Charge of Core Functions (“MICs”)

A licensed corporation is required to designate certain individuals as MICs and provide to the SFC information about its MICs and their reporting lines. MICs are individuals appointed by a licensed corporation to be principally responsible, either alone or with others, for managing each of the following eight core functions of the licensed corporation:

- (a) overall management oversight;
- (b) key business lines;
- (c) operational control and review;
- (d) risk management;
- (e) finance and accounting;

REGULATORY OVERVIEW

- (f) information technology;
- (g) compliance; and
- (h) anti-money laundering and counter-terrorist financing.

The management structure of a licensed corporation (including its appointment of MICs) should be approved by the board of the licensed corporation. The board should ensure that each of the licensed corporation's MICs has acknowledged his or her appointment as MIC and the particular core function(s) for which he or she is principally responsible.

Licensed Representatives

In addition to the licensing requirements for corporations that carry on regulated activities, any individual who:

- (a) performs any regulated function for his principal which is a licensed corporation in relation to a regulated activity carried on as a business; or
- (b) holds himself out as performing such regulated function,
- (c) must separately be licensed under the SFO as a Licensed Representative accredited to his principal.

Fit and Proper Requirement

Persons who apply for licenses to carry on regulated activities under the SFO must satisfy, and continue to satisfy the SFC after the grant of such licenses by the SFC, that they are fit and proper persons to be so licensed. The Fit and Proper Guidelines issued by the SFC under section 399 of the SFO ("**Fit and Proper Guidelines**") summaries certain matters that the SFC will generally consider when determining whether the applicant is a fit and proper person to be licensed under the SFO. Effective from January 1, 2022, the additional fit and proper guidelines for corporations and authorized financial institutions applying or continuing to act as sponsors and compliance advisers are addressed under the Guidelines on Competence and Guidelines on Continuous Professional Training.

Under the Fit and Proper Guidelines, the SFC will consider the following matters of the applicant in addition to any other issues as it may consider to be relevant:

- (a) the financial status or solvency;
- (b) the educational or other qualifications or experience having regard to the nature of the functions to be performed;

REGULATORY OVERVIEW

- (c) the ability to carry on the regulated activity competently, honestly and fairly; and
- (d) the reputation, character, reliability and financial integrity.

The SFC will consider the above matters in respect of the person (if an individual), the corporation and any of its officers (if a corporation) or the institution, its directors, chief executive, managers and executive officers (if an authorized financial institution).

In addition to the above, the SFC may also take into account of the following matters:

- (a) any decisions made by the Hong Kong Monetary Authority, the Insurance Authority, the Mandatory Provident Fund Schemes Authority or any other authorities or organizations performing similar functions as those of SFC (in the SFC's opinion) whether in Hong Kong or elsewhere in respect of the applicant;
- (b) any information relating to:
- (c) any person who is or is to be employed by, or associated with, the applicant for the purpose of the regulated activity in question;
- (d) any person who will be acting for or on behalf of the applicant in relation to the regulated activity in question; and
- (e) if the applicant is a corporation in a group of companies, any other corporation within the same group of companies or any substantial shareholder or officer of any such corporation;
- (f) whether the applicant has established effective internal control procedures and risk management systems to ensure its compliance with all applicable regulatory requirements under any of the relevant provisions; and
- (g) the state of affairs of any other business which the person carries on or proposes to carry on.

Continuing Obligations of Licensed Corporations

Licensed corporations, Licensed Representatives and Responsible Officers must remain fit and proper at all times. They are required to comply with all applicable provisions of the SFO and its subsidiary rules and regulations, as well as the codes and guidelines issued by the SFC.

Outlined below are some of the key continuing obligations of our licensed corporations under the SFO:

- maintenance of minimum paid-up share capital and liquid capital, and submission of financial resources returns to the SFC in accordance with the requirements under the Securities and Futures (Financial Resources) Rules of Hong Kong (“**FRR**”);

REGULATORY OVERVIEW

- maintenance of segregated account(s), and custody and handling of client securities in accordance with the requirements under the Securities and Futures (Client Securities) Rules (Chapter 571H of the Laws of Hong Kong);
- maintenance of segregated account(s), and holding and payment of client money in accordance with the requirements under the Securities and Futures (Client Money) Rules (Chapter 571I of the Laws of Hong Kong);
- issuance of contract notes, statements of account and receipts in accordance with the requirements under the Securities and Futures (Contract Notes, Statements of Account and Receipts) Rules (Chapter 571Q of the Laws of Hong Kong);
- maintenance of proper records in accordance with the requirements prescribed under the Securities and Futures (Keeping of Records) Rules (Chapter 571O of the Laws of Hong Kong);
- submission of audited accounts and other required documents in accordance with the requirements under the Securities and Futures (Accounts and Audit) Rules (Chapter 571P of the Laws of Hong Kong);
- maintenance of insurance against specific risks for specified amounts in accordance with the requirements under the Securities and Futures (Insurance) Rules (Chapter 571AI of the Laws of Hong Kong);
- payment of annual fees and submission of annual returns to the SFC within one month after each anniversary date of the license;
- notification to the SFC of certain changes and events in accordance with the requirements under the Securities and Futures (Licensing and Registration) (Information) Rules (Chapter 571S of the Laws of Hong Kong);
- notification to the SFC of any changes in the appointment of MICs or any changes in certain particulars of MICs pursuant to the Circular to Licensed Corporations Regarding Measures for Augmenting the Accountability of Senior Management dated December 16, 2016 issued by the SFC;
- compliance with the continuous professional training and related record keeping requirements under the Guidelines on Continuous Professional Training issued by the SFC;
- implementation of appropriate policies and procedures relating to client acceptance, client due diligence, record keeping, identification and reporting of suspicious transactions and staff screening, education and training in accordance with the requirements under the Guideline on Anti-Money Laundering and Counter-Financing of Terrorism (For Licensed Corporations) issued by the SFC (“**AMLCTF Guideline**”);

REGULATORY OVERVIEW

- compliance with the business conduct requirements under the Code of Conduct for Persons Licensed by or Registered with the SFC, the Management, Supervision and Internal Control Guidelines for Persons Licensed by or Registered with the Securities and Futures Commission, the Fund Manager Code of Conduct and the Fit and Proper Guidelines;
- compliance with employee dealings requirements under the Code of Conduct for Persons Licensed by or Registered with the Securities and Futures Commission, which requires licensed corporations to implement procedures and policies on employee trading, to actively monitor the trading activities in their employees' accounts and their related accounts;
- compliance with the Advertising Guidelines Applicable to Collective Investment Schemes Authorized under the Product Codes, the Guidelines on Disclosure of Fees and Charges Relating to Securities Services and other applicable codes, circulars and guidelines issued by the SFC; and
- compliance with the requirements in relation to provision of order execution, distribution or advisory services in respect of investment products via online platforms under the Guidelines on Online Distribution and Advisory Platforms issued by the SFC.

The Securities and Futures (Financial Resources) Rules of Hong Kong

Subject to certain exemptions specified under the FRR, a licensed corporation is required to maintain minimum paid-up share capital in accordance with the FRR. The following table sets out a summary of the key requirements on minimum paid-up share capital under the FRR which are applicable to certain HGNH Companies:

	Regulated Activities	Minimum Amount of Paid-up Share Capital
HGNH International Futures	Type 2, Type 5	HK\$5,000,000
HGNH International AM	Type 4 with a licensing condition to only provide services to professional investors, Type 9 with a licensing condition to only provide services to professional investors	HK\$5,000,000
HGNH International Securities	Type 1, Type 4	HK\$5,000,000

REGULATORY OVERVIEW

In addition, the FRR also requires a licensed corporation to maintain minimum liquid capital. The minimum liquid capital requirement under the FRR that is applicable to certain of our subsidiaries is as below:

	Regulated Activities	Minimum Amount of Paid-up Share Capital
HGNH International Futures	Type 2, Type 5	HK\$3,000,000
HGNH International AM	Type 4 with a licensing condition to only provide services to professional investors, Type 9 with a licensing condition to only provide services to professional investors	HK\$3,000,000
HGNH International Securities	Type 1, Type 4	HK\$3,000,000

Securities and Futures (Client Securities) Rules (Chapter 571H of the Laws of Hong Kong) (the “Client Securities Rules”)

The repledging limit stipulated under section 8A of the Client Securities Rules applies to an intermediary which is licensed for dealing in securities and/or securities margin financing and where the intermediary or an associated entity of such intermediary repledges securities collateral of the intermediary. On each business day, the intermediary shall ascertain the aggregate market value of the repledged securities collateral, which shall be calculated by reference to the respective closing prices of the collateral on that business day.

Pursuant to section 8A of the Client Securities Rules, if the aggregate market value of the repledged securities collateral as calculated above exceeds 140% of the intermediary’s aggregate margin loans on the same business day (“**Relevant Day**”), the intermediary shall by the close of business on the next business day following the Relevant Day (“**Specified Time**”), withdraw, or causes to be withdrawn, from deposit an amount of repledged securities collateral such that the aggregate market value of the repledged securities collateral at the Specified Time, which is calculated by reference to the respective closing prices on the Relevant Day, does not exceed 140% of the intermediary’s aggregate margin loans as of the close of business on the Relevant Day.

REGULATORY OVERVIEW

Exchange and Clearing Participantship

As of date hereof, certain of our subsidiaries were participants of the following:

HGNH International Futures:

<u>Exchange/Clearing House</u>	<u>Type of Participantship</u>
HKCC	Clearing Participant
Hong Kong Futures Exchange	Futures Commission Merchant

HGNH International Securities:

<u>Exchange/Clearing House</u>	<u>Type of Participantship</u>
Hong Kong Stock Exchange	Participant
	China Connect Exchange Participant
HKSCC	Direct Clearing Participant
	China Connect Clearing Participant

Trading Rights

In addition to the licensing requirements under the SFO, the rules promulgated by the Stock Exchange of Hong Kong and the Hong Kong Futures Exchange require any person who wishes to trade on or through their respective facilities to hold a trading right (“**Trading Right**”). The Trading Right confers on its holder the eligibility to trade on or through the relevant exchange. However, the holding of a Trading Right does not, of itself, permit the holder to actually trade on or through the relevant exchange. In order to do this, it is also necessary for the person to be registered as a participant of the relevant exchange in accordance with its rules, including those requiring compliance with all relevant legal and regulatory requirements.

The Stock Exchange of Hong Kong Trading Rights and the Hong Kong Futures Exchange Trading Rights are issued by the Stock Exchange of Hong Kong and the Hong Kong Futures Exchange at a fee and in accordance with the procedures set out in their respective rules. Alternatively, the Stock Exchange of Hong Kong Trading Rights and the Hong Kong Futures Exchange Trading Rights can be acquired from existing Trading Right holders subject to the rules of the respective exchanges.

REGULATORY OVERVIEW

Exchange Participants

The table below sets out a summary of the key requirements for becoming an exchange participant of the relevant exchange:

	<u>Stock Exchange Participant/Stock Options Exchange Participant</u>	<u>Futures Exchange Participant</u>
Legal Status	Being a company limited by shares incorporated in Hong Kong	
SFC Registration	Being a licensed corporation qualified to carry out Type 1 regulated activity under the SFO	Being a licensed corporation qualified to carry out Type 2 regulated activity under the SFO
Trading Right	Holding a Stock Exchange Trading Right	Holding a Futures Exchange Trading Right
Financial Standing	Having good financial standing and integrity	
Financial Resources Requirement	Complying with the minimum capital requirement, liquid capital requirement and other financial resources requirements as specified by the FRR	

Clearing Participants

An entity must be an exchange participant of the relevant exchange before it can become a clearing participant of the following clearing houses, namely the HKSCC and HKCC.

HKSCC

HKSCC has, among others, two categories of participants: (1) the Direct Clearing Participant; and (2) the General Clearing Participant. The requirements of Direct Clearing Participants are as follows:

- to be an Exchange Participant of the Stock Exchange of Hong Kong;
- to undertake to (i) sign a participant agreement with HKSCC; (ii) pay to HKSCC an admission fee of HK\$50,000 in respect of each Stock Exchange Trading Right held by it; and (iii) pay to HKSCC its contribution to the guarantee fund of HKSCC as determined by HKSCC from time to time subject to a minimum cash contribution of the higher of HK\$50,000 or HK\$50,000 in respect of each Stock Exchange Trading Right held by it;

REGULATORY OVERVIEW

- to open and maintain a single current account with one of the CCASS designated banks and execute authorizations to enable the designated bank to accept electronic instructions from HKSCC to credit or debit the account for CCASS money settlement, including making payment to HKSCC;
- to provide a form of insurance to HKSCC as security for liabilities arising from defective securities deposited by it into CCASS, if so required by HKSCC; and
- to have a minimum liquid capital of HK\$3,000,000.

HKCC

HKCC has two categories of participation: (1) the General Clearing Participant; and (2) the Clearing Participant. The requirements of Clearing Participation are as follows:

- be an Exchange Participant of the Hong Kong Futures Exchange;
- have a liquid capital of not less than the higher of:
 - (a) its required liquid capital under the Securities and Futures (Financial Resources) Rules; or
 - (b) HK\$5,000,000; and
- contribute HK\$1,500,000 participant deposit to the reserve fund under the rules of HKCC.

China Connect Exchange Participant

China Connect is open to all Exchange Participants, but Exchange Participants who wish to participate must satisfy certain eligibility requirements published on the Stock Exchange website at <http://www.hkex.com.hk/mutualmarket>.

Only the following Exchange Participants shall be eligible to apply for registration and to remain registered as China Connect Exchange Participants: (1) Exchange Participants that are CCASS Clearing Participants, and (2) Exchange Participants that are not CCASS Clearing Participants but have entered into a valid, binding and effective CCASS Clearing Agreement with a CCASS GCP which is and remains registered by HKSCC as a China Connect CCASS Clearing Participant for the clearing of its China Connect Securities Trades (capitalized terms of which are defined in the Rules of the Hong Kong Stock Exchange).

The Stock Exchange may publish the China Connect Exchange Participant Registration Criteria (as defined in the Rules of the Stock Exchange) and a list of the China Connect Exchange Participants registered from time to time on the website of the Stock Exchange or by other means that it considers appropriate.

REGULATORY OVERVIEW

China Connect Clearing Participant

Only China Connect Clearing Participants may use China Connect Clearing Services relating to the clearing and settlement of China Connect Securities Trades. The requirements for being accepted for registration and remaining registered as a China Connect Clearing Participant are as follows:

- to be a Direct Clearing Participant or a General Clearing Participant;
- to undertake to pay HKSCC such amount of Mainland Settlement Deposit, Mainland Security Deposit, Marks and Collateral as may be specified by HKSCC in accordance with the Operational Procedures of HKSCC in relation to CCASS; and
- to meet all other relevant China Connect Clearing Participant Registration Criteria.

HKSCC may from time to time prescribe additional eligibility criteria for participants to be accepted for registration and to remain registered as China Connect Clearing Participants. HKSCC may publish the China Connect Clearing Participant Registration Criteria and a list of China Connect Clearing Participants on the website of the Stock Exchange or by other means that it considers appropriate.

Anti-Money Laundering and Counter-Terrorist Financing

Licensed corporations are required to comply with the applicable anti-money laundering and counter-terrorist financing laws and regulations in Hong Kong as well as the AMLCTF Guideline and the Prevention of Money Laundering and Terrorist Financing Guideline issued by the Securities and Futures Commission for Associated Entities.

The AMLCTF Guideline provides practical guidance to assist licensed corporations and their senior management in formulating and implementing their own policies, procedures and controls in order to meet applicable legal and regulatory requirements in Hong Kong. Under the AMLCTF Guideline, licensed corporations should, among other things:

- assess the risks of any new products and services before they are introduced and ensure that appropriate additional measures and controls are implemented to mitigate and manage the risks associated with money laundering and terrorist financing;
- consider the delivery and distribution channels (which may include sales through online, postal or telephone channels where a non-face-to-face account opening approach is used and business sold through intermediaries) and the extent to which they are vulnerable to abuse for money laundering and terrorist financing;
- identify the client and verify the client's identity and any beneficial owner's identity by reference to any documents, information or data from reliable and independent sources, and take steps from time to time to ensure that the client information obtained is up-to-date and relevant;

REGULATORY OVERVIEW

- conduct on-going monitoring of activities of the clients to ensure that they are consistent with the nature of business, the risk profile and source of funds, as well as identify transactions that are complex, large or unusual, or patterns of transactions that have no apparent economic or lawful purpose and which may indicate money laundering and terrorist financing;
- maintain a database of names and particulars of terrorist suspects and designated parties which consolidates the information from various lists that have been made known to them, as well as conduct comprehensive on-going screening of the client database; and
- conduct on-going monitoring for identification of suspicious transactions and ensure compliance with their legal obligations of reporting funds or property known or suspected to be proceeds of crime or terrorist property to the Joint Financial Intelligence Unit, a unit jointly run by the Hong Kong Police Force and the Hong Kong Customs and Excise Department to monitor and investigate suspicious financial or money laundering activities.

The below is a brief summary of the principal legislation in Hong Kong that is concerned with anti-money laundering and counter-terrorist financing.

Anti-Money Laundering and Counter-Terrorist Financing Ordinance (Chapter 615 of the Laws of Hong Kong) (“AMLO”)

Among other things, the AMLO imposes on certain institutions (which include licensed corporations as defined under the SFO) certain requirements relating to customer due diligence and record-keeping. The AMLO empowers the relevant regulatory authorities to supervise compliance with the requirements under the AMLO. In addition, a financial institution must take all reasonable measures to (1) ensure that proper safeguards exist to prevent contravention of specific provisions in the AMLO, and (2) mitigate money laundering and terrorist financing risks.

Licensing Requirements for Trust or Company Service Providers (“TCSP”) under the AMLO

A person who carries on or wishes to carry on a trust or company service business in Hong Kong is required to apply for a licence under the AMLO, unless any exemption under the AMLO applies. The Companies Registry of Hong Kong is responsible for the administration of the licensing regime for TCSPs. It is an offense for a person to carry on a trust or company service business in Hong Kong without a licence.

A TCSP licence, once granted, will generally be valid for three years. The Companies Registry of Hong Kong is empowered to grant, refuse to grant, renew, suspend or revoke a licence, and impose or vary any conditions in relation to a licence. TCSP licensees are required to obtain prior approval from the Registrar of Companies of Hong Kong before any person becomes an ultimate owner, a partner or a director of a licensee. They should also give notifications to the Registrar of Companies of Hong Kong of any changes in particulars previously provided in connection with an application for the grant or renewal of a licence within one month of the change. A TCSP licensee who intends to cease to carry on the trust or company service business is also required to, before the intended date of cessation, notify the Registrar of Companies of Hong Kong of that intention and the intended date of cessation.

REGULATORY OVERVIEW

TCSP licensees are also required to comply with the statutory customer due diligence and record-keeping requirements as set out in Schedule 2 to the AMLO.

The Companies Registry of Hong Kong published the “Guideline on Licensing of Trust or Company Service Providers” to provide information on the licensing requirements and the “Guideline on Compliance of Anti-Money Laundering and Counter-Terrorist Financing Requirements for Trust or Company Service Providers” to provide guidance on the ongoing obligations of TCSP licensees. The register of licensees, which contains the name and business address of every TCSP licensee, is maintained by the Registrar of Companies of Hong Kong and is available for public inspection.

Drug Trafficking (Recovery of Proceeds) Ordinance (Chapter 405 of the Laws of Hong Kong) (“DTROP”)

Among other things, the DTROP contains provisions for the investigation of assets suspected to be derived from drug trafficking activities, the freezing of assets on arrest and the confiscation of the proceeds from drug trafficking activities by the competent authorities. It is an offense under the DTROP for a person to deal with any property knowing or having reasonable grounds to believe it to represent the proceeds from drug trafficking. The DTROP requires a person to report to an authorized officer if he/she knows or suspects that any property (in whole or in part directly or indirectly) represents the proceeds of drug trafficking or is intended to be used or was used in connection with drug trafficking, and failure to make such disclosure constitutes an offense under the DTROP.

Organized and Serious Crimes Ordinance (Chapter 455 of the Laws of Hong Kong) (“OSCO”)

Among other things, the OSCO empowers officers of the Hong Kong Police Force and the Hong Kong Customs and Excise Department to investigate organized crime and triad activities, and confers jurisdiction on the Hong Kong courts to confiscate the proceeds of organized and serious crimes, to issue restraint orders and charging orders in relation to the property of defendants of specified offenses under the OSCO. The OSCO extends the money laundering offense to cover the proceeds from all indictable offenses in addition to drug trafficking.

United Nations (Anti-Terrorism Measures) Ordinance (Chapter 575 of the Laws of Hong Kong) (“UNATMO”)

Among other things, the UNATMO stipulates that it is a criminal offense to: (1) provide or collect property (by any means, directly or indirectly) with the intention or knowledge that the property will be used to commit, in whole or in part, one or more terrorist acts; or (2) make any property or financial (or related) services available, by any means, directly or indirectly, to or for the benefit of a person knowing that, or being reckless as to whether, such person is a terrorist or terrorist associate, or collect property or solicit financial (or related) services, by any means, directly or indirectly, for the benefit of a person knowing that, or being reckless as to whether, the person is a terrorist or terrorist associate. The UNATMO also requires a person to disclose his knowledge or suspicion of terrorist property to an authorized officer, and failure to make such disclosure constitutes an offense under the UNATMO.

REGULATORY OVERVIEW

Personal Data (Privacy) Ordinance (Chapter 486 of the Laws of Hong Kong), (“PDPO”)

The PDPO imposes a statutory duty on data users to comply with the requirements of the six data protection principles (the “**Data Protection Principles**”) contained in Schedule 1 to the PDPO. The PDPO provides that a data user shall not do an act, or engage in a practice, that contravenes a Data Protection Principle unless the act or practice, as the case may be, is required or permitted under the PDPO. The six Data Protection Principles are:

- Principle 1 – purpose and manner of collection of personal data;
- Principle 2 – accuracy and duration of retention of personal data;
- Principle 3 – use of personal data;
- Principle 4 – security of personal data;
- Principle 5 – information to be generally available; and
- Principle 6 – access to personal data.

Non-compliance with a Data Protection Principle may lead to a complaint to the Privacy Commissioner for Personal Data (the “**Privacy Commissioner**”). The Privacy Commissioner may serve an enforcement notice to direct the data user to remedy the contravention and/or instigate prosecution actions. A data user who contravenes an enforcement notice commits an offense which may lead to a fine and imprisonment.

The PDPO also gives data subjects certain rights, *inter alia*:

- the right to be informed by a data user whether the data user holds personal data of which the individual is the data subject;
- if the data user holds such data, to be supplied with a copy of such data; and
- the right to request correction of any data they consider to be inaccurate.

The PDPO criminalizes, including but not limited to, the misuse or inappropriate use of personal data in direct marketing activities, non-compliance with a data access request and the unauthorized disclosure of personal data obtained without the relevant data user’s consent. An individual who suffers damage, including injured feelings, by reason of a contravention of the PDPO in relation to his or her personal data may seek compensation from the data user concerned.

REGULATORY OVERVIEW

Hong Kong Taxation

Hong Kong profits tax is chargeable on every person, including corporations, carrying on a trade, profession or business in Hong Kong in respect of profits arising in or derived from Hong Kong from such trade, profession or business (excluding profits arising from the sale of capital assets). However, profits arising from the sale of capital assets are not subject to Hong Kong profit tax. Whether (i) an activity amounted to trade, profession or business; (ii) an asset is capital in nature or revenue in nature; and/or (iii) profits are arising in or derived from Hong Kong are questions of fact. Under the current Hong Kong Inland Revenue Ordinance, Hong Kong profits tax for a corporation from the year of assessment 2018/2019 onwards is generally 8.25% on assessable profits up to HK\$2.0 million; and 16.5% on any part of assessable profits over HK\$2.0 million.

In addition, if the transfer of a share is required to be registered in a share register in Hong Kong, or Hong Kong Share, stamp duty will be payable by the person(s) who effects any sale or purchase of such Hong Kong Share. As at the date hereof, the stamp duty in relation to transfer of Hong Kong Share is charged at the ad valorem rate of 0.1% of the consideration for, or (if greater) the value of, the shares transferred on each of the seller and purchaser. In other words, a total of 0.2% of the consideration for, or (if greater) the value of, the shares transferred is currently payable on a typical sale and purchase transaction of Hong Kong Share. In addition, the instrument of transfer (if required) will be subject to a flat rate of stamp duty of HK\$5.00.

Regulations on Employment in Hong Kong

The principle legislations that govern employment matters in Hong Kong include: (i) the Employment Ordinance (Chapter 57 Laws of Hong Kong); (ii) Minimum Wage Ordinance (Chapter 608 Laws of Hong Kong); (iii) Occupational Retirement Schemes Ordinance (Chapter 426 Laws of Hong Kong); (iv) Mandatory Provident Fund Schemes Ordinance (Chapter 485 Laws of Hong Kong); (v) Employees' Compensation Ordinance (Chapter 282 Laws of Hong Kong); and (vi) Occupational Safety and Health Ordinance (Chapter 509 Laws of Hong Kong).

According to the legislations above, although there is no specific requirement that employment contracts must be in written form, an employer is required to provide particulars of the terms of employment to the employee upon request. Wages should not be lower than the statutory minimum wage and shall be paid to the employees within seven days from the end of the relevant wage period. Employers also required to take out sufficient employees compensation insurance in respect of their liability to compensate employees for any injury or accident arising out of and in the course of employment. In addition, all employers are required to provide a safe and healthy work environment to all employees and put in place appropriate measures in the workplace. Violations of the relevant legislation may result in the imposition of fines or imprisonments and also claims from the employees.

REGULATORY OVERVIEW

Regulations on Social Welfare in Hong Kong

Employers in Hong Kong are required by Hong Kong laws to enroll all eligible employees to their mandatory provident fund (“MPF”) scheme. Both the employer and the employee are each required to contribute an amount equal to at least 5% of an employee’s salary (subject to a statutory cap at HK\$1,500) per month to a retirement scheme that is registered as a MPF scheme. Some employers in Hong Kong may provide occupational retirement scheme as an alternative or additional benefit through occupational retirement scheme. Failure to maintain a retirement scheme, enroll eligible employees to its retirement scheme, or make the required contributions would be a criminal offence. Employers who are in breach may be subject to fine or imprisonment.

OVERVIEW OF THE LAWS AND REGULATIONS RELATING TO OUR BUSINESS AND OPERATIONS IN SINGAPORE

As we provide overseas financial services from our subsidiaries in Singapore, our business operations are subject to the laws of Singapore. The key laws and regulations which relate to our business and operations in Singapore are summarized as follows:

Regulatory Requirements under the Securities and Futures Act

The SFA is the principal legislation regulating activities and institutions in the securities and derivatives industry in Singapore.

The SFA is administered by the MAS, which is Singapore’s central bank and integrated financial regulator. As an integrated financial supervisor, the MAS has oversight of all financial institutions in Singapore, including banks, insurers, capital market intermediaries (such as Nanhua Singapore and Nanhua SG), and financial advisors. To this end, the MAS also establishes rules for such financial institutions which are implemented through legislation, regulations, directions and notices. MAS guidelines are also formulated and published to encourage best practices among financial institutions in Singapore.

In particular, Part 4 of the SFA provides for the licensing and regulation of certain regulated activities typically carried out by capital markets intermediaries (such as Nanhua Singapore and Nanhua SG).

Types of Regulated Activities under Part 4 of the SFA

Part 4 of the SFA governs the conduct of regulated activities typically carried out by capital market intermediaries. Under Section 82(1) of the SFA, a person carrying on business in a regulated activity is required to hold a Capital Markets Services Licence (“CMSL”), issued by the MAS, unless an exemption applies. The CMSL system is a modular licensing system, in that an entity will hold one single CMSL covering the different types of regulated activities under the SFA which it engages or intends to engage in. It is an offence for a person to carry on business, or hold himself out as carrying on business, in any regulated activity without the appropriate licence issued by the MAS.

REGULATORY OVERVIEW

In addition, where a CMSL has been granted by the MAS, the grant may be subject to such conditions and restrictions as the MAS thinks fit. It is an offence for a person to contravene any such condition or restriction in the licence.

Activities which Nanhua Singapore and Nanhua SG are Licensed to Conduct in Singapore

As of the Latest Practicable Date, Nanhua Singapore holds a CMSL (License No. CMS 100651) and is licensed under the SFA, authorizing it to deal in the following capital markets products: Exchange-Traded Derivatives Contracts, Over-The-Counter Derivatives Contracts, and Spot Foreign Exchange Contracts for the Purposes of Leveraged Foreign Exchange Trading.

Under the SFA, “capital markets products” means any securities¹, units in a collective investment scheme, derivatives contracts, and spot foreign exchange contracts for the purposes of leveraged foreign exchange trading and such other products as the MAS may prescribe as capital market products. The term “dealing in capital markets products” in turn means (whether as principal or agent) making or offering to make with any person, or inducing or attempting to induce any person to enter into or to offer to enter into any agreement for or with a view to acquiring, disposing of, entering into, effecting, arranging, subscribing for, or underwriting any capital markets product. This definition thus captures both the role of executing transactions involving capital markets products as well as the role of soliciting transactions involving capital markets products. Currently, under the CMSL granted to Nanhua Singapore, it may carry on business in dealing with capital market products only in respect to three specific products as mentioned above (i.e., Exchange-Traded Derivatives Contracts, Over-The-Counter Derivatives Contracts, and Spot Foreign Exchange Contracts for the Purposes of Leveraged Foreign Exchange Trading).

On the other hand, Nanhua SG holds a CMSL (License No. CMS 100920) and is licensed under the SFA to conduct fund management. “Fund management” is defined under the SFA to mean managing the property of, or operating a collective investment scheme, or undertaking, on behalf of a customer (whether on a discretionary authority granted by the customer or otherwise) the management of a portfolio of capital market products or the entry into spot foreign exchange contracts for the purpose of managing customer’s funds, excluding any real estate investment trust management.

The CMSL granted to both entities, Nanhua Singapore and Nanhua SG, are subject to certain conditions stipulated by MAS.

Representatives, Directors, and CEO Requirements

Under Section 99B(1) of the SFA, individuals who are employed by or who are acting for a CMSL holder in Singapore to carry out the regulated activities are required to be appointed, provisional or temporary representatives under the SFA, unless exempted.

¹ Under the SFA, the term “securities” generally refers to shares, debentures, units in a business trust or any instrument conferring or representing a legal or beneficial ownership interest in a corporation, partnership or limited liability partnership.

REGULATORY OVERVIEW

Pursuant to the MAS Guidelines SFA 04-G01 on Criteria for the Grant of a Capital Markets Services Licence other than for Fund Management and Real Estate Investment Trust Management (last revised January 21, 2025) (“**MAS Guidelines SFA 04-G01**”), Nanhua Singapore is required to employ at least two full-time individuals as appointed representatives for each of the regulated activities they are licensed to conduct. Additionally, Nanhua Singapore is to ensure that its board of directors comprises a minimum of two members, with at least one resident in Singapore. The CEO of Nanhua Singapore should also be resident in Singapore. Furthermore, the approval of MAS must be obtained before appointing the chief executive officer, any resident director, or any director directly responsible for the business operations in Singapore.

For Nanhua SG, which is licensed for fund management, the regulatory requirements for representatives, directors and CEO differ slightly from those applicable to Nanhua Singapore. Based on the MAS Guidelines SFA 04-G05 on Licensing and Conduct of Business for Fund Management Companies (last revised January 13, 2025) (“**MAS Guidelines SFA 04-G05**”), at least two full-time representatives residing in Singapore must be employed for licensed fund management companies dealing with accredited and/or institutional investors (“**A/I LFMC**”) or at least three if it is a licensed fund management company dealing with retail investors (“**retail LFMC**”). These representatives must be directly involved in the fund management activities of the company, such as portfolio management, investment research, trade execution, and client servicing, and must meet MAS’s prescribed competency and examination requirements. Unlike Nanhua Singapore, representatives engaged in control functions (e.g., risk management, compliance, operations, finance) should not be appointed as representatives of Nanhua SG.

In terms of directorship requirements, similar to the MAS Guidelines SFA 04-G01, Nanhua SG must have at least two directors, with at least one being an executive director who is resident in Singapore and actively involved in the day-to-day management of the company. Additionally, the executive director must have a minimum of five years of relevant portfolio management experience in asset classes or markets in which Nanhua SG intends to invest. Nominee directors, such as legal advisers or corporate secretaries, do not count toward this requirement.

The CEO of Nanhua SG must be resident in Singapore and meet MAS’s experience requirements which differs based on the type of fund management licence. For A/I LFMCS, the CEO must have at least five years of managerial or supervisory experience, while for retail LFMCS, this requirement is increased to ten years. The CEO must be actively engaged in the company’s operations and be responsible for ensuring compliance with MAS regulations, governance, and risk management requirements. The approval of MAS must be obtained before appointing the chief executive officer, any resident director, or any director directly responsible its fund management activities.

REGULATORY OVERVIEW

“Fit and Proper” Requirement

Persons applying to the MAS for a CMSL under the SFA, as well as its directors, representatives, and shareholders, must satisfy, and continue to satisfy after the grant of the CMSL by the MAS, that they are fit and proper persons. Generally, a fit and proper person means one who is financially sound, competent, honest, and has not been in breach of relevant laws and regulations. MAS administers this regime through a set of Fit and Proper Guidelines which all classes of regulated entities (including CMSL holders) are ordinarily expected to follow.

Base Capital Requirements

As both companies hold a CMSL, they would need to satisfy base capital requirements. For Nanhua Singapore, the base capital requirements would depend on the MAS Guidelines SFA 04-G01 and Securities and Futures (Financial and Margin Requirements for Holders of Capital Markets Services Licences) Regulations (“**SF(FMR)R**”).

By Regulation 4 of the SF(FMR)R, a CMSL holder shall not cause or permit its base capital to fall below the base capital requirement applicable to it. Where the base capital falls below the base capital requirement or where the CMSL holder becomes aware that the base capital will fall below the base capital requirement, the MAS must be notified immediately.

As for Nanhua SG, the base capital requirements would depend on the MAS Guidelines SFA 04-G05. The applicable base capital requirement for Nanhua SG depends on its client base and whether it manages retail funds. If Nanhua SG only serves accredited and institutional investors, it will be subject to the lower S\$250,000 requirement. However, if Nanhua SG engages in retail fund management or manages non-CIS discretionary portfolios for retail clients, the requirement increases to S\$500,000 or S\$1 million, respectively.

Risk Capital Requirements

Furthermore, a CMSL holder shall at all times meet the risk-based capital requirement in the SF(FMR)R and Notice SFA 04-N13 Risk Based Capital Adequacy Requirements for Holders of Capital Markets Services Licence upon obtaining its licence. The particular capital requirements are generally based on various risk factors faced by the CMSL holder, and the risk measurements are proxied from various items of information within the CMSL holder’s financial statements.

In this regard, under Regulations 6 and 7 of the SF(FMR)R, a licensed corporation shall:

- (a) not cause or permit its financial resources or adjusted net head office funds, whichever is applicable, to fall below its total risk requirement; and
- (b) immediately notify the Mas if its financial resources or adjusted net head office funds, whichever is applicable, fall below 120% of its total risk requirement.

REGULATORY OVERVIEW

Continuing Obligations

An entity licensed under Part 4 of the SFA would typically expect that various ongoing operational obligations would apply, in addition to any specific conditions which the MAS may impose when granting its license. There are different ongoing business conduct compliance obligations depending on the relevant licensing category. In respect of Nanhua Singapore and Nanhua SG, these include, but are not limited to, the following requirements under the SF(LCB)R:

- (a) maintenance of a minimum deposit sum of S\$100,000 with the MAS (Regulation 7 of the SF(LCB)R);
- (b) implement, and ensure compliance with, effective written policies on all operational areas, including financial policies, accounting and internal controls, and internal auditing (Regulation 13(b)(i) of the SF(LCB)R);
- (c) identify, address and monitor the risks associated with the trading or business activities (Regulation 13(b)(iii) of the SF(LCB)R);
- (d) ensure that its business activities are subject to adequate internal audit (Regulation 13(b)(iv) of the SF(LCB)R);
- (e) ensure that its business activities are subject to adequate internal audit (Regulation 13(b)(iv) of the SF(LCB)R);
- (f) provision of statements to customers (Regulation 40 of the SF(LCB)R); and
- (g) regulations on product advertisements (Regulation 46 of the SF(LCB)R).

In addition to the general ongoing compliance obligations applicable to all CMS licence holders, Nanhua SG as CMSL holder for fund management would be subject to additional continuing obligations under Regulation 13B of the SF(LCB)R. These obligations are specific to its role in management customer assets and include:

- (a) risk management framework that is proportionate to the nature, scale, and complexity of the managed assets;
- (b) assets under Nanhua SG's management must be independently valued to determine their Net Asset Value (NAV). An independent party must convey these valuations to the relevant customers or, in the case of closed-end funds or collective investment schemes (CISs), to the unitholders of such funds;

REGULATORY OVERVIEW

- (c) Nanhua SG is required to segregate customer assets from its proprietary assets, ensuring that client funds are maintained separately to safeguard investor interests. These assets must be held in trust or custody accounts with a financial institution approved by MAS or a licensed custodian in an overseas jurisdiction;
- (d) when executing transactions involving capital markets products traded on approved exchanges or recognized market operators, Nanhua SG must give priority to customer transactions over those of the firm itself, its officers, employees, and other related persons;
- (e) Nanhua SG must mitigate and manage conflicts of interest in the course of its fund management activities. Where conflicts cannot be fully avoided, Nanhua SG must disclose them to the affected customers in a transparent manner.

Licensing Regime under the Financial Advisers Act

For completeness, the provision of financial advisory services is regulated in Singapore under the Financial Advisers Act 2001 (“FAA”), and its related subsidiary legislation.

Under Section 6(1) of the FAA, a person is not to act as a financial adviser in Singapore in respect of any financial advisory services unless he is authorised to do so in respect of that financial advisory service by a financial adviser’s licence (“**FAL**”), or is an exempt financial adviser. Further, under Section 6(4) of the FAA, a person who contravenes Section 6(1) will be liable on conviction to a maximum fine of S\$75,000 or imprisonment for a term of up to 3 years or both.

The term “financial adviser” generally refers to a person who carries on a business of providing any financial advisory service under the FAA. Financial advisory services under the FAA include, but are not limited to:

- (a) advising others, either directly or through publications or writings, and whether in electronic, print or other form, concerning any investment product;²
- (b) advising others by issuing or promulgating research analyses or research reports, whether in electronic, print or other form, concerning any investment product; and
- (c) arranging of any contract of insurance in respect of life policies (other than a contract of reinsurance).

Nanhua Singapore is an exempt financial adviser under the FAA, and can conduct the above regulated activities in Singapore.

² Under the FAA, “investment product” includes any capital markets products, spot foreign exchange contracts other than for the purposes of leveraged foreign exchange trading, any life policy; or any other product as may be prescribed.

REGULATORY OVERVIEW

Anti-Money Laundering and Counter-Terrorist Financing (“AML/CTF”)

Sector-specific requirements applicable to capital markets intermediaries

In Singapore, corporations which are licensed by the MAS are required to comply with the applicable anti-money laundering and counter-terrorist financing laws and regulations in Singapore as well as various notices and guidelines. In particular, Nanhua Singapore and Nanhua SG as CMSL holders will be required to comply with the Notice on Prevention of Money Laundering and Countering the Financing of Terrorism – Capital Markets Intermediaries (last revised on April 20, 2022) (“**SFA 04-N02**”) issued by the MAS, read together with the Guidelines to MAS Notice SFA 04-N02 (collectively, the “**AML/CTF Notices and Guidelines**”).

Aside from the AML/CTF Notices and Guidelines, Singapore’s AML/CTF legal framework is governed by a patchwork of legal instruments. The key legislations in Singapore applicable to NSG and Nanhua SG which concern money laundering and terrorist financing, include the Corruption, Drug Trafficking and Other Serious Crimes (Confiscation of Benefits) Act 1992 of Singapore (“**CDSA**”) and the Terrorism (Suppression of Financing) Act 2002 of Singapore (“**TSOFA**”).

OVERVIEW OF THE LAWS AND REGULATIONS RELATING TO OUR BUSINESS AND OPERATIONS IN THE UNITED KINGDOM

As we provide overseas financial services from our subsidiaries in the UK, our business operations are subject to the laws of the UK. The key laws and regulations which relate to our business and operations in the UK are summarized as follows:

Key Law and Regulation Impacting Our Business

Financial Services and Markets Act 2000 (“FSMA”)

The FSMA is the cornerstone legislation governing financial regulation in the UK, granting, with its secondary legislation, the FCA the authority to supervise and enforce compliance of financial services firms. It covers a wide range of activities including the regulation of financial markets, consumer protection, and the prudential oversight of firms.

REGULATORY OVERVIEW

FCA Handbook of Rules & Guidance

The FCA Handbook is an extensive repository of rules and guidance covering all regulated activities. Sections relevant to us include, among others:

- **Threshold Conditions (“COND”)**: The COND sourcebook outlines the Threshold Conditions that firms must meet to become and remain authorised by the FCA in the UK. These conditions are essential criteria that firms must meet to support the FCA’s objectives of protecting consumers, enhancing market integrity, and promoting competition. The conditions include: “Location of Offices”, “Effective Supervision by the FCA”, “Appropriate Resources” – financial, human resources and systems, “Suitability” – management and employees must be fit and proper (i.e. having the appropriate qualifications, competence, integrity, and financial soundness to operate responsibly and ethically), and “Business Model viability”.
- **Principles for Businesses (“PRIN”) and Code of Conduct (“COCON”)**: The PRIN sourcebook outlines the fundamental obligations and ethical standards that all FCA-regulated firms must adhere to. It consists of high-level principles designed to ensure that firms conduct their business with integrity and in a way that promotes fair and transparent markets.

The COCON sourcebook sets out the standards of personal conduct expected from individuals working at FCA-regulated firms. It applies to senior managers and employees performing key functions within these firms.

Key principles/conduct rules cover “Integrity”, “Skill, Care and Diligence”, “Management & Control”, “Financial Prudence”, “Market Conduct”, “Communication with Regulators”.

- **The FCA’s Senior Managers and Certification Regime (“SMCR”)** is designed to enhance individual accountability within firms by ensuring that responsibilities are clearly defined and assigned. Firms must identify and assign clear responsibilities to senior managers, who are held personally accountable for the conduct and outcomes of their areas of responsibility. Employees who are not senior managers but whose roles can impact our risk or harm to consumers must be certified as fit and proper. This ensures that they are competent and understand their responsibilities.
- **Prudential sourcebook for MiFID Investment Firms (“MIFIDPRU”)**: Outlines prudential standards for capital adequacy, liquidity, and risk management specific to investment firms. Introduced in Jan 2022 to tailor prudential requirements specifically for investment firms, the Investment Firm Prudential Regime (“IFPR”) simplifies the previous regime and introduces proportionate rules on capital adequacy, liquidity, and risk management. As a Non-Small and Non-Interconnected (“Non-SNI”) MIFIDPRU investment firm, we must adhere to these enhanced prudential standards to ensure its financial resilience and effective risk management. The IFPR introduces an internal capital and risk assessment (“ICARA”) process. The ICARA process is the centrepiece of MIFID investment firms’ documented risk

REGULATORY OVERVIEW

management framework. The process incorporates business model assessment, forecasting and stress testing, recovery planning and wind-down planning. The new regime also introduces the Overall Financial Adequacy Rule (“**OFAR**”), which establishes the level of adequate financial resources (own funds) which we must retain as regulatory capital.

- Senior Management Arrangements, Systems and Controls (“**SYSC**”): Defines requirements for governance, risk management, and internal controls. The MIFIDPRU Remuneration Code (SYSC 19G) applies to us. The requirements in the MIFIDPRU Remuneration Code set out the minimum regulatory requirements that a MIFIDPRU investment firm must comply with in connection with staff remuneration, in particular variable remuneration e.g. bonuses.
- Conduct of Business Sourcebook (“**COBS**”): Sets out conduct rules to ensure fair treatment of clients including rules on the best execution of trades undertaken for clients.
- Client Money and asset safeguarding: Since we can hold and control client money, it must also adhere to the FCA’s rules on client asset protection, ensuring proper segregation and protection of client monies pursuant to the FCA’s client money rules (“**CASS**”).
- The FCA’s Supervision Manual (“**SUP**”) addresses the day-to-day relationship between the FCA, authorised person and key individuals within them. SUP includes obligations to ensure transaction reporting requiring us to report detailed information about all executed transactions to the FCA. This includes data such as instrument identification, price, volume, and client details. The goal is to provide regulators with transparency over market activity to detect and deter market abuse.

The FCA can take enforcement action for failure to comply with its rules which could result, inter alia, in fines or cancellation of authorisation.

Markets in Financial Instruments Directive II (MiFID II) and Markets in Financial Instruments Regulation (MiFIR)

MiFID II and MiFIR are crucial EU regulations retained in UK law post-Brexit, setting the framework for the operation of financial markets, including commodity derivatives. These regulations cover extensive requirements on transparency, investor protection, and market integrity, directly influencing how a firm conducts its trading activities and interacts with clients. Secondary legislation, such as the MiFID Org Reg, provides detailed requirements for firms and contains key conduct and systems and controls obligations for investment firms. The FCA is currently proposing to incorporate requirements from the MiFID Org Reg into the FCA Handbook.

REGULATORY OVERVIEW

UK Anti-Money Laundering (“AML”) Regulations and Related Primary Legislation

The Money Laundering, Terrorist Financing and Transfer of Funds (Information on the Payer) Regulations 2017 require firms to implement stringent AML controls. This includes conducting customer due diligence, ongoing monitoring of transactions, and reporting suspicious activities to the appropriate authorities. Our Money Laundering Reporting Officer (“**MLRO**”) must submit a report to the Board at least annually.

Other important related UK primary legislation that we must comply with includes:

- Proceeds of Crime Act 2002 (“**POCA**”);
- Serious Organised Crime and Police Act 2005 (“**SOCPA**”);
- Criminal Justice Act 1993 (“**CJA**”);
- Terrorism Act 2000 (“**TA**”);
- Counter-Terrorism Act 2008 (“**CTA**”);
- Bribery Act 2010 (“**BA**”);
- Financial Services Act 2012 (Misleading Statements & Impressions);
- Criminal Finances Act 2017 (“**CFA**”);
- Sanctions and Anti-Money Laundering Act (“**SAMLA 2018**”) governs the UK’s regime on sanctions. We must ensure that it does not deal with sanctioned individuals.

European Market Infrastructure Regulation (“EMIR”)

The UK EMIR covers derivatives, central counterparties and trade repositories (“**TR**”). It imposes requirements to improve transparency and reduce the risks associated with the derivatives market. UK EMIR requires firms that enter into derivative contracts, including interest rate, foreign exchange, equity, credit and commodity and emission derivatives, to:

- report details of derivative contracts to an FCA registered, or recognised TR;
- clear, via a CCP, those OTC derivatives subject to a mandatory clearing obligation; implement risk mitigation techniques for bilateral over-the-counter (OTC) derivatives that are not cleared by a CCP. These risk mitigation techniques include timely confirmation of trades, portfolio compression, dispute resolution mechanisms, and regular portfolio reconciliation with counterparties.

REGULATORY OVERVIEW

- in some circumstances, depending on the type and volume of derivatives traded, we may need to adhere to initial and variation margin requirements as well as other collateral management practices.

The onshored UK EMIR REFIT also brings into UK legislation amendments to UK EMIR that make the regime more proportionate for certain firms. The major change which impacts us is:

- A streamlined reporting regime, including mandatory delegation to FCs (Financial Counterparties) when facing an NFC (Non-Financial Counterparty).

Market Abuse Regulation (MAR)

The EU Market Abuse Regulation (“**EU MAR**”), effective from July 3, 2016, was onshored into UK law on December 31, 2020 by the European Union (Withdrawal) Act 2018.

UK MAR aims to increase market integrity and investor protection, enhancing the attractiveness of securities markets for capital raising. It contains prohibitions of insider dealing, unlawful disclosure of inside information and market manipulation, and provisions to prevent and detect these behaviours.

General Data Protection Regulation (“GDPR”) and Data Protection Act 2018 (“DPA 2018”):

These regulations govern the processing of personal data within the UK, ensuring that firms protect client data privacy and security. After Brexit, the GDPR was retained in domestic law as the UK GDPR. The UK GDPR sits alongside an amended version of the DPA 2018. Compliance involves implementing robust data protection policies, obtaining consent from data subjects where required, and ensuring transparency in data processing activities.

London Metal Exchange (“LME”) Rules:

As a Category 2 member of the LME. Category 2 members are entitled to trade on LMEselect and the telephone market. They can issue LME contracts – buying and selling material for their clients. They are also members of LME Clear.

We must comply with the specific rules and regulations established by the LME and LME Clear. These rules govern membership criteria, trading conduct, clearing, and settlement processes, ensuring orderly market behaviour, participant integrity and an overall governance framework that supports orderly market behaviour. Failure to comply with the LME’s rules can result in disciplinary action.

REGULATORY OVERVIEW

OVERVIEW OF THE LAWS AND REGULATIONS RELATING TO OUR BUSINESS AND OPERATIONS IN THE U.S.

As we provide overseas financial services from our subsidiaries in the US, our business operations are subject to the laws of the US. The key laws and regulations which relate to our business and operations in the US are summarized as follows:

General

The U.S. Commodity Exchange Act (“CEA”) is a federal statute that regulates transactions and markets involving different types of derivatives. The CEA is administered by the U.S. Commodity Futures Trading Commission (“CFTC”), which is an independent federal agency that has broad powers to adopt rules; interpret statutory provisions; oversee the markets, industry professionals and end user market participants; and take enforcement action against persons for their non-compliance. The CEA also relies upon self-regulation as an important element for overseeing persons regulated under the CEA. The CEA establishes a framework for registration and regulation of exchanges, derivatives clearing organizations and other market facilities. It also establishes registration and oversight regimes for different categories of market intermediaries and other industry professionals.

Registration Status of Nanhua USA

Our U.S. subsidiary Nanhua USA is registered under the CEA with the CFTC under one of the industry professional categories, specifically, as a futures commission merchant, or “FCM.” An FCM is a person that is engaged in soliciting or accepting orders from customers for different types of transactions regulated under the CEA, including futures and options on futures listed on exchanges (collectively, “futures”) and swaps, and which in connection with those activities accepts any money, securities or other property from customers to margin, guarantee or secure their resulting transactions. Nanhua USA is an FCM under this definition because it acts as an intermediary for its customers to give them access to U.S. and certain non-U.S. exchange markets and their associated derivatives clearing organizations to execute and clear transactions in futures. Nanhua USA currently does not provide execution or clearing services with respect to swaps.

The discussion in this section provides a high-level overview of the primary areas where Nanhua USA has regulatory obligations as an FCM. FCMs are subject to significant regulation. The discussion is not an exhaustive explanation of all requirements that apply to an FCM.

Self-Regulatory Oversight

Nanhua USA is a member of the National Futures Association (“NFA”). NFA is a “registered futures association” under the CEA. As such, it serves as a self-regulatory organization for industry professionals registered with the CFTC including FCMs. FCMs and other CFTC-registrants are generally required to join NFA. Individuals who solicit orders or customers for a CFTC-registered firm or who supervise that activity must (with limited exception) register with the CFTC as associated persons of the firm and must also join NFA. NFA performs certain functions for the CFTC pursuant to delegated

REGULATORY OVERVIEW

authority, such as processing registration applications, conducting fitness screening of associated persons and individuals who are principals of the firm and imposing proficiency requirements on associated persons. NFA incorporates by reference many CFTC rules applicable to FCMs into its own rulebook and thus such rules are also NFA rules.

As a member of NFA, Nanhua USA is subject to NFA rules and oversight. Nanhua USA is also a member of six U.S. futures exchanges and one non-U.S. futures exchange and a clearing member of three derivatives clearing organizations. The exchanges and derivatives clearing organizations have self-regulatory responsibilities as well and thus Nanhua USA is also subject to their rules and jurisdiction. (Regardless of exchange membership status, by virtue of trading on a U.S. exchange, a person is subject to that exchange's rules, as applicable to its activities.)

A "Joint Audit Committee" ("JAC") comprised of representatives of the U.S. exchanges and NFA develops audit programs that they follow when conducting financial or other audits of FCM members. The CFTC oversees the audit programs developed by the JAC. When an FCM belongs to one or more exchanges and NFA, to mitigate duplicative oversight, the JAC assigns a lead self-regulatory organization, called the designated self-regulatory organization ("DSRO"), to the FCM that is responsible for conducting audits of the firm. The DSRO for Nanhua USA is the Chicago Mercantile Exchange, where the firm is a clearing member.

Financial Requirements and Reporting; Related Obligations

Because an FCM may hold and receive funds from customers to margin their cleared positions, various requirements apply that are designed to protect customers' funds and the financial integrity of the cleared derivatives markets. For example, an FCM must comply with stringent minimum capital and financial reporting requirements imposed by the CFTC. An FCM will also have to comply with NFA's financial requirements and, if it is a member of a derivatives clearing organization, with the financial requirements of the derivatives clearing organization as well. Under the CFTC's net capital rule for FCMs, an FCM must at all times maintain "adjusted net capital" equal to or greater than the highest amount prescribed under one of several standards. The default requirement for a futures FCM is \$1 million in adjusted net capital, but typically the requirement will be higher under one of the other standards, for example under a risk-based calculation or under NFA's financial requirements. An FCM must calculate its adjusted net capital in the manner specified in the CFTC's net capital rule. It must prepare monthly financial statements showing that calculation along with annual audited financial reports and submit them electronically to the CFTC and its DSRO.

Other measures apply to protect and monitor an FCM's financial soundness. An FCM must prepare records and file reports concerning the activities of its affiliates that could reasonably be expected to have a material impact on an FCM's financial or operational condition and must maintain records of its policies, procedures and systems for monitoring and controlling financial and operational risks that could be caused by its affiliates. An FCM is also required to notify the CFTC and its DSRO about certain adverse financial or operational changes, such as a failure to meet the minimum capital requirements or to maintain adjusted net capital in excess of a higher "warning" level, failure to hold sufficient funds on deposit in segregated accounts on behalf of its customers or failure to keep its books and records current.

REGULATORY OVERVIEW

Protection of Customer Funds

An FCM is subject to stringent customer funds segregation requirements imposed under the CEA and detailed CFTC rules. In basic terms, segregation means that an FCM must hold its customers' funds separate and apart from its own funds and funds in any "proprietary accounts" it carries for affiliates or other insiders, both in terms of the internal bookkeeping accounts it maintains for customers and how the FCM holds the funds on deposit with another party, such as a custodian bank, a derivatives clearing organization or another FCM. As a general matter, persons receiving segregated funds from an FCM must acknowledge that the funds belong to the FCM's customers and are subject to the segregation protections afforded under the CEA and CFTC rules. Different CFTC rules apply to FCMs based on the classification of the accounts by account class. For example, the CFTC has separate rules governing an FCM's treatment of customer funds associated with trading futures on U.S. exchanges and customer funds associated with trading futures on non-U.S. exchanges. An FCM may invest customer segregated funds that it holds, but only in highly liquid instruments permitted by CFTC rule and must maintain such investments in segregation. To support the customer funds segregation framework, an FCM is required to maintain accurate internal books and records of the accounts it carries for customers and to prepare accurate customer account statements. An FCM must prepare and file daily statements of the amounts of segregated funds it holds on deposit by account class and the amounts it is required to so hold in segregation.

The segregation requirements help to assure that customer funds are available to meet obligations into the central clearing systems for derivatives. They also help assure the funds are available to return to customers, including in the unlikely event of an FCM's insolvency. Special CFTC rules apply under U.S. insolvency law to the "commodity broker" liquidation of an FCM, which govern among other matters the transfer of customer positions, treatment of customer claims, liquidation of assets and distribution of customer property. If there is a shortfall in segregated funds to distribute to customers in an account class that is not covered from other sources, the loss is shared *pro rata* by such customers.

Clearing Obligations

As a clearing member, an FCM generally has obligations to deposit performance bond margin with a derivatives clearing organization to secure its customers cleared transactions even if it has not received the margin funds from its customers. In other words, the FCM effectively guarantees financial performance to the clearing organization on its customers' cleared transactions. To be approved and maintain status as a clearing member, an FCM typically must meet higher capital requirements than otherwise apply and must also meet strict operational standards. A clearing member FCM is subject to rules of the clearing organization regarding margin requirements, variation (mark-to-market) payment flows, default management, guaranty fund deposits and other matters. A clearing member could face risk of mutualized loss in the event another clearing member defaults, and the clearing organization is unable to cover the losses with the defaulter's margin or guaranty fund deposit or other layers of the financial resources prescribed for covering losses.

REGULATORY OVERVIEW

An FCM may indirectly access the services of a derivatives clearing organization through another FCM that is a clearing member or through a non-U.S. broker to clear futures transactions executed on a non-U.S. exchange through that exchange's associated clearing organization. In that scenario, the FCM faces potential risk of the clearing broker's default. The relationship between the firms is typically covered by contract and applicable segregation requirements and other applicable law.

Risk Management

An FCM must have a reasonably designed risk management program to monitor and manage risks associated with its FCM activities, including segregation risk. The program must include written policies and procedures and be administered by a risk management unit independent of the FCM's business unit. An FCM must also have a reasonably designed supervisory system to ensure its required policies and procedures are diligently followed and review and test its risk management program at least annually. For segregation risk, the policies and procedures must establish a target amount of the FCM's own funds that it will maintain in the different pools of customer funds it is required to hold in segregation to provide a buffer of excess segregated funds to cover potential losses that could otherwise cause a segregation shortfall and is subject to restrictions on withdrawing its residual interest.

Customer Protection Duties

CFTC rules impose obligations on FCMs with respect to their business conduct dealings with their customers, including requirements to provide risk disclosures to customers and governing how they handle customer orders to be executed on an exchange. To protect customers against conflicts of interest, the CFTC also requires an FCM to maintain a separation between its business groups and research analysts to prevent business interests from improperly influencing research reports. NFA also has rules that impose obligations on FCMs beyond specific CFTC requirements. For example, NFA prohibits members from engaging in fraudulent or deceptive activities and requires them to conduct their business following high standards of commercial honor and just and equitable principles of trade and imposes requirements with respect to soliciting customers and communicating with members of the public. An FCM is also subject to an exchange's trade practice rules with respect to how it handles execution of customer orders on or subject to the rules of that exchange, even when it is not a member of the exchange. An FCM may also be subject the business conduct rules of the exchanges.

Supervision

An FCM has a general duty under CFTC rules to supervisor the accounts its carries and the activities of its personnel including sales personnel (associated persons) engaged in activities relating to the FCM's. NFA also requires an FCM to diligently supervise the conduct of its employees and agents relating to the FCM's business.

REGULATORY OVERVIEW

Chief Compliance Officer

An FCM is required to appoint an individual as its chief compliance officer (“CCO”). The CCO has duties and responsibilities that are prescribed in the CEA and by CFTC rule. Among others, the CCO is responsible for administering the FCM’s policies and procedures, which must be reasonably designed to ensure compliance with the CEA and CFTC rules; resolving conflicts of interest in consultation with the FCM’s board or senior officer; taking reasonable steps to ensure compliance by the FCM with its policies and applicable rules; and establishing procedures to remediate non-compliance issues the CCO identifies. An FCM is subject to certain requirements to assure the CCO’s independence in performing his responsibilities.

The CCO must prepare an annual report covering the FCM’s recently completed fiscal year. The report must contain a review of each applicable requirement under the CEA and CFTC rules and must highlight certain matters, such as areas for improvement to the compliance program, adequacy of staffing resources, and any issues of non-compliance identified by the CCO and the actions taken to address them. The CCO must provide the Annual Report to the firm’s board or a senior officer for review. The annual report is filed with the CFTC with a certification by the FCM’s CCO or chief executive officer that, to the best of his knowledge and reasonable belief, and under penalty of law, the information contained in the Annual Report is accurate and complete.

Account Ownership and Control Reporting

The CFTC has a multi-layered set of reporting rules for collecting “ownership and control” information on large traders in the futures markets. Under the rules, an FCM must file daily reports electronically with the CFTC with respect to each account it carries that holds or controls open positions or has daily trading volumes in futures traded on U.S. exchanges that equal or exceed prescribed “reportable” levels, referred to as a “special account.” FCMs must provide detailed information in the filings for each special account, including contact information on persons identified as owning or controlling the accounts and must also report updates to that information.

Anti-Money Laundering

The CFTC rules require FCMs to comply with anti-money laundering (“AML”) provisions of the U.S. Bank Secrecy Act and the regulations of the U.S. Department of the Treasury thereunder. NFA also imposes obligations on FCMs to have reasonably designed AML programs. The programs must be approved in writing by senior management and must meet certain minimum requirements. The program should include a “customer identification program,” procedures to identify and verify beneficial owners of legal entity customers, and systems and procedures for detecting and reporting suspicious AML activity.

REGULATORY OVERVIEW

Recordkeeping

An FCM is required under various CFTC rules to prepare and maintain regulatory records. It must maintain such records in the form and manner and for the retention period (generally five years for an FCM not engaged in swaps activities) required by the CFTC. The CFTC imposes standards with respect to storage of both electronic records and records created and maintained exclusively in paper form. An FCM must ensure that its regulatory records are retained in a form and manner that ensures their authenticity and reliability and must have appropriate systems and controls in place with respect to electronic regulatory records to ensure their authenticity and reliability.

Consumer Data Privacy

The CFTC has two sets of rules that impose requirements and restrictions on FCMs with respect to use of information on customers who are individuals and considered “consumers” under the rules. One set of rules implements certain privacy provisions of the U.S. Gramm-Leach-Bliley Act and governs an FCM’s treatment of nonpublic personal information about consumers it receives. The rules require an FCM to provide customers with notice about the FCM’s privacy policies and practices, describe the conditions under which an FCM may share nonpublic personal information on its consumer customers with non-affiliated third parties, and provide a method by which consumers may opt out of having their nonpublic personal information shared with most non-affiliated third parties. The other set of rules implements provisions of the U.S. Fair Credit Reporting Act that afford certain protections to consumer information. They address sharing of such information for marketing purposes with affiliates and provide for an opt-out mechanism. They supplement and do not limit an FCM’s obligations under the first set of rules described above. Certain states in the U.S. also have privacy laws that could apply to an FCM.

Enforcement

The CFTC has broad authority to oversee registered industry professionals including FCMs. This includes authority to initiate civil or administrative proceedings to enforce the provisions of the CEA and CFTC rules. The U.S. Department of Justice has complementary authority to prosecute persons involved in willful violations of the CEA or CFTC rules or other wrongdoing designated as criminal offenses under the CEA. The CFTC may assist the Department of Justice or other regulators (including state and foreign regulators) in their investigations, including sharing of information.

An FCM is also subject to the rules and oversight of NFA and must comply with applicable rules of any exchange on which it conducts business (as a member or otherwise) and any derivatives clearing organization in which it is a member. These self-regulatory bodies also have authority to conduct investigations and take enforcement action for alleged violations of their rules. An FCM is also subject to periodic routine financial or other audits conducted by its DSRO.

OUR HISTORY AND DEVELOPMENT

OVERVIEW

Our Company was incorporated under the name of Zhejiang Nanhua Futures Brokerage House Ltd. (浙江南華期貨經紀有限責任公司) in the PRC on May 28, 1996 as a limited liability company with a registered capital of RMB10 million. After decades of operations and development, our Company has grown into a PRC-based global financial services provider specializing futures and derivatives, and offering comprehensive and customized derivatives and risk management services to industrial clients, financial institutions and individual investors. We also strive to offer more diverse wealth management services to investors in China and abroad.

In October 2012, our Company was converted into a joint stock company with limited liability and was renamed as Nanhua Futures Co., Ltd. (南華期貨股份有限公司). In August 2019, our A Shares were listed on the Shanghai Stock Exchange (stock code: 603093).

KEY DEVELOPMENT MILESTONES

Key milestones in our development are as follows:

Year	Development Milestone(s)
1996	We were incorporated under the name of Zhejiang Nanhua Futures Brokerage House Ltd.
2005	We launched the first commodity index in the PRC – Nanhua Commodity Index.
2006	Our wholly-owned subsidiary HGNH International Futures, formerly known as Nanhua Futures (Hong Kong) Co., Limited (南華期貨(香港)有限公司)) was incorporated in Hong Kong.
2007	We were among the first general clearing members of China Financial Futures Exchange.
2009	HGNH International Futures became one of the first exchange participants of the Hong Kong Futures Exchange Limited.
2011	We were one of the first batch companies to obtain the qualification to conduct investment consulting business in the PRC.

OUR HISTORY AND DEVELOPMENT

Year	Development Milestone(s)
2012	We obtained qualification to provide asset management services and were one of the first batch companies in China to obtain the qualification to conduct asset management business. We were converted into a joint stock company and renamed as Nanhua Futures Co., Ltd. (南華期貨股份有限公司).
2013	Our wholly-owned subsidiary HGNH International Securities (formerly known as Nanhua Securities (Hong Kong) Company Limited (南華證券(香港)有限公司)) was incorporated in Hong Kong. Our wholly-owned subsidiary NANHUA USA LLC was incorporated in the United States.
2015	We were one of the first batch companies to participate in stock option trading at the Shanghai Stock Exchange. Our pricing services business was approved by China Futures Association. NANHUA USA became the clearing member of Chicago Mercantile Exchange, CBOT, New York Mercantile Exchange and The Commodity Exchange, Inc.
2016	We obtained the qualification to conduct securities investment fund sales business in the PRC. Our wholly-owned subsidiary Nanhua Fund was incorporated and became the first futures company in China to conduct public fund services. Our wholly-owned subsidiary HGNH International Financial (Singapore) Pte. Ltd. was incorporated in Singapore.
2017	We became the first batch members of Shanghai International Energy Exchange.

OUR HISTORY AND DEVELOPMENT

Year	Development Milestone(s)
2018	Our wholly-owned subsidiary Nanhua UK was incorporated in the United Kingdom. HGNH International Financial (Singapore) Pte. Ltd. became the trading member of Singapore Exchange Derivatives Trading Limited and a clearing member of Singapore Exchange Derivatives Clearing Limited.
2019	Our A Shares were listed on the Shanghai Stock Exchange in August 2019, marking us as the first ever futures company listed on the PRC stock exchange. Nanhua UK became a member of London Metal Exchange.
2021	We completed the non-public offering in March 2021, raising gross proceeds of approximately RMB365 million. Our subsidiary HGNH International Asset Management (SG) Pte. Ltd. became a qualified foreign institutional investor.
2023	NANHUA USA became a member of MIAX Futures Exchange, LLC (formerly known as Minneapolis Grain Exchange)
2024	NANHUA USA became the clearing member of Intercontinental Exchange Inc (ICE.US).

MAJOR CHANGES IN SHARE CAPITAL AND SHAREHOLDING

Early Development of our Company

Our Company was incorporated in the PRC on May 28, 1996 as a limited liability company with an initial registered capital of RMB10 million. At the time of establishment, our Company was owned as to 55% and 45% by Zhejiang Huadian Real Estate Development Company (浙江華電房地產開發公司) (“**Zhejiang Huadian**”) and Hangzhou Huaneng United Development Company (杭州華能聯合開發有限公司) (“**Hangzhou Huaneng**”), respectively. The initial registered capital of our Company was funded by the then shareholders.

Following completion of several rounds of capital increases and share transfers between September 1999 to September 2012, our registered capital was increased to RMB450 million by October 2012, of which Hengdian Holdings directly held 58.16% equity interests in our Company, and four other then shareholders held the remaining 41.84% equity interests in our Company.

OUR HISTORY AND DEVELOPMENT

Conversion into a Joint Stock Company in October 2012

On October 18, 2012, our Company was converted into a joint stock company with a registered capital of RMB450 million and was renamed as Nanhua Futures Co., Ltd.

Our Company further underwent several rounds of capital increases and share transfers by the then shareholders since its conversion into a joint stock company.

December 2012

Shenzhen Jianyin Nanshan Investment Co., LTD (深圳市建銀南山投資有限公司), Hengdian Import and Export, Hengdian DMEGC Magnetics, Wuxi Lingfeng Copper Co., Ltd. (無錫市凌峰銅業有限公司), Dongyang Zhongchao Investment Co., LTD (東陽市中超投資有限公司), Zhejiang Lingqing Venture Capital Co., LTD (浙江領慶創業投資有限公司), Shanghai Shanheng Investment Management Co., LTD (上海山恆投資管理有限公司), Gansu Fuxiang Materials Co., LTD (甘肅富祥物資有限公司) and Shanghai Dawei Freight Co., LTD (上海大微貨運代理有限公司) made capital contributions of RMB11.5 million, RMB10 million, RMB10 million, RMB10 million, RMB3 million, RMB2.5 million, RMB1 million, RMB1 million and RMB1 million, respectively, in cash to our Company.

In addition, Everbright Financial Holding (Tianjin) Venture Capital Co., LTD (光大金控(天津)創業投資有限公司) made capital contribution of RMB10 million in cash to our Company. Following such capital contribution, the registered capital of our Company increased to RMB510 million.

October 2014

Nanhua Development, Wuxi Lingfeng Copper Co., Ltd. and Dongyang Zhongchao Investment Co., LTD transferred their respective equity interests of 25.59%, 1.96% and 0.59% in our Company to Hengdian Holdings.

May 2015

Hengdian Holdings transferred its 4.8% equity interest in our Company to Dongyang Henghua LLP, an employee share ownership platform of our Company.

June 2015

Dongyang Feida Chemical Co., LTD and Dongyang Zhenghong Chemical Co., LTD respectively transferred their respective equity interests of 4.38% and 4.32% in our Company to Hengdian Holdings.

OUR HISTORY AND DEVELOPMENT

Listing on the Shanghai Stock Exchange in August 2019

As approved by the CSRC, our Company completed the initial public offering and listing of 70,000,000 A Shares on the Shanghai Stock Exchange (stock code: 603093) on August 30, 2019 (the “**A Share Offering**”). Our Company raised gross proceeds of RMB338.8 million from the A Share Offering. Upon completion of the A Share Offering, our registered share capital was increased to RMB580 million.

The shareholding structure of our Company as of the completion of the A Shares listing was as follows:

Shareholder	Number of Shares held	Approximate percentage of shareholding (%)
Hengdian Holdings	425,120,900	73.30
Dongyang Henghua LLP	24,480,000	4.22
Beijing Yiguang Investment Management Co., Ltd. (北京怡廣投資管理有限公司)	13,399,100	2.31
Shenzhen Jianyin Nanshan Investment Co., LTD	11,500,000	1.98
Everbright Financial Holding (Tianjin) Venture Capital Co., LTD	10,000,000	1.72
Hengdian Import and Export	10,000,000	1.72
Hengdian DMEGC Magnetics	10,000,000	1.72
Zhejiang Lingqing Venture Capital Co., LTD	2,500,000	0.43
Shanghai Shanheng Investment Management Co., LTD	1,000,000	0.17
Gansu Fuxiang Materials Co., LTD	1,000,000	0.17
Dawei Investment Management Co., Ltd. (大微投資管理有限公司) (formerly known as Shanghai Dawei Freight Co., Ltd)	1,000,000	0.17
Other A-Share Shareholders	70,000,000	12.07
Total	580,000,000	100.00

As of the Latest Practicable Date, our Company was listed on the Shanghai Stock Exchange, and our Directors confirmed that since our listing on the Shanghai Stock Exchange, we had no instances of material non-compliance with the rules of the Shanghai Stock Exchange and other applicable securities laws and regulations of the PRC in any material respects. To the best knowledge of our Directors upon due and reasonable inquiry, there has been no matter that should be brought to the attention of potential investors of our Company in relation to our compliance record on the Shanghai Stock Exchange. Based on the independent due diligence conducted by the Sole Sponsor, nothing has come to the Sole Sponsor’s attention that would cause them to disagree with our Directors’ confirmation with regard to the compliance records of the Company on the Shanghai Stock Exchange.

OUR HISTORY AND DEVELOPMENT

Non-public offering in March 2021

In order to obtain further financing for our business development, in March 2021, upon approval by the CSRC, our Company completed a non-public offering of 30,065,893 A Shares at RMB12.14 per Share and raised gross proceeds of approximately RMB365 million. Upon completion of such non-public offering, our registered share capital was increased to RMB610,065,893.

Issuance of the Convertible Bonds

On March 31, 2023, April 12, 2024 and March 31, 2025, our shareholders approved our plan to issue convertible bonds for replenishing our working capital. See “Financial Information” for further details.

MAJOR SUBSIDIARIES

The principal business activities and date of establishment of each of our major subsidiaries are shown below:

<u>Name of subsidiaries</u>	<u>Place of incorporation</u>	<u>Date of incorporation and commencement of business</u>	<u>Equity interest attributable to our Company (%)</u>	<u>Principal Business Activities</u>
1. Nanhua Fund	PRC	November 17, 2016	100%	Funds management and asset management
2. Nanhua Capital	PRC	May 20, 2013	100%	Risk management services
3. HGNH International	Hong Kong	August 16, 2011	100%	Investment holding
4. HGNH International Futures	Hong Kong	June 20 2006	100%	Futures services
5. HGNH International Securities	Hong Kong	August 5, 2013	100%	Security services
6. HGNH International AM	Hong Kong	May 18, 2011	100%	Asset management

For details of other subsidiaries of our Company, see “Appendix I – Accountant’s Report – note 27.”

REASONS FOR THE LISTING ON THE STOCK EXCHANGE

Our Company is seeking a listing of its H Shares on the Stock Exchange in order to expand our overseas operations, optimize our overseas business structure, and enhance our competitiveness and risk resilience in global markets, as described in more details in “Business – Our Strategies” and “Future Plans and Use of Proceeds”.

CORPORATE STRUCTURE

Corporate Structure as of the Latest Practicable Date

The following shareholding diagram displays the corporate and shareholding structure of our Company as of the Latest Practicable Date.

OUR HISTORY AND DEVELOPMENT

Notes:

- (1) In July 2001, the leading preparatory team of Dongyang Hengdian Association prepared and initiated the establishment of Dongyang Hengdian Association, which was approved by Dongyang Municipal Civil Affairs Bureau in August 2001. Since its establishment, Dongyang Hengdian Association has been a non-profit organization without shareholders, whose members are Chinese employees of Dongyang Hengdian Association and the enterprises under its management.

The highest authority of Dongyang Hengdian Association is its member representative assembly (the “**Member Representative Assembly**”). The representatives of the Member Representative Assembly shall be elected by all the members of Dongyang Hengdian Association with a term of office of five years. Dongyang Hengdian Association also establishes (i) the council, comprising five council members elected by the Member Representative Assembly, serving as the executive body of the Member Representative Assembly and is responsible for leading the daily operation of Dongyang Hengdian Association during the intervals between the sessions of the Member Representative Assembly; (ii) the executive committee, comprising five executive committee members elected by the Member Representative Assembly, serving as the permanent executive body of the Member Representative Assembly and is responsible for managing the daily operation of Dongyang Hengdian Association; and (iii) the supervisory board, comprising three supervisors elected by the Member Representative Assembly, is responsible for supervising the daily activities of Dongyang Hengdian Association. Additionally, Dongyang Hengdian Association has a president, a vice president and a secretary-general of the council. Each of the Member Representative Assembly, the council, the supervisory board and the leadership positions exercises their respective powers within the authority stated in the articles of association of Dongyang Hengdian Association.

The Member Representative Assembly exercises the following functions and powers: (i) formulate and amend the articles of association; (ii) elect and remove council members, executive committee members and supervisors; (iii) receive and review the work reports and financial reports of the council; (iv) receive and review the work reports of the supervisory board; (v) determine the operational policy and plan of the association; (vi) decide on the termination matters; and (vii) discuss and decide on other major matters. The quorum of the Member Representative Assembly shall be not less than two-thirds of all the members of Dongyang Hengdian Association. The resolutions of the Member Representative Assembly shall be approved by not less than half of the representatives present at the meeting of the Member Representative Assembly.

Pursuant to Regulations on the Administration of the Registration of Social Organizations (《社會團體登記管理條例》), the business supervisory department has the following responsibilities for supervising and managing the social organization: (i) investigating the social organization’s establishment, modification or cancellation of registration; (ii) supervising and guiding the social organization in observance of the constitution, laws, statutory regulations, national policy, and in developing activities in accordance with its articles of association; (iii) conducting a preliminary stage of the annual review; (iv) assisting the registration and management agency and other relevant departments to investigate and deal with illegal activities of social organizations; and (v) guiding the process of winding up social organizations together with other relevant departments. According to the above regulations, Dongyang Municipal Bureau of Economy and Information, as the competent business supervisory department of Dongyang Hengdian Association, shall perform relevant supervisory and management duties over Dongyang Hengdian Association.

- (2) With the objectives of “co-creation, co-ownership, co-prosperity and co-sharing” and the purpose of developing public welfare and charity undertakings, Dongyang Hengdian Association strategically decided to utilize the future earnings of all the equity interests held by Hengdian Holdings in our Company to carry out social welfare and charity undertakings. In December 2022, (i) Dongyang Chuangxiang, being the wholly-owned subsidiary of Dongyang Hengdian Association, entered into a trust agreement with Huaxin International Trust Co., Ltd. (“**Huaxin Trust**”, 華鑫國際信託有限公司) to establish a single fund trust (the “**Trust**”). The beneficiary of the Trust is Dongyang Chuangxiang; (ii) Hengdian Holdings entered into an equity interest earning right transfer agreement with Huaxin Trust, pursuant to which, Hengdian Holdings transferred its future earning right of all the equity interest in our Company held by it to the Trust; (iii) Dongyang Hengdian Association entered into another trust agreement with Huaxin Trust to establish an educational charity trust (the “**Charity Trust**”), the underlying asset of which is Dongyang Hengdian Association’s own funds mainly raised through Dongyang Chuangxiang’s entitlements under the Trust. The underlying assets of the Charity Trust will be used for educational charitable projects benefiting social groups, such as donations for school operation, student scholarships and grants, incentive awards for teachers and other educational charity projects.

OUR HISTORY AND DEVELOPMENT

According to the aforementioned trust arrangements and equity interest earning right transfer agreement, Hengdian Holdings only transferred its earning right of all the equity interest in our Company to the Trust, while it retained both the beneficial ownership of these equity interests and the corresponding voting rights in our Company.

- (3) As of the Latest Practicable Date, Dongyang Chuangxiang was the general partner of Dongyang Hengchuang.
- (4) As of the Latest Practicable Date, Hengdian Limited (橫店有限公司) was held (i) as to 70% by Dongyang Sanheng Investment Management Co., LTD (東陽市三衡投資管理有限公司) (“**Dongyang Sanghai**”), which was wholly-owned by Xu Yongan, (ii) as to 20.05% by Dongyang Jiuheng Industrial Development Partnership (Limited Partnership) (東陽市九衡實業發展合夥企業(有限合夥)) (“**Dongyang Jiuheng**”); and (iii) as to 9.95% by Dongyang Jiuwei Industrial Development Partnership (Limited Partnership) (東陽市九惟實業發展合夥企業(有限合夥)) (“**Dongyang Jiuwei**”). As of the Latest Practicable Date, Dongyang Sanghai was the general partner of Dongyang Jiuheng and Dongyang Jiuwei. As of the Latest Practicable Date, except for (i) Xu Wencai and Hu Tiangao, being our Directors, each holding 19.95% partnership interests in Dongyang Jiuheng, and (ii) Li Baoping, Li Guoping, Wang Li, Ma Yisheng and Du Shaohui, being our Director or director or supervisor of our subsidiary, who held 10.05%, 5.03%, 2.21%, 0.90% and 0.85% partnership interests in Dongyang Jiuwei, respectively, Hengdian Limited and its ultimate beneficial owners are Independent Third Parties.
- (5) As of the Latest Practicable Date, Dongyang Chuangfu Chuangxiang Industrial Development Partnership (Limited Partnership) (東陽市創富創享實業發展合夥企業(有限合夥)) (“**Dongyang Chuangfu Chuangxiang**”) was held (i) as to 0.01% by Hengdian Limited, who also served as the general partner; and (ii) as to 99.98% by Dongyang Film and Television Promotion Association (東陽市影視旅遊促進會), which is a non-profit association organization established in China on October 1, 1998 under the supervision of Dongyang Municipal Bureau of Culture, Radio, Television, Tourism and Sports (東陽市文化和廣電旅遊體育局) and primarily engaged in managing enterprises and institutions under its management, conducting theoretical research on the operation and management and practical exploration on contributions to social responsibility, and developing public welfare and charity undertakings. As of the Latest Practicable Date, Dongyang Chuangfu Chuangxiang and its ultimate beneficial owners were Independent Third Parties.
- (6) As of the Latest Practicable Date, Dongyang Zhuowei was held (i) as to 14.29% by Hengdian Holdings, who also served as the general partner; (ii) as to 35.71% by Wu Xing, an Independent Third Party; (iii) as to 50% by other 21 individuals with the highest shareholding not exceeding 14.00%, who were Independent Third Parties.
- (7) As of the Latest Practicable Date, Dongyang Henghua LLP was held (i) as to approximately 17.36% by Hengdian Holdings, who also served as the general partner; (ii) as to approximately 21.65% by Dr. Luo Xufeng; (iii) as to approximately 4.09% by Zhang Zijian; (iv) as to approximately 3.68% by Wang Zhenghao; (v) as to approximately 3.68% by Zhu Bin; (vi) as to approximately 2.04% by Tang Qijun; (vii) as to approximately 2.04% by Zhu Jian; (viii) as to approximately 1.47% by Cao Zhitong; (ix) as to approximately 1.23% by Jia Xiaolong; (x) as to approximately 1.14% by Xu Fengting; (xi) as to approximately 1.02% by Huang Xian; (xii) as to approximately 0.74% by Yu Zhenzhou; (xiii) as to approximately 0.41% by Chen Xiaoyi, who were our Director or director, supervisor or general manager of our subsidiaries (including persons who were directors of our subsidiaries in the last 12 months) and thus all connected persons of the Company; and (xiv) the remainder of approximately 39.45% by other 29 individuals with the highest shareholding not exceeding 4.00%, who were Independent Third Parties.
- (8) As of the Latest Practicable Date, the remaining equity interests of approximately 19.00% of Hengdian Import and Export were held by Dongyang Sanwei Equity Investment Co., Ltd. (東陽市三維股權投資有限公司), which was wholly-owned by Wei Yuqiao, who was an Independent Third Party.
- (9) As of the Latest Practicable Date, there were other subsidiaries of our Company, which are not considered as our principal subsidiaries. For further details of the directly-held subsidiaries of our Company, see “Appendix I – Accountant’s Report – II Notes to the Historical Financial Information – note 27.”
- (10) As of the Latest Practicable Date, HGNH International indirectly held 100% equity interests in NANHUA USA through its wholly-owned subsidiary NANHUA USA Holding LLC.

OUR HISTORY AND DEVELOPMENT

Corporate Structure Immediately after Completion of the Global Offering

The following chart sets out the shareholding and group structure of our Company immediately following completion of the Global Offering (assuming the Over-allotment Option is not exercised).

Note: (1)-(10) See notes under “– Corporate Structure as of the Latest Practicable Date”.

OUR HISTORY AND DEVELOPMENT

Public Float and Free Float

So far as our Directors are aware, immediately following the completion of the Global Offering (assuming the Over-allotment Option is not exercised), Hengdian Holdings, Dongyang Henghua LLP, Hengdian Import and Export, Hengdian DMEGC Magnetics, Dongyang Zhuowei, Dongyang Hengdian Association, Dongyang Chuangxiang and Dongyang Hengchuang will be a group of Controlling Shareholders of our Company, and hence be core connected persons of our Company. Therefore, the shares held by them will not be counted towards the public float for the purpose of Rule 8.08 (as amended and replaced by Rule 19A.13A) of the Listing Rules.

Our A Shares are listed on the Shanghai Stock Exchange. Save as disclosed above, upon the completion of the Global Offering (assuming the Over-allotment Option is not exercised), the Shares held by our other Shareholders (including our A Shareholders and H Shareholders) will be counted towards the public float. It is expected that upon the Listing, our Company will be able to meet the public float requirements under Rule 19A.13A(2)(a) of the Listing Rules. So far as our Directors are aware, all 107,659,000 H Shares to be issued pursuant to the Global Offering, representing approximately 15.00% of our total issued share capital immediately upon Listing (assuming the Over-allotment Option is not exercised), are expected to be held by the public, which is higher than the prescribed percentage of H Shares required to be held in public hands of 10% under Rule 19A.13A(2)(a) of the Listing Rules, thereby satisfying Rule 19A.13A(2) of the Listing Rules at the time of the Listing.

Rule 19A.13C(2) of the Listing Rules provides that, where a new applicant is a PRC issuer with other listed shares at the time of Listing, this will normally mean that the portion of H shares for which Listing is sought that are held by the public and not subject to any disposal restrictions (whether under contract, the Listing Rules, applicable laws or otherwise), at the time of Listing, must: (a) represent at least 5% of the total number of issued shares in the class to which H shares belong at the time of Listing (excluding treasury shares), with an expected market value at the time of Listing of not less than HK\$50,000,000; or (b) have an expected market value at the time of Listing of not less than HK\$600,000,000.

Our Company has proposed to adopt mechanism B under Chapter 4.14 of the Guide for New Listing Applicants. Accordingly, 10% of the initial Offer Shares shall be allocated to the public subscription tranche, and at least 40% of the Offer Shares shall be allocated to the placing tranche according to paragraph 3.2 of Practice Note 18 to the Listing Rules. Therefore, at least 50% of the Offer Shares will not be subject to lock-up at the time of the Listing. As such, at least 7.56% of the total number of our issued shares (excluding the treasury shares) will be held by the public and not be subject to lock-up, with an expected market capitalization of approximately HK\$645,954,000 at the time of listing (calculated based on an Offer Price of HK\$12.00 per H Share, being the low-end of an indicative Offer Price range), which is higher than the expected market capitalization of not less than HK\$600,000,000 under Rule 19A.13C(2)(b), thereby satisfying Rule 19A.13C(2)(b) of the Listing Rules at the time of Listing.

OVERVIEW

We are a leading futures company in the PRC, providing global financial services to clients. According to the F&S Report, we ranked 8th among all futures companies in the PRC by total revenue in 2024, and 1st among all non-financial institution-related futures companies in the PRC by total revenue in 2024. The principal focus of our Group lies in the provision of futures and derivatives services, both within the PRC and in international markets. Leveraging our understanding of the needs of both Chinese and overseas clients developed through our decades of experience, coupled with our insight into global financial and derivatives markets, we offer comprehensive and customized derivatives and risk management services to industrial clients, financial institutions and individual investors, and we also strive to offer more diverse wealth management services to investors in China and abroad.

Founded in 1996 and headquartered in Hangzhou, China, we have, over the years, focused on business development, the application of technology, the delivery of professional services and the strengthening of internal controls. We began as a PRC futures brokerage service provider, into a comprehensive, global financial services platform. Our offering include PRC futures brokerage and have since developed, PRC risk management services, PRC wealth management, and overseas financial services, covering the value chain of futures and derivatives. We believe that our readiness to seize new opportunities has been one of the key drivers of our past growth, we have achieved numerous industry firsts throughout our nearly 30-year of history. According to the F&S Report:

- in 2001, we established the first dedicated futures research institute in China's futures industry;
- in 2006, we became one of the first futures companies in China to establish a subsidiary in Hong Kong;
- in 2007, we became one of the initial full clearing members of the China Financial Futures Exchange;
- in 2016, we became the first futures company in China's futures industry to establish a subsidiary carrying out mutual fund management business; and
- in 2019, we became the first futures company in China to list on the A-share market (stock code: 603093.SH).

We believe futures and derivatives markets play a crucial role in the economy and financial system by facilitating price discovery, risk management, and resource allocation. These markets are intricately linked to enterprises, investors, and consumers, contributing to operational stability, commodity trading and the stabilization of supply and prices. The PRC government actively promotes the roles of the futures and derivatives markets in serving the real economy by optimizing commodity futures for agriculture, manufacturing, and green development, enhancing financial futures to stabilize capital markets, and

enhancing international market expansion. Guided by government policies, market demand, and industry trends, we have executed a diversification strategy encompassing various service types, cross-national coverage, and diverse asset classes. This strategy has culminated in forming a comprehensive financial services product network under a globalized framework. Specifically:

- ***PRC and Overseas.*** Our PRC operations deliver high-quality futures, risk management and wealth management services to a wide-range of investors and corporate clients. In our overseas markets, we provide comprehensive risk management tools to Chinese companies seeking to “go global”, offering a 24-hour uninterrupted global financial services network. By integrating our PRC and overseas platforms, we mitigate the impact of any single market on our operations.
- ***Exchange-traded and OTC Products.*** Exchange trading provides standardization and liquidity, while OTC trading offers flexibility for specialized risk management services. We integrate exchange-traded and OTC transactions to cater for diverse client needs, showcasing our ability to consolidate and allocate diverse products, accurately identify market and client demands, and deliver professional and customized risk management services.
- ***Mutual Funds and Private Products.*** Our mutual fund offerings, characterized by lower entry threshold and higher liquidity, allow us to reach a wider investor base. Meanwhile, our service and products offerings such as private asset management services, QFII services and RQFII services are designed for high-net-worth individuals and institutional investors requiring more tailored and flexible investment strategies. By bringing together public and private products under our wealth management umbrella, we strive to serve clients with varying risk appetites and investment needs.
- ***Futures and Spot Products.*** Our PRC risk management services business plays a critical role in supporting the real economy through its integrated spot and futures operations. We operate within the industrial value chain through our services offering. Utilizing derivatives like futures and options, we help enterprises transfer price volatility risks from the over-the-counter market to the on-exchange market for effective hedging. For example, in basis trading, we introduce a futures pricing mechanism by signing purchase and sales contracts, enabling upstream and downstream enterprises to lock in procurement costs or sales prices. This approach helps smooth the impact of price fluctuations on production and operations. Additionally, through options-embedded trading, we customize personalized risk management solutions, converting risks such as regional price differences and product price spreads of non-standard products into standardized on-exchange contracts. This “futures and spot integration” mechanism not only alleviates financial pressure on enterprises but also strengthens the resilience of the industrial value chain. Our risk control systems, embedded within these innovative business models, ensure dynamic monitoring of risk exposures and compliance in operations. In doing so, we complete the “last mile” of financial services for the real economy, creating a closed-loop system that effectively bridges the finance and industrial sectors.

- **Online and Offline.** Our online platforms and branch network work in tandem to deliver a seamless customer experience. At our offline branches, clients benefit from face-to-face professional guidance and personalized services, fostering deeper client engagement. At the same time, our online platforms enable convenient access to trading, information, and support. By integrating these channels, we provide comprehensive, uninterrupted services to our diverse client base.

Global Network

In recent years, as China's global influence has grown, the PRC government has introduced policies to support Chinese enterprises in "going global," creating favorable conditions for overseas expansion. Capitalizing on this trend, we have developed our overseas business by addressing the needs of Chinese enterprises through providing their overseas entities with professional overseas financial services. This approach has supported Chinese enterprises' international ventures while expanding our own global presence. Additionally, the increasing openness of China's futures market has attracted overseas clients, whose needs we are able to meet through our cross-border servicing network. This dual focus has strengthened our integration into global markets.

We believe we are the Chinese futures and derivatives service provider with the most profound understanding of international futures and derivatives financial business, and also the international futures and derivatives services provider with the closest affinity to Chinese clients. By implementing a diversification strategy across service types, geographic coverage, and asset classes, we have established a comprehensive network of financial services and products within a globalized framework.

Overseas: Since 2006, we have, through our overseas subsidiary, HGNH International, been among the first in the futures industry to implement an internationalization strategy. Leveraging our overseas branch network in major financial hubs including Hong Kong, Chicago, Singapore, and London, we extend our reach across Asia, North America, and Europe, delivering round-the-clock cross-market trading services. As of the Latest Practicable Date, we held memberships on 16 overseas exchanges and maintained 14 clearing seats, including those at CME, LME, SGX, and ICE-US. According to the F&S Report, we are also one of the few Chinese futures companies capable of fulfilling the delivery of spot commodities in the overseas market, enabling deeper involvement in the commodity and trade delivery process and offering comprehensive risk management services to overseas entities of Chinese enterprises expanding abroad.

PRC: We are a member of all six futures exchanges in China and a trading participant on both the Shanghai Stock Exchange and the Shenzhen Stock Exchange, providing investors with a full range of futures brokerage services. As of the Latest Practicable Date, we had established 11 branch companies and 28 business offices across provinces and municipalities such as Zhejiang, Shanghai, Guangdong, Sichuan, Chongqing, and Liaoning, covering regions that collectively account for a substantial portion of China's GDP. In addition, through our wholly-owned subsidiaries Nanhua Fund and Nanhua Capital, we offer wealth management and risk management services to our clients, respectively.

Diversified Business Mix

We maintain a comprehensive and diversified business layout, covering the key value chains of the futures and derivatives markets. Our product mix covers a diverse range of asset classes, including futures and spot commodities (including agricultural, industrial, energy and chemical, and metals) as well as equity and fixed-income securities. From trade execution to risk management, from wealth management to overseas financial services, we provide end-to-end coverage of the futures and derivatives market value chain, establishing a complete and robust business framework. Our principal business lines include:

- ***PRC Futures Brokerage.*** Our PRC futures brokerage business provides a platform for clients to participate in commodity and financial futures trading. Through professional services and diverse channels, we bring together a wide range of market participants, promoting robust development and efficient operation. As of December 31, 2022, 2023 and 2024 and June 30, 2025, client equity in our PRC futures brokerage business stood at RMB19.1 billion, RMB21.2 billion, RMB31.6 billion, and RMB27.3 billion, respectively, representing a CAGR of approximately 28.6% from 2022 to 2024. As of June 30, 2025, our PRC futures brokerage business had in total 126,949 registered clients, including 119,798 individual investors, 5,279 corporates, and 1,872 financial institutions. Our client base also included 173 publicly listed companies and 601 state-owned enterprises as of June 30, 2025.
- ***PRC Risk Management Services.*** Our PRC risk management services offer tailored hedging services for enterprises and institutions using specialized tools, which aim to help our clients stabilize operations and mitigate relevant risks. Our PRC risk management services business primarily comprises basis trading, OTC derivatives, and market making activities. Our basis trading coverage extends to the core commodity products listed on the exchanges in China. Through OTC derivatives, we offer customizable risk management services to meet diverse institutional and investor needs. In addition, we act as a market maker for options and futures products, helping enhance market liquidity. As of the Latest Practicable Date, we had the capability to hedge exposures directly in the secondary market.
- ***PRC Wealth Management.*** With deep market knowledge and extensive experience, we precisely identify investor needs and deliver customized wealth management solutions, meeting diverse demands for wealth growth. Our PRC wealth management services include mutual funds, asset management, and agency sale of funds, leveraging our specialized expertise in futures and derivatives to expand our client base. Our subsidiary, Nanhua Fund, is the first mutual fund management company established by a futures company in China and one of the only two Chinese mutual fund managers affiliated with a futures company. As of June 30, 2025, the mutual funds products under our management amounted to RMB21,526.9 million in total.

- **Overseas Financial Services.** We capitalize on our overseas licenses to actively engage in international markets, offering core services such as brokerage, clearing, and asset management. By building an efficient business system, we have successfully connected PRC and key overseas markets, enabling the optimized allocation of cross-border financial resources. As of December 31, 2022, 2023 and 2024 and June 30, 2025, total client equity from our overseas brokerage services (covering securities, futures, and foreign exchange) amounted to approximately HK\$11.9 billion, HK\$12.5 billion, HK\$13.8 billion, and HK\$17.8 billion, respectively. By June 30, 2025, we had cumulatively served around 1,570 Chinese-funded enterprises expanding globally and over 30,260 individual clients.

Technology-Driven Infrastructure

We have established a IT infrastructure that is essential in our business operations, corporate governance, and risk management. We have also established a series of strict data security policies to ensure that the collection, use, storage, transmission, and dissemination of data comply with all applicable laws and regulations, optimize data management, and protect the interests of data subjects. See “Data Privacy and Security”. Our innovation and technology capabilities had been recognized at the People’s Bank of China’s Fintech Development Awards in 2021, 2022 and 2023. We were also recognized as the Best Digital Transformation Futures Brokerage in both 2023 and 2024 by Futures Daily, and the Outstanding IT Service Futures Company Jun Ding Award in 2023 by Securities Times and Securities China. These accolades highlight our leadership in leveraging technology for excellence and innovation. Our technology infrastructure provides us with crucial advantages:

- **Client-Centric Application:** Our flagship Nanhua Futures App is available across different platforms and devices, offering comprehensive functionality from real-time trading to advanced analytics, providing both convenience and expertise to investors. In 2024, this App achieved an average of 61,161 monthly active users, representing a CAGR of 24.0% from 2022 and further grew to an average of 62,386 monthly users for the six months ended June 30, 2025. This growth was driven by enhanced App functionality and increased marketing efforts, boosting brand visibility and market impact.
- **Innovative Systems:** our fifth-generation NHTD trading system processes up to 30 million transactions daily with a median latency under two microseconds. Our proprietary Ruihua Risk Management Services Business Risk Control System (睿華風險管理業務風控系統) combines advanced resource control, data governance, and intelligent computing to deliver precise, high-frequency monitoring across on- and off-market, PRC and overseas markets, and futures and spot markets. Our proprietary Shenghua Financial Derivatives Integrated Platform supports our PRC risk management services business and offers comprehensive yet highly sophisticated functionality across trading, risk control, back-end management, and data applications. In Hong Kong, we utilize a dedicated risk control platform offering pre-trade restrictions, real-time monitoring, and post-trade analysis, including stress testing, to ensure seamless oversight throughout the trading process. By transitioning to a digital-driven, proactive, and adaptive risk control model, we deliver robust risk management and operational stability.

- **Global Data Network:** we maintain dedicated servers in key data centers of major exchanges in China and overseas, including the China Financial Futures Exchange, Shanghai Futures Exchange, Dalian Commodity Exchange, Zhengzhou Commodity Exchange, Guangzhou Futures Exchange, Shanghai Stock Exchange, Shenzhen Stock Exchange, Chicago Mercantile Exchange, and Singapore Exchange. As of the Latest Practicable Date, we had over 150 server cabinets deployed globally at major exchanges with premium hosting environments and connected through a redundant low-latency network, providing secure, reliable, and highly efficient trading services to a wide range of clients.
- **Resilient Architecture:** to ensure operational stability, we have implemented a “two-location, three-center” data architecture across Shanghai and Hangzhou, with the primary data center and same-site active backup center in Shanghai and a remote disaster recovery center in Hangzhou, providing redundancy and disaster recovery capabilities. Additionally, we have built an integrated PRC and overseas cybersecurity framework, supported by a global data center network in Hong Kong, Shanghai, and Chicago. This architecture enhances system resilience through rapid fault switching and multi-point defense mechanisms, ensuring security and continuity for global operations.

Solid Financial Performance

With our cross-national network, our business mix and our technology capabilities, we have achieved financial growth over the Track Record Period. During the Track Record Period, our profit for the year rose from RMB245.9 million in 2022 to RMB458.0 million in 2024, reflecting a CAGR of 36.5%. Our profit for the period remained stable, amounting to RMB230.5 million for the six months ended June 30, 2024 and RMB231.3 million for the six months ended June 30, 2025. Our weighted average ROE demonstrated improvement and continued resilience during the Track Record Period, reaching 7.75%, 11.46%, 11.71%, 6.03%, and 5.51% for 2022, 2023, and 2024 and the six months ended June 30, 2024 and 2025, respectively.

OUR STRENGTHS

We believe that the following are our key competitive strengths:

Established Presence in Futures and Derivatives Industry Driven by Early Moves in China and Our Global Capabilities

We were among the first companies established in China’s futures industry, contributing to its evolution from early stages to a mature market. Over the years, we have introduced numerous industry firsts that established our presence in China’s futures and derivatives industry. In 2019, we became the first futures company to list on the A-share market. This listing has broadened our access to capital and strengthened our brand, supporting our continued expansion. With an active client engagement, we maintain our market influence. As of December 31, 2024, client equity of our PRC futures brokerage reached RMB31.6 billion, represented a CAGR of 28.6% from that of December 31, 2022, as compared to a CAGR of 1.9% of China’s futures industry. As of June 30, 2025, client equity of our PRC futures brokerage reached RMB27.3 billion.

BUSINESS

We believe we are the Chinese futures and derivatives service provider with the most profound understanding of international futures and derivatives business, and also the international futures and derivatives services provider with the closest affinity to Chinese clients. We established our overseas operations early on, becoming one of the first Chinese futures companies to set up a branch in Hong Kong in 2006. According to the F&S Report, we have one of the most extensive clearing networks among Chinese futures companies in terms of exchange memberships. We had a broad international presence with extensive overseas clearing capabilities supported by 16 overseas exchange memberships and 14 overseas clearing seats as of the Latest Practicable Date. This foundation enables us to provide futures, securities, leveraged forex trading and clearing services. Notably, we are one of the few Chinese futures companies capable of fulfilling the delivery of spot commodities in the overseas market, according to the F&S Report. In Singapore, we are capable of offering ADP and EFP physical deliveries for rubber products on the Singapore Exchange. In London, we are able to facilitate physical deliveries for aluminum, copper, and lead futures contracts. In the United States, we possess physical deliveries capabilities for silver, gold, and copper futures contracts. By overseeing settlement and delivery processes directly, we minimize intermediaries, reduce counterparty risk, and enhance overall efficiency and security. Our efforts had earned us recognition as the “SGX SICOM Top Rubber Clearing Member” by SGX in both 2023 and 2024. In addition, HGNH International Futures, Nanhua Singapore, and Nanhua UK all hold offshore brokerage qualifications for key Chinese futures exchanges such as the Dalian Commodity Exchange, Zhengzhou Commodity Exchange, and Shanghai International Energy Exchange. This enables overseas investors to trade internationalized futures products in Chinese markets seamlessly through our global platforms.

Compared with overseas financial service providers, we enjoy strong trust among Chinese industrial and institutional clients in cross-border derivatives because of our established presence. As of December 31, 2022, 2023 and 2024 and June 30, 2025, our overseas financial services business had in total 33,392 registered clients, 33,098 registered clients, 32,577 registered clients, and 32,345 registered clients respectively, of which, 1,306 registered clients, 1,555 registered clients, 1,916 registered clients, and 2,077 registered clients were corporate clients, respectively. As of December 31, 2022, 2023 and 2024 and June 30, 2025, total client equity from our overseas futures, securities, and leveraged foreign exchange brokerage services stood at approximately HK\$11.9 billion, HK\$12.5 billion, HK\$13.8 billion, and HK\$17.8 billion respectively, while our overseas asset management business had an AUM of approximately HK\$2.0 billion, HK\$2.3 billion, HK\$2.5 billion, and HK\$3.4 billion respectively.

The growing demand for futures trading and risk management services among Chinese enterprises created opportunities for us to expand our client base for the PRC markets and overseas markets. As we continue to strengthen our global footprint and introduce innovative products, we expect to capture a broader range of opportunities in both China’s and overseas futures and derivatives markets.

Benefitting from the Growing Demand for Futures and Derivatives both in China and Overseas

In the PRC markets, we benefit from the increasing demand by Chinese enterprises for comprehensive derivatives services, as well as the appeal of internationalized futures products to overseas investors. China's futures industry is transitioning from traditional brokerage to full-service derivative trading and risk management, including OTC derivatives, hedging, and basis trading services. According to the F&S Report, since 2017, the notional principal of China's OTC derivatives transactions has grown from RMB333.1 billion to RMB3,181.7 billion in 2024, with an average CAGR of 45%. Despite this growth, the market size remains smaller than that of the United States, which totaled US\$12.3 trillion as of December 31, 2024. In 2024, 1,503 A-share listed companies which are non-financial institutions participated in hedging activities, a 14.7% increase from 2023, raising the participation rate to 28.6%.

In addition, China's introduction of the QFII/RQFII regimes and the internationalization of futures products such as crude oil and iron ore have attracted a growing number of overseas traders. As of the Latest Practicable Date, QFII and RQFII qualified foreign investors were permitted to trade 95 futures and options products within China. In total, 15 types of futures and nine types of options are designated as internationalized products, allowing participation by overseas traders. This will invite higher foreign participation in the PRC markets, presenting greater opportunities for our growth.

In overseas markets, we benefit from Chinese-funded enterprises' "go global" strategy, which drives demand for international derivatives and risk management services and increases overseas revenue. In the first half of 2024, listed Chinese companies generated RMB3.8 trillion in overseas revenue, a 12.8% increase from the first half of 2023, according to the China Association for Public Companies. Over the years, as overseas entities of Chinese companies have actively expanded their presence abroad, they have accumulated a substantial and mature portfolio of overseas assets. This sizeable scale of Chinese-funded assets abroad presents significant opportunities for risk management services, particularly as these entities face increasingly complex market risks such as exchange rate fluctuations, interest rate changes, commodity price volatility, and geopolitical uncertainties. We are well positioned to support these overseas entities by providing tailored risk management services that address these challenges. We aim to capitalize on this established asset base and the growing market demand for futures and derivatives services to foster our revenue growth.

Acclaimed Technology Capabilities and a Comprehensive Risk Management Framework

We place technological innovation at the core of our corporate strategy, continuously advancing financial and digital technologies to strengthen our data infrastructure and upgrade our core proprietary systems. Our efforts have earned numerous accolades. Our Futures-Spot Transactions Risk Management System (期現交易風險管理系統), Shenghua Financial Derivatives Integrated System (盛華金融衍生品綜合平台), and Integrated Platform for Investment, Research, Production and Service (投研產服一體化平台) were awarded Third Prize, Second Prize and Third Prize, respectively, at the PBOC's Fintech Development Awards in 2021, 2022 and 2023, respectively. We were also recognized as the Best Digital Transformation Futures Brokerage in both 2023 and 2024 by Futures Daily, and received the Outstanding IT Service Futures Company Jun Ding Award in 2023 from Securities Times and Securities China. These accolades highlight our achievements in leveraging technology for excellence and innovation. These recognitions underscore our leadership in driving innovation and excellence in the futures and derivatives industry.

BUSINESS

Supporting our business operations and enhancing client experience, we have developed proprietary systems and introduced applications. Our proprietary NHTD trading system processes up to 30 million transactions daily with a median latency of under two microseconds, providing speed and reliability. Our flagship Nanhua Futures App has demonstrated growth in user engagement, with an average of 62,386 monthly active users for the six months ended June 30, 2025. The Nanhua Futures App offers diverse features, including practical tools and professional insights.

We have established a comprehensive PRC and international cybersecurity framework to ensure the security and continuity of our global operations. In China, our “two-location, three-center” architecture in Shanghai and Hangzhou serves as the foundation, while internationally, our global data center network spans three key hubs in Hong Kong, Shanghai, and Chicago, enabling geographical redundancy and efficient coordination. This architecture enhances system resilience through rapid fault switching and multi-point defense mechanisms, effectively mitigating various risks. With over 150 server cabinets deployed globally at major exchanges with (including CFFEX, SHFE, DCE, ZCE, GFEX, SSE, SZE, CME, and SGX) and we deliver secure, efficient, and highly reliable transaction support for both onshore and offshore clients.

Further strengthening our operations, our proprietary Ruihua Risk Management Services Business Risk Control System underpins a comprehensive risk management framework. Ruihua Risk Management Services Business Risk Control System allows for real-time data processing managing majority of business risks, ensuring precise, high-frequency monitoring and operational stability. This system has significantly enhanced efficiency, reducing the time to simulate 100,000 paths from 14,000 seconds to just 17 seconds – a nearly 1,000-fold improvement over a traditional model. Another of our proprietary systems, Shenghua Financial Derivatives Integrated Platform, supports our PRC risk management services business and offers comprehensive yet highly sophisticated functionality across trading, risk control, backend management, and data applications.

The coordinated local and international layout not only demonstrates our robustness in cybersecurity but also reflects our deep understanding of global customer needs and our ability to respond swiftly. Looking ahead, we will continue to optimize our global network infrastructure to deliver safer and more efficient services to our clients.

We are also actively embracing advancements in AI and big data to further enhance our capabilities. By conducting in-depth testing and application research on leading large language models and deploying a privatized version based on existing large language models, we have developed a range of AI-powered tools. These include a large language model-based employee assistant, intelligent Q&A systems, and automated research writing platforms. Additionally, we are building a comprehensive global futures industry database, enabling institutional clients to leverage the database and AI tools to assist in formulating trading strategies. Through AI-driven advancements, we continue to build a unique competitive edge and lead the industry’s shift toward smarter, more innovative solutions.

Highly Efficient Client Acquisition and Strong Service Capabilities

Leveraging our strategic PRC and overseas business presence, extensive network of branches, and a diverse business mix spanning multiple asset classes, we are well positioned to attract a substantial base of outstanding Chinese enterprises and their overseas subsidiaries, and meet their specialized needs in derivatives services in China and overseas. Leveraging our broad service offerings and research capabilities, we address the diverse needs of industrial clients, financial institutions, and individual investors. For example, our futures brokerage business acts as an entry point, attracting clients by providing trading channels, while our risk management business offers customized hedging strategies, basis trading, and over-the-counter derivative services. These capabilities ensure that clients benefit from our services and deepen their engagement with us. Additionally, our integrated research resources – ranging from commodity price forecasts to macroeconomic insights – enable us to provide actionable investment advice and optimize client service strategies across all business lines.

Our operations are supported by our global server cabinet network, system-level support for millisecond high-frequency trading, and extensive research coverage of market, macroeconomic conditions, and derivatives. As a result, we have attracted a significant number of industrial clients and financial institutions of our PRC futures brokerage business. The number of corporate registered clients of our PRC futures brokerage business increased steadily from 4,266 as of December 31, 2022 to 4,672 as of December 31, 2023, representing year-on-year growth of 9.5%. This further increased to 5,089 as of December 31, 2024, representing year-on-year growth of 8.9%, and to 5,279 in the six months ended June 30, 2025, representing a growth of 3.7%. The number of financial institution registered clients of our PRC futures brokerage business increased from 1,140 as of December 22, 2022 to 1,488 as of December 31, 2023, representing year-on-year growth of 30.5%. This further increased to 1,770 as of December 31, 2024, representing year-on-year growth of 19.0%, and to 1,872 in the six months ended June 30, 2025, representing a growth of 5.8%. In addition, our advanced fintech infrastructure underpins a robust online marketing capability that expands our reach to potential clients. Over 60% of newly acquired individual investors in 2024 originated from digital channels, and our Nanhua Futures App saw an average of 61,161 monthly active users, which further grew to an average of 62,386 monthly active users during the six months ended June 30, 2025.

In overseas markets, our broad global clearing access, unique physical delivery capability, and bespoke “personalized” service approach have helped us forge long-term, stable relationships with many overseas Chinese-funded enterprises and institutions. As of June 30, 2025, our overseas financial services business had around 2,077 registered clients that were corporates. Moreover, our extensive offshore footprint allows us to better understand overseas clients’ needs, enabling us to provide more customized solutions as they enter the PRC markets. As of June 30, 2025, we had around 240 in-bound overseas registered clients.

Diversified Business Model and Disciplined, Flexible Resource Allocation

Our diversified business mix allows us to adapt to market dynamics and mitigate risks associated with individual business lines, contributing to our financial growth. By maintaining flexibility in resource allocation, we are able to strategically invest in areas with growth potential while controlling the scale of businesses facing challenges. This agility enhances our overall resilience and positions us for long-term success, even amid fluctuating market conditions.

This strategic approach has translated into exceptional financial performance. According to data published by the China Futures Association, the futures industry in China experienced modest growth during the Track Record Period, with total industry revenue of RMB40.2 billion, RMB40.1 billion, and RMB41.3 billion in 2022, 2023 and 2024, respectively, and industry-wide net profits of RMB11.0 billion, RMB9.9 billion, and RMB9.5 billion over the same period, respectively. In contrast, we achieved substantial growth, supported by our comprehensive PRC and overseas product and service offerings. Specifically, our operating profit grew from RMB296.0 million in 2022 to RMB518.6 million in 2024, reflecting a CAGR of 32.4%. Meanwhile, our profit for the year increased from RMB245.9 million in 2022 to RMB458.0 million in 2024, representing a CAGR of 36.5%. Our profit for the period remained stable, amounting to RMB230.5 million for the six months ended June 30, 2024 and RMB231.3 million for the six months ended June 30, 2025. Additionally, our weighted average ROE demonstrated improvement and continued resilience during the Track Record Period, reached 7.8%, 11.5%, 11.7%, 6.0%, and 5.5% for 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, respectively. Notably, our ROE ranked 7th, 2nd and 3rd among 53 A-share listed securities firms and futures companies in 2022, 2023 and 2024, according to the F&S Report, further demonstrating our strong financial performance relative to peers.

Our leadership in the international market also underscores the strength of our business model. In 2024, we ranked 1st among Chinese futures companies in terms of overseas revenue, highlighting our ability to leverage global opportunities to drive growth.

By combining a diversified business layout with strategic agility, we have built a financial foundation capable of delivering solid growth while managing market uncertainties effectively. This competitive strength positions us as a leader in the industry and a reliable partner for sustainable value creation.

Management Team with Deep Industry Experience and a Market-Oriented Incentive Mechanism

Our senior management team combines extensive leadership experience, robust professional capabilities, and a relatively youthful composition, collectively underpinning our rapid yet stable growth. Led by Chairman Dr. Luo Xufeng, who has over 30 years of experience in the futures sector and has been recognized multiple times as “Best Leader of a Chinese Futures Company,” our core executives collectively possess an average of more than 20 years of expertise across futures brokerage, risk management, asset management, and investment consulting. They have also served with us for an average of 15 years, granting them a solid command of market dynamics and operational processes. This depth of experience enables them to guide our teams in executing diverse business activities while effectively navigating market fluctuations. We have also cultivated a young workforce, with an average age of around 36 years as of June 30, 2025, capable of rapid learning and flexible adaptation, allowing us to swiftly respond to market developments, capitalize on emerging opportunities, and continually refine our corporate strategies. Through these collective efforts, our management team has earned the “Gold Medal Management Team among Chinese Futures Companies” award for several consecutive years.

BUSINESS

Behind our sustained capacity for innovation lies an organizational culture that champions initiatives, underpinned by a long-term aim of becoming a “century enterprise.” Aligned with national strategies, we focus on talent acquisition and development, consistently invest in research and development, and attentively track market changes to introduce diversified products and services that meet evolving client needs, driving our continued innovation.

Our Controlling Shareholder, Hengdian Holdings, is a major private conglomerate in China with six A-share listed subsidiaries (Nanhua Futures (Stock Code: 603093.SH), Hengdian DMEGC Magnetics (Stock Code: 002056.SZ), Innuovo Technology (Stock Code: 000795.SZ), Apelo Pharmaceutical (Stock Code: 000739.SZ), Hengdian Tospo (Stock Code: 603303.SH), and Hengdian Entertainment (Stock Code: 603103.SH)), spanning sectors such as electronics, healthcare, film and cultural tourism, and modern services. Drawing on this background, we have established effective and market-based talent incentive policies to attract and retain high-caliber professionals who infuse our business with continual vitality and momentum. Driven by these incentives, the per capita operating income generated by our front-office employees rose from RMB1.9 million in 2022 and RMB2.5 million in 2023 to RMB2.6 million in 2024 and the per capita operating income generated by our front-office employees for the six months ended June 30, 2024 and 2025 amounted to RMB1.3 million and RMB1.1 million.

OUR STRATEGIES

We aim to serve the real economy (such as industrial and agricultural sectors) with specialized PRC and overseas financial services, empowering Chinese and overseas enterprises to achieve sustainable growth, and becoming a trusted partner to clients. To accomplish this goal, we plan to implement the following strategies:

Enhancing Our Capital Base and Service Capabilities Overseas

We intend to strengthen the capital base of our overseas subsidiaries to expand our overseas financial services, optimize our business structure abroad, and enhance our competitiveness and risk resilience in global markets. We intend to allocate all net proceeds from the Global Offering to HGNH International which will be used to strengthen the capital base of our licensed overseas subsidiaries. See “Future Plans and Use of Proceeds”.

We aim to enhance operations in the United States, United Kingdom, and Singapore, aligning with China’s “Belt and Road” initiative and the internationalization of the futures industry. To support this expansion, we plan to enhance clearing, physical delivery, and low-volatility asset management. To boost our edge in supporting overseas entities of Chinese-funded enterprises, we will seek more overseas qualifications, exchange memberships and clearing seats, including ICE-Singapore clearing seats. This will strengthen our global clearing network, protect client funds, and better serve industrial clients with in-demand futures contracts, especially large central state-owned enterprises and outward-bound private companies. In the future, we also aim to broaden our overseas physical delivery capabilities through our global network. By leveraging our global clearing advantage, we will provide cross-border trading, settlement, and physical delivery services that enable businesses to net off positions – the holding or balancing of a long position and a short position in the same asset to reduce risk – in a faster and safer way and to lower exposure risks in import and export activities.

BUSINESS

As Chinese-funded enterprises expand their overseas operations, we will integrate our PRC and overseas futures and derivatives capabilities to deliver effective risk management services. Initiatives include supporting private equity firms in their overseas expansion, collaborating with asset managers, enhancing our market and industry data library, and optimizing exchange data-center resources.

Additionally, we plan to expand our specialized investment management operations, focusing on commodity-related and cross-border products. We plan to train and attract high-quality fund managers and develop innovative products, capitalizing on opportunities arising from the global interest rate cycles and cross-market strategies. Further, we will leverage our membership and qualifications to offer a diverse range of products with different volatility profiles, meeting the varied investment needs of our clients.

For our brokerage and clearing services in the overseas markets, we plan to further penetrate both institutional and retail segments. For professional clients such as private equity firms and QFII, we plan to attract high net-worth clients by leveraging our global clearing capabilities and cross-border presence to create new investment and trading opportunities. At the retail level, we plan to employ both online and offline strategies, including investor education and community engagement, to improve customer stickiness and activity.

Through these initiatives, we are positioned to strengthen client relationships and capitalize on the increasing demand for risk management services and cross-border trading services in both the PRC and overseas markets.

We believe these initiatives will drive our sustainable growth globally.

Expanding Our Global Client Base

As of June 30, 2025, we had more than 150,000 registered clients across different business lines. A key element of our growth strategy is leveraging our global business network and extensive service offerings to deepen client relationships and increase revenue from both new and existing clients.

With the growing demand for futures trading and risk management services among Chinese enterprises, we plan to further expand our range of PRC and overseas futures and derivatives services. We will focus particularly on supporting companies in their “go global” initiatives by addressing their expanding overseas risk management needs. According to the F&S Report, outbound capital from Chinese enterprises grew by 11% in 2023 compared to 2022, while the number of overseas entities of Chinese-funded enterprises increased by 23%. We believe these trends will continue to create substantial opportunities for us to expand our client base in overseas markets.

BUSINESS

We plan to enhance our positions in the existing markets we operate and further broaden our global footprint, aligning with China's "Belt and Road" initiative and the internationalization of the futures industry:

- in **Hong Kong**, we will focus on enhancing service capabilities across securities, futures, and asset management to meet the evolving needs of clients and capitalize on emerging market opportunities. We will emphasize client acquisition for U.S. stock options, targeting customers of existing online brokers, U.S. stock retail investors, and open-ended fund companies in Hong Kong.
- in the **United States**, we aim to develop relationships with introducing broker to deepen our local presence, attracting institutional clients, and expanding services to non-clearing clients beyond North America. We also plan to focus on building on our experience in assisting overseas investors to invest in internationalized products of the PRC markets.
- in the **United Kingdom**, we have obtained ICE Europe membership, which will allow us to broaden our scope of services and strengthen our market presence and will increase our opportunities in the European region.
- in **Singapore**, we will expand our institutional client base with tailored services and OTC clearing. For our asset management business, we aim to expand FOF offerings to meet diverse client needs.
- in **Southeast Asia**, we plan to establish a subsidiary in Malaysia and develop clearing capabilities in Malaysia and other Southeast Asian countries, focusing on palm oil and agricultural products. We aim to enhance hedging and investment services. By engaging in regional industry events, we plan to boost our brand visibility as a cross-border financial services provider.

Strengthening Our Overseas Marketing Capabilities

We intend to fully leverage our global business network and financial service platform to deepen existing client relationships while attracting new clients:

- **Expanding Marketing Teams.** We plan to strengthen our overseas marketing presence in Hong Kong, Singapore, the United States, and the United Kingdom. In particular, we plan to attract and hire experienced professionals with deep knowledge of local markets. By building a highly skilled and regionally diverse team, we aim to deepen client relationships, improve service quality, and enhance our ability to provide tailored solutions that meet the unique needs of clients in these regions.

- ***Building Diverse Marketing Channels.*** We plan to expand our marketing channels to offer a range of services including futures brokerage, securities brokerage, and family office services to serve both trading-focused and professional clients. In particular,
 - o We aim to collaborate with overseas brokerages, family offices, and branches and futures subsidiaries of Chinese securities firms to bring in additional overseas clients.
 - o We also seek to host events to boost client engagement and broaden partnerships with exchanges and brokers.
 - o For traders, we plan to provide up-to-date research on hot stocks and conduct overseas listed-company roadshows.
 - o For professional clients, we will integrate services such as futures brokerage, asset management, and Singapore-based family offices.

Advancing Technological Infrastructure and Research and Development Capabilities

As part of our core strategy and to meet the growing demands of our clients, we are committed to advancing our technological infrastructure and strengthening our research and development capabilities. We aim to focus on the following:

- ***Upgrade Our Internal Information Technology Systems.*** We will enhance our internal CRM system to better cater for the tailored needs of our clients. By customizing our IT systems, we aim to significantly improve operational efficiency and ensure seamless client service delivery.
- ***Build Client-Focused Software Applications.*** Following our success with Nanhua Futures App in the PRC markets, we aim to develop and deploy similar software platforms that enable clients to trade seamlessly while providing them with access to valuable industry data, and thus offering a superior client experience.
- ***Expansion of Information Technology Team.*** IT personnel will play a critical role in maintaining and improving our technological capabilities. We aim to further develop our existing IT team overseas by hiring skilled professionals with expertise in software development, infrastructure management, and data analytics to support our strategic focus to advance our IT capabilities.
- ***Strengthen Information Technology Infrastructure.*** A robust trading IT infrastructure, including advanced networking and colocation facilities, is key for our overseas brokerage business by allowing low-latency trade execution, reliability, and scalability. It enhances client experience, supports high-frequency trading, and provides the technological foundation to capitalize on market opportunities and drive growth. We plan to make investments to upgrade our IT infrastructure, including our servers, GPU computing power resource pool and networking equipment to support our overseas business growth.

BUSINESS

- ***Enhance our Research Capabilities.*** We will harness the power of big data to analyze market trends, client behavior, and industry developments. We also aim to expand our access to overseas exchange data center resources to obtain real-time market data. By leveraging data-driven insights, we will be able to provide better consultancy services to our clients, helping them make informed investment decisions.

By advancing our technological infrastructure and research capabilities, we aim to deliver innovative, efficient, and client-focused services across global markets.

OUR BUSINESS

We provide financial products and services in China and overseas. Our principal business lines include:

Business Lines	Main Products and Services
PRC futures brokerage	• Brokerage
PRC risk management services	• OTC derivatives • Basis trading • Market making
PRC wealth management	• Mutual funds • Asset management • Agency sale of funds
Overseas financial services	• Futures services • Securities services • Asset management • Leveraged forex trading

BUSINESS

The following table sets forth our operating income by business lines for the periods indicated:

	For the year ended December 31,						For the six months ended June 30,			
	2022		2023		2024		2024		2025	
	(RMB in millions except for percentages)						(unaudited)

PRC Futures Brokerage

Overview

We are a member of all futures exchanges in China, namely the China Financial Futures Exchange, the Dalian Commodity Exchange, the Guangzhou Futures Exchange, the Shanghai Futures Exchange, the Shanghai International Energy Exchange and the Zhengzhou Commodity Exchange. We are also an exchange participant of the Shanghai Stock Exchange and Shenzhen Stock Exchange. We were among the first futures companies approved by the CSRC to conduct futures investment advisory services. These qualifications enable us to provide our clients with comprehensive brokerage services.

PRC futures brokerage is our founding business and our cornerstone. It serves as an enabler and driver of growth for our other business segments. From a functional perspective, it plays a key role in price discovery, risk management, and optimizing resource allocation during the procurement and sales processes of real economy enterprises. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, operating income from our PRC futures brokerage business amounted to RMB536.2 million, RMB571.1 million, RMB494.4 million, RMB257.0 million, and RMB190.4 million, respectively, representing 56.2%, 44.2%, 36.5%, 38.1% and 32.1% of our operating income during those periods, respectively. The net investment gains of our PRC futures brokerage business primarily derive from gains or losses on investments made by our Group using our own funds.

BUSINESS

The operating profit generated from our PRC futures brokerage decreased from RMB122.8 million in 2022 to RMB106.0 million in 2023, primarily due to increasing staff costs which was partially set off by the increasing income resulting from the rise of average brokerage commission rates from 0.275 bps in 2022 to 0.334 bps in 2023. The operating profit further decreased to RMB35.8 million in 2024, primarily due to the decrease of operating income as a result of the decrease of average brokerage commission rates from 0.334 bps in 2023 to 0.225 bps in 2024. The operating profit generated from our PRC futures brokerage amounted to RMB43.3 million for the six months ended June 30, 2024, while decreased to RMB11.7 million for the six months ended June 30, 2025, primarily due to (i) the decrease of interest income and (ii) the decrease of average brokerage commission rates from 0.265 bps for the six months ended June 30, 2024 to 0.158 bps for the six months ended June 30, 2025. The decrease in average brokerage commission rates was primarily due to changes in the product mix traded by our clients in the six months ended June 30, 2025 as compared to the six months ended June 30, 2024, which were: (i) a shift in our clients' trading activity toward products with lower commission rates and (ii) a higher proportion of trading of products charged under a volume-based commission model instead of a value-based commission model, see "Summary – Key Financial and Operating Data – PRC Futures Brokerage."

Our PRC futures brokerage business is the core of our operations. In 2025, we aim to expand our scale and enhance collaboration across segments for competitive advantages. We will maintain a client-focused strategy, offering risk management for industrial clients, wealth management for institutional clients, and internet services for individuals. This ensures tailored services and boosts our brokerage effectiveness.

For industrial clients, risk management is the primary reason for their involvement in the derivatives market, and fulfilling the functional role of the futures market is a critical mission of futures market participants for the industry's advancement. In 2025, we intend to further bolster the synergy between our risk management and PRC futures brokerage operations, enhance the expertise of our personnel, and deliver superior services to increase client loyalty and our influence within the industry value chain.

For institutional clients, we will continue to strengthen our collaboration with securities firms, private funds, and other institutions, aiming to significantly expand our institutional client base. Concurrently, we will leverage our wealth management resources to actively improve our investment management capabilities. By expanding our asset management business, we anticipate generating additional growth for our PRC futures brokerage business.

During the Track Record Period, we evaluated the commission rate charged by our PRC futures brokerage business against those of our peers and found no significant discrepancy. We will continue to monitor market trends and adjust our commission rates as necessary to remain competitive and support our long-term growth. See "Business – Our Business – PRC Futures Brokerage – Commission and Interest Income".

BUSINESS

Brokerage Products and Services

We provide futures brokerage service for both commodity futures products and financial futures products. The table below sets forth the main futures categories we offered at each of the six futures exchanges in China as of June 30, 2025.

Futures Exchange	Futures Categories
China Financial Futures Exchange	Stock index and treasury bond
Dalian Commodity Exchange	Agricultural and industrial
Guangzhou Futures Exchanges	New energy and chemical
Shanghai Futures Exchange	Metals, energy and chemical
Shanghai International Energy Exchange	Metals, energy and chemical, Shanghai (export) Containerized Freight Index based on Settled Rates (SCFIS) (Europe service)
Zhengzhou Commodity Exchange	Agricultural and industrial

The following table sets forth the breakdown of our trading value and our market share in each of the six futures exchanges in China:

	Year ended December 31,						Six months ended June 30,			
	2022		2023		2024		2024		2025	
	Amount	Market share	Amount	Market share	Amount	Market share	Amount	Market share	Amount	Market share

Treasury bond futures	1,662,317	1.79%	1,013,931	0.91%	349,053	0.26%	151,788	0.26%	476,163	0.54%
Subtotal	3,947,863	1.48%	2,703,446	1.02%	2,223,593	0.58%	951,276	0.59%	1,423,684	0.63%
Total	12,742,789	1.19%	12,111,181	1.07%	13,332,900	1.08%	5,904,002	1.05%	7,137,877	1.05%

(1) Others mainly refer to Shanghai (export) Containerized Freight Index based on Settled Rates (SCFIS) (Europe service) available in Shanghai International Energy Exchange.

Commission and Interest Income

Our PRC futures brokerage business generates income from the commissions fees we charge our clients as well as the interest income on margin deposits and settlement reserve funds.

Commission fee income is affected by trading value and the commission rate we charge and we adopt a mixture of volume-based commission model and value-based commission model. We determine the commission rate by referencing prevailing market rates, client type, and trading value. The final rate is typically negotiated with clients and is generally set at a premium to the fee standards established by the relevant exchanges. We collect commission fee by deducting the amount from the client's futures trading accounts held with us.

In addition to commission fee income, we earn interest income on margin deposits and settlement reserve funds, which may either be deposited with banks or exchanges. We negotiate deposit interest rates with banks, referencing benchmarks including the one-year term negotiable certificate of deposit rate or the one-day current deposit rate. During the Track Record Period, the one-year term negotiable certificate of deposit rate ranged from 1.60% to 3.50% while the one-day current deposit rate ranged from 0.35% to 2.00%. Deposit interest rate at futures exchanges is generally determined by the futures exchanges. During the Track Record Period, we earned interest from deposit with futures exchanges at a rate ranging from 0.35% to 1.66%.

BUSINESS

The following table sets forth the operating and financial metrics of our PRC futures brokerage business during the Track Record Period:

	Year ended/ As of December 31,			Six months ended/ As of June 30,	
	2022	2023	2024	2024	2025
Net commission and fee income					
Amount (<i>RMB in millions</i>)	350.4	404.3	300.0	155.3	113.1
By client type (<i>RMB in millions</i>)					
– Retail	215.5	223.1	182.1	82.2	69.4
– Corporates and financial institutions	134.8	181.2	117.8	73.1	43.7
Average brokerage commission rates (<i>bps</i>) ⁽¹⁾	0.275	0.334	0.225	0.265	0.158
Client equity					
Amount (<i>RMB in billions</i>)	19.1	21.2	31.6	25.8	27.3
By client type (<i>RMB in billions</i>)					
– Retail	6.5	7.1	6.7	6.8	7.1
– Corporates and financial institutions ⁽²⁾	12.6	14.1	24.9	19.0	20.3
Average daily client equity (<i>RMB in millions</i>)	20,618.4	20,432.7	24,222.6	22,711.7	29,554.8
Interest income (<i>RMB in millions</i>)	194.4	164.2	195.5	100.7	81.1

(1) Average brokerage commission rate equals the aggregate of net commission and fee income from the PRC futures brokerage business as divided by our futures brokerage trading value.

(2) This has deducted the figures from non-clearing members. The CFFEX adopts a tiered clearing membership system, under which members are classified as clearing members and non-clearing members. Clearing members are qualified to settle directly with CFFEX, while non-clearing members must settle through general clearing members. We do not include the client equity where we serve as the settlement agent for other non-clearing member futures companies.

Comparison of Our Commission Rate with Peers

During the Track Record Period, our commission rate generally aligned with that of our peers listed on the SEHK and/or the industry level. Minor year-to-year differences were attributable to variations in products traded by clients, client base, and pricing strategies across different companies.

BUSINESS

The tables below sets forth our commission rates as compared to our peers during the Track Record Period:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	‰ (one ten-thousandth, or 0.01%)				
Our Company	0.275	0.334	0.225	0.265	0.158
Industry	0.231	0.206	0.192	0.184	0.153
SEHK-Listed Future Company A	0.300	0.324	0.211	Undisclosed	Undisclosed
SEHK-Listed Future Company B	0.206	Undisclosed	Undisclosed	0.057	0.086

Notes

1. The above data have been sourced from the published annual reports of the futures companies and data published on the China Futures Association website.
2. Commission rate is calculated by futures brokerage commission income divided by futures brokerage trading value. The industry trading value used to compute industry commission rate was derived from single-sided data published by China Futures Association and multiplying it by two. For SEHK-Listed Future Company B, futures brokerage commission income in 2022 used to compute its commission rate was derived from the sum of exchange fee rebates, reduction in net income, net trading fees, net exercise fees, and net settlement fees as reported in its published annual report.

Our commission rate for the six months ended June 30, 2025 decreased primarily due to changes in the product mix traded by our clients in the six months ended June 30, 2025 as compared to the six months ended June 30, 2024, which were: (i) a shift in our clients' trading activity toward products with lower commission rates; and (ii) a higher proportion of trading of products charged under a volume-based commission model instead of a value-based commission model.

BUSINESS

Clients

As of December 31, 2022, 2023 and 2024 and June 30, 2025, our PRC futures brokerage business had in total of 107,797 registered clients, 117,825 registered clients, 124,043 registered clients, and 126,949 registered clients, respectively. The following table sets forth the breakdown of registered clients as of the dates indicated:

	As of December 31,			As of June 30,
	2022	2023	2024	2025
Retail	102,391	111,665	117,184	119,798
Corporates and financial institutions	5,406	6,160	6,859	7,151
Of which:				
Publicly listed companies ⁽¹⁾	123	150	169	173
State-owned enterprises ⁽²⁾	333	419	561	601
Publicly listed and state-owned enterprises	36	36	50	54
Total	107,797	117,825	124,043	126,949

(1) A “publicly listed company” refers to any entity that is listed on the Shanghai Stock Exchange, Shenzhen Stock Exchange, Beijing Stock Exchange and/or Hong Kong Stock Exchange and any subsidiary or branch of such entity, with each being counted a separate client.

(2) A “state-owned enterprise” refers any entity in the PRC that is owned or controlled by the local, provincial or central government of the PRC.

BUSINESS

As of December 31, 2022, 2023, and 2024 and June 30, 2025, the total number of active clients in our PRC futures brokerage business during each respective period was 18,484, 19,191, 19,859 and 16,266. The following table sets forth the movement of our registered clients in our PRC futures brokerage business for the periods indicated:

				Six months ended June 30,	
	2022	2023	2024	2024	2025
Number of registered clients as of the beginning of the period	99,650	107,797	117,825	117,825	124,043
Number of new registered clients during the period	8,677	10,659	7,056	3,447	3,324

Marketing and Customer Services

We have meticulously built a collaborative marketing and service network that integrates online and offline channels to meet diverse client market demands.

Online Outreach

We have developed a multi-dimensional communication network that spans domestic and international markets, utilizing formats such as text, video, and live-streaming. By managing a diverse portfolio of self-media accounts, we engage with audiences across various platforms. To ensure effective and targeted messaging, we adopt strategies tailored to each channel: publishing in-depth articles on social media platforms to showcase our brand value and industry insights; creating short videos to educate investors; and leveraging overseas social media platforms to introduce China's futures market to global audiences.

We also maintain strong partnerships with leading domestic and international media outlets to amplify our brand presence. Our management team and industry experts regularly participate in interviews and publish articles on topics such as market trends and rural revitalization initiatives. By contributing research-driven opinion pieces to respected platforms, we strengthen our reputation for professionalism and expertise. Additionally, we use global media channels to share insights into the development of China's derivatives market, enhancing international investors' understanding and confidence in the Chinese market.

BUSINESS

Across all promotional and corporate materials, we adhere to unified brand standards, ensuring consistent visual design and messaging across major conferences, digital marketing campaigns, and other initiatives. This cohesive approach conveys professionalism and credibility, reinforcing our brand image. Through frequent forums, industry summits, and training sessions, we integrate brand exposure with business development, turning each event into a platform to highlight the role of futures in supporting the real economy.

Online Services

As a key component of our client outreach strategy, we provide a comprehensive range of digital platforms and services to ensure seamless access to our offerings. Our online business hall serves as a one-stop hub, giving clients access to essential services like account opening and trading. Convenient links are provided to download our apps and software, enabling secure and efficient account setup and trading.

Our flagship application, Nanhua Futures App, is compatible with both mobile devices and computers across different platforms. It provides real-time market data covering stocks, options, and futures, along with detailed contract information, interactive charts, and historical data to support informed decision-making. Users can efficiently execute trades through features that support various order types and utilize portfolio management tools to monitor account balances, track positions, review transaction histories, and set alerts for specific assets. With secure login options such as fingerprint and facial recognition, cloud synchronization, and multi-account management capabilities, the App delivers a safe, efficient, and flexible trading experience, strengthening connectivity with clients.

Offline Marketing and Services

We have developed a highly skilled marketing team, employing a dual management structure that combines client managers as the primary focus and introducing brokers as a complementary component. Through our internal marketing management system, we implement differentiated strategies for these two groups, offering competitive compensation to support their career development and personal growth. Our mature and comprehensive training programs enhance professional capabilities, including onboarding training to improve professionalism and on-the-job training to help marketing personnel grow into future leaders. This program integrates personal, corporate, and societal values, empowering employees to achieve both personal and professional growth.

BUSINESS

With our roots in Zhejiang Province, we have expanded our PRC futures brokerage network nationwide. As of June 30, 2025, our network in China comprised 11 branch companies and 28 branch offices, with locations in Zhejiang, Shanghai, Guangdong, Beijing, Jiangsu, Liaoning, Heilongjiang, Gansu, Fujian, Shandong, Hubei, Shanxi, Sichuan, Henan, Chongqing, Jiangxi, Tianjin, and Shaanxi. The following diagram shows the distribution of our futures brokerage branch companies and branch offices as of June 30, 2025:

We derived a majority of our futures brokerage commission fee income from our business in Zhejiang and Guangdong Provinces and Shanghai. In 2022, 2023, and 2024 and for the six months ended June 30, 2024, and 2025, 78.0%, 77.1%, 65.5%, 69.3%, and 56.9%, respectively, of our PRC commission fee income originated from Zhejiang and Guangdong Provinces and Shanghai. For further details, see “Risk Factors – Risks Relating to Our PRC Futures Brokerage Business – Our PRC futures brokerage business is concentrated in Zhejiang and Guangdong provinces, as well as Shanghai, and our business, financial condition and results of operations may be materially and adversely affected by a significant deterioration in our PRC futures brokerage business in Zhejiang and Guangdong Provinces and Shanghai.”

As of June 30, 2025, we had 363 in-house personnel and 12 introducing brokers. Introducing brokers are individuals who are appointed by us to provide intermediary services in introducing clients to us and facilitating the signing futures brokerage contracts. Introducing brokers are independently liable for the civil responsibilities arising from their intermediary services and are compensated by us according to the agreed terms for their services.

BUSINESS

To effectively serve different client segments, we employ tailored marketing strategies:

- ***Retail Clients:*** we focus on experiential and interactive offline events, inviting industry experts to share investment insights and hosting award ceremonies and social gatherings to enhance client loyalty and foster a sense of community.
- ***Corporate and Institutional Clients:*** leveraging our highly skilled research team and innovative service portfolio, we host in-depth discussions on macroeconomic trends and industry cycles, organizing specialized seminars on current market developments. Additionally, we use online channels – such as our Apps, official social media accounts, and other reputable investment platforms – to expand our brand visibility and reach a broader audience of potential investors.

Market and Competition

We capitalize on our brand and platform advantages to deliver end-to-end services to address our clients' needs. On one hand, we utilize our advanced technologies such as the fifth-generation NHTD trading system, the data connectivity platform, and Nanhua Futures App, combined with a “two-location, three-center” data center architecture, to ensure trading efficiency, stability, and an enhanced client experience. On the other hand, we offer comprehensive services around the upstream and downstream of the industry chain through integrated futures and spot strategies. Supported by the professional research team at the Nanhua Research Institute, we strengthen the value of our specialized services and build differentiated competitive advantages in the industry. Furthermore, we have earned market recognition for our professional service capabilities and technological innovation as evidenced by the multiple awards we received throughout our development.

PRC Risk Management Services

In our PRC risk management services business, we assist our clients with managing market risks using financial derivatives. Our PRC risk management services offering include OTC derivatives, basis trading and market making. Our PRC risk management services are primarily conducted by Nanhua Capital. Nanhua Capital holds the necessary qualifications to conduct futures-based risk management business in China. We also carry out our basis trading business through Heilongjiang Henghua Agricultural Industry Service Co., Ltd. (“**Henghua Agricultural**”).

In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, operating income from our PRC risk management services business amounted to RMB121.7 million, RMB45.2 million, RMB127.7 million, RMB53.9 million and RMB45.1 million, respectively, representing 12.8%, 3.5%, 9.4%, 8.0% and 7.6% of our operating income during those periods, respectively.

BUSINESS

The operating profit generated from our PRC risk management services amounted to RMB47.7 million in 2022 while we incurred operating losses of RMB26.2 million in 2023, primarily due to the decrease of operating income from our market making business as a result of volatile market conditions, the increasing competition for the market making business, and less favorable results from our trading strategies and business team. In 2024, we generated operating profit of RMB9.6 million, primarily due to the increase of income from our OTC derivatives business. We incurred operating losses of RMB0.3 million for the six months ended June 30, 2024, while the operating profit amounted to RMB13.4 million for the six months ended June 30, 2025, primarily due to the increased income from OTC derivatives business as a result of the commodity price volatility caused by the U.S. tariff policies in 2025, which led to an increase in volatility long positions.

Our PRC risk management services will continue to focus on the three core areas of OTC derivatives, basis trading, and market making, driving the steady development of each segment. For OTC derivatives, we will leverage our strengths in commodity-linked OTC products that are closely integrated with the real economy, control the scale of higher-risk activities, enhance product design and innovation, launch new varieties to meet diverse risk management needs, coordinate with other departments for client development and investor education, improve risk control and hedging effectiveness, and boost profitability. In basis trading, we will promote the application of basis trading across different industry chains while maintaining robust risk controls, steadily explore combinations of spot and various options to expand scenarios for embedded option trading, and provide tailored hedging solutions and trading strategies to serve the real economy, large enterprises, SMEs, and agricultural clients. For market making, we will focus on consolidating our current market-making products, enhance the efficiency of our strategies through talent recruitment and development, and increase revenue from market-making activities.

OTC Derivatives

In an OTC derivatives transaction, we offer our counterparty clients non-standardized financial contracts such as options, swaps, and forwards. We manage the associated market risk by conducting hedging transactions on futures, securities and other markets.

Our OTC derivatives services provide customized risk management tools, addressing the diverse needs of clients. Through tailored strategies, we help clients reduce procurement costs, improve sales profitability, and enhance portfolio returns, enabling them to optimize risk exposure and improve financial stability.

We closely monitor market demand and refine our product design strategies to expand the use of various derivatives, including forwards, options, and swaps. The underlying assets include commodities, stocks, indices, funds, and interest rates.

BUSINESS

In 2023, we launched the first OTC derivatives product based on the Nanhua Commodity Index, and derivatives linked to this index grew to RMB381.5 million as of June 30, 2025.

In 2022, 2023, 2024 and for the six months ended June 30, 2024 and 2025, the scale of our OTC derivatives business as measured by the notional principal amount of newly added contracts amounted to RMB71,746.4 million, RMB79,113.8 million, RMB64,392.6 million, RMB32,465.0 million, and RMB31,855.9 million, respectively, achieving a market share of 3.50%, 2.49%, 2.15%, 2.15%, and 2.32% respectively, based on the total notional principal amount of the newly added contracts as published by the China Futures Association. The table below sets forth the breakdown of the notional principal amount of the newly added contracts transacted by derivative type and by product type during the Track Record Period:

	Year ended December 31,			Six months ended June 30,	
	2022	2023	2024	2024	2025
	<i>(RMB in millions)</i>				
By type of derivatives:					
Options	59,264	53,124	41,015	20,744	20,152
Futures	7,479	12,754	12,121	6,316	6,012
Swaps	5,002	13,236	11,256	5,405	5,691
Total	71,746	79,114	64,393	32,465	31,856
By product:					
Commodity	60,655	70,615	60,653	30,646	31,578
Equity	11,091	8,499	3,739	1,819	277
Total	71,746	79,114	64,393	32,465	31,856

As of December 31, 2022, 2023 and 2024 and June 30, 2025, our OTC derivatives business had in total 1,860 registered clients, 2,807 registered clients, 3,645 registered clients, and 1,305 registered clients, respectively. Our client base covers a diverse range of corporate and institutional clients, including publicly listed companies, micro, small and medium-sized enterprises and state-owned enterprises.

The following hypothetical case study illustrates how our OTC derivatives business works in practice:

Case Study – Rebar

A machinery manufacturing client sought to lock in the cost of raw materials for the next month. To achieve this, the client purchased an at-the-money rebar call option contract for 10,000 tons from us, with a strike price of RMB3,300/ton and a premium of RMB74/ton (implied volatility of 20%). Such at-the-money rebar call option would provide the client with a right to buy 10,000 tons of rebar at RMB3,300/ton regardless of how the market price changes. To acquire this right, the client paid a premium of RMB74/ton.

Our income and risk management process for this transaction is as follows:

- **Premium Income:** The client paid an option premium of RMB74/ton $\times$ 10,000 tons = RMB740,000, which represents our direct income from this transaction.
- **Dynamic Hedging and Volatility Management:** To manage the risk associated with this option, we used a dynamic hedging strategy in the futures market. At the start of the transaction, we purchased 500 lots⁽¹⁾ of rebar futures at RMB3,300/ton to hedge the Delta risk (Delta $\approx$ 0.5). Delta measures how much the price of an option changes in response to a change in the price of the underlying asset. As the futures price rose and Delta increased (e.g., Delta = 0.6), we bought an additional 100 lots. Conversely, when the price fell and Delta decreased (e.g., Delta = 0.4), we sold 200 lots. This dynamic hedging process continued until the option expired. Over the course of the hedging period, the realized volatility decreased to 19.3%, which was lower than the implied volatility of 20% at the time of the transaction. This allowed us to profit from the time decay of the option (Theta) and the decline in volatility. Time decay, or Theta, measures the rate at which an option loses value over time, assuming all other factors remain constant. After accounting for the futures hedging loss (including transaction fees) of RMB710,300, the net profit from this transaction was: RMB740,000 (premium income) - RMB710,300 (hedging loss) = RMB29,700.

This case study demonstrates how we generate income from a combination of both receiving premium income and dynamic hedging and volatility management.

(1) A lot of rebar futures amounts to 10 tons.

* The above case study is hypothetical and for illustration purpose only.

Case Study – Iron Ore

A trading client sought to enhance returns by selling us an out-of-the-money iron ore put option contract with a 10-day expiry for 20,000 tons with a strike price of RMB710/ton and a premium of RMB2.04/ton (implied volatility 32.5%). At the time of the transaction, the iron ore market price was RMB770/ton. Such an out-of-the-money put option provided us with the right to sell 20,000 tons of iron ore at RMB710/ton, regardless of subsequent market price movements. To acquire this right, we paid the client a premium of RMB2.04/ton. Our payment and risk management process for this transaction is as follows:

- **Premium Payment:** We paid the client an option premium of RMB2.04/ton × 20,000 tons = RMB40,800, which represents our cost for this transaction.
- **Dynamic Hedging and Volatility Management:** To manage the risk associated with this option, we used a dynamic hedging strategy in the futures market. At the start of the transaction, we purchased 18 lots of iron ore futures at RMB770/ton to hedge the Delta risk (Delta ≈ 0.09). Delta measures how much the price of an option changes in response to a change in the price of the underlying asset. As the futures price increased and the option became further out-of-the-money, Delta decreased and we sold iron ore futures. Conversely, when the price decreased and Delta increased, we bought iron ore futures. This dynamic hedging process continued until the option expired. During the option's life, realized volatility fell to 25%, lower than the initial implied volatility of 32.5%. As a result, we incurred a loss from the time decay of the option (Theta) and the decrease in volatility. After accounting for a hedging profit (including transaction fees) of RMB12,500, the net profit from this transaction was: RMB12,500 (hedging profit) – RMB40,800 (premium paid) = RMB-28,300 (loss).

In this case, the decline in realized volatility and the effect of time decay resulted in a net loss for us, even after dynamic hedging profits achieved during the life of the option. See “Risk Factors – We may suffer losses from market risks, operation risks, credit risks, and liquidity risks in our OTC derivatives business.”

* The above case study is hypothetical and for illustration purpose only.

In 2022, 2023 and 2024, and for the six months ended June 30, 2024 and 2025, operating income from our OTC derivatives business amounted to RMB28.3 million, RMB28.4 million, RMB70.3 million, RMB21.6 million, and RMB41.6 million, respectively, representing 3.0%, 2.2%, 5.2%, 3.2% and 7.0% of our operating income during those periods, respectively.

Basis Trading

In our basis trading business, we engage in spot commodity trades with our clients while executing commodity futures trades to hedge risks, thereby earning basis income. We assist our clients by facilitating the procurement and sale of physical commodities, thereby expanding their procurement and sales channels. By tailoring basis trading strategies to meet the specific needs of clients, particularly industrial enterprises, we deliver value by controlling their procurement costs or enhancing their sales revenue. Our basis trading business primarily serves industry leaders in relevant product categories as well as small and medium-sized enterprises within the supply chain.

We diversify our product offerings to align with market demands. During the Track Record Period, our product portfolio had evolved, expanding from energy and chemicals, ferrous metals, and agricultural products to include non-ferrous metals. This broad range of commodities underscores our expertise and adaptability in basis trading business. During the Track Record Period, we traded in the following commodities across several key sectors:

- *Energy and chemicals:* rubber, purified terephthalic acid, styrene, methanol, ethylene glycol, polyethylene, polypropylene, and polyvinyl chloride.
- *Ferrous metals:* rebar, hot-rolled coil, iron ore, steel billet, and stainless steel.
- *Agricultural:* cotton, soybean oil, palm oil, soybeans, soybean meal, and sunflower meal.
- *Non-ferrous metals:* copper, tin, aluminum, and silver.

In a typical basis trading transaction, we make trades on both the spot market and the futures market.

- On the spot market, based on our seller and buyer clients' targeted business and risk management needs, we enter into a contract with each of them under which we purchase and agree to take delivery of, or sell, a specific quantity and type of commodities from or to them at a predetermined price during a future period, usually up to one month. We are typically required to prepay a portion, usually up to 15%, of the total commodity price, to the seller clients upon entering into contracts with them while the remainder will be paid in accordance with the terms of the contract. We typically store the purchased commodities in third-party warehouses, which also insure the commodities against potential damage. When buyer clients request us to deliver the commodities to a designated location, we conduct thorough assessments of shipping risks, carefully evaluate the qualifications of the shipping companies, and purchase adequate insurance to ensure the safe and secure transportation of the commodities.

- On the futures market, we engage in futures trading to manage risks and capture potential gains. Our strategies include hedging and arbitrage, which are tailored based on the type of commodities, prevailing market conditions, and other relevant factors. For hedging, when we enter into purchase contracts with seller clients for physical commodities to be delivered on a future date, we simultaneously establish a back-to-back short position in the futures market for the same or closely related commodity. This approach helps us mitigate the risk of potential price declines in the commodity. Similarly, once we enter into sales contracts with buyer clients for these physical commodities, we close out the corresponding short futures positions to neutralize our exposure. For arbitrage, we capitalize on price discrepancies between (i) futures contracts of the same commodity with different maturity dates, and (ii) futures contracts of related commodities. By taking offsetting positions in these related products, we aim to lock in a profit based on the price differential. Arbitrage opportunities arise when we identify mispricing between the two products and anticipate that the price relationship will correct itself. In such cases, the gain on one leg of the trade is expected to exceed the loss on the other, allowing us to generate a net profit.

The following hypothetical case study illustrates how this process works in practice:

Case Study – Methanol

Basis trading is a strategy that capitalizes on the difference, also known as “basis”, between the spot price of an asset and its corresponding futures price.

Background: In 2023, we facilitated a basis trading transaction to help Company A manage its price risk in methanol procurement. The transaction involved leveraging the spot procurement price of methanol and the main futures contract price of methanol on the Zhengzhou Commodity Exchange to execute a basis trading strategy.

Trading Details: **Initial Situation (February 1, 2023):**

Spot Price: Company A’s methanol procurement price was RMB2,580/ton.

Futures Price: The methanol futures 2305 contract on ZCE was trading at RMB2,781/ton.

Basis: -201 (Spot Price – Futures Price), which expanded to an unreasonable level.

BUSINESS

To manage the price risk, Nanhua Capital initiated a basis trading transaction:

- Purchased 500 tons of methanol spot from Company B at RMB2,580/ton. After accounting for delivery, the actual received quantity was 495.62 tons.
- Shorted 46 lots of methanol futures 2305 contract at RMB2,781/ton (1 lot = 10 tons).

Closing the Position (February 10, 2023)

Basis: Narrowed to -65, returning to a reasonable range.

Actions:

- We entered into a sales contract with Company A to sell methanol at a price of RMB2,565/ton (adjusted for a RMB5 discount). The proceeds from the sale of 495.6 tons of methanol to Company A at RMB2,565/ton, and the cost incurred from the purchase of 495.6 tons of methanol spot from Company B at RMB2,580/ton, were recorded as part of our net investment gains, reflecting the price difference between the two transactions.
- Closed the 46 lots of methanol futures 2305 contract at RMB2,630/ton.

Profit: The basis profit of RMB62,881.

	February 1, 2023	February 10, 2023	Quantity	VAT	Profit (RMB)
Spot Price	2,580	2,565	495.6 tons	0.13	-6,579.0
Futures Price	2,781	2,630	460 tons	–	69,460
Basis	-201	-65	–	–	62,881

Our Value: We acted as a bridge between upstream suppliers (Company B) and downstream manufacturers (Company A), combining the resource advantages of Company A, the distribution capabilities of Company B, and our operational expertise to improve the efficiency of production and trading activities, providing a “safe harbor” for enterprises during periods of market volatility.

* The above case study is hypothetical and for illustration purpose only.

We may incur loss from our basis trading transaction. See “Risk Factors – We may suffer losses from market risks, operation risks, credit risks, and inventory risks in our basis trading business.”

BUSINESS

As we generate profit from basis trading primarily by capturing the basis between the spot market and the futures market, trading income alone does not reflect the underlying profitability of the business. Hedging gains from the futures or derivatives market should be taken into account in order to understand the comprehensive gains from our basis trading business.

The following table sets forth the comprehensive gains from our basis trading business during the Track Record Period:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	<i>(RMB'000)</i>			<i>(unaudited)</i>	
Trade income from basis trading	374	–	1,873	330	61
Net investment gains from basis trading	26,437	31,751	27,309	19,092	10,223
Net investment gains from hedging transactions	10,931	(23,843)	(14,553)	6,977	17,177
Net investment gains from commodity trading	15,505	55,595	41,862	12,116	(6,954)
Comprehensive gains from basis trading	26,810	31,751	29,182	19,423	10,284

Using comprehensive gains from basis trading business allows us to consider the combined impacts of basis trading, hedging transactions and commodity trading, providing a useful analysis of investment gains and effectiveness of our basis trading.

Market Making

We provide market making services in China for futures contracts and options. We provide continuous buy and sell quotes for the designated products as required by the exchanges, in accordance with the specific contracts and performance indicators designated by the exchanges. These requirements include the number of contracts we must quote, the required tightness of bid-ask spreads, and the designated hours for providing quotes. As of June 30, 2025, we provided market-making services for 14 options products and 22 futures products, consistently meeting the performance standards mandated by the exchanges. Our market making services are provided in all futures exchanges in China. In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, the trading value of our market making business amounted to RMB789.7 billion, RMB927.4 billion, RMB281.5 billion, RMB83.7 billion, and RMB200.6 billion, respectively. The decrease in our trading value in 2024 was mainly due to the policy changes by the exchanges during the first quarter. To counter the effects these challenges brought

BUSINESS

us, we have taken proactive steps to enhance our capabilities and improve our operation efficiency by introducing a new market-making team comprising experienced and qualified personnel in IT and trading, implementing an advanced market-making system, and optimizing our strategies, systems, and personnel to enhance our capabilities and improve operational efficiency.

We generate revenue by capturing the gains from the price differences between the bid price buyers are willing to purchase the asset and the ask price sellers are willing to sell the asset. In 2022, operating income from our market making business amounted to RMB66.4 million, representing 7.0% of our operating income during the period. In 2023 and 2024 and for the six months ended June 30, 2024 and 2025, operating loss from our market making business amounted to RMB16.8 million, RMB8.4 million, RMB6.3 million, and RMB9.4 million, respectively, representing -1.3%, -0.6%, -0.9% and -1.6% of our operating income during those periods, respectively.

The negative operating income under market making from PRC risk management services was primarily due to volatile market conditions, the increasing competition for the market making business, and less favorable results from our trading strategies and business team. In response, we have engaged a new team as well as designed and upgraded our trading strategies. See “Summary – Key Financial and Operating Data – PRC Risk Management.”

We may incur loss from our market making transactions. See “Risk Factors – We may suffer losses from model risks, operation risks, and liquidity risks in our market making business.”

We are not required to engage in market making to maintain our membership with the relevant futures exchanges.

Other Services

We also provide other PRC risk management services which primarily include product sales, involving agricultural products such as soybeans, and pre-packaged foods like rice and oil, as well as consulting services through Henghua Agricultural. The establishment of Henghua Agricultural was a strategic initiative to create a physical platform that integrates our financial services with the agricultural industry chain, enabling us to embed financial derivative instruments into the various stages of the agricultural value chain, such as planting, trading, processing, and logistics, thereby connecting traditional agricultural enterprises and financial institutions. This direct involvement enables us to better understand market conditions, pricing mechanisms, and logistical considerations. Our consulting services, offered through Henghua Agricultural’s specialized online platform, provide high-value market information and advisory services to members across the soybean industry value chain. These services include real-time data on domestic and international markets, in-depth analysis of supply and demand fundamentals, and access to exclusive expert consultations, supporting members’ decision-making process, from data acquisition to implementation.

BUSINESS

The operating income from other services comprises income from Henghua Agricultural and other non-recurring income, amounting to RMB0.2 million, RMB1.8 million, RMB36.5 million, RMB19.2 million and RMB2.6 million, respectively, in 2022, 2023, 2024 and for the six months ended June 30, 2024 and 2025. The increase in operating income under other services in 2024 was primarily attributable to the subsidies received for the market making business and the growth of income for “Insurance + Futures” business.

PRC Wealth Management

Our wealth management business in China includes the provision of mutual funds, asset management, and agency sale of funds services. Our PRC wealth management business helps cultivate and grow the base of institutional investors, which improves the structure of market participants, and enhances pricing efficiency. Our specialization in derivatives enables us to offer wealth management services focused on hedging and arbitrage, meeting investors’ diverse needs while showcasing our strengths in the field.

In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, operating income from our PRC wealth management business amounted to RMB60.6 million, RMB90.1 million, RMB68.2 million, RMB39.6 million, and RMB27.6 million, respectively, representing 6.3%, 7.0%, 5.0%, 5.9% and 4.7% of our operating income during those periods, respectively. Our operating income from the PRC wealth management business is the aggregate of operating income from our mutual funds, asset management, agency sale of funds businesses and others. Others represent amounts resulting from non-core wealth management operations, which mainly include intercompany eliminations from consolidated structured entities and non-recurring income, such as government grants and subsidies. The net investment gains of our PRC wealth management business primarily derive from gains or losses (i) on investments by our Group using our own funds and (ii) from investment activities of the consolidated structured entities.

The operating losses incurred from our PRC wealth management services decreased from RMB11.6 million in 2022 to RMB9.2 million in 2023, primarily due to the increase of operating income reflecting the growth of our PRC asset management and mutual fund services. The operating losses further decreased to RMB3.3 million in 2024, primarily due to the decrease of operating expenses in line with the reduced AUM under our asset management operations as a result of our initiation of a clean-up of bond-related business under our asset management operations out of prudence. The operating loss from our PRC wealth management amounted to RMB4.7 million for the six months ended June 30, 2024, and further increased to RMB10.9 million for the six months ended June 30, 2025, primarily due to the decline of operating income as a result of the reduction of average AUM of our PRC asset management and mutual fund businesses.

The PRC wealth management business has not yet achieved sustained profitability primarily because the current scale of the business is not sufficient to cover the fixed costs required to support ongoing operations. These fixed costs include essential expenditures for licensing, compliance, and IT infrastructure. While these costs have contributed to operating losses during the Track Record Period, we believe they represent essential investments that will establish a foundation for future profitability as the business scales. See “Risk Factors – Risks Relating to Our PRC Wealth Management Business – Our ability to achieve profitability in our PRC wealth management business is subject to various risks and uncertainties and we may continue to incur operating losses in connection with our PRC wealth management business.” We expect our PRC wealth management business to achieve profitability in the next one to two years.

BUSINESS

For our PRC wealth management business, we have secured multiple financial licenses for mutual funds, asset management, and agency sales of funds. By 2025, we aim to balance development with risk prevention, expanding through enhanced investment management, multi-license synergies, and overall growth. For mutual funds, we will collaborate with banks, trusts, private funds, and others to grow rapidly, making them key profit contributors. This involves improving personnel, systems, product design, fund manager capabilities, channels, and risk management. In asset management, we will boost active management and future asset management through CTA strategy development, high-quality products, services, and strong branding. For agency sales of funds, we will refine the whitelist system, optimize third-party product selection, emphasize our own products, and enhance sales incentives to drive growth. These initiatives will help improve performance, reduce losses, and achieve sustainable growth in our PRC wealth management business.

Mutual Funds

Through Nanhua Fund, we engage in mutual funds business, providing fund management, fund sales, asset management, and discretionary portfolio management services in compliance with regulations set by the CSRC. We were the first PRC futures company to obtain approval from the CSRC to operate a mutual funds business.

Our products offerings encompass various funds spanning equity funds, fixed-income instruments funds, and mixed-type funds (which include a combination of equities and fixed-income instruments), catering to a wide range of investor preferences. Our featured products include the following:

- ***Nanhua CSI Hangzhou Bay Area ETF (fund code: 512870)***: this is the first bay area economy-themed ETF in China, designed to track the CSI Hangzhou Bay Area Index. This product offers an investment tool that focuses on high-quality listed enterprises in the Hangzhou Bay area and contributes to the development of the Common Prosperity Demonstration Zone.
- ***Nanhua Fenghui Mixed Fund (fund code: 015245)***: this fund follows value investing principles, focusing on constructing a “margin of safety,” avoiding value traps, and pricing potential returns. It screens undervalued stocks to address market uncertainties through portfolio diversification, reflecting turnaround opportunities in distressed situations.
- ***Nanhua Ruiheng Short-Medium Term Bond Fund (fund code: 005513)***: this fund primarily invests in bonds with a remaining maturity of no more than three years, offering a risk-return profile positioned between money market funds and medium-to-long-term bond funds. In terms of strategy execution, this fund seeks to avoid excessive exposure to interest rate and credit risks. Under a risk-controlled framework, this fund aims to enhance returns through a combination of sub-strategies, including flexible duration adjustments, selective investment in credit bonds, leverage carry trades, and yield curve riding strategies. This fund strives to balance risk and return, providing investors with a relatively stable cash management product.

BUSINESS

- **Nanhua Ruiying Mixed Fund (fund code: 004845):** this has garnered a four-star rating (over a five-year horizon) from Morningstar as of December 31, 2024, indicating that its risk-adjusted returns in the year place it in the top 22.5% among comparable funds during such period.

We generate income through the collection of management fees as stipulated in the fund documents. We determine management fees based on factors including fund type, management costs, market competition, investor demand, regulatory compliance, target fund size, and distribution channels, ensuring a balanced and informed fee structure. The core client base of our mutual funds business is institutional clients. The following table sets forth the number of mutual fund products and their scale under our mutual funds business as of the dates indicated:

	As of December 31,			As of June 30,
	2022	2023	2024	2025
Mutual Fund Products				
Number	14	15	19	20
AUM (RMB in millions)	11,697.6	17,254.7	14,804.8	21,526.9

In addition, as part of our mutual funds business, we also had under our management 14, 15, 15, and 14 target products, with an AUM of RMB3,528.7 million, RMB3,856.5 million, RMB18,952.9 million, and RMB16,916.3 million, respectively, as of December 31, 2022, 2023 and 2024 and June 30, 2025, respectively. Target products refer to private asset management services we provide for specific qualified clients, such as corporations, organizations, or high-net-worth individuals. These products involve raising funds or accepting entrusted assets from specific clients, with the fund manager investing these assets in securities for the benefit of the asset entrustor. Target products are private asset management service for qualified investors with high entry thresholds, offering customized investment strategies. In contrast, mutual fund products are publicly available to the general public with low entry requirements.

In our mutual funds business, we offer mutual funds and target products with distinct fee structures. We establish pricing standards based on fund contracts and distribution agreements with sales partners. Fees include management fees, performance-based fees, and may involve sales or redemption fees. Our fees are set according to product type, investment strategy, and market practices. All fee arrangements are disclosed to investors for transparency and regulatory compliance. For mutual funds, we charge a management fee of 0.15% to 1.2%. For target products, our fees generally consist of a fixed management fee and a performance-based fee. Management fees for target products generally vary from 0.01% to 0.08% for fixed income products, from 0.05% to 1.7% for equity products and the management fee for the futures and derivative product is 0.05%. Performance fees for target products are typically set at 20% to 50% on the portion of returns exceeding the agreed-upon returns.

BUSINESS

In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, operating income from our mutual funds business amounted to RMB39.1 million, RMB64.0 million, RMB57.1 million, RMB31.6 million, and RMB23.3 million, respectively, representing 4.1%, 5.0%, 4.2%, 4.7% and 3.9% of our operating income during those periods, respectively.

Asset Management

We commenced our asset management business in 2012. We were among the first futures companies in China that were licensed to provide asset management business. Our clients include both retail investors and institutional investors.

Our asset management products offerings include both collective and targeted asset management schemes. For collective asset management schemes, we manage assets with diverse risk and return profiles for multiple clients through designated accounts. For targeted asset management schemes, we manage assets for a single client through a designated account. The following table sets forth the number of asset management schemes and AUM under our management as of the dates indicated:

	As of December 31,						As of June 30,	
	2022		2023		2024		2025	
	<i>Number</i>	<i>AUM</i>	<i>Number</i>	<i>AUM</i>	<i>Number</i>	<i>AUM</i>	<i>Number</i>	<i>AUM</i>
	<i>(AUM in RMB millions)</i>							
Collective asset management schemes	12	537	21	1,222	11	116	14	172
Targeted asset management schemes	5	195	3	62	3	43	6	83
Total	17	732	24	1,283	14	159	20	255

Compared to 2023, our AUM decreased in 2024. This reduction was primarily due to a decrease in the number of schemes under our management as we initiated a clean-up of bond-related business under our asset management operations out of prudence. The decision to return AUM under this mandate to investors, rather than reallocating it to a different investment strategy, was because changing the strategy would not align with the investors' risk appetite. Investors in bond-related products typically have a lower risk tolerance, and reallocating these investments to other asset classes would not match their investment preferences. This shift away from bond-related business refocused our collective schemes on commodities, futures, and derivatives, aligning our asset management business more closely with our core strengths and market opportunities. These adjustments reflect our commitment to an efficient and compliant asset management business for long-term sustainability.

BUSINESS

On October 31, 2023, the Zhejiang Bureau of the CSRC issued regulatory decisions against the company and a senior executive overseeing asset management. Our Company was cited for failing to comply with accounting standards in certain asset management plans, revealing deficiencies in internal controls. In response, our Company conducted a self-inspection and implemented corrective measures across systems, processes, personnel, and policies, with the rectification successfully completed and approved. During the Track Record Period and up to the Latest Practicable Date, we had no other material non-compliance incidents in our asset management business. See “ – Legal and Regulatory – Compliance and Regulatory Inspection.”

We generate income through collection of management fees and, in some cases, performance fees on schemes under our management. We set the fee rates of each scheme with reference to its type and characteristics taking into consideration of market competition, and investor demand. Management fees are charged at a pre-determined fee rate while performance fees are charged at a rate that is tied to the performance of the scheme. In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, operating income from our asset management business amounted to RMB9.6 million, RMB12.7 million, RMB7.1 million, RMB6.3 million, and RMB1.0 million, respectively, representing 1.0%, 1.0%, 0.5%, 0.9% and 0.2% of our operating income during those periods, respectively.

In our asset management business, we charge fees that primarily include management fees and performance-based fees. Our pricing standards are determined with reference to the fee rates of similar asset management products in the market, and we take into account factors such as the nature of the product and the characteristics of our clients. The composition of our fees typically consists of a fixed management fee and, where applicable, a performance-based fee that aligns our interests with those of our clients. Our management fee rates generally range from 0.2% to 2.0%, while our performance-based fees are typically set at 20% to 50% on the portion of returns exceeding the agreed-upon returns.

We market our asset management products using multiple channels. We have established a dedicated sales team. We also seek opportunities to market our products through qualified financial intermediaries to extend our reach to a broader client base. We plan to enhance our marketing capabilities by improving internal collaboration, expanding external channels, and refining the roles of our sales team to build independent marketing strength. At the same time, we will empower our investment team with clear objectives, encouraging deeper expertise and close collaboration with the sales team to drive asset growth. While ensuring compliance, we will explore new product models, such as customized solutions for large institutions, research resource-sharing through data platforms, and FOF investment management, to steadily expand our AUM.

Agency Sale Funds

We act as agent for fund managers to sell funds to investors.

BUSINESS

We receive commission from the agency sales of securities investment funds. Our commission is typically pre-agreed with the fund administrator. In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, the total sales of securities investment funds completed by us amounted to RMB1,518.1 million, RMB507.8 million, RMB171.3 million, RMB49.1 million, and RMB143.9 million, respectively. In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, operating income from our agency sale of funds business amounted to RMB1.7 million, RMB4.5 million, RMB1.0 million, RMB0.6 million, and RMB0.5 million, respectively, representing 0.2%, 0.3%, 0.1%, 0.1% and 0.1% of our operating income during those periods, respectively.

Overseas Financial Services

In overseas financial services business, we provide futures services, securities services, asset management and leveraged forex trading. Through HGNH International and its subsidiaries, we have been actively expanding our business in global markets. We were one of the first futures companies in China to establish a presence in Hong Kong with the establishment of HGNH International. Since 2006, HGNH International and its subsidiaries have developed operations in key strategic financial centers: Hong Kong, Chicago, Singapore, and London, covering the Asia, North America, and Europe time zones and enabling 24-hour cross-market trading services.

We play a role in helping overseas clients, especially overseas entities of Chinese enterprises, to navigate global financial markets, facilitating cross-border transactions and expanding investment opportunities beyond China. We also attract overseas clients to PRC futures and derivatives market.

In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, operating income from our overseas financial services business amounted to RMB231.1 million, RMB567.3 million, RMB654.2 million, RMB321.0 million, and RMB326.9 million, respectively, representing 24.2%, 43.9%, 48.3%, 47.6%, and 55.1% of our operating income during those periods, respectively. The net investment gains of our overseas financial services business primarily derive from gains or losses on investments and foreign exchange.

The operating profit generated from overseas financial services increased from RMB132.3 million in 2022 to RMB397.1 million in 2023, primarily driven by higher operating income resulting from rising overseas interest rates. The growth in operating income was also attributable to (i) an increase in client equity from our overseas brokerage services and (ii) higher trading volumes in our overseas futures brokerage business. The operating profit further increased to RMB466.2 million in 2024, primarily due to the increases in (i) client equity from our overseas brokerage services and (ii) trading volume for our futures brokerage in the overseas markets. The operating profit generated from overseas financial services remained relatively stable for the six months ended June 30, 2024 and 2025, which amounted to RMB228.7 million and RMB241.3 million, respectively.

Our Overseas Network

Our overseas financial services business is conducted through HGNH International and its subsidiaries.

BUSINESS

We have established presence in Hong Kong, Chicago, Singapore, and London, allowing us to deliver seamless financial solutions across jurisdictions. As of the Latest Practicable Date, our overseas subsidiaries hold the following licenses in the jurisdictions indicated.

<u>Location</u>	<u>Entity</u>	<u>Licenses as of the Latest Practicable Date</u>
Hong Kong	HGNH International Securities	Type 1 (dealing in securities) under SFO Type 4 (advising on securities) under SFO
	HGNH International Futures	Type 2 (dealing in futures contracts) under SFO Type 5 (advising on futures contracts) under SFO Registered with the NFA as an exempt foreign firm
	HGNH International AM	Type 4 (advising on securities) under SFO with a licensing condition to only provide services to professional investors Type 9 (asset management) under SFO with a licensing condition to only provide services to professional investors
Singapore	Nanhua Singapore	Capital Markets Services License (futures contracts trading and leveraged foreign exchange trading) of MAS Registered with the NFA as an exempt foreign firm
	Nanhua SG	Capital Markets Services License (fund management) of MAS
United Kingdom	Nanhua UK	Approved by the UK FCA to deal in commodity futures, options, and other derivatives, and arrange investment transactions (including certain LME-related swap order independent quotation services) Registered with the NFA as an exempt foreign firm
United States	Nanhua USA	Futures Commission Merchant
	Nanhua USA Investment	Commodity Trading Advisor Commodity Pool Operator

As of the Latest Practicable Date, we held 16 overseas exchange memberships and 14 clearing memberships, including those with CME Group, LME, ICE Europe and SGX.

Futures

We provide services to facilitate trades of futures products on multiple exchanges overseas. In addition, we are also qualified to assist overseas investors to trade futures products in three futures exchanges in China. Through our platform, overseas investors can trade internationalized futures contracts listed in China, such as crude oil and international copper on the Shanghai International Energy Exchange, as well as PTA, rapeseed oil, rapeseed meal, and peanuts on the Zhengzhou Commodity Exchange. In addition, we are one of the few PRC futures companies with the capability to facilitate physical commodity delivery overseas, providing end-to-end risk management services to overseas entities of Chinese enterprises expanding internationally.

We serve a stable base of retail and institutional clients overseas. As of December 31, 2022, 2023 and 2024 and June 30, 2025, our overseas futures services business had in total 14,019 registered clients, 13,985 registered clients, 13,813 registered clients, and 13,794 registered clients, respectively, of which, the number of active clients was 1,067, 1,016, 1,037, and 931, respectively, as of the same dates. The map below depicts our services network as of the Latest Practicable Date.

Scope of Services

Our futures services include brokerage, clearing, and delivery.

BUSINESS

Brokerage

We provide futures brokerage services overseas where we assist clients in executing trades per client's instructions. We are licensed to provide futures brokerage service in Hong Kong, Singapore, the United Kingdom and the United States. The table below sets forth the breakdown of the number of overseas futures services client accounts and trading volume in lots by geography as of the dates and for the periods indicated:

	As of/For the year ended December 31,						As of/For the six months ended June 30,			
	2022		2023		2024		2024		2025	
	<i>Number of</i>	<i>Trading</i>	<i>Number of</i>	<i>Trading</i>	<i>Number of</i>	<i>Trading</i>	<i>Number of</i>	<i>Trading</i>	<i>Number of</i>	<i>Trading</i>
	<i>accounts</i>	<i>volume</i>	<i>accounts</i>	<i>volume</i>	<i>accounts</i>	<i>volume</i>	<i>accounts</i>	<i>volume</i>	<i>accounts</i>	<i>volume</i>
	<i>(Trading volume in lots in thousands)</i>

Delivery

Our delivery capabilities cover a wide range of asset classes, including foreign exchange, commodities, and financial derivatives, with support for major global currencies such as the US dollar, Euro, British pound, Japanese yen, and Chinese yuan.

BUSINESS

One of our key strengths lies in our ability to facilitate delivery, particularly for commodities and currency futures. We are capable to deliver a wide range of futures products, including metals such as LME Aluminum, Copper, Nickel, Lead, Tin, Zinc, COMEX Gold, Silver, and Copper. In the currency market, we support USD/CNY and USD/CNY options, while in agriculture, we offer delivery for corn futures. Additionally, we facilitate delivery for rubber products like TSR 20, SICOM RSS3, and TSR20 futures. These capabilities demonstrate our expertise in meeting clients' physical and financial risk management needs across diverse markets.

The complexity of logistics and warehouse requirements limit the number of futures firms offering delivery services across different markets. By addressing these challenges, we differentiate ourselves in the market, enhancing our service offerings and increasing client stickiness through comprehensive support in both financial and physical markets.

Commissions and Interest Income

We generate income from commission earned on executing and clearing trades. During the Track Record Period, we primarily charged commissions on a fixed fee per trade basis in most markets. In some markets, commissions were also charged based on the trading value and a commission rate. The actual charging method depends on the specific market and product, as well as client agreements. The table below sets forth the breakdown of trading value and net commission rate by geography as of the dates and for the periods indicated:

	As of/For the year ended December 31,						As of/For the six months ended June 30,			
	2022		2023		2024		2024		2025	
	Net		Net		Net		Net		Net	
	Trading Value	Commission Rate	Trading Value	Commission Rate	Trading Value	Commission Rate	Trading value	Commission Rate	Trading value	Commission Rate
<i>(Trading value in HK\$ in millions; net commission rate in %)</i>										
Hong Kong	8,046,934	0.058	11,945,095	0.040	19,160,778	0.035	8,422,292	0.036	10,995,279	0.036
Singapore	3,232,649	0.034	6,006,312	0.026	9,256,697	0.024	4,094,475	0.024	4,523,243	0.024
United Kingdom	1,766,004	0.118	1,975,799	0.180	3,125,867	0.162	1,581,148	0.136	1,816,226	0.181
United States	6,255,190	0.013	8,584,140	0.014	13,509,052	0.015	6,413,723	0.015	7,382,110	0.012
Total	19,300,777		28,511,346		45,052,393		20,511,638		24,716,857	

Note: Net commission rate equals net commission divided by trading value. The net commission rate is for reference only. The commission for each trade is determined differently based on the specific market and product, as well as client agreements.

We also earn interest income on client funds and accrued interest at a rate as negotiated between the bank and us.

BUSINESS

The table below sets forth the breakdown of operating and financial metrics of our overseas futures brokerage business during the Track Record Period:

	As of/For the year ended December 31,			As of/For the six months ended June 30,

– Corporates and financial institutions	8,082	9,231	10,968	9,733	14,235
Interest income	133.8	408.3	484.2	253.0	172.3

In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, operating income from our overseas futures services amounted to RMB203.8 million, RMB484.8 million, RMB625.4 million, RMB252.6 million, and RMB261.6 million, respectively, representing 21.4%, 37.5%, 46.2%, 37.4% and 44.1% of our operating income during those periods, respectively.

Asset Management

We provide overseas asset management services through our Hong Kong-incorporated subsidiary HGNH International AM and our Singapore-incorporated subsidiary Nanhua SG. These entities each holds the required license in their respective jurisdictions to provide asset management services: HGNH International AM holds a Type 9 (asset management) licenses under the SFO with a licensing condition to only provide services to professional investors and Nanhua SG holds a capital markets services license from the Monetary Authority of Singapore. Further, HGNH International AM is authorized as a RQFII while Nanhua SG is authorized as a QFII, enabling us to assist our clients to invest in China's onshore capital markets. By leveraging our multi-market presence and regulatory licenses, we are qualified to deliver a diverse range of investment products and solutions, including:

- *Global Multi-Asset Funds:* providing exposure to equities, fixed income, and alternative investments across international markets.
- *China-Focused Investment Strategies:* facilitating foreign investment into China's financial markets through RQFII and QFII programs.

BUSINESS

- *Commodity and Derivatives Investment Solutions:* offering structured products and fund management services centered on commodity trading, hedging, and arbitrage strategies.

We receive management fees plus performance-based fee as income from our overseas asset management services. Our fees are affected by our service with reference to prevailing market rates. The following table sets forth the number of funds and scale under management of our overseas asset management during the Track Record Period:

	As of December 31,			As of June 30,
	2022	2023	2024	2025
Number of funds	38	47	52	49
AUM (in HK\$ millions)	1,953	2,303	2,520	3,376

In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, operating income from our overseas asset management services amounted to RMB14.0 million, RMB19.2 million, RMB20.9 million, RMB7.8 million, and RMB9.1 million, respectively, representing 1.5%, 1.5%, 1.5%, 1.2% and 1.5% of our operating income during those periods, respectively.

Securities

We primarily provide overseas securities services in Hong Kong through our subsidiary HGNH International Securities. HGNH International Securities holds licenses under the SFO to carry on Type 1 (dealing in securities) and Type 4 (advising on securities) regulated activities. Our overseas securities services primarily serve as an extension of our futures business, enabling us to deliver comprehensive, multi-asset services to our existing futures clients. By offering an integrated platform that encompasses both futures and securities, we address a broader range of risk management and investment needs for retail and institutional clients, with the goal of enhancing client satisfactory and deepening long-term relationships.

HGNH International Securities became a China Connect (Shanghai-Hong Kong Stock Connect) clearing and trading participant in 2014 and Shenzhen-Hong Kong Stock Connect clearing and participant in 2016, allowing it to serve PRC and international clients on cross-border securities trades.

HGNH International Securities assists clients on trading and dealing a diverse range of securities investment products, including Hong Kong-listed equities, callable bull/bear contracts, derivative warrants, equity-linked instruments, primary offerings, and exchange-traded funds. Additionally, it offers access to equities in the United States, Japan, Australia, and the United Kingdom. In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, we assisted our clients to trade securities in the aggregate amount of HK\$5,966.7 million, HK\$7,023.1 million, HK\$13,920.7 million, HK\$6,348.4 million, and HK\$4,972.9 million, respectively.

BUSINESS

The following table sets forth the number of client accounts and client equity of our overseas security trading services during the Track Record Period:

	As of December 31,			As of June 30,
	2022	2023	2024	2025
Number of cash client accounts	10,350	10,211	10,003	9,884
Number of margin client accounts	9,023	8,902	9,761	8,667
Client equity (<i>in HK\$ millions</i>)	1,970	2,099	1,865	2,483
By client type (<i>in HK\$ millions</i>)				
Retail	888	665	997	1,095
Corporates and financial institutions	1,082	1,433	869	1,388

In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, operating income from our overseas securities services amounted to RMB10.3 million, RMB10.1 million, RMB16.0 million, RMB7.1 million, and RMB8.0 million, respectively, representing 1.1%, 0.8%, 1.2%, 1.1% and 1.3% of our operating income during those periods, respectively. We generate income from commission earned on securities trades based on instructions received from clients. In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, the average commission rate calculated by commission received divided by trading value was 0.1154%, 0.0450%, 0.0535%, 0.0490%, and 0.0582%, respectively. In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, revenue contribution generated from retail clients in our overseas securities services amounted to HK\$5.4 million, HK\$2.3 million, HK\$3.4 million, HK\$1.3 million, and HK\$2.0 million, respectively, and revenue contribution generated from corporates and financial institutions in our overseas securities services amounted to HK\$1.5 million, HK\$0.9 million, HK\$4.1 million, HK\$1.9 million, and HK\$0.9 million, respectively.

Other Services

We also provide other overseas financial services which primarily include leveraged forex trading.

We primarily provide overseas leveraged forex trading in through Nanhua Singapore. Nanhua Singapore provides services covering a wide range of forex products including currency pair CFDs such as EUR/USD, GBP/USD, and USD/JPY.

The operating income from other services amounted to RMB3.0 million, RMB53.2 million, RMB8.1 million, RMB53.5 million and RMB48.1 million, respectively, in 2022, 2023, 2024 and for the six months ended June 30, 2024 and 2025. The significant increase in operating income under other services in 2023 was primarily attributable to Nanhua USA's investments in U.S. Treasury securities or certain designated currency funds. Benefiting from favorable overseas markets conditions, investment income and fair value gains from such investments were notably higher compared to the previous year.

BUSINESS

Clients

Chinese-funded enterprises investing overseas as well as overseas entities seeking for investment in China. As of December 31, 2022, 2023, and 2024 and June 30, 2025, our overseas financial services business had in total 33,392 registered clients, 33,098 registered clients, 32,577 registered clients, and 32,345 registered clients, respectively, of which, 1,306 registered clients, 1,555 registered clients, 1,916 registered clients, and 2,077 registered clients were corporate clients, respectively. Among our registered corporate clients, 74.2%, 75.0%, 77.7%, and 75.6% were Chinese-funded enterprises as of the same dates, respectively, while 25.8%, 25.0%, 22.3%, and 24.4% of the registered corporate clients were from overseas, respectively.

We help overseas clients access China's financial markets by supporting their participation in the futures market. We help them either by guiding them to trade through Qualified Foreign Intermediaries – financial institutions established outside China and recognized by their local futures regulators, which can accept client funds and orders and trade in their own name on specific Chinese futures products – or by assisting them as QFII, allowing them to trade futures contracts. For these clients, we provide comprehensive support, including market access services such as assisting with regulatory reviews and filings, especially for Qualified Foreign Intermediaries. We also offer account opening support and ongoing account risk management, connect client trading systems as needed, and send daily trading reports. Additionally, we deliver value-added services like investor education, training on trading rules, timely notifications of rule changes, research reports, and other customized support based on client needs. The cumulative total number of overseas clients we assisted in reaching the financial markets in China exceeded 240 as of June 30, 2025.

The table below sets forth the revenue break down by geography of our overseas financial services for each period during the Track Record Period:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB in millions)				
	(unaudited)				
Hong Kong	131.4	284.6	320.3	154.7	175.0
Singapore	31.8	92.8	106.7	45.8	52.1
United States	37.8	117.3	135.1	73.6	46.0
United Kingdom	30.2	72.6	92.1	46.9	53.8
Total	231.1	567.3	654.2	321.0	326.9

BUSINESS

OUR AWARDS AND RECOGNITIONS

During the Track Record Period, we have received a number of representative awards, including:

Year	Organizers/Media	Awards
2025	Futures Daily (期貨日報)	Best Futures Service Provider Award (最佳期貨服務實體獎)
2024	Financial Times Press (金融時報社)	2023 Outstanding Case of Financial Support for Rural Revitalization (2023金融支持鄉村振興優秀案例)
2024	Securities Times (證券時報) and Securities China (券商中國)	2024 China Innovation Pioneer Futures Company Jun Ding Award (2024中國創新先鋒期貨公司君鼎獎) 2024 China Outstanding IT Service Futures Company Jun Ding Award (2024中國傑出IT服務期貨公司君鼎獎)
2024	Financial Associated Press (財聯社)	2024 Annual Financial Associated Press Zhiyuan Award Social Responsibility (S) Pioneer Enterprise Award (2024年度財聯社致遠獎社會責任(S)先鋒企業獎)

2022	Futures Daily and Securities Times (期貨日報、證券時報)	15th China Best Futures Institutions Selection (第十五屆中國最佳期貨經營機構評選): China Best Futures Company (中國最佳期貨公司)

RESEARCH

We established the Futures Research Institute, which was the first futures research institute in the industry, in 2001 to assist our clients in identifying and evaluating investment and hedging opportunities. Our research team produces regular research reports, event-driven reports, and specialized research studies, covering non-ferrous metals, precious metals, agriculture, energy, crude oil, and distinctive products such as cotton and PTA. Market analysis provided by the Futures Research Institute is mostly free, of charge except for services related to investment advisory, which are chargeable. In addition to serving our clients, our research team also supports various business operations including sales, investor education, trading, risk management and compliance, branding, and management, by providing comprehensive market analysis, strategic recommendations, risk assessments, and industry insights to enhance client service and inform strategic decision-making. As of June 30, 2025, there are 43 analysts in Futures Research Institute, 38 of whom held postgraduate degrees, and five of whom held undergraduate degrees.

In March 2004, the Futures Research Institute successfully launched China's first commodity index – the Nanhua Commodity Index. The Futures Research Institute also compiled several additional indices, including the Long Commodity Return Index, Short Commodity Return Index, and Comprehensive Return Index. Our research team has received several awards and recognition for its excellence, including:

- From 2022 to 2024, in the 15th, 16th, and 17th selection “China’s Best Futures Operating Institutions and Best Futures Research Teams” by Futures Daily and Securities Times, our Nanhua Futures Research Institute was awarded “China’s Gold Medal Futures Research Institute” for three consecutive years;
- From 2022 to 2023, in the selection of “Gold Medal Futures Research Award” by Wind, we were recognized as the most popular research institution;
- From 2022 to 2023, in the selection of Excellent Analysts (Teams) by the Shanghai Futures Exchange, our Futures Research Institute was awarded “Excellent Research Team”;
- In 2022, during the 20th China Financial Awards hosted by Hexun, we were awarded the “Outstanding Futures Research Team.”

We have pursued research collaborations with universities. Our notable project with Beijing Technology and Business University and Beijing Beishang Industrial Internet Information Consulting Co., Ltd., Research on the Development Strategy of Private Futures Companies in the New Situation (《新形勢下民營期貨公司發展戰略研究》), was completed in August 2024 with positive outcomes.

We have partnered with universities for projects commissioned by external organizations. For example, we collaborated with Zhejiang University on project “The Application of Credit Derivatives in the Urban Investment Bond Market” (《信用衍生品在城投市場中的應用》) and completed it in April 2023. We remain committed to fostering research partnerships with universities, exploring market frontiers, and contributing to the development of the futures market.

BUSINESS

To support innovative research and the development of the futures market, our Futures Research Institute actively participates in the CFA's 17th joint research program. By July 2024, we completed a study titled "The Necessity and Development Model of Commodity Index Futures Listing" (《商品指數類期貨上市必要性及發展模式研究》) which received a good evaluation and we received a completion certificate in June 2025. We also completed research on financial technology applications and the futures market's role in serving the real economy in 2021, receiving a completion certificate from the CFA in 2022.

In addition, we have utilized information technology to present our research results. Our Nanhua Futures App provides detailed market analysis, company information, daily and weekly reports, hot topic analysis, and special research reports to help investors understand market trends.

INFORMATION TECHNOLOGY

We prioritize development of fintech and digital finance innovation. Since 2011, our tech team has innovated in fintech, developing products like the Nanhua High-Speed Trading System ("NHTD"), Nanhua Futures App, Nanhua Tong App, futures-spot trading risk management system, Shenghua Financial Derivatives Integrated Platform, and Ruihua Risk Management Services Business Risk Control System. The NHTD system is now in its fifth generation.

Our IT system is pivotal to our highly effective operation and performance of our business, playing a crucial role in our success and future growth. We have established a robust IT management infrastructure to support our expanding business operations, corporate governance, and risk management needs. As of June 30, 2025, our IT department comprised 98 employees. Our IT department organized into three divisions: the data division, the network engineering division, and the E-commerce division. Our data segment drives technology development and data governance; our E-commerce segment enhances customer experience via website and app design; and our network engineering segment ensures stable online operations, system security, and technical services, and manages critical information systems and network security plans. The network engineering segment works with E-commerce segment and data segment to set IT policies, execute strategy, and handle daily IT governance.

We have received several awards and recognition for our dedication in IT innovation:

- Recognized at the 2024 Artificial Intelligence Large Model Financial Innovation and Application Showcase (2024年度人工智能大模型金融領域示範場景及創新應用案例徵集宣傳展示活動) by Shanghai FinTech Industry Alliance (上海金融科技產業聯盟) in 2024; and
- 17th China's Best Futures Brokerage and Best Futures Research Team Selection – Annual Best Futures Company APP Outstanding Performance Award in 2024 by Futures Daily.

BUSINESS

We have the following principal IT systems and platforms for our business operations, risk control and management:

- **Data centers:** To ensure that our technological advancements also safeguard the stability of our operations, we have implemented a “two-location, three-center” architecture across Shanghai and Hangzhou. This structure includes a primary data center and a same-city active back-up center in Shanghai and a remote disaster recovery center in Hangzhou, providing redundancy and disaster recovery capabilities. With over 150 server cabinets deployed globally at major exchanges (including CFFEX, SHFE, DCE, ZCE, GFEX, SSE, SZE, HKEX, CME, and SGX) and we deliver secure, efficient, and highly reliable transaction support for both onshore and offshore clients.
- **Trading system:** We have adopted the CTP System by Shanghai Futures Information Technology Co., Ltd. as our primary trading system facing consumers and also developed our own NHTD series of trading systems to meet the evolving needs of our professional clients. These systems can be configured according to our specific requirements, accommodating various trading needs. They offer real-time traffic control, risk management, bank-to-futures account transfers, trading and settlement, generation, recording and storage of necessary log information, connection to the margin monitoring center’s investor query service system, and prevention of client terminals from directly accessing core data by bypassing the application. The comprehensive suite of features provided by our system ensures that our clients can trade with confidence, knowing their transactions are secure and efficient.
- **Office Automation System:** We have independently developed the Nanhua OA System, a proprietary enterprise collaboration software meticulously built on an open-source framework. Guided by the principles of “simplicity, practicality, and efficiency,” this system is designed to closely align with our actual enterprise needs. With its universal product design, the system highlights the core objectives of standardized corporate management and enhanced office efficiency. It provides users with a comprehensive and standardized office automation solution.
- **Business Mid-office Platform:** We have also independently developed a business mid-office data integration platform and the HGNH CRM system, designed specifically to address the core needs of financial derivatives businesses. Focusing on our PRC futures brokerage business, PRC wealth management business, PRC risk management services business and overseas financial services business, the platform addresses challenges in business operations, compliance and risk control, and operational management by incorporating advanced technologies and innovative concepts. Through the implementation of standardized measures – such as unified client account management, suitability management, document management, and foundational information management – the platform optimizes and re-engineers business processes, significantly enhancing operational efficiency and improving the client service experience. This initiative has gradually enabled the centralized management of client resources, laying a solid foundation for achieving intelligent operations in the future.

- **Risk Management system:** We have developed a comprehensive risk management system which oversees the entire trading process. Before trading, it enforces pre-trade risk controls. During trading, it monitors price fluctuations and client equity in real time, identifies risks through ratios, tracks order errors, and alerts trading risk management staff to handle issues promptly. After trading, the system auto-generates position statements, margin call notices, forced liquidation reports, and expiration product statements for post-trade risk analysis. It also flags clients with abnormal trading patterns based on predefined indicators and issues alerts. Additionally, the system supports various risk simulations and stress tests to prepare for potential risk scenarios.

Separately, our Ruihua Risk Management Services Business Risk Control System has constructed a multi-dimensional risk management matrix, which includes an algorithm-optimized model algorithm library that covers majority of varieties in the futures and derivatives markets. The risk indicator library monitors the risks of each business and stage in real-time. The business parameter library establishes an early warning system, while the risk data warehouse contains various data sources, providing a panoramic view of risk information. The system features an intelligent computing engine that ensures effective risk monitoring across all business scenarios, including on-exchange, off-exchange, domestic, international, futures and spot markets, while performing rapid and accurate data calculations and risk assessments. The Ruihua system unifies the management of data from various business systems, quickly identifies risks, dynamically tracks and mitigates risks, and connects on-exchange and off-exchange data through APIs.

To manage the risks inherent in our online trading system, we have utilized various IT safety controls, including:

- **Staffing and Procedures:** We ensure adequate technical staff to support our system operations and maintenance. Individual roles are clearly defined with responsibilities for network, system, security, and server room management. All our staff sign confidentiality agreements, and we have established procedures for staff turnover to safeguard information security.
- **Certified Security Products:** We procure certified network security products and deploy high-performance firewalls at internet nodes adopting a least privilege access policy. We monitor our network devices and traffic in real-time to alert via email in case of anomalies, ensuring our network security. We conduct annual professional security scans to identify and patch system vulnerabilities.
- **Network Isolation:** We open only necessary ports, using a secure bastion host (a security gateway that controls access and monitors activity to protect a network) for internal management. This setup records all operations for audits and problem tracing. Critical systems are layered to isolate important data, and office and trading networks are separated with regular logging checks.

BUSINESS

- **Data Backup:** We conduct daily backups of post-settlement data, transmitting it over internal networks to offsite locations for periodic archiving. Our backup medium is preserved for a minimum of 20 years, ensuring capability of data recovery in case of system failures.
- **Comprehensive Contingency Plans:** We have an emergency response team to swiftly address unforeseen events. We conduct at least two full-scale emergency drills annually, covering various scenarios like system failures, network issues, and disaster recovery, enhancing inter-departmental coordination and response speed.
- **Virus Prevention and System Security:** We perform regular weekly virus scans, promptly install operating system patches, and continuously monitor our IT system. We send email alerts for abnormal activities, ensuring the integrity and security of our systems.
- **Video Surveillance:** Our server room is equipped with a 24/7 video monitoring system, with recordings retained for at least six months. Unauthorized access to the server room is strictly prohibited unless it's an emergency, especially during trading hours.

We also employ systems and equipment developed by leading IT providers, placing a strong emphasis on timely maintenance and upgrades. Each year, we allocate significant resources to optimize and enhance our IT systems. In 2022, 2023, and 2024, and for the six months ended June 30, 2024 and 2025, we incurred IT-related expenditures amounting to RMB62.1 million, RMB90.4 million, RMB94.2 million, RMB46.0 million, and RMB37.9 million, respectively, for hardware, software, daily operations and maintenance, data center and line rental, IT service fees and salaries for IT personnel.

We also value data governance and have established a dedicated department for enterprise-level data infrastructure. By integrating various systems and eliminating data silos, we now offer services across all departments.

DATA PRIVACY AND SECURITY

Protecting privacy and data security is one of our responsibilities. We have established a series of strict data security policies to ensure that the collection, use, storage, transmission, and dissemination of data comply with all applicable laws and regulations, optimize data management, and protect the interests of data subjects. For detailed information on relevant laws and regulations, see "Regulatory Overview." These policies include:

- **Data Collection and Use:** Based on the types of products and services selected by our customers, and with their consent or in accordance with applicable legal exemptions, we may collect certain categories of personal data during our business operations. As of the Latest Practicable Date, we may collect certain categories of personal information in the course of our business operations, depending on the products and services selected by our clients and with their consent or as otherwise permitted under applicable laws and regulations. For domestic retail clients, the categories of personal data we collect include, but are not limited to, the following: (i) basic personal information such as name, gender, date of birth,

and nationality; (ii) identification information such as type, number, and validity period of identification documents; and (iii) personal financial information such as sources of income, credit records, credit information, bank deposit information, investment experience, risk preferences, and transaction records. For domestic corporate and institutional clients, the categories of personal data we collect include, but are not limited to, the national identification numbers, WeChat IDs, and mobile phone numbers of the relevant legal representatives, authorized persons, and contact persons. When opening an account and selecting our products and services, customers must confirm that they have read and agreed to relevant terms and conditions, including our Nanhua Futures Privacy Policy, which informs customers how we collect, use, store, and provide access to their personal data, as well as how customers can access, update, control, and protect their personal data and the rights associated with the data.

- **Data Storage and Transmission:** We will encrypt customer personal data to prevent unauthorized access, use, or modification of customer's information and to avoid data corruption or loss. Additionally, we conduct regular data backup and data recovery tests, and organize personal data safety training and disaster recovery simulation drills on a regular basis for our employees. As the processor of the personal data collected from our customers, we do not share or transfer personal data with third parties without the customer's explicit authorization or unless exempted under applicable laws and regulations. We also implement measures to choose and supervise third-party service providers in fulfilling their obligations. Legal actions may be pursued against any business partner who fails to comply with data privacy and protection provisions within executed agreements. In accordance with applicable laws and regulations, and based on the nature of our business operations, personal data of clients is stored on our own servers and on the servers of designated third-party industry cloud service providers all of which are located within the territory of the PRC. Up to the Latest Practicable Date, our operations do not involve any cross-border transmission of data in connection with Chinese enterprises served by our overseas financial services business.
- **Data Protection:** We have established a strict customer personal data protection policy and have implemented a series of internal control measures from organizational, managerial, and technical perspectives to preserve individual personal data and protect customer privacy, which comply with the aforementioned laws and regulations. Specifically, we have developed the Nanhua Futures Customer Information Protection Management Measures, which set out the key principles and policies governing the personal data protection. We have implemented strict perimeter defense strategies, using technologies such as zero trust and sandboxing to enforce access control and data leakage prevention functions, thus preventing unauthorized access by non-relevant departments and personnel. If personal data is compromised, we require immediate remedial action from relevant departments, strict disciplinary actions for involved employees, and prompt reporting to regulatory authorities if necessary. Up to the Latest Practicable Date, we have not experienced any cybersecurity or data security incidents (such as information leakage, data loss, or virus attacks), nor have we been subject to any administrative investigation or dispute arising from cybersecurity or data protection issues.

BUSINESS

- **Overseas Measures:** We ensure data privacy and security by complying with local laws and protecting client information. Our transparent approach includes clear client consent and detailed privacy notices. We use strict access controls and advanced encryption to safeguard data. Regular audits, employee training, and incident response plans are in place to address any breaches swiftly. We also oversee third-party providers with binding agreements and continuous monitoring to maintain high confidentiality and security standards.

Our PRC Legal Advisors are of the view that, during the Track Record Period and as of the Latest Practicable Date, we had complied with the Personal Information Protection Law (《個人信息保護法》), the Cybersecurity Law (《網絡安全法》), and the Data Security Law (《數據安全法》) of the PRC as well as other related laws and regulations in all material aspects.

During the Track Record Period and up to the Latest Practicable Date, to the best knowledge of our Directors, we did not experience any material data or personal confidential information leakage or loss or any other personal information related incidents which could cause a material adverse effect on our business, financial condition, or results of operations, nor have there been any material disputes, administrative investigation, or penalties relating to the protection of personal information overseas, and we had complied with applicable overseas laws and regulations on data privacy and security, such as the Personal Data (Privacy) Ordinance, Personal Data Protection Act (PDPA), Gramm-Leach-Bliley Act (GLBA) and CFTC Regulation Part 160, and the UK General Data Protection Regulation and Data Protection Act 2018, in all material respects during the Track Record Period and up to the Latest Practicable Date. Our external legal advisers on the laws of Hong Kong, Singapore, the UK and the US have advised us that they have not identified matters which will result in the Group being non-compliant with applicable local laws and regulations (which include laws and regulations on data privacy and security) in any material respects during the Track Record Period and up to the Latest Practicable Date.

ENVIRONMENTAL, SOCIAL RESPONSIBILITY AND GOVERNANCE

As a leading futures firm in Zhejiang, China, we are committed to sustainable growth. Our comprehensive ESG framework integrates environmental, social, and governance principles into our strategies. We will set metrics and targets for ESG projects and regularly assess our performance. We will formulate and manage our ESG strategies, objectives, and related risks.

Corporate Governance

We recognize our obligations towards environmental protection and social responsibility, and understand the potential impact of climate-related issues on our operations. We are committed to adhering to environmental, social, and governance reporting requirements upon listing.

BUSINESS

As a leading futures firm, we maintain high standards of corporate governance and ethics. We recognize the importance of transparency, accountability and sound decision-making to build and maintain trust with our stakeholders. We have established governance frameworks, with the meeting of shareholders serving as the power institution, the Board of Directors as the decision-making institution, and the management as the executive institution. The Board of Directors has five specialized committees including Strategy, Risk Management, Audit, Nomination, and Remuneration and Appraisal. The management has three committees and 29 departments including committees of IT Management, Risk Management, and Business Strategy as well as departments of Marketing, Compliance Review, Legal Affairs, Internal Review, Risk Management, Human Resources, Office, Party and Mass Work Office, Branding, Finance Management, Board Office, Nanhua Research Institute, Nanhua Investment Academy, Customer Service Center, Network Engineering, Data, Settlement, Audit and Supervision, Strategic Customer, Business Coordination, Capital, Index Development, Wealth Management Business Headquarters, Asset Management, Industrial Services Headquarters, Internet Business, Internet Operations, E-commerce Department, and Investment. We believe that our corporate governance structure is well structured with independent oversight, effective risk management systems and robust internal controls. By adhering to these principles, we ensure that our operations are conducted with integrity and uphold the interests of our customers, shareholders and the wider investor community.

We ensure compliance by regularly reviewing and updating our management systems to address new regulations, business needs, and emerging issues. We also reinforce compliance awareness and professional ethics through compliance education, including external lectures and training classes. To comply with regulations, we have created and submitted our regular report to the CSRC, which covers policy guidance, management oversight, staffing, daily operations, and outreach in rural revitalization, price stabilization, and supporting small- and medium-sized enterprises. We have also established the Information Disclosure Management System which helps us meet regulatory requirements, such as carbon emission disclosures and potential ESG-related reviews. We embed energy saving and emission reduction into daily operations, adhering to environmental laws. We promote green office practices by leveraging technology, using an online office system, and encouraging electronic conferencing. We have established the Settlement Statement Management Measures and switched from paper to electronic statements for customer billing, enhancing efficiency and reflecting our commitment to low-carbon development.

Environmental Responsibility

We are a financial services company. Unlike industries such as manufacturing or energy, our environmental footprint is minimal. Our primary focus is providing financial services, assisting clients in managing risk, and offering investment advice. Consequently, we believe that our business operation did not have any significant impact on the environment and climate change during the Track Record Period. We are, however, dedicated to environmental awareness and energy efficiency. During the Track Record Period and up to the Latest Practicable Date, we had not been subject to any material fines or other material penalties due to non-compliance with health, work safety, social or environmental regulations.

Impact of ESG-related Risks

Climate-related issues, including extreme weather conditions such as storms and typhoons, may affect our business operations by disrupting essential equipment and facilities. Additionally, these weather conditions may impact the health and safety of our employees and the energy used in the working sites, potentially leading to increased operational, maintenance, and labor costs. Furthermore, evolving social trends and political policies related to ESG, such as transitioning to a lower-carbon economy, may result in more stringent regulations that require us to incur additional compliance costs. For example, we may need to allocate significant time and resources to monitor developments in ESG laws and regulations relevant to our business. This could also involve increased expenses to implement stricter measures for monitoring emissions and resource consumption. Non-compliance with environmental regulations could result in penalties, fines, suspensions, or other legal actions.

Metrics and Targets

The venue for our daily operations is our offices, where the primary resource consumption includes electricity, water and paper. We also generate waste and emit greenhouse gases during our business operations. We monitor the following metrics to assess and manage the environmental and climate-related risks arising from our business operations:

- **Electricity and water usage.** We follow national rules to conserve electricity and water, adhering to laws such as the Energy Conservation Law and the Water Law of China. We manage our energy use – including electricity, gasoline, natural gas, and water – according to the General Principles for Comprehensive Energy Consumption Calculation (GB/T 2589–2020). Electricity is a major source of greenhouse gas emissions in our operations. To improve efficiency, we monitor energy use, cut down on usage outside working hours, and promote awareness about energy conservation among employees. In 2022, 2023, and 2024 and for the six months ended June 30, 2025, the total energy consumption was 2,110,611.39 kWh, 1,986,582.64 kWh, 2,211,539.92 kWh, and 1,021,103.46 kWh, respectively and our energy consumption per employee was 4,074.54 kWh, 3,592.37 kWh, 3,893.56 kWh, and 1,766.61 kWh respectively; among total energy consumption, our electricity consumption was 1,908,186.00 kWh, 1,729,726.00 kWh, 1,930,780.00 kWh, and 874,113 kWh, respectively and electricity consumption per employee was 3,683.76 KWh, 3,127.90 KWh, 3,399.26 KWh, and 1,512.31 KWh respectively. From 2022 to 2024, our total energy consumption showed an increasing trend, mainly due to the expansion of our business scale, which led to a corresponding increase in energy demand for related operational activities. Our energy consumption per capita decreased by 4.44% in 2024 as compared to that of 2022, benefiting mainly from the implementation of energy-saving measures such as the promotion and use of intelligent equipment. Energy consumption and management practices are regularly benchmarked against industry peers to identify areas for improvement and align with best practices. In addition to electricity, water usage is continually evaluated and conservation is promoted throughout operations. In 2022, 2023, and 2024, and for the six months ended June 30, 2025, the total water consumption was 4,726.00 tons, 5,401.00 tons, 5,767.00 tons, and 2,726.00 tons, respectively and water consumption per employee was 9.12

tons, 9.77 tons, 10.15 tons, and 4.72 tons, respectively. Efforts focus on fostering a culture of water conservation through staff engagement and internal campaigns, with continued organization of activities to support this goal. To further reduce resource consumption, we are actively exploring and implementing a series of energy-saving and emission-reduction measures, with a particular focus on optimizing energy use in our canteen, including but not limited to improving equipment efficiency and adopting clean energy alternatives. We will continue to monitor resource consumption and adopt measures to reduce usage, aiming to minimize the environmental impact of our operations and services. To this end, we are developing a systematic environmental management plan to continuously enhance resource efficiency and ensure business operations comply with environmental regulations and relevant requirements. This plan is established with reference to our historical data, industry peer averages, and international standards such as the Greenhouse Gas Protocol and relevant sector guidelines. In setting this goal, we considered both our own operational realities and the achievements of leading companies in the industry.

- **Paperless operation.** We emphasize paper conservation and aim to reduce paper usage through initiatives such as paperless operations. Additionally, we seek to enhance our digital operations by further developing our business and internal management systems. We primarily monitor the number of pieces of paper used in our headquarter office to assess the effectiveness of our paperless operation. In 2022, 2023, and 2024 and for the six months ended June 30, 2025, we used approximately 327.5 thousand, 310.0 thousand, 305.0 thousand, and 242.5 thousand pieces of paper, respectively. These figures were calculated based on the purchase amount of paper at the beginning of each period. Our goal is to reduce paper usage by approximately 1-5% per year over the next three years.
- **Greenhouse gas emissions.** We adopt the concept of sustainable development in our daily operations and closely monitor our greenhouse gas emissions. Our main sources of emissions are electricity consumption and the use of natural gas. In 2022, 2023, and 2024 and for the six months ended June 30, 2025, our total greenhouse gas emissions (scope 1 plus scope 2) were 1,133.77 tons, 1,044.55 tons, 1,164.79 tons, and 531.61 tons of carbon dioxide equivalent, respectively. Our emission intensity per employee was 2.19 tons, 1.89 tons, 2.05 tons, and 0.92 tons of carbon dioxide equivalent, respectively, for the same periods. The increase in emissions from 2022 to 2024 was mainly due to business expansion and higher energy demands. We calculate direct emissions (scope 1) from natural gas and fuel use, and indirect emissions (scope 2) from purchased electricity, using GHG Protocol and PRC standards. We benchmark against peer futures firms listed on the SEHK and optimize our energy structure to increase green electricity and office efficiency. We plan to include key scope 3 categories, such as employee commuting and supplier energy use, to achieve carbon neutrality. In setting goals, we refer to the 1.5°C temperature control target under the Paris Agreement and the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD) for the financial industry. Our goals are to reduce per capita greenhouse gas emissions by 5% in 2027 from the 2024 baseline. This target is established with reference to our historical data, industry peer averages, and international standards such as the Greenhouse Gas Protocol and relevant sector guidelines. In setting this goal, we considered both our own operational realities and the achievements of leading companies in the industry.

BUSINESS

- Waste generated.** Our operations primarily generate air emissions from company vehicle exhaust. Wastewater is generated predominantly from domestic sewage during daily office activities. Non-hazardous waste includes used paper and general office refuse, whereas hazardous waste comprises discarded light tubes and used batteries. The overall volume of air emissions, wastewater, and solid waste produced through our business activities is minimal and does not significantly impact the environment. Consequently, we have not established specific reduction targets for these emissions at this time.

To fulfill our environmental and social responsibilities, we have set the following environmental goals and indicators as well as action plans to be implemented to achieve the expected results:

Category	Key Performance Goals	Environmental Goals	Indicators	Action Plans
GHG Emissions	Emission Targets	Encourage Green Commuting	Reduce annual GHG Emissions	Strictly limit the number of company-owned vehicles and reasonably maintain them to extend their service life
		Reduce Overall Greenhouse Gas Emissions	Increase percentage of green electricity in total use	Gradually increase the proportion of green electricity procurement and enhance power efficiency management
		Increase Use of Renewable Energy Sources	Increase number of new energy vehicles in fleet	
Waste Generation	Waste Reduction Targets	Reduce Paper Usage	Reduce use of paper in the office	Convert to no-paper operation
Energy Usage	Energy Efficiency Targets	Improve Energy Efficiency	Reduce office energy consumption	Set up relevant rules
		Promote Clean Energy Use	Increase energy consumption efficiency	Upgrade to energy-efficient appliances
			Reduce canteen energy consumption	Implement smart management systems
				Regularly maintain and service water and electricity facilities
				Monitor and analyze energy use in real time

BUSINESS

Category	Key Performance Goals	Environmental Goals	Indicators	Action Plans
All Above	Emission	Promote	Provide	Encourage employees to
Environmental	Targets Waste	Environmental	environmental	cultivate an awareness
Goal Categories	Reduction	Awareness	training/publicity	of energy conservation
	Targets Energy		to employees	and environmental
	Efficiency	Foster a Culture of		protection and to use
	Targets	Sustainability	Enhance ESG Data	office resources like
		and Compliance	Governance	paper responsibly

				promote energy saving,
				water conservation,
				and environmental
				protection
				Strengthen ESG data
				governance to ensure
				disclosure transparency
				and decision relevance
				Actively participate in
				ESG-related ratings
				to enhance market
				competitiveness

To meet greenhouse gas emission targets, we implemented energy-saving measures: (1) Green electricity costs 15%-20% more than traditional electricity but leads to overall savings with energy efficiency improvements; (2) The payback period for new energy vehicles is five years, with a 30% reduction in long-term maintenance costs, offering significant economic benefits. We will engage in ESG ratings to boost our market appeal and competitiveness, and improve ESG data governance for transparent and relevant information.

Measures to Achieve the Goals

We have adopted comprehensive environmental policies and practices with a strong emphasis on (i) green office; (ii) green finance; (iii) employee education and training; and (iv) green supply chain.

- *Green office:* We have initiated several green office measures to achieve low-carbon and sustainable development. We have established and utilized our own Office Automation (OA) system and promoted the use of video and telephone conferencing, electronic workflows, and the reduction of paper documents in customer billing service.

BUSINESS

- *Green finance:* We have planned to increase our client base in the new energy sector and enhance our service.
- *Employee education and training:* We have invested in promoting our employee's awareness of environment protection. We urge employees to be mindful of energy conservation and environmental protection and to use office resources, like paper, responsibly. We post signs in common areas and on equipment to promote awareness of saving energy, conserving water, and protecting the environment by reminding employees to turn off lights when leaving and close faucets completely to prevent waste.
- *Green Supply Chain:* We require suppliers to meet high social responsibility standards, ensuring ethical business practices and compliance with sustainable development goals. Products and services must be sourced legally and ethically, without unfair competition. In addition, during the construction and renovation of our headquarters, we used eco-friendly materials and smart lighting. The property management company regularly maintains equipment to conserve electricity.

Social Responsibility

We have launched multiple initiatives focused on supporting underserved communities, promoting financial literacy, and encouraging diversity and inclusivity within our workforce. Our major corporate social responsibility initiatives include:

Rural Revitalization

We have identified and supported projects tailored to the local context in underdeveloped regions, contributing to local economic growth and improved living standards. Since 2016, we have pioneered a specialized support model called "Insurance + Futures," focusing on agriculture, rural areas, and farmers. An "Insurance + Futures" project combines agricultural insurance with commodity futures based on derivatives to help agricultural producers to manage risks against price fluctuations in their produce. In a typical transaction, agricultural producers purchase agricultural insurance from insurance companies to protect against price risk arising natural disasters, pests, or yield losses. Insurance companies hedge against price risk by trading in related OTC derivatives with us. As of the Latest Practicable Date, our projects have covered 27 provinces and around 126 counties and cities across China, including Heilongjiang, Jilin, Yunnan, Hainan, and Xinjiang, serving around 498,800 farming households. During the Track Record Period, we have provided support in total of RMB5.8 million.

We established the Hangzhou Ganlin Student Aid Foundation to support education for disadvantaged students in China's ethnic minority and impoverished regions. During the Track Record Period, we had provided RMB1.5 million to the Hangzhou Ganlin Student Aid Foundation and sponsored 201 students to finish the college entrance exam.

Social Public Welfare

On August 1, 2024, we partnered with a commercial bank based in Zhejiang to establish the “Shanben Trust Zhejin – Nanhua Charity Trust,” with an initial capital of RMB1 million. The primary purpose of this trust is to provide educational assistance in Changshan County, Quzhou, Zhejiang and to support the development of the Hangzhou Ganlin Student Aid Foundation. On January 9, 2025, we donated RMB100,000 through the Shanben Trust Zhejin-Nanhua Charitable Trust to support the earthquake-stricken areas in Tibet for, but not limited to, providing emergency relief supplies to the affected areas, supporting the temporary resettlement and basic livelihood of the people affected by the earthquake, and other post-disaster recovery projects.

In 2023, we mobilized employees to donate to the earthquake-stricken area of Jishishan County, raising RMB163,300. This action demonstrated our commitment to social responsibility.

Rapid Disaster Relief and Support

On January 7, 2025, after the 6.8 magnitude earthquake occurred in Dingri County, Shigatse City, Tibet, we responded promptly by donating over RMB120,000 to support emergency rescue, relocation, medical treatment, livelihood assistance, and post-disaster reconstruction. Furthermore, we encouraged employees to donate funds and warm clothing for the affected place.

During the COVID-19 pandemic, we demonstrated our corporate commitment by donating funds and supplies to affected areas. We contributed approximately RMB1 million to the Shangcheng District Charity Federation in Hangzhou and provided medical gloves to the Second Affiliated Hospital of Zhejiang University. Additionally, we utilized futures and options to assist a medical glove manufacturer in Jiangxi, a non-ferrous metal trader in Shanghai, and a livestock enterprise in Inner Mongolia in managing the risk of rising raw material prices, thereby ensuring stable production and supply.

Employees

We respect gender, age, and ethnicity among individuals and have implemented policies on compensation, dismissal, equal opportunities, diversity, and anti-discrimination. As of June 30, 2025, we employed 1,048 individuals, with approximately 50.3% female and 49.7% male. We adhere to relevant regulations during recruitment processes, prioritizing equal opportunity, diversification, and anti-discrimination in the workplace. All qualified candidates are considered equally, regardless of their gender, age, nationality, or cultural background. Regarding terminations, we comply with applicable regulations and procedures, including the termination of labor contracts when employees violate rules and regulations.

We place strong emphasis on employee growth and development by offering extensive training and internal resources, including mentorship programs and job rotation opportunities. See “– Employee”. We align compensation with job responsibilities, performance, and skills, focusing on performance-based allocation, efficiency, fairness, and sustainable development to foster employee enthusiasm and innovation. We adhere to labor laws in all regions of operation, ensuring our work environments comply with legal standards. Additionally, we prioritize safety and health by providing the necessary facilities to maintain a safe and healthy workplace.

OUR CLIENTS AND SUPPLIERS

We serve a diverse base of clients comprising corporate, institutional, and individual clients across a spectrum of sectors.

In 2022, 2023, and 2024, and for the six months ended June 30, 2025, revenue attributable to our top five clients accounted for less than 5.0% of our total operating income, respectively.

Due to the nature of our business, we have no major suppliers.

To the knowledge of our Directors, none of our Directors and their respective associates or any Shareholders holding more than 5% of our issued share capital had any interests in any of our five largest clients as of the Latest Practicable Date.

MARKET AND COMPETITION

For our PRC futures brokerage business, we compete primarily with financial institution-affiliated futures companies, and non-financial institution-related futures companies; for our PRC risk management services business, we compete primarily with risk management subsidiaries of other PRC futures companies; for our PRC wealth management business, we compete primarily with other mutual fund companies and the asset management departments or asset management subsidiaries of other financial institutions; for our overseas financial services business, we compete primarily with China-funded financial services providers with qualifications in futures and derivatives businesses. We compete with our competitors in terms of brand recognition, marketing and distribution capacity, service quality, financial strength, pricing, talent, information technology and research capabilities.

Our competitors may have certain competitive advantages over us, including greater financial resources, higher brand recognition and more extensive experience.

INTELLECTUAL PROPERTY RIGHTS

As of June 30, 2025, we registered 109 trademarks in China, seven trademarks in Hong Kong, eight trademarks in Taiwan, eight trademarks under the Madrid International Trademark System, 19 software copyrights in China and 22 domain names. See “Appendix VI – Statutory and General Information – B. Further Information about Our Business – 2. Intellectual Property Rights”.

South China initiated a lawsuit in the Hong Kong High Court against certain of our subsidiaries and our Company on December 10, 2014 and January 15, 2015, respectively, seeking to prohibit our subsidiaries from using the name “南华” and “Nanhua” and any variances in the company names in Hong Kong. In December 2015, we reached settlement with South China pursuant to which, we undertook to no longer use the name “南華”, “南华” or “Nanhua” in Hong Kong in the course of establishing, offering

or conducting any business in Hong Kong for the provision of financial services in Hong Kong, paid the compensation of HK\$1 million and South China's litigation costs of HK\$3.5 million to South China, and cancelled the relevant registered trademarks in full and final settlement of the lawsuit. We recorded other litigation costs in a total amount of approximately HK\$4.0 million. See "Risk Factors – The use of our Chinese name in this prospectus and the use of it in the course of trade or business in Hong Kong may be challenged due to potential trademark infringement and passing off."

To minimize any possible risks arising from further claims that may be brought by South China, we have resolved not to make use of the name comprising "南华", "南華" or "Nanhua" in the course of any business carried on by us in Hong Kong but instead carry on business in Hong Kong under the name "橫華國際" through our Hong Kong subsidiaries. Consequently, we have applied for the registration of "橫華國際" as our business name in Hong Kong. We have also provided guidelines to our employees that: (i) they should introduce our Company to our potential clients in the name of "橫華國際" in Hong Kong; and (ii) they should use the name of "橫華國際" for all external communication in Hong Kong. See "Risk Factors – The use of our Chinese name in this prospectus and the use of it in the course of trade or business in Hong Kong may be challenged due to potential trademark infringement and passing off". All businesses serving Hong Kong clients are conducted through our Hong Kong subsidiaries under the "HGNH International" or "橫華國際" brand, which are licensed by the SFC to carry on regulated activities. No services are provided to Hong Kong clients under and none of these entities uses the "南华", "南華" or "Nanhua" name.

Our undertaking pursuant to the abovementioned lawsuit stipulates that operating entities in the Chinese mainland or in jurisdictions outside Hong Kong shall not conduct any business in Hong Kong under the name "南华", "南華" or "Nanhua". Accordingly, our business and brand management in Chinese mainland are as follows: (i) all user registration and log-in processes require a Chinese mainland identity document and a Chinese mainland mobile phone number (with an 86 prefix). Mobile numbers not issued in Chinese mainland cannot be used for registration or log-in; (ii) our products and services under the "南华" or "Nanhua" brand are submitted only to Chinese mainland app stores. Though some app stores cannot be set to Chinese mainland-only regions, the requirement of a Chinese mainland mobile phone number ensures that users outside Chinese mainland cannot register; (iii) servers for our products and services carrying the "南华" or "Nanhua" brand are located in Chinese mainland. We monitor IP addresses and access logs to ensure that only clients registered in Chinese mainland can log in; (iv) user agreements and privacy policies for products under the "南华" or "Nanhua" brand expressly state that the products are offered only to users in Chinese mainland; and (v) we conduct periodic reviews from the perspective of a Hong Kong investor to ensure that the "南华" or "Nanhua" brand does not appear in marketing or promotional materials accessible in Hong Kong.

BUSINESS

Our subsidiaries in the US, the UK, and Singapore have not established any branches or offices in Hong Kong, nor do they actively promote or advertise securities, futures, or other regulated services to the public in Hong Kong. These subsidiaries conduct their respective businesses in accordance with the laws of their jurisdictions of incorporation and use the “南华” or “Nanhua” brand in their corporate names and branding within their jurisdiction. Global clients, including those in Hong Kong, may access these services through remote channels on their own initiative; however, these business activities are not conducted within Hong Kong. Our policy ensures that clients clearly understand which specific entity is providing the services. For example, if Hong Kong residents access information about related services through the official websites of our subsidiaries in the US, the UK and Singapore, in accordance with our internal control policies of our subsidiaries in the US, the UK and Singapore, they can only obtain such services through offline account opening. The client explicitly acknowledges that the relevant products and services are provided by our corresponding subsidiary.

All our business operations in Hong Kong are conducted under the name “橫華國際”, “HGNH INTERNATIONAL”, “橫華”, or “HGNH”.

For the avoidance of doubt, we consider that the mere fact that Hong Kong residents access, on their own initiative and without any active marketing or solicitation in Hong Kong by us, products and services offered in jurisdictions other than Hong Kong does not constitute a breach of the aforementioned undertaking.

We rely on a combination of trademark passing off, copyright, trade secret and fair business practice laws in China and other jurisdictions to protect our intellectual property rights and our brand. We will seek registration for our brands, marks, and software from time to time when our management determines that it is competitively advantageous and cost effective for us to do so. We maintain and renew our intellectual property rights to avoid any lapses. Additionally, our cooperation agreements include clauses for intellectual property protection, outlining infringement liabilities and compensation mechanisms. In cases of intellectual property infringement, we work with legal counsel to seek legal remedies. Despite our precautions, third parties may obtain and use our intellectual property or license without our consent. Instances of impersonation on our intellectual property were resolved after a business report led to the other party’s withdrawal. We are not aware of any other breaches of our intellectual property rights during the Track Record Period and up to the Latest Practicable Date.

We have not experienced any material disputes or claims for infringement of intellectual property rights with third parties during the Track Record Period and up to the Latest Practicable Date.

BUSINESS

EMPLOYEES

As of December 31, 2022, 2023, and 2024 and June 30, 2025, we had 978, 1,023, 1,038, and 1,048 employees, respectively, who had entered into employment contracts with us. As of June 30, 2025, 616 employees had undergraduate degrees, accounting for 58.8% of our total employees; 352 employees had postgraduate degrees, accounting for 33.6% of our total employees. The following table sets forth a breakdown of our employees by departments as of December 31, 2024 and June 30, 2025:

	As of December 31, 2024	As of June 30, 2025
PRC Futures Brokerage	375	363
PRC Risk Management Services	56	64
PRC Wealth Management	59	58
Overseas Financial Services	32	34
Research	53	48
Compliance	34	35
IT	94	98
Finance	51	52
Administration	51	54
Others	233	242
Total	1,038	1,048

The following table sets forth a breakdown of our employees by geographic regions as of December 31, 2024 and June 30, 2025:

	As of December 31, 2024	As of June 30, 2025
China		
Zhejiang Province	688	694
Outside Zhejiang Province	260	255
Overseas		
Hong Kong	33	39
Singapore	22	24
United Kingdom	22	23
United States	13	13
Total	1,038	1,048

BUSINESS

Our long-term growth relies on the knowledge, experience, and development of our employees. We use a hybrid recruitment process, incorporating both online and traditional methods to recruit candidates. We focus on recruiting, training, and retaining skilled and experienced individuals throughout our operations. This is achieved by offering competitive remuneration packages and emphasizing training and career development, including tailored training resources, internal rotation opportunities, and mentorship programs.

As required under PRC laws and regulations, we participate in various employee social security plans that are organized by the applicable local municipal and provincial governments, including housing, pension, medical, maternity, work-related injury, and unemployment benefit plans. We are required under PRC laws to make contributions to employee benefit plans at specified percentages of salaries, bonuses, and certain allowance of our employees, up to a maximum amount specified by the local government.

We have established a labor union dedicated to safeguarding the rights and interests of our employees. We consider our relationship with our employees to be positive and have never experienced disruptions in our operations due to labor disputes. We are confident that our senior management, labor union, and employees will continue to maintain strong and cooperative relationships.

INSURANCE

We provide PRC legally required social security insurance including medical insurance, maternity insurance, workplace injury insurance, unemployment insurance and pension benefits for our PRC-based employees. We contribute to Mandatory Provident Fund, provide labor insurance, and provide health insurance for certain of our Hong Kong-based employees and maintain property insurance for our office facilities in Hong Kong. In accordance with the Securities and Futures (Insurance) Rules of Hong Kong (Chapter 571AI of the laws of Hong Kong), we have purchased and maintained insurance for any loss incurred by us due to any loss to our clients' assets in our custody that are caused by fraudulent conduct of our employees, robbery, theft or other misconduct. We provide our Singapore-based employees with contributions to the Central Provident Fund, a compulsory comprehensive savings and pension plan for working Singaporeans and permanent residents, as well as group medical insurance (i.e., PRUtreasury Flexi II). We provide our U.K.-based employees with pension benefits, group medical insurance, and directors and officers liability insurance and Nanhua UK has in place employer's liability insurance as required by UK law. In addition, We provide our U.S.-based employees with a retirement plan and various welfare benefits, including group health insurance. We believe that our insurance coverage is adequate to cover our key assets, facilities and liabilities. We believe that we have maintained insurance coverage we consider necessary and sufficient for our operations and customary for the industry in which are operate.

Our policies are subject to standard deductibles, exclusions, and limitations. Therefore, insurance might not cover all potential losses, and we cannot guarantee that we will not incur losses or claims beyond the limits or outside the scope of our insurance policies.

PROPERTIES

Our headquarters are located at Hangzhou, Zhejiang, China.

Owned Properties in the PRC

As of the Latest Practicable Date, we had property ownership certificates for two properties located in Hangzhou and Chengdu, respectively, for office purposes, with an aggregate gross floor area of approximately 15,391.7 sq.m.

Leased Properties in the PRC

As of the Latest Practicable Date, in China, we leased and occupied 44 properties with an aggregate leased area of 11,376.0 square meters, which were primarily used for business operations and office purposes. Under applicable PRC laws and regulations, lease agreements are required to be filed with the local land administration authorities. In practice, such filing requires the cooperation of both the lessor and the lessee. Although we have sought the necessary support from the lessors to file our lease agreements, up to the Latest Practicable Date, we had not registered 25 lease agreements for 25 leased properties. This is primarily due to various reasons, including the lessors' failure or unwillingness to provide the requisite documents. In all cases, landlords of our rented premises are in possession of the property certificate. As advised by our PRC Legal Advisor, such non-compliance does not affect the validity of the relevant property lease agreement, but if we fail to rectify any non-compliance within the prescribed time limit after receiving notice from the relevant government authorities, we may be subject to fines. The fine for each unregistered lease agreement ranges from RMB1,000 to RMB10,000, at the discretion of the relevant authority. If we are unable to complete the registration of all 25 lease agreements, the maximum aggregate fine we may face would be approximately RMB0.25 million. Up to the Latest Practicable Date, we had not received any rectification order or notice from the relevant real estate authorities in connection with the registration or filing of our lease agreements, nor had we been subject to any penalties by such authorities for this reason. We believe such non-compliance will not have a material adverse effect on our business.

Leased Properties outside the PRC

We leased one property in each of Chicago and London, with a gross floor area of approximately 3,622 square feet and 3,913 square feet, respectively. We leased one property in Singapore with a gross floor area of approximately 3,262 square feet. We use all of these properties as office space.

We leased three properties in Hong Kong, with one property for office space and the other two as staff dormitory. The property for office space has a total gross floor area of 5,240 square feet and the property for dormitory purpose has a total gross floor area of 56.6 square metres.

RISK MANAGEMENT

Overview

The primary risks in relation to our operations include operation risk, market risk, credit risk, liquidity risk, investment risk and legal and compliance risk. We have established an integrated risk management system with comprehensive risk coverage and continuously invested in its upgrade and optimization. Our comprehensive risk management system enables us to effectively manage primary risks associated with our daily operations and achieve sustainable business growth.

Our success is predicated on our ability to effectively control and manage systemic, institutional, and operational risks. Through a robust and well-defined risk management organizational governance structure, we aim to achieve comprehensive risk management across the entire enterprise so that we can effectively mitigate risks and develop our business in a sustainable way. To achieve these objectives, we have implemented the following principles in our risk management:

- *Comprehensive.* We have established, maintained, and will continuously improve a comprehensive risk management framework that is fully aligned with our overall corporate development goals and encompass all company levels, departments, and personnel.
- *Material.* Our risk management system ensures the effective implementation and execution of our internal control policies. We prioritize main business areas and risk-prone operations and allocate risk management resources to high-risk business to manage key risk points effectively.
- *Compliant.* We ensure that the design and implementation of the risk control system adhere to relevant laws, industry self-regulatory standards, and our internal policies.
- *Independent.* We ensure that the risk management system and risk management personnel operate independently from other business departments. The responsible individuals report directly to senior management or the Board of Directors, thereby preventing any interference from business departments and ensuring the independence and effectiveness of supervision and control.
- *Dynamic.* We recognize the importance of innovation for our continued success and our risk management system will facilitate and support business innovation, provided that such innovation occurs within acceptable and controlled risk parameters, promoting sustainable development and improving our operational efficiency. We ensure that our risk management system align with our strategy, business type, operation scale, and risk tolerance, and is timely adjusted and optimized based on market changes, regulations, and policies to remain adaptive and flexible, avoiding delays.

BUSINESS

- *Preventive.* We ensure that our risk management system should not only control the risks that have occurred but also take measures in advance to prevent the occurrence of potential risks through prediction and analysis.
- *Confidential.* We ensure the confidentiality of the large amount of sensitive information.
- *Advanced.* We proactively incorporate advanced technologies, including artificial intelligence, big data, and cloud computing, to enhance the intelligence and automation of our risk management system. Additionally, we develop a unified data platform to integrate both internal and external data resources, enabling comprehensive risk monitoring and management. We conduct regular assessments and audits to evaluate the operational effectiveness of the system.

We have established a comprehensive risk management system that integrates all aspects of our operations, including corporate governance, transaction management, and daily activities. Our risk management process encompasses risk identification, risk assessment, monitoring and control, and risk reporting:

- *Risk Identification:* We undertake a thorough and systematic review of all business processes, departments, and personnel. Our analysis encompasses risk and their evolving patterns within our operational scope, with particular attention to new risks emerging from environmental changes. By summarizing and organizing both internal and external events, and utilizing methods such as scenario analysis and process analysis, we have developed an event database to facilitate risk identification.
- *Risk Assessment:* We use methods such as checklists, statistical classification, and narrative descriptions for internal self-assessment and evaluation. When necessary, we invite external third parties to participate in the risk assessment.
- *Monitoring and Control:* We employ advanced management systems (including OA office automation systems, transaction risk control systems, and anti-money laundering systems) to establish comprehensive risk controls for business processes. This includes implementing emergency mechanisms and risk reserve systems for major risks. We leverage contemporary information technology to conduct real-time risk monitoring of our operational and management activities. By deploying an OA modern management system, we manage various tasks in daily operations through process-based management and hierarchical authorization, thereby strengthening the legal and compliance review of personnel, fund transfers, contracts, and other matters. The account opening system ensures the compliance of customer account openings and assesses investor suitability. The futures trading management system oversees risk control and review of customer margins, trading risks, and trading outcomes. The futures risk monitoring system provides real-time surveillance of customer risks and abnormal trading behavior, enabling prompt control measures. The anti-money laundering monitoring system is responsible for monitoring suspicious transactions. Additionally, the financial accounting system supervises customer funds, bank accounts, and other related items.

- *Risk Reporting:* Through regular testing, we develop a risk map to continuously enhance the early warning indicator system. We assess the effectiveness of risk management and provide reports on the outcomes. The Compliance Review Department performs both on-site and off-site inspections to evaluate each department's adherence to our company's risk management system. They measure, analyze, assess, and report on business risks. We employ various audit methods, including on-site audits, off-site audits, comprehensive audits, and special audits, to conduct internal evaluations of the performance of all business and functional departments. These efforts culminate in written reports that facilitate post-event control of risks across all business areas.

Our Directors confirm that, during the Track Record Period, there have not been any material erroneous trades or departures from our risk management system.

Risk Management System

We have established a four-level risk management structure, consisting of: (i) the Board and its Specialized Committee; (ii) the executive management; (iii) the functional management departments; and (iv) frontline risk management teams at our business departments and branches.

Board and Specialized Committee

The Board represents the highest level of authority within our risk management framework. The Board is responsible for approving our overall business strategy and major policies, defining our risk appetite and risk tolerance levels, and approving the risk management policies, systems, and procedures for all our business operations. The Board is further charged with overseeing, inspecting, and evaluating the effectiveness of our risk management system, bearing ultimate responsibility for our overall risk management performance. The Board has established two specialized committees:

Risk Management Committee (under the Board)

The Risk Management Committee (under the Board) consists of three Directors and is chaired by Dr. Luo Xufeng, who are chiefly responsible for executing the Board's risk management functions. Their specific duties include: (i) designing our risk management policies and procedures, as well as issuing risk management guidelines; (ii) reviewing our major and high-risk business decision plans; (iii) assessing and monitoring various market risks to ensure that the overall risk level and structure align with our overall policies; (iv) providing recommendations for improving the company's risk control and management; (v) overseeing the effective operation of our risk management; (vi) propose to appoint or change our external auditors, supervise our internal audits and financial conditions; and (vii) undertaking other responsibilities stipulated by laws, administrative regulations, departmental rules, the Articles of Association, or authorized by the Board.

Audit Committee

Our Audit Committee, also comprised of three Directors and chaired by Ms. Li Jing, exercises the supervisory board's powers as stipulated by the Company Law, and is primarily responsible for liaising with our external accounting firm, reviewing our financial information, and overseeing our financial reporting system and internal control procedures. Its specific duties include: (i) supervising and evaluating the work of external auditors and proposing the appointment and replacement of external auditors; (ii) supervising and evaluating the work of internal auditors and coordinating between internal audit and external audit; (iii) reviewing our financial information and disclosure; (iv) supervising and evaluating our internal control; (v) exercising the supervisory board's powers as stipulated by the Company Law; and (vi) handling other related matters authorized by laws and regulations, Articles of Association and the Board.

Executive Management

Our executive management team, led by the General Manager, oversees the practical application of risk management. This responsibility is primarily handled by the Chief Risk Officer and the Risk Control Committee. These groups ensure that the Board's risk management policies are implemented and monitored across all operations.

Chief Risk Officer (CRO)

The Chief Risk Officer, a key member of our senior management team, is responsible for overseeing the legal compliance and risk management of our company's operations. The responsibilities of the CRO include ensuring that internal systems and business rules comply with legal standards; conducting risk assessments and compliance reviews for major decisions and providing recommendations; offering compliance consultancy to all levels of management; auditing the effectiveness of compliance and risk management practices; investigating potential violations and risks; reporting to the Board, shareholders, and regulators; serving as the regulatory liaison; and promoting risk awareness via training, oversight, and other proactive measures.

Risk Management Committee (executive)

Comprising senior executives and relevant department heads, our Risk Management Committee (executive) manages operational risks, ensuring we handle business threats effectively. Their responsibilities include: (i) reviewing our risk management system, appetite, tolerance, and limits; (ii) establishing a comprehensive risk management framework; (iii) assessing risks in major decisions; (iv) regularly evaluating overall and specific risks; (v) overseeing the risk management system, including subsidiaries; (vi) approving subsidiary risk indicators; and (vii) ensuring adequate internal audit resources. Additionally, they supervise and evaluate audits, propose changes to external auditors, review financial information and disclosures, assess our internal control system, and handle other matters as authorized by laws, regulations, our Articles of Association, and the board of directors.

Functional Management Departments

Our operational risk management is executed by functional management departments, each with specific responsibilities to ensure comprehensive risk mitigation across our business:

Risk Management Headquarter

The Risk Management Headquarter is responsible for (i) overseeing our trading risks, as well as (ii) managing risk control for our business operations, and (iii) risk management processes. Their duties include formulating risk management policies, identifying and quantifying risks, conducting business reviews, monitoring and mitigating risks, compiling risk reports, constructing information systems, and undertaking research and evaluation.

The Finance Management Department

The Finance Management Department is responsible for managing our liquidity risk and proprietary capital. Their key functions include assessing, monitoring, and controlling liquidity risk and risk-adjusted returns, overseeing the financial and capital status of each department, and managing financial and capital risks at all organizational levels.

The Legal Affairs Department

The Legal Affairs Department is responsible for managing our legal risks. This includes evaluating the legality of contracts and agreements with external entities, ensuring the comprehensiveness of terms, and maintaining the balance of agreed rights and obligations.

The Compliance Review Department

The Compliance Review Department is tasked with managing compliance risk. This includes establishing foundational compliance management systems, offering compliance advice and consultation, implementing anti-money laundering measures and other risk prevention controls, organizing audits and inspections, and assessing and ensuring the legality and compliance of various departments.

Internal Review Department

The Internal Review Department is tasked with evaluating the whitelist access application materials submitted by different business lines. It organizes due diligence and credit assessments based on the business risk profile and approves whitelist qualifications in accordance with our regulations.

Investment Department

The Investment Department is responsible for managing our proprietary capital investments. This includes assessing, monitoring, and controlling the investment risks and ensuring risk-adjusted returns on proprietary capital.

BUSINESS

Audit and Supervision Department

The Audit and Supervision Department is tasked with routinely inspecting and assessing the efficacy of our risk management processes, as well as recommending necessary improvements.

Business Departments and Branches

Each business department and branch office are essential for executing risk management and preventing potential risks. Their duties include following internal control requirements, managing client suitability, handling complaints, and monitoring and reporting risks under guidance.

Monitoring and Management of Major Risks

We focus on monitoring and managing operation risk, market risk, credit risk, liquidity risk, investment risk and legal and compliance risk.

Operation Risk

Operation risk refers to the risk of loss caused by improper operation of our employees, problematic procedures and information system or external incidents. The operation risks faced by us mainly include employee violations, security incidents, security failures, business interruptions, information system failures, and transaction execution, delivery, and business process management defects.

We have developed a transparent system of daily operating procedures. This encompasses the creation of business processes and authority divisions, the implementation of dual review for key positions to minimize human error, and the establishment of a robust performance appraisal mechanism. We also address risks arising from errors in trading and risk control systems by formulating contingency plans, ensuring data backup, conducting system testing, and enhancing the development of emergency backup channels.

Market Risk

Market risk refers to the potential adverse changes in the market prices of underlying assets, which can affect the prices or values of derivatives. In futures brokerage, this risk can lead to fluctuations in trading volume, declining commission rates, customer loss, reduced margins, and overall negative impacts on our revenue and financial health. In risk management services, market risk manifests when we need to hedge their positions in the securities and futures markets due to price changes, which can adversely affect our performance. In wealth management, the returns on managed financial products are significantly influenced by market volatility, which can hinder investment strategies. Additionally, in overseas financial services, we face similar market risks and must also contend with the risks associated with international market fluctuations, especially in futures clearing operations.

To combat market risks in futures brokerage, we conduct comprehensive market risk assessments and adjust margin levels accordingly to mitigate position risks at various risk levels. For risk management service, we calculate hedge thresholds and dynamically adjust position sizes to avoid adverse market fluctuations, employing stop-loss points and real-time asset price monitoring to control risks. In wealth management, we analyze liquidity conditions and asset size changes to ensure a match between fund usage and sources, while continuously monitoring the liquidity of investment portfolios. For overseas financial services, we enhance product investigation procedures to analyze price volatility and market liquidity, implementing effective market risk control measures for proposed trading products. Additionally, we employ measures such as adjusting trading funds and limiting trading scales to further manage market risks.

Credit Risk

Credit risk affects our various operations. In PRC futures brokerage business, credit risks arise from insufficient client margin, unmet margin calls, and market illiquidity. PRC risk management services business involves potential counterparty default in OTC derivatives and basis trading. In PRC wealth management business, we face creditworthiness issues from poor investment selection or asset management practices. We also encounter credit risk in our overseas financial services given difficulties in assessing clients and counterparties affecting performance.

In order to control credit risk, we have stringent control in place during the account opening process. We will assess each of our new clients' identity, creditworthiness, and adequacy of funds that our new client will be using to fund the futures trading. We also conduct the necessary training and examinations to ensure our clients are well aware of the risks involved in futures trading, as well as providing them with training on transaction skills so as to reduce the likelihood of a massive loss. We manage risk by monitoring price trends in the futures and derivatives market, overseeing changes in positions and margin levels, making prompt margin calls, and liquidating positions if clients do not respond.

Liquidity Risk

Liquidity risk relates to the possibility of not obtaining funds at a reasonable cost in time to repay debts, fulfill obligations, or meet capital needs. In addition, we face liquidity risks when we cannot effectively carry our hedging due to the lack of liquidity in the hedging target or the excessive concentration of positions. Our goal is to manage this risk within tolerable limits by establishing an effective liquidity risk management system. This helps balance fund efficiency and safety, ensuring our ongoing and healthy operations.

To minimize liquidity risk, we accurately identify, measure, monitor, and control our company's liquidity levels. The Finance Management Department oversees liquidity risk, financial status, and risk controls. The Risk Management Department monitors market liquidity indicators such as trading volume and open interest. For active products, we track price fluctuations and trading depth, while for less active products, we alert investors to risks and set cautious position limits. We also manage client margin by setting margin ratios based on factors such as the client's trading volume, position holdings, and risk level. When there are market fluctuations, we promptly notify clients to add margin to prevent margin calls that could trigger liquidity risks.

Investment Risk

Investment risk pertains to the potential loss or reduction in income that may arise from pursuing business growth through investment activities.

Our Investment Department manages proprietary fund investment by conducting pre-investment due diligence, investment feasibility assessments, and organizing the Business Decision Committee to approve investment decisions. It handles account opening, trading procedures, review of proposed cooperative projects, coordination of financial payments, and monitors post-investment activities like project tracking, data collection, performance evaluation, and report preparation. It is responsible for timely redemption of underperforming products and manages settlement and project assessment to prevent investment risks.

Legal and Compliance Risk

Legal and compliance risk encompasses potential legal sanctions, prosecutions, litigation claims, penalties, financial loss, as well as damage to our reputation resulting from non-compliance with legal rules and regulations, supervisory authorities' requirements, self-discipline codes of conduct, or any guidelines related to our futures brokerage business. The major compliance risk areas lie in (i) our employees, (ii) our Introducing Brokers and (iii) newly installed compliance requirements in relation to our overseas financial services business.

The compliance risks associated with employee activities include managing client finances, opening accounts, and conducting trades without client consent or authority. To mitigate these risks, we have enhanced our internal control measures and implemented an accountability system to identify such instances.

Our compliance risk related to Introducing Brokers stems from: (i) Introducing Brokers misrepresenting themselves as our employees, and (ii) Introducing Brokers infringing on clients' interests by accepting unauthorized requests and engaging in futures trading without consent for higher commissions. To mitigate these risks, we (i) assess the creditworthiness of Introducing Brokers before agreements, and (ii) manage and supervise their performance continuously.

Furthermore, we have overseas subsidiaries in Hong Kong, the United States, Singapore, the United Kingdom, and other locations. In the course of operations, our overseas subsidiaries must comply with the laws and regulations of the jurisdiction they operate in, and they are subject to regulatory oversight by the relevant regulatory bodies in these jurisdictions. Given difference of the regulatory oversight of overseas regulatory bodies from that of China, we may have a different understanding of overseas regulatory laws and regulations than the local regulatory bodies intend. To mitigate compliance risks internationally, we have implemented detailed policies and procedures to oversee the capital operations of each subsidiary. This includes regular reporting on the business activities and capital utilization of each subsidiary to prevent potential business risks.

INTERNAL CONTROL MEASURES

Our internal controls are formulated and implemented in compliance with the relevant regulations of the CSRC and other regulatory authorities. The elements of our internal control are set out below:

- **Controlling the Environment**
 - o *Implementation of Integrity and Ethical Values:* We cultivate this atmosphere through internal norms enforced by a strict accountability system and leadership actions.
 - o *Emphasis on Competence:* We provide post-training education to meet work needs and ensure employees can effectively perform their duties.
 - o *Well-Established Corporate Governance Structure:* We have established a corporate governance structure that suits our needs, following modern enterprise management system requirements.
 - o *Management's Philosophy and Management Style:* We manage our business operations and strategies, focusing on environmental, business, accounting, information system, transmission, and internal audit controls. We promptly address internal control deficiencies and follow a philosophy of solidity, meticulousness, pragmatism, efficiency, self-discipline, honesty, trustworthiness, and sound operation.
 - o *Organizational Structure:* We clearly define responsibilities among our internal organizations to plan, coordinate, and control business activities. We ensure positions are separated to balance responsibilities and authorities, creating a mutual check mechanism.
- **Risk Assessment:** We use an effective risk assessment mechanism to handle operational, environmental, and financial risks. We also assess the risks of new businesses or products before their launch.
- **Information Systems and Communication:** We use several information systems and a customer service call center. We have also established communication channels for discussing employee responsibilities and accountability. Our major incident reporting system ensures timely updates to department managers and regulatory agencies about operational management and risks.

BUSINESS

- **Controlling procedures:** To effectively achieve our objectives, we have implemented control procedures, including authorization control, division of responsibility, business segregation, and independent audit.
 - o *Authorization Control:* The scope, authority, procedure, and responsibilities of the authorization are clearly defined. Management at all levels must operate within their authorized limits, and staff must conduct business accordingly.
 - o *Division of Responsibilities:* We strategically assign responsibilities, scientifically delineate roles and authorities, adhere to the principle of separation of incompatible positions, and establish mutual inspection and supervision mechanisms to create an effective system of checks and balances.
 - o *Business Segregation:* We have implemented a business segregation system to maintain the relative independence of our futures brokerage, asset management, investment consulting, risk management, and overseas businesses.
 - o *Independent Audit:* We have set up a Compliance Review Department and Audit and Supervision Department to conduct audits of various departments and work processes such as account opening, trading, and settlement.
- **Monitoring:** We conduct regular evaluations of our internal control system. Additionally, we enhance internal controls through check-and-balance mechanisms between departments. Our management attaches great importance to the reports and recommendations of various functional departments of internal control. We take various measures to rectify deviations arising from the operation of control in a timely manner.

Our Main Internal Control System

We have implemented the below internal control system:

Corporate Governance System

We maintain a robust corporate governance structure to ensure checks and balances. We comply with standardized operations and have developed comprehensive governance systems. Our directors and senior management meet the qualifications outlined in the Administrative Measures for the Office Qualifications of Directors, Supervisors and Senior Managers of Futures Companies. They adhere to laws, regulations, and our articles of association, fulfilling their duties responsibly. We have established appropriate functional departments with clearly defined management roles and a scientific division of responsibilities to manage assets effectively.

BUSINESS

Settlement Management System

We have developed a settlement management system to protect investors' and our rights. We use methods like the margin system and same-day debt-free settlement to monitor our futures brokerage activities and manage settlement risks.

Financial Accounting System

We have established our financial accounting system and clearly defined the procedures for the management of cash flow, including the receipt and disbursement of monetary funds, the handling of accounting vouchers, accounting books, and accounting reports. We have hired a sufficient number of accounting staff and provided adequate resources to establish and improve our computerized accounting operation system, enabling them to complete assigned tasks according to established procedures.

Margin Management System

To standardize our margin management and effectively safeguard our clients' margin security while preventing risks, we have developed a margin management system which includes management of deposits and withdrawals, settlement management of margins, financial accounting of margins, management of designated settlement banks' dedicated margin accounts and management of exchange settlement reserves. Client margins are closely managed and settled daily. They are kept in futures margin accounts and dedicated settlement accounts at the futures exchange, supervised by the exchange, banks, and the China Futures Market Monitoring Center. These margins are separate from our own funds.

Risk Control System

We have established systems for the management of job duties, operational management, and risk control to ensure that risks in our daily operations are effectively controlled.

Branch Management Practices

Following the Regulations on Administration of Futures Transactions (期貨交易管理辦法) and Measures for Supervision of Futures Companies (期貨公司監督管理辦法), we have created management measures for our branches. These define the roles and authorities of branches, business scope, assessment methods, and management for personnel, financial oversight, and transaction settlements. We also implemented a regular and temporary reporting system to headquarters and standardized contract and seal management to enhance control. The branches follow the principles of unified settlement, unified risk control, unified funds transfer, and unified financial management and accounting requirements. This approach ensures consistent practices in account opening, trading, risk control, funds transfer, and other related activities.

BUSINESS

Internal Audit

We established a Compliance Review Department and Audit and Supervision Department to audit compliance operations and internal controls in our business. Periodically, we review these processes to enhance our internal management. We implemented risk management and control measures to address specific business risks.

We have also established corresponding measures to manage the risks associated with our businesses:

PRC Futures Brokerage Business

We adopt the following internal control measures to manage the risks associated with our PRC futures brokerage business:

Account and Client Management

We have established and improved the account management system for PRC futures brokerage business, conducting strict reviews of client qualifications to prevent any violations during the account opening process. During the account opening phase, we strictly adhere to the real-name account opening system and the suitability assessment framework. We adhere to the principle of “matching suitable products with suitable investors” by rigorously assessing investors’ product understanding and risk tolerance according to the suitability requirements of relevant exchanges. During the account opening process, we have implemented strict rules to verify the client’s identity, creditworthiness, and financial conditions and ensure that the client has a sufficient degree of understanding regarding the risks involved. We prioritize investor education and provide full disclosure of associated risks. A thorough evaluation of investors’ financial capacity, expertise in futures trading, cognitive abilities, trading experience, risk appetite, and risk tolerance is conducted to ensure they meet the necessary qualifications. Account opening procedures are carried out exclusively for eligible investors. We strictly comply with unified account opening requirements, including verifying investor identities and retaining image data for proper documentation. Before completing the account opening process, we will disclose risks to new clients and inform them of prohibited industry practices, ensuring that investor protection measures are fully implemented.

We have also developed and enhanced the client development and service system, strengthening investor education to protect clients’ legitimate rights and interest.

Trading Management

We have established and improved the trading management system and trading risk control system to ensure the standardized, smooth, and safe operation of all business units. For example, when a client’s account equity drops below the exchange’s required margin level, and the client does not deposit the necessary additional margin or close out positions on their own by the specified deadline, control measures such as forced liquidation will be implemented.

Specification of Duties

We have defined the responsibilities of various positions, such as the customer service center, Risk Management First Department, and settlement department, to standardize the behavior of relevant staff.

Management of Introducing Brokers

We have established a management system for Introducing Brokers, including guidelines for their rights and obligations, mobility management, file handling, breach procedures, and notification systems. Our headquarter sets management guidelines, handles introducing broker qualifications, organizes documents, and reviews information. Introducing Broker agreements detail both parties' rights and obligations and prohibited clauses. We maintain an integrity record for introducing brokers, documenting complaints and violations. In cases of major legal breaches and noncompliance, we report to local associations or regulatory authorities and terminate the introducing broker's agreement immediately.

Client Follow-up

In order to prevent misleading or fraudulent representations by our employees and business partners to our clients, and also to ensure that our employees are carrying out instructions within the permitted scope of job duty, we have established a coordinated system to follow-up with our clients.

PRC Risk Management Services

We adopt the following internal control measures to manage the risks associated with our PRC risk management services:

Evaluation and Approval of Trading Strategies

The board of Nanhua Capital is tasked with formulating the overall business strategy, while the management team is responsible for its promotion and implementation. Nanhua Capital has established various divisions, including OTC derivatives and market-making departments, as well as various basis trading departments by main products, each responsible for the development of specific risk management service. The heads of each department formulate business plans, which are strictly executed after obtaining internal approval, thereby facilitating the development of related businesses.

Controlling Transaction Risks

We have established a multi-level, dynamic risk management framework to ensure effective control of potential transaction risk exposure while managing clients' credit risks.

BUSINESS

The hedging strategy for OTC derivatives involves several components. OTC transactions use underlying assets for risk hedging, while allowing for exceptions based on liquidity constraints or other considerations, following approved emergency plans. The positions held for hedging must not exceed the maximum necessary exposure and we conduct intraday risk-neutral hedging. Additionally, specialized risk indicators may be employed for unique derivative contracts, and in cases of operational or system risks, the OTC derivatives department must follow internal control systems to address and mitigate these risks, ensuring timely communication with the risk management team.

In spot transactions, we have established a comprehensive review and assessment mechanism for the underlying assets which include (i) thoroughly evaluating market liquidity and the effectiveness of hedging tools and strategies before engaging in new asset types; (ii) setting limits on asset scale, hedging ratios, and exposure amounts; (iii) defining valuation methods for each asset and hedging transaction; and (iv) conducting regular assessments of market risks associated with spot assets and the effectiveness of hedging strategies. We hedge for the procurement and sale of any product, maintaining a hedging ratio of 80% to 120% of the net exposure. When market prices deviate from their fair value, we adjust the hedging ratio in accordance with our understanding and recognition of market risks.

Evaluating Client Creditworthiness

In compliance with regulatory requirements, we have implemented a customer assessment system and conduct thorough due diligence on clients, engaging only those who meet the established criteria. Additionally, based on the clients' involvement in OTC derivatives trading, OTC derivatives clients are required to provide a performance bond to mitigate the risk of default.

PRC Wealth Management Business

We have established internal control measures to for our mutual funds business, asset management business and agency sale of funds business.

Mutual funds internal control measures

Our Board of Directors has formed a Risk Management Committee to review our compliance, audit, and risk management activities, supervise the implementation of compliance and risk control systems, propose to appoint or change our external auditors, oversee our internal audits and financial conditions, and evaluate material related-party transactions.

At the management level, we have established a Risk Prevention Committee, which holds the primary responsibility for developing risk control policies within our business operations and coordinating the creation of internal risk control systems. The Risk Prevention Committee oversees our risk control measures in areas such as investment, market, credit, and operations, and conducts regular or ad-hoc evaluations of the risk status in our business management practices.

BUSINESS

We have established an Investment Decision Committee, serving as the highest authority for investment decisions. A Chief Inspector has been appointed to report directly to the Board of Directors, primarily responsible for reviewing the legality, effectiveness, and reasonableness of our internal controls. In accordance with relevant regulations from regulatory authorities, the Chief Inspector communicates and reports to the Board or regulatory agencies. Additionally, we have established an Audit and Supervision Department, tasked with identifying, assessing, and controlling risks associated with the investments of our funds and other entrusted assets, as well as assuming other risk management responsibilities. It conducts secondary risk control based on the primary risk control measures implemented by various business units.

Investment decision procedures

We have enhanced our investment authorization system by clearly defining the responsibilities and authority of each investment decision-making entity. Investment portfolio managers are empowered to make independent decisions within their designated scope of authority. Additionally, we have implemented a comprehensive management and confidentiality system for investment information. This ensures that significant non-public investment information, such as holdings and transactions, is segregated among different portfolio managers through a combination of role assignments, institutional constraints, and technical measures. As a result, each portfolio has equal access to research information, investment advice, and the execution of investment decisions.

Trade execution management

A centralized trading system is implemented to ensure trade execution control. The trading department leverages various functions within the trading system, such as fair trading, to guarantee equitable treatment of all investment portfolios. For over-the-counter transactions, including primary market subscriptions, relevant distribution mechanisms have been established and refined based on the principle of fair trading.

Asset management internal control measures

We have adopted the following internal control measures to manage the risks associated with our asset management business:

Investment Decision-Making Procedures

During the product development phase, we submit our project proposal after we design the project development plan based on needs. Based on regulatory policies and our internal risk management requirements, we must design a comprehensive risk control plan to configure the risk monitoring module within the system and pre-define for each product and across various trading stages distinct risk control parameters. The Asset Management Department is responsible for product design and development, drafting a product launch approval form, and submitting it to the Business Decision Committee. The Business Decision Committee gathers input from departments such as risk control, compliance, and

legal affairs, and conducts project initiation, review, and evaluation of the product launch approval form. Once approved by the Product Review Committee, the Asset Management Department drafts the official contract and manages external sales and fundraising. Following the establishment of the product, we file it with the Asset Management Association of China.

Trading

We designate separate personnel for issuing investment orders and executing trades. Investment managers issue trading orders in compliance with the authorization, instructions, and investment scope outlined in asset management agreements. Traders are required to strictly adhere to these orders when executing trades, while risk control personnel are responsible for monitoring risks.

Real-time Risk Monitoring

Our real-time risk monitoring framework ensures seamless operation of our risk management systems by integrating automated alerts and manual oversight. The Asset Management Department oversees the system's functionality, ensuring it can calculate risk values in real time based on pre-set warning thresholds and promptly trigger alerts when necessary. The system is also designed to automatically notify risk controllers of potential risks. During trading hours, risk controllers closely monitor intraday trading activities, maintaining constant vigilance for emerging risks. When required, they can perform manual assessments or utilize additional tools to evaluate the system's performance, ensuring comprehensive and timely risk management.

Segregation of Business

We implement an information barrier system in between the PRC asset management business and other businesses, and between different asset management schemes, preventing conflicts of interest.

Risk Disclosure

We conduct both regular and ad-hoc assessments of pressures tests and business risks on our asset management products, which include evaluating new business ventures, major events, special matters, or ongoing operations. In the event of a significant risk occurrence, we promptly report to the relevant offices of the CSRC and the industry association.

Agency Sales of fund internal control measures

We record, analyze, and monitor fund sales activities and implement trading frequency and limit controls in the system for effective trading management. We rigorously supervise abnormal transactions and continuously monitor fund product sales. Additionally, we ensure that the IT department establishes disaster recovery and emergency response systems.

BUSINESS

A clear reporting mechanism is established for risk data statistics and analysis, with monthly reports submitted to the risk control department. Our risk control and compliance departments conduct both regular and ad-hoc inspections of the fund sales business, which include evaluations of internal control systems and the execution of business processes.

Overseas Financial Services Business

HGNH International has policies and procedures for capital operations and managing its subsidiaries. Regular reporting on business activities and fund usage helps monitor and mitigate risks, promoting smooth development. Internal audits ensure compliance with legal and regulatory requirements.

HGNH International and its licensed subsidiaries have set up risk control systems tailored to their business needs and regulatory requirements. They have a financial reporting system and mechanisms to monitor operational risks. Each subsidiary must have policies for credit, market, liquidity, and operational risks, along with business continuity plans to ensure uninterrupted operations.

HGNH International has a thorough reporting policy and procedure. They monitor and train staff to ensure compliance with regulations:

- HGNH International and its licensed subsidiaries handle credit risk through effective credit assessment systems. They evaluate clients' financial status, investment purposes, trading history, and risk tolerance to set appropriate credit limits. For counterparties, they monitor financial status, news reports, and stock prices to allocate capital effectively and reduce credit risk.
- HGNH International and its licensed subsidiaries have enhanced product investigation procedures, analyzed the price volatility and market liquidity of intended trading products, and implemented market risk control measures. They also manage market risk by adjusting trading capital and limiting trading scale.
- HGNH International and its licensed subsidiaries monitor cash flow daily and conduct liquidity tests to ensure adequate liquidity and prevent risk.
- HGNH International and its licensed subsidiaries have streamlined their structure, clarified departmental responsibilities, and ensured supervision between offices. They have also implemented staff training and a code of conduct to meet regulatory requirements and prevent fraud and errors.

HGNH International AM and Nanhua SG have established investment management policies and procedures that match their business scale, including but not limited to client suitability management, due diligence review of investment targets, investment decision-making, and investment risk control, in order to manage the risks related to asset management.

Treasury Management

We have developed the settlement management system to effectively protect the legitimate rights and interests of both our investors and our company. We implement systems such as a margin system and a daily mark-to-market settlement system, and we dynamically monitor our futures brokerage activities to control our company's settlement risks.

In China, our Finance Management Department implements a centralized supervision and management system for client margin funds. It is responsible for selecting the settlement banks where client margin funds are deposited and promptly reports to the local branches of CSRC and the China Futures Market Monitoring Center as well as notifies clients through our websites. The Finance Management Department strengthens the supervision and management of all margin-specific accounts, regularly conducting random checks and reconciliations of account balances, and performing monthly bank reconciliations for margin accounts. Client margin funds are subject to closed-loop management and a daily debt-free settlement system. They are deposited, as stipulated, in segregated futures margin accounts and specialized settlement accounts of the futures exchange. These funds are supervised by the exchange, banks, and the China Futures Market Monitoring Center, and are kept independent and separately managed from our proprietary funds.

We have also put in place the investment and treasury policies and internal control measures to control the investment risks with respect to our financial investments. The Investment Department reviews the investment projects and coordinates with the Business Decision Committee to review and approve the projects. We have also set investment amount limits based on the risk levels of different products.

When subscribing to various asset management products, we conduct due diligence on the prospective products and prudently perform investment analysis. All proposed cooperative products must be evaluated and accompanied by a due diligence report and an investment feasibility report before being submitted to the Business Decision Committee for investment approval and implementation.

In our overseas business, we have also established policies governing the monitoring of the fund status and client margins. We monitor the fund status on a regular basis and significant fund movements require senior management approval. In Singapore and Hong Kong, our investment projects are reviewed and approved by the board of directors or the meeting of shareholders.

Inventory Control

Our capital risk control team is responsible for: (i) standardizing operating procedures for warehousing, logistics, inventory counting, and other processes; (ii) strengthening the supervision and verification of elements such as quantity and quality in the circulation of cargo rights; (iii) standardizing the management of warehousing documents, cargo rights certificates, and ledger accounts; and (iv) conducting regular and irregular inventory checks to confirm consistency in inventory elements, ensuring that stored goods are properly maintained, and protecting cargo rights. The team has established a timely monitoring system for inventory flow and will report to the Risk Control Department any instances where inventory transfer or fund payment has not been completed within the specified period.

Information Barriers

To control or isolate the flow of inside information and sensitive information internally, and to prevent insider trading and avoid conflicts of interest, we have created the Business Firewall System. This system outlines specific measures to keep information separate between our various business departments – such as our futures brokerage, asset management, and risk management services divisions. These measures cover things like personnel, information systems, funds, accounts, and even our office spaces.

Segregation of Duties

We have separate functional departments, each working independently to maintain orderly operations.

We strictly adhere to legal and regulatory requirements, including the Futures and Derivatives Law, the Regulations on the Administration of Futures Trading, and the Measures for the Supervision and Administration of Futures Companies. To prevent conflicts of interest and operational risks, we implement the principle of segregation of duties through departmental setups, position assignments, authority controls, and business process designs.

Our internal systems, such as the Measures for the Administration of Branches, the Measures for the Administration of Futures Investment Consulting Business, and the Measures for the Administration of Asset Management Business Practitioners, along with the job responsibilities of each department, explicitly prohibit personnel from holding concurrent incompatible positions. For instance, trading, clearing, and financial operations are managed by separate departments and personnel; marketing staff are not permitted to handle account openings or customer follow-up; compliance and risk management staff cannot hold positions that conflict with their compliance and risk management responsibilities; individuals involved in futures investment consulting must operate independently from trading, settlement, risk control, finance, technology, and other business areas; and roles such as investment managers, trade execution, and risk control must remain separate.

Using our OA system, business management, and other platforms, we assign permissions based on job responsibilities following the principle of minimum authorization. In cases of personnel position changes, the technical department adjusts the corresponding system permissions to ensure alignment with employees' new job responsibilities.

Conflict of Interest

Conflict of interest may arise between (i) our various operating units; (ii) our clients and us; (iii) our employees and us; or (iv) our clients and our employees. To prevent conflicts of interest, we have implemented the Business Segregation Wall System and various business management measures. These include the Asset Management Business Management Measures, Futures Investment Consulting Business Management Measures, and Securities Investment Fund Sales Business Management Measures. These measures are designed to effectively prevent potential risks, conflicts of interest, and protect the legitimate rights and interests of customers. They involve the segregation of business operations, office space and equipment, personnel and positions, funds and accounts, and information systems and their permissions.

BUSINESS

Anti-Money Laundering

In order to comply with the rules and regulations set by the government of China, Hong Kong, Singapore, the UK and the US, and in order to prevent money laundering and terrorist financing, we have the appropriate policies and procedures in place.

We have designated officers to report money-laundering risks and anti-money laundering activities. We verify client identity information, maintain records of client identity information and transactions. If we suspect money laundering, we may restrict, suspend, or terminate our business relationship with clients.

We have introduced extensive anti-money laundering training for our employees. Staff members are required to verify the identities of clients who wish to open new accounts thoroughly. They must also carefully review, archive identification documents, and keep transaction records.

During the Track Record Period and up to the Latest Practicable Date, we have not received any administrative penalties from regulatory authorities as a result of violation of laws and regulations related to anti-money laundering in the jurisdictions we operate in.

LEGAL AND REGULATORY

Licensing Requirements

We conduct our business in China, Hong Kong, Singapore, the United States and the United Kingdom and are subject to local restrictions and regulatory requirements in jurisdictions we operate. During the Track Record Period and up to the Latest Practicable Date, we had duly obtained and maintained all material licenses, permits and certificates required by laws and regulations for our operations, and such licenses, permits and certificates have remained in full effect. To the best knowledge of our Directors after due enquiry, our Directors confirm that, during the Track Record Period and up to the Latest Practicable Date, all of our employees have, where required, obtained the relevant qualifications for their business activities.

China

As of the Latest Practicable Date, we held the Securities and Futures Business License issued by the CSRC to engage in securities and futures business in China (including commodity futures brokerage, financial futures brokerage, futures investment consulting, and fund sales). In addition, we have the qualifications and licenses required to conduct our asset management, mutual fund services and risk management services businesses in China.

BUSINESS

As of the Latest Practicable Date, we have membership of the following exchanges in China:

Exchanges	Date of Membership

	Nanhua USA Investment	Clearing Member of Nodal Clear	November 13, 2025
		NFA member, Commodity Trading Advisor and Commodity Pool Operator	June 8, 2016

BUSINESS

Our Directors confirm that during the Track Record Period and up to the Latest Practicable Date, we complied with the relevant regulatory requirements and guidelines in all material respects and obtained the necessary permits and licenses for our operations according to the laws and regulations of those jurisdictions where we operate.

Legal Proceedings

We are a party to a number of legal proceedings arising in the ordinary course of our business. As of the Latest Practicable Date, we were the defendants in one pending lawsuit where there was a claimed principal amount exceeding RMB10.0 million, and the claimed principal amount in such legal proceeding was approximately RMB103.4 million. We are actively defending ourselves in this case. None of our Directors or senior management was involved in this litigation. We set out below summary of the case:

On January 10, 2025, plaintiffs X and Y filed a lawsuit with the Hangzhou Intermediate People's Court. They claimed that they had participated the OTC derivatives transactions with Nanhua Capital through the private wealth management products of a third-party asset management firm, which ultimately resulted in investment losses. Plaintiff Y participated in the transactions using plaintiff X's name and plaintiff X only signed agreements related to the transactions with the third-party asset management firm. Both plaintiffs X and Y are indirect clients. Plaintiffs X and Y argued that they lacked investment capability and suitability, and requested the court to rule that Nanhua Capital, being one of the five defendants, should jointly bear their economic loss of RMB95.1 million, the cost of fund taken up, as well as litigation costs and legal fees. The case is still in the process of trial. Previously, on April 24, 2024, one of the plaintiffs had filed a lawsuit on the same matter with the Hangzhou Shangcheng District People's Court. After all defendants, including us, raised an objection to the court's jurisdiction, the plaintiff applied to withdraw the lawsuit. The court approved the withdrawal on November 28, 2024. As advised by our litigation counsel for this lawsuit, we are likely to prevail, as the plaintiffs' claims lack evidentiary support, and that there is no direct contractual relationship between the plaintiffs and Nanhua Capital given that neither plaintiff X nor plaintiff Y signed any agreements with Nanhua Capital related to the transactions involved in this lawsuit. Given the high likelihood of a favorable outcome, we have not made any provision in respect of this matter.

Apart from the lawsuit described above, up to the Latest Practicable Date, we had been defendants in three pending legal proceedings, each with a claimed principal amount not exceeding RMB2.0 million. The aggregate claimed amount for these cases was RMB0.62 million. During the Track Record Period and up to the Latest Practicable Date, none of the legal proceedings to which we were a party, individually or in the aggregate, would have a material adverse effect on our business, financial condition or results of operations.

Data Security Compliance

As a leading financial services provider, we operate in a complex and constantly evolving regulatory environment regarding data privacy and security. Our operations span multiple jurisdictions, and we are subject to a wide range of data protection laws.

BUSINESS

During the Track Record Period and up to the Latest Practicable Date, we have not experienced any material incidents of non-compliance with any applicable data privacy laws across our global operations, nor have we received any penalties from data protection regulatory bodies regarding material violations of any applicable data privacy laws. This reflects our proactive approach to data protection and our commitment to maintaining the highest standards of data security. We understand that maintaining this record requires continuous effort and vigilance.

Compliance and Regulatory Inspection

We operate in China, Hong Kong, Singapore, the UK and the US and are, therefore, subject to various regulatory requirements and guidelines promulgated by regulatory authorities and exchanges in these jurisdictions, such as the CSRC, SFC, MAS, FCA, CFTC, as well as HKCC and CME Group.

During the Track Record Period and up to the Latest Practicable Date, we have been involved in certain regulatory actions and received notices or warnings from, or been fined by, the relevant authorities. While such actions did not have a material adverse impact on our business and results of operations, they revealed certain deficiencies in our business operations and risk management practices. These incidents include:

Regulatory actions	Our primary remedial measures
On November 21, 2025, following observations of shortcomings in management oversight and adherence with internal procedures, the Zhejiang Bureau of CSRC issued a corrective order to Nanhua Fund and imposed regulatory measures on the relevant responsible individuals.	As of the Latest Practicable Date, we are preparing for self-examination and rectification measures and for the rectification report to be submitted to the Zhejiang Bureau of the CSRC.
On November 19, 2025, the Guangdong Bureau of the CSRC issued a regulatory decision to our Guangdong branch company, finding that we had internal control deficiencies in business document retention, business and personnel management, and investor suitability management.	As of the Latest Practicable Date, we are preparing for self-examination and rectification measures and for the rectification report to be submitted to the Guangdong Bureau of the CSRC.
On September 24, 2025, the Liaoning Bureau of the CSRC issued a warning letter to our Shenyang branch office, to the person in charge of the branch office and the market manager, finding that our business departments had internal control deficiencies in WeChat group management and marketing behavior management.	We have conducted self-examination and took rectification measures. We submitted the rectification report to the Liaoning Bureau of the CSRC on October 23, 2025. The Liaoning Bureau of the CSRC has not raised any further questions or taken any additional measures regarding this matter.

BUSINESS

Regulatory actions

On May 9, 2024, the Chongqing Bureau of the CSRC issued a regulatory decision to our Chongqing branch office, finding that our business departments did not strictly implement our “Brokerage Business Risk Control Management System” during futures accounts opening, and the compliance risk management was not sufficient, with internal control deficiencies.

On October 31, 2023, the Zhejiang branch of the CSRC issued a regulatory measure to make correction to us and issued a warning letter to the executive in charge of our asset management business, finding that our asset management business had not been accounted for in accordance with accounting standards, and there were deficiencies in the relevant internal controls.

On January 19, 2024, Nanhua USA was order to pay CME U.S.\$50,000.00 pursuant to an offer of settlement for holding customer invested funds in excess of CFTC Regulation 1.25 concentration limits on multiple occasions in violation of CME Rule 971.A.

On September 26, 2022, and July 20, 2023, HGNH International Futures, while sending closing instructions to the HKFE, resulted in significant margin calls on September 27, 2022, and July 20, 2023, and experienced delays of meeting the margin call amount due to capital allocation issues. As a result of these delays, HKCC notified HGNH International Futures in writing to implement restrictions on September 30, 2022 and on July 25, 2023, respectively. On January 16, 2024, given the repeated violation, HKCC issued a fine of HKD10,000 to HGNH International Futures and issued a warning regarding this matter.

Our primary remedial measures

We have conducted self-examination and took rectification measures. We submitted the rectification report to the Chongqing Bureau of the CSRC on July 3, 2024. On July 24, 2024, the Chongqing Bureau of the CSRC conducted an on-site inspection at our Chongqing branch office and verbally informed us that we had passed the inspection. Since then, the Chongqing Bureau of the CSRC has not raised any further questions or taken any additional measures regarding this matter.

We conducted self-examination, took rectification measures from the aspects of internal rules, procedures, systems, and personnel, and the rectification has been implemented and accepted by the Zhejiang branch of the CSRC.

We have fully paid the U.S.\$50,000.00. We have set up new procedures to monitor 1.25 concentration limit and have implemented enhanced internal procedures among the risk management team and accounting team. CME did not make a further request for submission of enhanced internal procedures or take any further action in respect of this incident.

We have taken measures to comprehensively review our fund allocation procedures, fund management policies, and the issuance and review of close-out order instructions for locked positions, and have provided training to the relevant employees to enhance the management of these matters.

BUSINESS

Our Directors confirm that, as advised by our external counsels, the above regulatory actions will not have any material adverse impact on our business, financial condition or results of operations.

In order to prevent the recurrence of regulatory actions, we will adopt or have adopted the following measures:

- We have established and improved our internal control and risk management framework by updating the internal control and corporate governance system in accordance with the development of relevant laws and regulations;
- We have enhanced employee training programs to focus on compliance awareness, professional ethics, and regulatory updates. Individuals directly responsible for violations are held accountable, and we have also intensified efforts in compliance inspections; and
- Regarding the disciplinary actions we have received from the relevant departments of the CSRC, we have submitted a rectification report and passed the on-site acceptance. In the future, we will reinforce compliance awareness, comprehensively strengthen management, implement compliance requirements, and achieve steady and sustainable development.

None of our current Directors nor any current member of our senior management of our Company was directly involved in the foregoing regulatory actions. We confirm that, during the Track Record Period and up to the Latest Practicable Date, save as disclosed above, while we were involved in certain other regulatory actions or inspections, none of such incidents, individually or in the aggregate, had a material adverse impact on our business and results of operations, and we have complied with the relevant regulatory requirements in all material aspects, and there were no other material incidents of regulatory non-compliance that led to regulatory measures or material fines imposed by any regulatory authorities in China or other regulatory authorities in the jurisdictions where we operate. As advised by our internal control consultant, Tianjian Management Consulting (Hangzhou) Co., Ltd., all internal control deficiencies of us have been fully rectified, and thus we believe that, save as disclosed and separately discussed hereinabove, we had been in compliance with relevant regulatory requirements and guidelines relating to our business operations, risk management, tax compliance and internal controls in all material respects during the Track Record Period and up to the Latest Practicable Date.

HISTORICAL IMPACT OF THE COVID-19 PANDEMIC

Since the end of December 2019, the outbreak of a novel strain of coronavirus, or COVID-19, has affected the global economy. In response to the COVID-19 pandemic, including the recurrence of the Omicron variant of COVID-19 since the end of 2021 across the world, governments had implemented numerous measures to contain the spread of the virus, including mandatory quarantine, closure of workplaces and facilities, travel bans and restrictions and stay-at-home orders.

BUSINESS

During the Track Record Period, our operations in Shanghai were affected by lockdown measures imposed to counter the resurgence of COVID-19. From March 28, 2022 to May 31, 2022, our three branches in Shanghai were subject to closure, and all face-to-face client activities were suspended. During this period, our operations in Shanghai transitioned to a remote work model to ensure business continuity. All client meetings, presentations, and marketing events were conducted online, leveraging digital collaboration tools to maintain effective communication and project management across teams. Regular departmental meetings and staff training sessions were also moved to virtual platforms. This experience has enhanced our remote collaboration capabilities and digital service delivery, positioning us to respond more effectively to similar disruptions in the future.

Despite the impact mentioned above, neither our operations nor our financial performance were materially and adversely affected by the COVID-19 pandemic during the Track Record Period. Our operating profit grew from RMB296.0 million in 2022 to RMB518.6 million in 2024, reflecting a CAGR of 32.4%. For the six months ended June 30, 2024 and June 30, 2025, our operating profit were RMB270.3 million to RMB258.6 million, respectively. Our profit for the year also increased from RMB245.9 million in 2022 to RMB458.0 million in 2024, representing a CAGR of 36.5%. For the six months ended June 30, 2024 and June 30, 2025, our profit for the period were RMB230.5 million and RMB231.3 million, respectively.

CONNECTED TRANSACTIONS

OVERVIEW

Upon Listing, the directors (including persons who were directors in the last 12 months), supervisors, and general managers of the Company and its subsidiaries (apart from insignificant subsidiaries) and their respective associates will become our connected persons (as defined under Chapter 14A of the Listing Rules). In addition, as of the Latest Practicable Date, Hengdian Holdings directly and indirectly controlled approximately 76.97% of our total issued share capital and will directly and indirectly control approximately 65.43% of our total issued share capital immediately after completion of the Global Offering (assuming the Over-allotment Option is not exercised). Therefore, Hengdian Holdings is, and will continue to be, our Controlling Shareholder upon Listing, and hence, Hengdian Holdings and its associates (excluding our Group, the “**Hengdian Holdings Group**”) are connected persons of our Company.

Upon Listing, the following transactions between members of our Group and our connected persons will constitute continuing connected transactions of our Company under Chapter 14A of the Listing Rules.

FULLY-EXEMPT CONTINUING CONNECTED TRANSACTIONS

Provision of Brokerage and other Financial Services by our Group to certain directors (including persons who were directors in the last 12 months), supervisors, and general managers of the Company and its subsidiaries and their respective associates

We provide brokerage and other financial services (including but not limited to futures and securities brokerage and wealth management services) to some of the directors (including persons who were directors in the last 12 months), supervisors, and general managers of the Company and its subsidiaries (apart from insignificant subsidiaries) and their respective associates (who are our connected persons) in our ordinary and usual course of business. The terms and conditions of the brokerage and other financial services (including but not limited to the commission and fee charged by us) which we offered to such connected persons are on normal commercial terms comparable to those offered to Independent Third Parties. It is expected that we will continue to provide such services to such connected persons after Listing, which will constitute continuing connected transactions of our Company under Chapter 14A of the Listing Rules.

As all of the applicable percentage ratios (other than the profits ratio) under the Listing Rules in respect of these transactions are expected to be less than 0.1% on annual basis, the brokerage and other financial services to some of the directors (including persons who were directors in the last 12 months), supervisors, and general managers of the Company and its subsidiaries (apart from insignificant subsidiaries) and their respective associates will be exempt from the reporting, annual review, announcement, circular and independent shareholders’ approval requirements under Chapter 14A of the Listing Rules.

CONNECTED TRANSACTIONS

Procurement of Goods and Services from Hengdian Holdings Group

On December 10, 2025, we entered into a framework agreement (the “**Procurement Framework Agreement**”) with Hengdian Holdings, for itself and on behalf of the Hengdian Holdings Group, pursuant to which our Group will procure different types of goods and services from Hengdian Holdings Group, including but not limited to accommodation services, conference and hospitality services, gift certificates, tickets, workwear, daily necessities, electronic products and other office supplies for our daily management, marketing and employee welfare purposes from time to time. The pricing of such goods and services shall be determined by our Group and Hengdian Holdings Group on normal commercial terms through arm’s length negotiation, subject to applicable laws and regulations and with reference to factors including the costs, quantities, quality and reliability of relevant goods and services, the prevailing market price and other terms such as payment terms. The terms are to be no less favourable to our Group than those for transactions between our Group and Independent Third Parties under the same conditions. The Procurement Framework Agreement is for a fixed term of three years effective on the Listing Date, subject to renewal.

As all of the applicable percentage ratios (other than the profits ratio) under the Listing Rules in respect of the Procurement Framework Agreement are expected to be less than 0.1% on annual basis, the Procurement Framework Agreement will be exempt from the reporting, annual review, announcement, circular and independent shareholders’ approval requirements under Chapter 14A of the Listing Rules.

Sales of Goods and Services to Hengdian Holdings Group

On December 10, 2025, we entered into a framework agreement (the “**Sales Framework Agreement**”) with Hengdian Holdings, for itself and on behalf of Hengdian Holdings Group, pursuant to which our Group will provide Hengdian Holdings Group with goods and services, including agricultural products and services from time to time. The pricing of such goods and services shall be determined by our Group and Hengdian Holdings Group on normal commercial terms, through arm’s length negotiation, subject to applicable laws and regulations and with reference to factors including the costs, quantities, quality and reliability of relevant goods and services, the prevailing market price and other terms such as payment terms. The terms are to be no less favourable to our Group than those for transactions between our Group and Independent Third Parties under the same conditions. The Sales Framework Agreement is for a fixed term of three years effective on the Listing Date, subject to renewal.

As all of the applicable percentage ratios (other than the profits ratio) under the Listing Rules in respect of the Sales Framework Agreement are expected to be less than 0.1% on annual basis, the Sales Framework Agreement will be exempt from the reporting, annual review, announcement, circular and independent shareholders’ approval requirements under Chapter 14A of the Listing Rules.

CONNECTED TRANSACTIONS

Provision of Financial Services by our Group to Hengdian Holdings Group

On December 10, 2025, we entered into a financial services framework agreement (the “**Financial Services Framework Agreement**”) with Hengdian Holdings, for itself and on behalf of Hengdian Holdings Group, pursuant to which our Group will provide the following financial services to Hengdian Holdings Group in our ordinary and usual course of business from time to time. The Financial Services Framework Agreement is for a fixed term of three years effective on the Listing Date, subject to renewal.

- A. **Brokerage Services:** we will provide brokerage services to Hengdian Holdings Group (covering futures, securities and other financial products) in our ordinary and usual course of business on a continuing basis.
- B. **Wealth Management Services:** we will provide wealth management services to Hengdian Holdings Group in our ordinary and usual course of business on a continuing basis, including but not limited to asset management, mutual fund services and agency sale of funds services.
- C. **Risk Management Services:** we will provide risk management services to Hengdian Holdings Group in our ordinary and usual course of business on a continuing basis, including but not limited to OTC derivatives products.

With respect to the brokerage services, the commission fee to be charged under the Financial Services Framework Agreement shall be determined through arm’s length negotiation with reference to the prevailing market commission rates of futures or securities of similar type and trading volume, such as commission fee charged by the China Financial Futures Exchange or charged by our Group to clients who are Independent Third Parties. With respect to asset management, management fees and, in some cases, performance fees are determined through arm’s length negotiation with reference to factors including the prevailing market rates, the size of assets, the complexity of the particular services provided and fee rates charged by our Group to the Independent Third Parties. With respect to mutual funds business, the management fees are determined through arm’s length negotiation with reference to factors including the type, value and performance of the mutual funds, the prevailing market rates and the complexity of the particular services provided by our Group. With respect to agency sale of funds services, the commissions are determined through arm’s length negotiation with reference to factors including prevailing market prices, industry practice and the total amount of financial products under the agency sale arrangements with reference to the commissions charged by our Group for similar agency sale services provided to Independent Third Parties. With respect to the risk management services, we generate income from the premiums paid by clients and also from effective risk management strategies. The pricing for OTC derivatives transactions shall be mainly determined according to OTC derivatives pricing models taking into account the risk hedging and transaction costs, and with reference to the fees charged by our Group to the Independent Third Parties.

As all of the applicable percentage ratios (other than the profits ratio) under the Listing Rules in respect of the Financial Services Framework Agreement are expected to be less than 0.1% on annual basis, the Financial Services Framework Agreement will be exempt from the reporting, annual review, announcement, circular and independent shareholders’ approval requirements under Chapter 14A of the Listing Rules.

DIRECTORS AND SENIOR MANAGEMENT

BOARD OF DIRECTORS

The table below sets out certain information in relation to our Directors:

<u>Name</u>	<u>Age</u>	<u>Position(s)</u>	<u>Timing of joining our Company</u>	<u>Date of appointment as a Director</u>	<u>Principal responsibilities</u>

Executive Director

Dr. Luo Xufeng (羅旭峰), aged 57, is an executive Director and the chairman of the Board of our Company.

Dr. Luo has over 30 years of experience in futures business and is one of the first generation of industry leaders advocating for futures business in the PRC. Having proactively participated in various roles in the industry throughout his tenure, Dr. Luo has accumulated the wealth of experience and skills for the overall operational management and strategic planning to promote the growth of our Company. Dr. Luo joined our Company in May 1996 and since then has been working in various positions, including deputy general manager and general manager of our Company. Dr. Luo was appointed as the chairman of the Board in November 2019. Dr. Luo has also served as a director in certain major subsidiaries of our Company namely, Nanhua Fund, Nanhua Capital, HGNH International, HGNH International Futures, HGNH International AM, HGNH International Securities, Nanhua USA, Nanhua UK, Nanhua Singapore, and Nanhua SG.

Dr. Luo obtained his bachelor's degree in industrial management and engineering from Zhejiang University in December 1992 and his executive master of business administration (EMBA) degree from Shanghai Jiao Tong University in the PRC in March 2014. Dr. Luo obtained his degree of Doctor of Philosophy from University of Technology, Sydney in March 2012. Dr. Luo was recognized as a senior economist by Zhejiang Province Human Resources and Social Security Department Senior Economist Job Qualification Assessment Committee (浙江省人力資源和社會保障廳正高級經濟師職務任職資格評審委員會) in December 2024. Dr. Luo was qualified for engaging in futures business by China Futures Association in 2003. Dr. Luo obtained his qualification for futures investment consultancy by China Futures Association in August 2012.

DIRECTORS AND SENIOR MANAGEMENT

Dr. Luo was awarded Top Ten Leaders of Financial Investment in Zhejiang of 2015 and of 2017 (2015年度和2017年度的浙江金融投資十大領軍人物) in 2016 and 2018 by Organizing Committee of Zhejiang Financial Investment Forum, the Best Helmsman of China Futures Company of the Year (中國期貨公司年度最佳掌舵人) by Futures Daily in 2018, 2019, 2020, 2021, 2023 and 2024, respectively.

Non-executive Directors

Mr. Lyu Yuelong (呂躍龍), aged 59, is a non-executive Director of our Company.

Mr. Lyu joined our Company in July 2025 and since then has been serving as a non-executive Director of our Company. Mr. Lyu served as the Secretary of the Municipal Committee of Jiangshan of Zhejiang (浙江省江山市委書記) from October 2014 to August 2017, and as the vice mayor of Zhejiang Quzhou Municipal Government (浙江省衢州市政府) from April 2017 to December 2019. Mr. Lyu served as the secretary of the Party Committee and the vice president of Hengdian Holdings since December 2019. Mr. Lyu has served as a director of Hengdian Holdings since March 2023.

Mr. Lyu currently sits on the boards of a number of companies under Hengdian Holdings and its subsidiaries, which are involved in film and television services, new energy, cultural and tourism projects and property management businesses. These roles are all non-executive or supervisory in nature and do not require his day-to-day operational involvement.

Mr. Lyu has been serving as a director of Zhejiang Hengdian Film Crew Service Co., Ltd. (浙江橫店影視劇組服務有限公司) since December 2020, a director of Zhejiang Hengdian Aviation Industry Development Co., Ltd. (浙江橫店航空產業發展有限公司) since May 2020, a director of Zhejiang Hengdian Education Technology Co., Ltd. (浙江橫店教育科技有限公司) since June 2020, a director of Zhejiang Hengdian Jiuwei Art and Culture Co., Ltd. (浙江橫店九維藝術文化有限公司) since July 2020, a director of Zhejiang Hengdian New Energy Technology Co., Ltd. (浙江橫店新能源技術有限公司) since December 2020, a director of Dongyang Yuyuan Marketing Planning Co., Ltd. (東陽市御苑營銷策劃有限公司) since July 2021, a director of Dongyang Dongheng Landscape and Classical Architecture Co., Ltd., Zhejiang Province (浙江省東陽市東橫園林古典建築有限公司) since September 2021, a director of Dongyang Hengneng Power Sales Co., Ltd. (東陽市橫能售電有限公司) since November 2021, a director of Zhejiang Hengdian Film and Television Property Rights Trading Center Co., Ltd. (浙江橫店影視產權交易中心有限公司) since March 2022, a director of Shanghai Conjoint Building Technology Co., Ltd. (浙江開裝建築科技有限公司) since June 2022, a director of Zhejiang Xinna Composite Material Co., Ltd. (浙江新納複合材料有限公司) since July 2022, a director of Hengdian Group DMEGC Magnetics Co., Ltd. (橫店集團東磁有限公司) since September 2022, a director of Beijing Hengdian Investment Co., Ltd. (北京橫店投資有限公司) since September 2022, a director of Zhejiang Yuanjing Investment Management Co., Ltd. (浙江元景投資管理有限公司) since December 2022, a director of Zhejiang Hengdian Airport Co., Ltd. (浙江橫店機場有限公司) since September 2022, a director of Donghua General Aviation Co., Ltd. (東華通用航空有限公司) since October 2022, a director of Hengdian Group Real Estate Development Co., Ltd. (橫店集團房地產開發有限公司) since November 2022, a director of Hengdian Film and Entertainment Co., Ltd. (橫店影視娛樂有限公司) since December 2022, a director of Hengdian Group Jiayuan Chemical Co., Ltd. (橫店集團家園化工有限公司) since March 2023, a director of Hengdian Group Innuovo Electric Co., Ltd. (橫店集團英洛華電氣有限公司) since May 2023, a director of Zhejiang Shijin Basalt Fiber Co., Ltd. (浙江石金玄武岩

DIRECTORS AND SENIOR MANAGEMENT

纖維股份有限公司) since December 2023, a director of Dongyang Hengdian Non-financing Guarantee Co., Ltd. (東陽市橫店非融資性擔保有限公司) since January 2024, a director of Dongyang Hengdian Enterprise Management Service Co., Ltd. (東陽市橫店企業管理服務有限公司) since February 2024, a director of Dongyang Hengdian Wansheng Business Administration Co., Ltd. (東陽橫店萬盛商業管理有限公司) since February 2024, a director of Dongyang Hengdian Jiuli Hotel Management Co., Ltd. (東陽橫店九里酒店管理有限公司) since February 2024, a director of Dongyang Hengdian Yuanwei Property Management Co., Ltd. (東陽橫店元維物業管理有限公司) since April 2024, a director of Dongyang Hengdian Hechuang Technology Development Co., Ltd. (東陽市橫店合創科技發展有限公司) since June 2024, a director of Zhejiang Hengdian Film and Television Industry Experimental Zone Film and Television Services Co., Ltd. (浙江橫店影視產業實驗區影視服務有限公司) since February 2025, a director of Hangzhou Jiulisong Resort Hotel Co., Ltd. (杭州九里松度假酒店有限責任公司) since April 2025, a director of Hengdian DMEGC Magnetics (a company listed on the Shenzhen Stock Exchange (SZEX: 002056)) since September 2025, a director of Hengdian Tospo (a company listed on the Shanghai Stock Exchange (SSE: 603303)) since September 2025, a director of Hengdian Entertainment (a company listed on the Shanghai Stock Exchange (SSE: 603103)) since September 2025, and a director of Zhejiang Xinna since September 2025. During the Track Record Period, Mr. Lyu has an overall attendance rate of 100% at board meetings of the above-mentioned entities where he served as a director.

Pursuant to his director service contract with our Company, Mr. Lyu is required to perform his duties diligently and conscientiously, possess the necessary knowledge, skills and experience to discharge his duties, and ensure that he has sufficient time and energy to discharge his responsibilities. Mr. Lyu shall also attend Board meetings in person and express clear opinions on matters; if he cannot attend, he must designate another Director in writing and provide his voting instructions.

Since his appointment and up to the Latest Practicable Date, the Company has held five meetings of the Board and its committees and Mr. Lyu has attended all meetings of the Board and its committees. Our Board meets periodically or on an ad-hoc basis, with agendas and materials circulated in advance to facilitate attendance in person or via tele conference. These arrangements enable Mr. Lyu to participate effectively without conflicting with his other duties. At the level of our Controlling Shareholders, Hengdian Holdings has established a dedicated department which is responsible for coordinating matters and facilitating directors' involvement in board meetings and major decisions. With this mechanism support, and as at the Latest Practicable Date, Mr. Lyu has attended all meetings of the board and related committees of the listed entities of our Controlling Shareholders and Mr. Lyu is able to effectively discharge his duties under his other directorships.

Based on the foregoing, we consider that Mr. Lyu's multiple directorships do not impair his ability to discharge his duties as a director of our Company. Mr. Lyu's other appointments are confined to Hengdian Holdings and its subsidiaries, which are under the management of the Controlling Shareholders, with clear delineation of responsibilities and established procedures for related party transactions and abstention from voting.

Based on the independent due diligence conducted by the Sole Sponsor, nothing has come to the Sole Sponsor's attention that would cause it to disagree with the Directors' assessment regarding Mr. Lyu's ability to devote sufficient time and attention to his role as a non-executive Director.

DIRECTORS AND SENIOR MANAGEMENT

Mr. Lyu obtained his associate's degree in Chinese from Zhejiang Normal University (浙江師範大學) in the PRC in July 1987.

Dr. Xu Wencai (徐文財), aged 59, is a non-executive Director of our Company.

Dr. Xu has over 20 years of experience in futures business. Dr. Xu joined our Company in July 2005 and since then has been working in various positions, including Director, legal representative and chairman of the Board of our Company. Dr. Xu has successively served as the assistant president, the vice president, senior vice president and a director of Hengdian Holdings since August 2001. DIRECTORS AND SENIOR MANAGEMENT

BOARD COMMITTEES

Our Board has established the audit committee, the remuneration and appraisal committee, the nomination committee, strategy committee and the risk management committee.

Audit Committee

We have established the audit committee with written terms of reference in compliance with Rule 3.21 of the Listing Rules and the Corporate Governance Code set out in Appendix C1 to the Listing Rules.

The primary duties of the audit committee are to review and supervise our financial reporting process and internal control system of our Company, risk management and internal audit, provide advice and comments to our Board and perform other duties and responsibilities as may be assigned by our Board. The audit committee consists of three members, namely Ms. Li Jing, Dr. Xu Wencai and Dr. Liu Yulong. The chairperson of the audit committee is Ms. Li Jing, who is our independent non-executive Director with appropriate professional qualifications.

Remuneration and Appraisal Committee

We have established the remuneration and appraisal committee with written terms of reference in compliance with Rule 3.25 of the Listing Rules and the Corporate Governance Code set out in Appendix C1 to the Listing Rules.

The primary duties of the remuneration and appraisal committee are to establish, review and provide advices to our Board on our policy and structure concerning remuneration of our Directors and senior management and on the establishment of a formal and transparent procedure for developing policies concerning such remuneration, make recommendations to our Board the terms of the specific remuneration package of each executive Director and senior management and review and approve performance-based remuneration by reference to corporate goals and objectives resolved by our Directors from time-to-time. The remuneration committee consists of three members, namely Dr. Liu Yulong, Dr. Luo Xufeng and Dr. Xu Lin. The chairperson of the remuneration committee is Dr. Liu Yulong.

Nomination Committee

We have established a nomination committee with written terms of reference in compliance with the Corporate Governance Code set out in Appendix C1 to the Listing Rules.

The primary duties of the nomination committee are to review the structure, size and composition of our Board on a regular basis and make recommendations to our Board regarding any proposed changes to the composition of our Board; identify, select or make recommendations to our Board on the selection of individuals nominated for directorships, and ensure the diversity of our Board members; assess the independence of our independent non-executive Directors and make recommendations to our Board on relevant matters relating to the appointment, re-appointment and removal of our Directors and succession planning for our Directors. The nomination committee consists of three members, namely Dr. Xu Lin, Mr. Lyu Yuelong and Ms. Li Jing. The chairperson of the nomination committee is Dr. Xu Lin.

DIRECTORS AND SENIOR MANAGEMENT

Strategy Committee

We have established a strategy committee with written terms of reference.

The primary duties of the strategy committee of our Company include reviewing the overall development strategy plan of our Company, including our ESG development strategy, and advising our Board accordingly, evaluating the overall development of each business unit of our Company and making recommendations to our Board regarding any adjustments, reviewing our Company's business investment and financing plans, and making recommendations to our Board and handling other matters required by laws, rules and regulations of the jurisdictions where our Shares are listed, our Articles of Association, or as authorized by our Board. The strategy committee consists of three members, namely Dr. Luo Xufeng, Dr. Xu Wencai and Mr. Hu Tiangao. The chairperson of the strategy committee is Dr. Luo Xufeng.

Risk Management Committee

We have established a risk management committee with written terms of reference.

The primary duties of the risk management committee are to provide guidance to our Company's overall risk management and provide support for our Board to perform risk management functions and evaluating the integrity of the risk management system and issuing opinions; and handling other matters required by laws, rules and regulations of the jurisdictions where our Shares are listed, our Articles of Association or as authorized by our Board. The risk management committee consists of three members, namely Dr. Luo Xufeng, Mr. Li Baoping and Ms. Sun Yingting. The chairperson of the risk management committee is Dr. Luo Xufeng.

DIRECTORS' AND SENIOR MANAGEMENT'S REMUNERATION

Our Directors and senior management receive their remuneration in the form of basic annual payments and performance-related annual payments, including fees, salaries, share-based compensation, pension schemes contribution and other benefits in kind.

For the years ended December 31, 2022, 2023 and 2024 and the six months ended June 30, 2025, the total remuneration paid to our Directors amounted to RMB2.58 million, RMB1.72 million, RMB2.61 million and RMB1.41 million, respectively.

For the years ended December 31, 2022, 2023 and 2024 and the six months ended June 30, 2025, the total emoluments paid to the five highest paid individuals (including Directors) by us amounted to RMB11.60 million, RMB17.92 million, RMB20.90 million and RMB7.99 million, respectively.

For the years ended December 31, 2022, 2023 and 2024 and the six months ended June 30, 2025, no payment was made by us to any of the Directors or the five highest paid individuals as an inducement to join us or as compensation for loss of office. None of the Directors waived their remuneration during the relevant period.

DIRECTORS AND SENIOR MANAGEMENT

The remuneration of our Directors and senior management is determined with reference to factors including the responsibility, risk and commitment of our Directors and senior management, the completion rate of our corporate profit, the assessment result of our target responsibility system, the performance evaluation structure of each of our corporate departments and the salaries paid by comparable companies.

Save as disclosed in this prospectus, no other payments had been made, or are payable, by any member of our Company to our Directors during the Track Record Period. For additional information on our Directors' remuneration during the Track Record Period as well as information on the highest paid individuals, see "Appendix I – Accountant's Report – II Notes to the Historical Financial Information – Note 13(2)."

BOARD DIVERSITY POLICY

We have adopted a board diversity policy (the "**Board Diversity Policy**"), which sets out the criteria in selecting candidates to our Board, to achieve and maintain diversity of our Board in order to enhance the effectiveness of our Board and to maintain a high standard of corporate governance. Our Board currently consists both female and male Directors with a mix of education background, professional qualifications, skills, knowledge, and industry experience. Our Directors obtained degrees in various majors including accounting, laws, business administration, management and engineering and from universities in Chinese mainland and Hong Kong. We believe they can contribute different knowledge, skills and industry experience, such as overall management, strategic development, financial and accounting, investment and legal compliance. The Board is of the view that our Board achieves the board diversity requirement in our Board Diversity Policy.

Our nomination committee will review and assess the composition of the Board and make recommendations to the Board on appointment of members of the Board. The nomination committee will include in corporate governance reports a summary of the Board Diversity Policy, the progress on achieving these objectives each year and the status of maintaining diversity of our Board.

COMPLIANCE ADVISER

Our Company has appointed Innovax Capital Limited (創陞融資有限公司) as our compliance adviser upon the listing of our Shares on the Stock Exchange pursuant to Rule 3A.19 of the Listing Rules. The material terms of the compliance adviser's agreement entered into between our Company and the compliance adviser are as follows:

- (1) the compliance adviser shall provide our Company with services including guidance and advice as to compliance with the requirement of the Listing Rules and other applicable laws, rules, codes and guidelines, and accompany our Company to any meetings with the Stock Exchange;

DIRECTORS AND SENIOR MANAGEMENT

- (2) our Company may terminate the appointment of the compliance adviser by giving a no less than 10 days' prior written notice to the compliance adviser. Our Company will exercise such right in compliance with Rule 3A.26 of the Listing Rules. The compliance adviser will have the right to terminate its appointment as compliance adviser under certain specific circumstances and upon notification of the reason of its resignation to the Stock Exchange; and
- (3) during the period of appointment, our Company must consult with, and if necessary, seek advice from the compliance adviser on a timely basis in the following circumstances:
 - (a) before the publication of any regulatory announcement, circular or financial report;
 - (b) where a transaction, which might be a notifiable or connected transaction, is contemplated, including share issuance, sale or transfer of treasury shares and share repurchase;
 - (c) where the Company proposes to use the proceeds of the Global Offering in a manner different from that detailed in this prospectus or where our business activities, developments or results deviate from any forecast, estimate or other information in this prospectus;
 - (d) when Stock Exchange makes enquiries on the Company pursuant to Rule 13.10 of the Listing Rules; and
 - (e) When the Company raises any other compliance enquiries regarding the requirements of the Stock Exchange or other regulatory authorities or the responsibilities or obligations that the company should fulfill under the Listing Rules.

The term of the appointment shall commence on the Listing Date and end on the date on which we distribute our annual report in respect of our financial results for the first full financial year commencing after the Listing Date.

COMPETITION

None of our Directors has any interest in a business which materially competes or is likely to compete, directly or indirectly, with our business, and requires disclosure under Rule 8.10 of the Listing Rules.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

OUR CONTROLLING SHAREHOLDERS

Given that, upon completion of the Global Offering (assuming that (i) there will be no change of shareholding between the Latest Practicable Date and the Listing Date and (ii) the Over-allotment Option is not exercised), (i) Dongyang Hengdian Association will directly and indirectly hold 70% equity interests in Hengdian Holdings; (ii) Hengdian Holdings will directly and indirectly hold approximately 65.43% interests in our Company, a group of Controlling Shareholders of our Company (as defined in the Listing Rules) will be comprised of the following entities:

No.	Controlling Shareholder	Relationship with our Company
1	Hengdian Holdings	As of the Latest Practicable Date, our Company was directly and indirectly held by Hengdian Holdings
2	Dongyang Hengdian Association	as to approximately 76.97%, which was directly and indirectly owned by Dongyang Hengdian Association as to approximately 70%.
3	Dongyang Henghua LLP	As of the Latest Practicable Date, our Company was held by Dongyang Henghua LLP as to approximately 4.01%, whose general partner was Hengdian Holdings.
4	Hengdian DMEGC Magnetics	As of the Latest Practicable Date, our Company was held by Hengdian DMEGC Magnetics as to approximately 1.64%, which was directly owned by Hengdian Holdings as to approximately 50.59%.
5	Hengdian Import and Export	As of the Latest Practicable Date, our Company was held by Hengdian Import and Export as to approximately 1.64%, which was directly owned by Hengdian Holdings as to approximately 74%.
6	Dongyang Zhuowei	As of the Latest Practicable Date, Hengdian Holdings was the general partner of Dongyang Zhuowei and Dongyang Zhuowei held 7% equity interests in Hengdian Import and Export.
7	Dongyang Chuangxiang	As of the Latest Practicable Date, Dongyang Chuangxiang was wholly-owned by Dongyang Hengdian Association.
8	Dongyang Hengchuang	As of the Latest Practicable Date, Dongyang Chuangxiang was the general partner of Dongyang Hengchuang, which held 19% equity interests in Hengdian Holdings.

See “Our History and Development – Corporate Structure” for details in relation to the corporate structure regarding the relationship between our Company and our Controlling Shareholders.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

INDEPENDENCE FROM OUR CONTROLLING SHAREHOLDERS

Having considered the following factors, our Directors are of the view that our Group is capable of carrying on our business independently of our Controlling Shareholders and their respective close associates (other than our Group) after the Global Offering:

Management Independence

Our Company and our Controlling Shareholders have boards of directors that function independently of each other. Upon Listing, our Board comprises one executive Director, five non-executive Directors and three independent non-executive Directors. The following table sets forth the positions held by our Directors and senior management in our Controlling Shareholder:

<u>Name of Director</u>	<u>Position held in our Company</u>	<u>Position held in the Controlling Shareholders</u>
Mr. Lyu Yuelong	Non-executive Director	• A director, the secretary of the Party Committee and the vice president of Hengdian Holdings. • A director of Hengdian Group DMEGC Magnetics.
Dr. Xu Wencai	Non-executive Director	• A director and vice president of Hengdian Holdings. • A director of Hengdian DMEGC Magnetics. • A director of Hengdian Import and Export. • A director of Dongyang Chuangxiang.
Mr. Hu Tiangao	Non-executive Director	• A director and vice president of Hengdian Holdings. • A director of Hengdian DMEGC Magnetics. • A director of Hengdian Import and Export. • A director of Dongyang Chuangxiang.
Mr. Li Baoping	Non-executive Director	• A director and vice president of Hengdian Holdings. • A director of Hengdian DMEGC Magnetics. • A director of Hengdian Import and Export.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

Except for the above-mentioned individuals, none of our other Directors and senior management of our Company holds any directorship or senior management role in our Controlling Shareholders.

Since Mr. Lyu Yuelong, Dr. Xu Wencai, Mr. Hu Tiangao and Mr. Li Baoping are non-executive Directors of our Company, they will not be involved in the day-to-day management or affairs and operations of our businesses. Also, Mr. Lyu Yuelong, Dr. Xu Wencai, Mr. Hu Tiangao and Mr. Li Baoping have a track record of devoting sufficient time and energy to discharge their duties as our Directors.

Our executive Director and senior management, with substantial experience in the industry in which we are engaged and/or in their respective fields of expertise, have served our Group for many years. They formed part of our core management and have been responsible for overall business strategy, daily management and operation of our Group during the Track Record Period. Save as disclosed above, there was no overlapping personnel between the senior management team of our Group and our Controlling Shareholders as at the Latest Practicable Date.

In the event that the four overlapping Directors is required to abstain from any board meeting of our Company on any matter which may give rise to a potential conflict of interest with our Controlling Shareholders, the remaining non-overlapping Directors will have sufficient expertise and experience to fully consider any such matter. Notwithstanding the four overlapping Directors, our Directors, including the independent non-executive Directors, are of the view that our Board is able to manage our business independently from our Controlling Shareholders for the following reasons:

- (a) none of the business of our Controlling Shareholders competes, or is likely to compete, with our core business and with the corporate governance measures in place to manage existing and potential conflicts of interest, the dual roles assumed by the four overlapping Director in most cases will not affect the requisite degree of impartiality of our Directors in discharging their fiduciary duties owed to our Company;
- (b) we have three independent non-executive Directors, and certain matters of our Company, including continuing connected transactions, must always be referred to the independent non-executive Directors for review and they will confirm in our annual report that our continuing connected transactions have been entered into in our ordinary and usual course of business, are on normal commercial terms or better and on terms that are fair and reasonable and in the interests of our Company and our Shareholders as a whole; and
- (c) in an event of conflict of interests, the relevant Director(s) will abstain from voting and will be excluded from deliberation by our Board. We believe our Directors with no overlapping directorships in our Controlling Shareholders have the requisite qualifications, integrity and experience to maintain an effective board and observe their fiduciary duties in an event of conflict of interests. See “Directors and Senior Management – Board of Directors” for the relevant experience and qualifications of our Directors.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

Business and operational independence

Our Group will be able to operate independently of our Controlling Shareholders and their respective close associates for the reasons set out below:

We engage in businesses that are independent of those operated by our Controlling Shareholders and its associates. We have obtained the relevant qualifications and licenses, independent operating premises, trademarks, domain names and electronic information systems needed for our businesses.

We own or have the right to use all the operational facilities and technologies relating to our business. We also have our own clients and serve them with our own employees. We have sufficient capital to operate our business independently. In addition, we currently conduct our principal business independently and we have the ability to formulate and implement our own operational decisions independently. We have our own organizational structure and departments which are under specific authority independent from our Controlling Shareholders. We also maintain a comprehensive set of internal control procedures for promoting efficient business operation. With reference to relevant laws, regulations and rules, we develop sound corporate governance practice and have adopted our rules of procedure for Shareholders' meeting, rules of procedure for Board meeting and connected transactions regulations.

We have entered into certain continuing connected transactions in relation to procurement of goods and services, sales of goods and services and provision of financial services to or by Hengdian Holdings and/or its associates. Such goods and services are not provided to or by Hengdian Holdings and/or its associates on an exclusive basis and may be offered to or by Independent Third Parties on similar terms. See "Connected Transactions".

Financial independence

Our Group will be able to maintain financial independence from our Controlling Shareholders and their respective close associates for the reasons set out below:

We have our own financial and accounting system, which is independent from that of our Controlling Shareholders and their respective close associates. Accounting functions and financial decision making will be carried out by our Group independently and according to our own business needs and financial conditions. Based on the above, we will be able to finance our own operations and function independently without reliance on our Controlling Shareholders and their respective close associates.

As at the Latest Practicable Date, all outstanding balance of amounts due from and/or to our Controlling Shareholders and/or their respective close associates which were not arising out of the ordinary course of our business has been settled. As of the Latest Practicable Date, there was no unsettled financial guarantee given by our Controlling Shareholders.

Our Group's future financial resource requirements will be satisfied through a combination of cash generated from its operating activities, banking facilities made available to it or proceeds from equity financing including but not limited to the Global Offering, and will not be dependent on our Controlling Shareholders for future financing.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

CORPORATE GOVERNANCE MEASURES

Our Directors believe that there are adequate corporate governance measures in place to manage existing and potential conflicts of interest. In order to further avoid potential conflicts of interest, we have implemented the following measures:

- (a) as part of our preparation for the Global Offering, we have amended our Articles of Association to comply with the Listing Rules. In particular, our Articles of Association provided that, unless otherwise provided, a Director shall not vote on any board resolution in respect of any contract or arrangement or any other proposal whatsoever in which such Director or any of his/her close associates has any material interest, and if he/she shall do so his/her vote shall not be counted (nor shall such Director be counted in the quorum for the resolution);
- (b) a Director with material interests shall make full disclosure in respect of matters that may have conflict or potentially conflict with any of our interest and abstain from the board meetings on matters in which such Director or his/her associates have a material interest, unless the attendance or participation of such Director at such meeting of the Board is specifically requested by a majority of the independent non-executive Directors;
- (c) we are committed that our Board should include a balanced composition of executive Director, non-executive Directors and independent non-executive Directors. We have appointed independent non-executive Directors and we believe our independent non-executive Directors possesses sufficient experience and they are free of any business or other relationship which could interfere in any material manner with the exercise of their independent judgement and will be able to provide an impartial, external opinion to protect the interests of our public Shareholders. Details of our independent non-executive Directors are set out in the paragraph headed “Directors and Senior Management – Board of Directors – Independent non-executive Directors”;
- (d) we have appointed Innovax Capital Limited as our compliance adviser, which will provide advice and guidance to us in respect of compliance with the applicable laws and the Listing Rules including various requirements relating to Directors’ duties and corporate governance; and
- (e) as required by the Listing Rules, our independent non-executive Directors shall review continuing connected transactions annually and confirm in our annual report that such transactions have been entered into in our ordinary and usual course of business, are either on normal commercial terms or on terms no less favourable to us than those available to or from Independent Third Parties and on terms that are fair and reasonable and in the interests of our Company and our Shareholders as a whole.

SUBSTANTIAL SHAREHOLDERS

SUBSTANTIAL SHAREHOLDERS

So far as our Directors are aware, immediately following completion of the Global Offering and no other changes are made to the issued share capital of our Company between the Latest Practicable Date and Listing, the following persons will have an interest or short position (as applicable) in our Shares or underlying Shares which would fall to be disclosed to us under the provisions of Divisions 2 and 3 of Part XV of the SFO, or, will be, directly or indirectly, interested in 10% or more of the issued voting shares of our Company or any other member of our Group:

Substantial shareholders of our Company

Shareholder	Nature of interest	Description of Shares	Number of Shares directly or indirectly held	Assuming that the Over-allotment Option are not exercised		Assuming that the Over-allotment Option are fully exercised	
				Approximate % of shareholding		Approximate % of shareholding	
				Approximate % of shareholding in our A Shares	in the total share capital of our Company	Approximate % of shareholding in our A Shares	in the total share capital of our Company
				immediately after the Global Offering	immediately after the Global Offering	immediately after the Global Offering	immediately after the Global Offering
Hengdian Holdings ⁽¹⁾	Beneficial owner	A Shares	425,120,900	69.68%	59.23%	69.68%	57.93%
	Interest in controlled corporation	A Shares	44,480,000	7.29%	6.20%	7.29%	6.06%
Dongyang Hengdian Association ⁽²⁾	Interest in controlled corporation	A Shares	469,600,900	76.98%	65.43%	76.98%	63.99%

Note:

- (1) Hengdian Holdings directly holds 425,120,900 A Shares of our Company, indirectly holds 10,000,000 A Shares through its subsidiary Hengdian DMEGC Magnetics and 10,000,000 A Shares through its subsidiary Hengdian Import and Export. Since Hengdian Holdings is the general partner of Dongyang Henghua LLP, Hengdian Holdings is deemed to be interested in 24,480,000 A Shares held by Dongyang Henghua LLP for the purpose of the SFO.
- (2) Hengdian Holdings is directly held by Dongyang Hengdian Association and Dongyang Hengchuang as to 51% and 19%, respectively. Dongyang Hengchuang is held by Dongyang Hengdian Association as to 0.01% as its general partner and as to 99.98% as its limited partner. Therefore, Dongyang Hengdian Association is deemed to be interested in all the shares held by Hengdian Holdings for the purpose of the SFO.

For further information on any other person who will be, immediately following completion of the Global Offering, directly or indirectly, interested in 10% or more of the issued voting shares of any other member of our Group, see “Appendix VI – Statutory and General Information – C. Further Information about our Directors and Substantial Shareholders – 2. Substantial Shareholders”.

SHARE CAPITAL

BEFORE THE GLOBAL OFFERING

As of the Latest Practicable Date, the total issued share capital of our Company was 610,065,893 A Shares of nominal value of RMB1.00 each, which are all listed on the main board of the Shanghai Stock Exchange.

Description of Shares	Number of Shares	Approximate percentage of issued share capital
A Shares in issue	610,065,893 ⁽¹⁾	100%
Total	610,065,893	100%

Note:

(1) These A Shares include 5,681,234 A Shares which are held by our Company as treasury shares.

UPON COMPLETION OF THE GLOBAL OFFERING

Immediately following the completion of the Global Offering, assuming that the Over-allotment Option is not exercised, the share capital of our Company will be as follows.

Description of Shares	Number of Shares	Approximate percentage of issued share capital
A Shares in issue	610,065,893 ⁽¹⁾	85%
H Shares to be issued pursuant to the Global Offering	107,659,000	15%
Total	717,724,893	100%

Note:

(1) These A Shares include 5,681,234 A Shares which are held by our Company as treasury shares.

SHARE CAPITAL

Immediately following the completion of the Global Offering, assuming that the Over-allotment Option is fully exercised, the share capital of our Company will be as follows.

Description of Shares	Number of Shares	Approximate percentage of issued share capital
A Shares in issue	610,065,893 ⁽¹⁾	83.13%
H Shares to be issued pursuant to the Global Offering	123,807,500	16.87%
Total	733,873,393	100%

Note:

(1) These A Shares include 5,681,234 A Shares which are held by our Company as treasury shares.

OUR SHARES

Upon completion of the Global Offering, the Shares will consist of A Shares and H Shares. A Shares and H Shares are all ordinary Shares in the share capital of our Company. However, apart from certain qualified domestic institutional investors in the PRC, the qualified PRC investors under the Shanghai – Hong Kong Stock Connect or the Shenzhen – Hong Kong Stock Connect and other persons who are entitled to hold our H Shares pursuant to relevant PRC laws and regulations or upon approvals of any competent authorities, H Shares generally cannot be subscribed for by or traded between investors of the PRC.

Shanghai-Hong Kong Stock Connect has established a stock connect mechanism between the PRC and Hong Kong. Our A Shares can be subscribed for and traded by investors in the PRC, qualified foreign institutional investors or qualified foreign strategic investors and must be traded in Renminbi. As our A Shares are eligible securities under the Northbound Trading Link, they can also be subscribed for and traded by Hong Kong and other overseas investors pursuant to the rules and limits of Shanghai-Hong Kong Stock Connect. If our H Shares are eligible securities under the Southbound Trading Link, they can also be subscribed for and traded by investors in the PRC in accordance with the rules and limits of Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect.

RANKING

Our H Shares and our A Shares are regarded as one class of Shares under our Articles of Association and will rank *pari passu* with each other in all other respects and, in particular, will rank equally for all dividends or distributions declared, paid or made after the date of this prospectus.

SHARE CAPITAL

NO CONVERSION OF OUR A SHARES INTO H SHARES FOR LISTING AND TRADING ON THE HONG KONG STOCK EXCHANGE

Our A Shares and our H Shares are generally neither interchangeable nor fungible, and the market prices of our A Shares and our H Shares may be different after the Global Offering. The Guidelines on Application for “Full Circulation” of Domestic Unlisted Shares of H-share Companies (《H股公司境內未上市股份申請“全流通”業務指引》) announced by the CSRC are not applicable to companies dually listed in the PRC and on the Hong Kong Stock Exchange. As of the Latest Practicable Date, there were no relevant rules or guidelines from the CSRC providing that A share shareholders may convert A shares held by them into H shares for listing and trading on the Hong Kong Stock Exchange.

APPROVAL FROM HOLDERS OF A SHARES REGARDING THE GLOBAL OFFERING

Approval from holders of A Shares is required for our Company to issue H Shares and seek the listing of H Shares on the Hong Kong Stock Exchange. Such approval was obtained at the shareholders’ meeting of our Company held on February 6, 2025 and is subject to the following conditions:

- (i) Size of the offer. The proposed number of H Shares to be offered shall not exceed 15% of the total issued share capital enlarged by the H Shares to be issued pursuant to the Global Offering (before the exercise of the Over-allotment Option). The number of H Shares to be issued pursuant to the full exercise of the Over-allotment Option shall not exceed 15% of the total number of H Shares to be offered initially under the Global Offering.
- (ii) Method of offering. The method of offering shall be by way of an international offering to institutional investors and a public offer for subscription in Hong Kong.
- (iii) Target investors. The H Shares shall be issued to public investors in Hong Kong under the Hong Kong Public Offering and international investors, qualified domestic institutional investors and other investors in compliance with regulatory requirements.
- (iv) Price determination basis. The issue price of the H Shares will be determined, among others, after due consideration of the interests of existing shareholders of our Company, acceptance of investors and the risks related to the offering, according to international practice, through the demands for orders and book building process, subject to the domestic and overseas capital market conditions and by reference to the valuation level of comparable companies in domestic and overseas markets.
- (v) Validity period. The issue of H Shares and listing of H Shares on the Hong Kong Stock Exchange shall be completed within 24 months from the date when the shareholders’ meeting was held on February 6, 2025.

There is no other approved offering plans for our Shares except the Global Offering.

SHAREHOLDERS’ MEETINGS

For details of circumstances under which our shareholders’ meeting is required, see “Appendix V – Summary of the Articles of Association – Shareholders and Shareholders’ Meetings”.

FINANCIAL INFORMATION

The following discussion and analysis should be read in conjunction with our consolidated financial statements included “Appendix I – Accountant’s Report” together with the accompanying notes. Our consolidated financial statements have been prepared in accordance with IFRSs.

The following discussion and analysis contain forward-looking statements that involve risks and uncertainties. These statements are based on assumptions and analysis that we make in light of our experience and perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate under the circumstances. However, our actual results may differ significantly from those projected in the forward-looking statements. Factors that might cause future results to differ significantly from projections include, but are not limited to, those discussed in “Risk Factors” and “Forward-looking Statements” and elsewhere in this prospectus.

OVERVIEW

We are a leading futures company in the PRC, providing global financial services to clients. The principal focus of our Group lies in the provision of futures and derivatives services, both within the PRC and in international markets. Leveraging our understanding of the needs of both Chinese and overseas clients developed through our decades of experience, coupled with our insights into global financial and derivatives markets, we offer comprehensive and customized derivatives and risk management services to industrial clients, financial institutions and individual investors, and we also strive to offer more diverse wealth management services to investors in China and abroad.

We believe we are the Chinese futures and derivatives service provider with the most profound understanding of international futures and derivatives financial business, and also the international futures and derivatives services provider with the closest affinity to Chinese clients. According to the F&S Report, we ranked 8th among all futures companies in the PRC by total revenue in 2024, and 1st among all non-financial institution-related futures companies in the PRC by total revenue in 2024. We maintain a forward-looking, strategic presence across multiple segments of the trading value chain, offering a broad range of services and spanning the PRC and global markets. Our product mix covers a diverse range of asset classes, including futures and spot commodities (including agricultural, industrial, energy and chemical, and metals) as well as equity and fixed-income securities. Our principal business lines include PRC futures brokerage, PRC risk management services, PRC wealth management, and overseas financial services.

Our globally integrated, strategic business mix, comprehensive financial service offerings, and technology-enabled capabilities had driven our robust growth over the Track Record Period. We have achieved continuous growth in client equity in our brokerage business across both PRC and overseas markets during the Track Record Period. Client equity in our PRC futures brokerage business grew from RMB19.1 billion as of December 31, 2022, to RMB21.2 billion as of December 31, 2023, and further to RMB31.6 billion as of December 31, 2024, representing a CAGR of approximately 28.6%. As of June

FINANCIAL INFORMATION

30, 2025, client equity in our PRC futures brokerage business stood at RMB27.3 billion. Similarly, client equity from our overseas brokerage services (covering securities, futures, and foreign exchange) increased from approximately HK\$11.9 billion as of December 31, 2022, to HK\$12.5 billion as of December 31, 2023, and further to HK\$13.8 billion as of December 31, 2024, representing a CAGR of approximately 7.7%. As of June 30, 2025, client equity from our overseas brokerage services (covering securities, futures, and foreign exchange) rose to HK\$17.8 billion. The growing demand for futures trading and risk management services among Chinese enterprises created opportunities for us to expand our client base for PRC markets and overseas markets and we believe such will continue in the future.

Our financial performance further underscores the strength of our diversified businesses. Our profit for the year grew significantly from RMB245.9 million in 2022 to RMB458.0 million in 2024, with a CAGR of 36.5%. Our profit for the period remained stable, amounting to RMB230.5 million for the six months ended June 30, 2024 and RMB231.3 million for the six months ended June 30, 2025. Our total assets rose from RMB34,189.2 million as of December 31, 2022, to RMB48,863.4 million as of December 31, 2024, representing a CAGR of 19.5%. As of June 30, 2025, our total assets further increased to RMB46,878.2 million. Additionally, our weighted average ROE continuously improved, reaching 7.75%, 11.46%, 11.71%, 5.51%, and 6.03% for 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, respectively. These results reflect our ability to generate sustainable growth and deliver returns to shareholders while maintaining a solid financial foundation.

RECENT DEVELOPMENTS

Publication and Summary of Quarterly Results

As a public company listed on the Shanghai Stock Exchange, we are required to disclose unaudited financial results prepared under PRC GAAP for the nine months ended September 30, 2025 pursuant to the relevant PRC securities laws and regulations. We published our quarterly results on October 24, 2025 and we will continue to provide periodic financial disclosure in compliance with the relevant laws and regulations.

We have included our unaudited interim consolidated financial information for the nine months ended September 30, 2025 in Appendix IA to this prospectus. The unaudited interim consolidated financial information for the nine months ended September 30, 2025 has been reviewed by our reporting accountant in accordance with Hong Kong Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” as issued by the Hong Kong Institute of Certified Public Accountants. For details, see Appendix IA to this prospectus.

FINANCIAL INFORMATION

Our operating income slightly decreased from RMB1,025.7 million for the nine months ended September 30, 2024 to RMB940.4 million for the nine months ended September 30, 2025. Our operating expenses also decreased by 10.7% from RMB611.0 million for the nine months ended September 30, 2024 to RMB545.5 million for the nine months ended September 30, 2025, primarily due to the decrease of other operating expenses. As a result, our operating profit slightly decreased from RMB414.7 million for the nine months ended September 30, 2024 to RMB394.9 million for the nine months ended September 30, 2025. Our profit for the period remained stable, amounting to RMB358.5 million and RMB351.8 million, for the nine months ended September 30, 2024 and 2025, respectively. Our total assets increased by 31.1% from RMB48,863.4 million as of December 31, 2024 to RMB64,079.0 million as of September 30, 2025, primarily due to increases of deposits with exchange-clearing organizations and bank balances held for clients. Our net current assets remained stable at RMB4,449.3 million as of September 30, 2025 compared to RMB4,197.3 million as of December 31, 2024. See “Appendix IA – Unaudited Interim Condensed Consolidated Financial Information” for details.

Recent Regulatory Guidance on Accounting Treatment for Risk Management Companies

Implementation Q&A on Accounting Treatment for Standard Warehouse Receipt Transactions

On July 8, 2025, the accounting department of MOF issued the Implementation Q&A on Accounting Treatment for Standard Warehouse Receipt Transactions (《標準倉單交易相關會計處理實施問答》) (“**Implementation Q&A**”). The Implementation Q&A clarifies that where an enterprise frequently buys and sells standard warehouse receipts at futures exchanges to earn price spreads without taking physical delivery, such contracts should be treated as financial instruments and accounted for in accordance with China Accounting Standard for Business Enterprises No. 22 – Financial Instruments: Recognition and Measurement. Under this treatment, the difference between the consideration received and the carrying amount of standard warehouse receipts sold is recognized as investment income rather than sales revenue, and standard warehouse receipts held at period end are presented as other current assets rather than inventory. Accordingly, we had adopted such treatment when preparing the financial statements as at and for years ended December 31, 2022, 2023 and 2024 and the six months ended June 30, 2024 and 2025 included in this prospectus. The change resulted in a reclassification of amounts previously reported as sales revenue to investment income, and a reclassification of period-end holdings from inventory to other current assets. See “Financial Information – Material Accounting Policies and Estimates – Material Accounting Policies – Contracts for the Purchase or Sale of Non-financial Items that are within the Scope of Financial Instruments Accounting Standards” for details.

FINANCIAL INFORMATION

China Futures Association's Rules for the Management of Commodity Risk Management Business of Futures Risk Management Companies

On November 14, 2024, the China Futures Association issued the Rules for the Management of Commodity Risk Management Business of Futures Risk Management Companies (《期貨風險管理公司大宗商品風險管理業務管理規則》) (the “**New RM Rules**”), which was amended on May 13, 2025. The New RM Rules requires a futures company’s risk management subsidiary to recognize revenue on a net basis for certain type of trading transactions. Accordingly, we adopted a net recognition method for reporting operating income associated with certain trading businesses based on the New RM Rules when preparing the financial statements as at and for years ended December 31, 2022, 2023 and 2024 and the six months ended June 30, 2024 and 2025 included in this prospectus.

Changes in Macroeconomy

The global financial markets have experienced significant volatility and uncertainty in recent months, driven by a combination of geopolitical tensions, economic policy shifts, and trade disruptions. Futures markets have also been affected, with heightened volatility and risk aversion among investors. Our Directors confirm that, as of the date of this prospectus, market fluctuations have not had a material adverse impact on our client’s trading activities and business operations.

The global interest rate environment has experienced pronounced volatility in recent years, driven by macroeconomic shocks and policy responses. In the United States, the Federal Reserve cut the federal funds rate from 1.5%–1.75% to 0%–0.25% in early 2020 and launched quantitative easing to stabilize markets during the pandemic. As inflation surged, the Federal Reserve implemented 11 consecutive rate hikes totaling 525 basis points, raising the rate to 5.25%–5.5% by 2023. With inflation receding in 2024, the Federal Reserve paused hikes and began a cautious easing cycle, lowering the rate to 4.25%–4.5% by year-end. In early 2020, China’s 1-year LPR was 4.15%, but the PBOC gradually reduced it to 3.65% by 2022 through liquidity injections and policy easing. In 2023, the PBOC further cut the LPR to 3.45% and implemented additional reserve requirement ratio reductions. By late 2024, the LPR declined to 3.10%. These significant and often abrupt changes – driven by inflation, fiscal pressures, and global capital flows – directly affect our net interest income. In 2022, 2023, and 2024 and for the six months ended June 30, 2024 and 2025, our interest income from client funds amounted to RMB313.0 million, RMB537.0 million, RMB644.1 million, RMB333.6 million and RMB243.8 million, respectively, our interest income from client funds in the PRC amounted to RMB194.4 million, RMB164.2 million, RMB195.5 million, RMB100.7 million and RMB81.1 million, respectively, and our interest income from client funds overseas amounted to RMB118.6 million, RMB372.8 million, RMB448.7 million, RMB232.9 million and RMB162.7 million, respectively. However, interest rate movements are entirely outside our control and remain subject to frequent policy shifts. Such fluctuations may materially affect our profitability and financial condition. See “Risk Factors – Significant interest rate fluctuations could affect our financial condition and results of operations.”

FINANCIAL INFORMATION

Recent tariff changes and geopolitical tensions have a multi-dimensional impact on our business, affecting our PRC futures brokerage, PRC risk management services, and overseas financial services. In our PRC futures brokerage, frequent tariff adjustments and geopolitical risks increase price volatility in commodities such as agricultural products, metals, and energy. Clients respond by increasing their hedging and trading activities, which helps to drive an increase in higher agency trading volumes and fee income, but also raises the number of forced liquidations due to margin shortfalls. This volatility necessitates robust risk control, prompting us to identify, warn, and manage risks early to maintain transaction stability. For PRC risk management services, tariff shocks heighten clients' exposure to exchange rate and raw material cost volatility. We address rising demand for risk hedging and customized risk management solutions, such as OTC derivatives and basis trading, leading to growth in our notional principal in OTC derivatives business since the new US tariff policies in April 2025. In overseas financial services, with a similar effect on the PRC businesses, tariff changes drive global commodity volatility and increase clients' demand for hedging and global asset allocation. Overall, while these factors stimulate demand for our futures and derivatives services, they also necessitate enhanced risk management. Our comprehensive risk management system is designed to strengthen risk control measures in volatile markets through real-time monitoring and prompt responsiveness, covering different products and business lines rather than focusing on any single area. We continuously track price trends, position changes, and margin levels across all commodities. By calculating hedge thresholds and dynamically adjusting position sizes, we control our exposure and avoid adverse market movements. We use stop-loss points and real-time asset price monitoring to manage risk as conditions change. When volatility increases, we proactively adjust margin requirements, increase the frequency of intraday risk testing and stress tests, and strengthen communication between our risk and business teams as well as with clients. This allows us to identify and address potential issues early, effectively preventing risk events. If we detect increased risk, we notify clients to add margin. If clients do not respond, we act quickly to liquidate positions and limit potential losses. We maintain a whitelist for counterparties and apply stricter requirements for those with higher risk profiles. After significant market events, we review our positions and exposures to avoid excessive concentration in any single commodity. See "Business – Risk Management – Monitoring and Management of Major Risks."

In the short term, we do not anticipate tariffs or geopolitical tensions to have a material adverse impact on our performance.

No Material Adverse Change

Our Directors confirm that, up to the date of this prospectus, there has been no material adverse change in our financial, operational and trading positions or prospects since June 30, 2025, being the end date of the periods reported on in the Accountant's Report included in Appendix I, and there had been no event since June 30, 2025, that would materially affect the information shown in the Accountant's Report set out in Appendix I.

BASIS OF PRESENTATION

The consolidated financial statements of our Group have been prepared in accordance with IFRSs. In addition, the consolidated financial statements comply with the disclosure requirements of the Companies Ordinance.

FINANCIAL INFORMATION

We prepared our financial statements on the historical cost basis except for certain financial assets and liabilities that are measured at their fair value, including financial assets at fair value through profit or loss, derivative financial assets, financial assets at fair value through other comprehensive income. Our financial statements are presented in Renminbi, which is our functional currency.

The preparation of our consolidated financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying our accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to our consolidated financial information are prepared in note 2.1 to the Accountant's Report in Appendix I.

FACTORS AFFECTING OUR RESULTS OF OPERATIONS

The following factors are the principal factors that have affected and, we expect, will continue to affect our business, financial condition, results of operations and prospects.

Macroeconomic and Financial Market Conditions

As a PRC-based financial services provider with global operations, our business and operating results are affected by PRC and global economic conditions, including the business environment in which we operate. Our results of operations in the past have been, and in the future may continue to be, materially affected by factors relating the economic and market conditions, including one or a combination of the following:

- the economic and political conditions within China and overseas, such as macroeconomic and monetary policies, legislation and regulation affecting the financial and futures industries;
- the effect of market conditions within China and overseas, particularly in commodities, futures, equity and credit markets;
- the level and volatility of domestic and international interest rates, exchange rates, commodity price, equity and fixed income;
- changes in clients' hedging or speculative trading activities in the markets;
- investor sentiment and confidence in the financial markets; and
- inflation, natural disasters, severe contagious diseases and acts of war or terrorism.

FINANCIAL INFORMATION

Economic and market conditions affecting our businesses in China, among other factors, are related to the GDP growth rate, liquid and efficient capital markets, levels of inflation and interest rates, confidence level of investors and market competition of the industry. In periods of economic expansion or heightened market volatility, trading activity typically increases as clients seek to hedge risks or capitalize on market opportunities. Additionally, fluctuations in commodity prices, foreign exchange rates, and equity markets can influence the demand for derivatives and other financial products that we offer. As we have a diverse business portfolio with an expanding global footprint, we believe we have the ability to adapt during times of market volatility and adverse financial or economic conditions.

Diversification of Services and Market Expansion

Our ability to broaden our service offerings and expand into various markets is a critical factor influencing our results of operations. By diversifying our business lines, product mix, and geographic presence, we aim to capture growth opportunities in both PRC and overseas markets. This approach allows us to better serve the evolving needs of our clients, including individuals, corporations, and financial institutions, while mitigating risks associated with reliance on a single market or product category.

In recent years, we have expanded our business overseas, offering a wide range of services such as securities, futures, foreign exchanges, and clearing services. This expansion has been complemented by the introduction of innovative products and services across asset classes, including futures and spot commodities (including agricultural, industrial, energy and chemical, and metals) as well as equity and fixed-income securities. Our ability to adapt our product mix to meet market demand and regulatory requirements has enabled us to strengthen our competitive position and attract a diverse client base.

This strategic focus on broadening our service offerings and entering new markets not only drives profit growth but also enhances our resilience to changes in market conditions, ensuring sustainable development over the long term.

Competition and Pricing

We face intense competition in our business lines in both the PRC and overseas markets.

The pricing of our products and services has been largely driven by market competition. Pricing has been a principal factor affecting our business, financial condition and results of operations. As for the brokerage services, the average brokerage commission rate for our PRC futures brokerage was 0.275 bps, 0.334 bps, 0.225 bps, 0.265 bps and 0.158 bps, respectively, in 2022, 2023 and 2024 and the six months ended June 30, 2024 and 2025. Intensified price competition in the futures brokerage business with other futures brokerage firms may force us to charge lower rates to stay competitive going forward. We also face increased competition in asset management and mutual funds.

In the overseas markets, we face competition primarily with China-funded financial services providers with qualifications in futures and derivatives businesses. We face competition in terms of brand recognition, marketing and distribution capacity, information technology and research capabilities.

FINANCIAL INFORMATION

To differentiate ourselves, we focus on delivering superior client experiences through innovative products, advanced technology, and professional expertise. Our ability to offer tailored solutions, supported by robust risk management systems and a deep understanding of market dynamics, allows us to compete effectively while maintaining profitability. Additionally, our strong reputation, global capabilities, and ability to adapt to changing market conditions further enhance our competitive positioning.

We believe our competitiveness lies in the value we offer. While we expect that the competition in most of the markets in which we operate will likely remain intense, by balancing competitive pricing with high-quality services and innovation, we aim to sustain growth and solidity in our position in the industry.

Interest Rates

Interest rate fluctuations have a significant impact on our results of operations, influencing both our PRC and overseas businesses across multiple dimensions. As a key economic factor, interest rates affect market sentiment, client activity, and the profitability of our business.

In the PRC markets, changes in interest rates directly influence investor appetite and market sentiment. Higher interest rates can undermine the willingness of institutional clients to invest in the securities market, thereby affecting trading volumes and overall market activity. This, in turn, impacts our PRC futures brokerage and risk management services.

Interest rates also affect our PRC wealth management, particularly income generated from fixed-income securities. Rising interest rates may reduce the value of fixed-income investments, while falling rates can create opportunities for higher returns, influencing client demand for wealth management.

Interest rates also affect our interest income, which we earn on client funds and our own funds deposited with futures exchanges and commercial banks. In 2022, 2023, 2024 and the six months ended June 30, 2024 and 2025, our net interest income amounted to RMB326.5 million, RMB545.4 million, RMB681.8 million, RMB350.8 million and RMB253.3 million, respectively. Changes in interest rates directly influence the returns on these deposits, contributing to our overall financial performance.

In overseas markets, interest rate changes in major economies, such as the U.S. and Europe, have broader implications for global financial markets. They affect foreign exchange rates, commodity prices, and cross-border capital flows, which in turn influence the demand for our overseas financial services. For example, rising interest rates in overseas markets may strengthen currencies like the USD, impacting commodity prices and creating opportunities or challenges for clients engaged in global trading.

Additionally, interest rate changes have a direct impact on our financing activities. Higher interest rates increase our finance costs, while lower rates reduce borrowing costs.

Our ability to adapt to changing interest rate environments is critical to maintaining competitiveness. By offering diversified services and leveraging our expertise in both the PRC and overseas markets, we help clients to navigate the challenges posed by interest rate fluctuations while supporting their derivatives trading, wealth management, and risk management needs.

FINANCIAL INFORMATION

Investment in Technology and Talent

Our results of operations are driven by strategic investments in advanced technology and talent recruitment and development, which form vital parts of the foundation of our competitive advantage and long-term growth.

Technology: Technology innovation is a critical factor for us to retain and attract clients. We have made significant investments into our financial technology platform, which drive to provide efficient and innovative features relating to our business operations including trading, risk management and clearing. Our focus on technology-led financial solutions is exemplified by several in-house developed systems, including the Nanhua High-Speed Trading System, Nanhua Futures App, Nanhua Tong App, futures-spot trading risk management system, Shenghua Financial Derivatives Integrated Platform and Ruihua Risk Management Services Business Risk Control System. Further, we have implemented a “two-location, three-center” data architectural framework in Shanghai and Hangzhou, supplemented by over 150 server cabinets across key PRC and overseas exchanges – such as CFFEX, SHFE, DCE, ZCE, GFEX, SSE, SZSE, CME, and SGX – ensuring secure, efficient, and stable transaction support for both onshore and offshore clients. These innovations strengthen our operational efficiency and risk controls. We will continue to invest in research and development, innovation, and technology to enhance our platform to address the diverse needs of our clients and improve operating efficiency.

Talent: Talented professional is a critical factor driving our market expansion and delivering innovative products to meet client needs. Our senior management team combines extensive leadership experience, robust professional capabilities, and a relatively youthful composition, with an average of over 20 years of expertise in key areas such as futures brokerage, risk management, and asset management. Their leadership has been instrumental in guiding our teams through market complexities and identifying growth opportunities in both domestic and international markets. Capable and motivated people are essential to our ability to expand into new markets and diversify our offerings. They bring the expertise and flexibility needed to navigate regulatory environments, build client relationships, and tailor services to regional demands. By fostering a culture of innovation and prioritizing talent development, we equip our workforce to effectively support our strategic goals, ensuring sustained growth and competitiveness.

With continuous investments in technology and talent, we believe we are well-positioned to adapt to market dynamics, drive innovation, and achieve sustainable growth.

Regulatory Environment

Our results of operations, financial condition and prospects are subject to regulatory developments and economic measures undertaken by the government in which we operate. In particular, we believe that our ability to expand our business and broaden the scope of our product and service offerings has been, and will continue to be, materially affected by changes in the policies, laws and regulations of the jurisdictions in which we operate, including the extent to which we can engage in certain businesses or adopt certain business models or fee structures.

FINANCIAL INFORMATION

- *PRC markets:* The regulatory regime of the PRC futures industry has been evolving. The CSRC and other regulatory authorities have been broadening the scope of new products and services that futures firms can offer. The CSRC also encouraged futures firms to diversify their product and service offerings and issued specific guidelines on product and service innovation for futures firms. We believe that the approval of new products and services by the CSRC will enable us to further expand and diversify our business and revenue streams as well as increase our profitability.

The PRC government authorities also from time to time may roll out new legislations and laws with the aim to establish a comprehensive and systematic regime. In 2022, the promulgation of Futures and Derivatives Law (《期貨和衍生品法》) systematically established the fundamental principles, rights and obligations within the futures and derivatives sector from a legal standpoint. We believe the laws and regulations will foster a more stable and supportive business environment, enabling us to operate more efficiently and confidently within the PRC markets.

- *Overseas markets:* Our overseas financial services are also subject to diverse regulatory frameworks. Among the first futures companies in the industry in China to implement an internationalization strategy early on, we have developed deep expertise in navigating international financial regulations. This understanding enables us to comply effectively with the legal and regulatory requirements of various jurisdictions, ensuring the integrity and sustainability of our overseas operations. However, expanding our overseas operations remains contingent on meeting the specific regulatory and legal requirements of each market. These requirements may vary significantly, posing challenges to our ability to scale and adapt quickly. While we are committed to monitoring and complying with regulatory developments in these markets, doing so inevitably increases our operational costs.

To address these regulatory challenges, we continuously optimize our business operations and adjust our businesses to align with evolving regulatory requirements. By staying ahead of regulatory changes, fostering innovation, and maintaining a strong compliance culture, we aim to turn regulatory developments into opportunities for growth and differentiation in both the PRC and overseas markets.

MATERIAL ACCOUNTING POLICIES AND ESTIMATES

We have identified certain accounting policies and estimates significant to the preparation of our financial statements in accordance with IFRSs. The Accountant's Report in Appendix I sets forth these material accounting policies in note 3 to the Accountant's Report in Appendix I, which are important for an understanding of our financial condition and results of operations.

FINANCIAL INFORMATION

Some of our accounting policies involve subjective assumptions, estimates and judgments that are discussed in note 5 to the Accountant's Report in Appendix I. In the application of our accounting policies, our management is required to make estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. Our estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. Our estimates and underlying assumptions are reviewed by our management on an ongoing basis.

Our management has identified below the accounting policies, estimates and judgments that they believe are critical to the preparation of our financial statements.

Material Accounting Policies

Revenue Recognition

Commission and Fee Income

Our Group provides brokerage service to its customers, which contains a series of distinct services that are substantially the same and have the same pattern of transfer. Therefore, the services are identified as one performance obligation. Revenue is recognized upon completion of each service, usually on the date of the transaction or the completion of fund settlement with the exchange.

Our Group provides asset management service to its customers, which contains a series of distinct services that are substantially the same and have the same pattern of transfer. Therefore, the services are identified as one performance obligation. Revenue is recognized when services are rendered according to the provisions of the underlying contracts.

Consultancy and advisory fees are recognized when the relevant transactions have been arranged or the relevant services have been rendered.

Interest Income

Interest income is recognized using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, our Group estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses.

FINANCIAL INFORMATION

Dividend Income

Dividend income is recognized when the right to receive payment is established.

Trading Gains from Financial Assets at Fair Value through Profit or Loss

Trading gains from financial assets at fair value through profit or loss is recognized on a trade date basis whilst the unrealized profits or losses are recognized from valuation at the end of reporting period. Gains/(losses) on physical commodities trading is realized on delivering the physical commodities to customers, which generally coincides with the time when physical commodities are delivered to the customers and the ownership has been transferred.

Trade Income

Trade income mainly comes from agricultural products sales of our Group's PRC risk management subsidiary.

Our Group recognizes sales revenue in the gross amount from agricultural products when fulfil our Group's performance obligations in the contract, that is, the revenue is recognized when the customer obtains control of the relevant agricultural products.

The China Futures Association issued the Rules for the Management of Commodity Risk Management Business of Futures Risk Management Companies ("**New RM Rules**"). The New RM Rules requires a futures company's risk management subsidiary to recognize revenue on a net basis for certain types of trading transactions. Our Group adopted the net recognition method for reporting operating income associated with the above certain types of trading transactions based on the New RM Rules in the reporting period, save for the commodity basis trading that falls within the scope of financial instruments standards, in accordance with the Implementation Q&A on Accounting Treatment for Standard Warehouse Receipt Transactions issued by the accounting department of MOF, whose accounting policy has been disclosed in note 3.2 (d) to the Accountant's Report in Appendix I.

Financial Instruments

Initial Recognition, Classification and Measurement of Financial Instruments

Financial assets and financial liabilities are recognized when our Group becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognized on trade date, the date on which our Group commits to purchase or sell the asset.

At initial recognition, our Group measures a financial asset or financial liability at its fair value, in the case of a financial asset or financial liability not at fair value through profit or loss, plus or minus transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs of financial assets and financial liabilities carried at fair value through profit or loss are expensed in profit or loss.

FINANCIAL INFORMATION

Financial assets are classified on the basis of our Group's business model for managing the asset and the cash flow characteristics of the assets:

- Amortized cost;
- Fair value through other comprehensive income (“FVOCI”); or
- Fair value through profit or loss (“FVPL”).

Financial assets are not reclassified subsequent to their initial recognition unless our Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

Business model reflects how our Group manages the assets in order to generate cash flows. That is, whether our Group's objective is solely to collect the contractual cash flows from the assets or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g. financial assets are held for trading purposes), then the financial assets are classified as part of “other” business model and measured at FVPL. Factors considered by our Group in determining the business model for a group of assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, how risks are assessed and managed and how managers are compensated.

Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, our Group assesses whether the financial instruments' cash flows represent solely payments of principal and interest (“SPPI”). In making this assessment, our Group considers whether the contractual cash flows are consistent with a basic lending arrangement. i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determine whether their cash flows are SPPI.

The classification requirements for debt instruments and equity instruments are described as below:

(i) Debt instruments

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective.

Classification and subsequent measurement of debt instruments depend on: (i) our Group's business model for managing the asset; and (ii) the cash flow characteristics of asset.

FINANCIAL INFORMATION

Based on these factors, our Group classifies its debt instruments into one of the following three measurement categories:

- Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent SPPI, and that are not designated at FVPL, are measured at amortized cost.
- FVOCI: Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets' cash flows represent SPPI, and that are not designated at FVPL, are measured at FVOCI.
- FVPL: Assets that do not meet the criteria for amortized cost or FVOCI are measured at FVPL.

Our Group may also irrevocably designate financial assets at FVPL if doing so significantly reduces or eliminates a mismatch created by assets and liabilities being measured on different bases.

(ii) Equity instruments

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets. Examples of equity instruments include basic ordinary shares.

Our Group subsequently measures all equity investments at FVPL, except where our Group's management has elected, at initial recognition, to irrevocably designate an equity investment at FVOCI.

(iii) Financial liabilities

Financial liabilities are classified as subsequently measured at amortized cost, except for financial liabilities at FVPL, which is applied to derivatives, financial liabilities held for trading (e.g. short positions in the trading books) and other financial liabilities designated as such at initial recognition.

Contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies. Such contingent consideration shall subsequently be measured at fair value with changes recognized in profit or loss.

An entity may, at initial recognition, irrevocably designate a financial liability as measured at fair value through profit or loss: (i) it eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as 'an accounting mismatch'); (ii) a group of financial liabilities or financial assets and financial liabilities is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about our Group is provided internally on that basis to the entity's key management personnel.

FINANCIAL INFORMATION

Reclassification of Financial Assets

When our Group changes the business model for managing its financial assets, it shall reclassify all affected financial assets, and apply the reclassification prospectively from the reclassification date. Our Group does not restate any previously recognized gains, losses (including impairment gains or losses) or interest. Reclassification date is the first day of the first reporting period following the change in business model that results in an entity reclassifying financial assets.

Fair Value of Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by our Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

The fair values of quoted financial assets and financial liabilities in active markets are based on quoted market prices. If there is no active market, our Group establishes fair value by using valuation techniques. These include the use of market approach, income approach and cost approach. When using valuation techniques, our Group uses observable inputs. Unobservable market inputs would not be used unless relevant observable inputs are not available or not practicable to access.

Default Valuation Adjustments are applied to our Group's financial liabilities at fair value through profit or loss, and assumes that Default Valuation Adjustments stay the same before and after the transfer of the liability. Default Valuation Adjustments refer to risk that enterprises fail to perform the obligation, including but not limited to their own credit risk.

Our Group uses the following hierarchy for determining and disclosing the fair values of financial assets and financial liabilities based on the inputs used when determining the fair value:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Valuation technique using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: Valuation technique using inputs for the asset or liability that is not based on observable market data (unobservable inputs).

The level of fair value measurement depends on the lowest level of input that is significant to the entire fair value measurement.

FINANCIAL INFORMATION

Subsequent Measurement of Financial Instruments

Subsequent measurement of financial instruments depends on the categories:

(i) Amortized cost

The amortized cost is the amount at which the financial asset or financial liability is measured at initial recognition: (i) minus the principal repayments; (ii) plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount; and (iii) for financial assets, adjusted for any loss allowance. Interest income from these financial assets is included in “Interest income” using the effective interest rate method.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e. its amortized cost before any impairment allowance) or to the amortized cost of a financial liability. The calculation does not consider expected credit losses (“ECL”) and includes transaction costs, premiums or discounts and fees and points paid or received that are integral to the effective interest rate. For purchased or originated credit-impaired (“POCI”) financial assets, our Group calculates the credit adjusted effective interest rate, which is calculated based on the amortized cost of the financial asset instead of its gross carrying amount and incorporates the impact of expected credit losses in estimated future cash flows.

When our Group revises the estimates of future cash flows, the carrying amount of the respective financial asset or financial liability is adjusted to reflect the new estimate discounted using the original effective interest rate. Any changes are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of financial assets and is included in “Interest income”, except for: (i) POCI financial assets, whose interest income is calculated, since initial recognition, by applying the credit-adjusted effective interest rate to their amortized cost; and (ii) financial assets that are not POCI but have subsequently become credit-impaired, whose interest income is calculated by applying the effective interest rate to their amortized cost (i.e. net of the expected credit loss allowance). If, in a subsequent period, the financial assets improve their qualities so that they are no longer credit-impaired and the improvement in credit quality is related objectively to a certain event occurring after the application of the above-mentioned rules, then the interest income is calculated by applying the effective interest rate to their gross carrying amount.

(ii) Financial assets at fair value through other comprehensive income

Debt instruments

Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses and interest revenue on the instrument’s amortized cost which are recognized in profit or loss. Interest income from these financial assets is included in “interest income” using the effective interest rate method. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to profit or loss and recognized in “Investment income”.

FINANCIAL INFORMATION

Equity instruments

The equity instrument investments that are held for purposes other than to generate investment returns are designated as FVOCI. When this election is used, fair value gains and losses are recognized in OCI and are not subsequently reclassified to profit or loss, including on disposal. Impairment losses (and reversal of impairment losses) are not reported separately from other changes in fair value. Dividends, when representing a return on such investments, continue to be recognized in profit or loss as investment income when our Group's right to receive payments is established, and it is probable that future economic benefits associated with the item will flow to our Group, and the amounts of the dividends can be measured reliably.

(iii) Financial assets at fair value through profit or loss

Debt instruments

A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognized in profit or loss and presented in the profit or loss statement within "Investment income" in the period in which it arises.

Equity instruments

Gains and losses on equity investments at FVPL are included in the "Investment income" line in the statement of profit or loss.

Contracts for the purchase or sale of non-financial items that are within the scope of financial instruments accounting standards

Our Group enters into commodity purchase and sale contracts in the ordinary course of business. With respect to commodity basis trading, our Group engages in spot commodity transactions with customers while concurrently executing commodity futures trades to hedge risks, thereby generating basis profits. As our Group typically receives and subsequently resells the underlying commodities covered by these business contracts within a short period to profit from short-term price fluctuations, these contracts are not entered into and held for the purpose of taking delivery or delivering non-financial items in accordance with predetermined purchase, sale, or usage requirements. Consequently, our Group classifies such contracts as financial instruments, to which the financial instruments accounting standards apply. The difference between the sales consideration received and the carrying value of the commodities sold is recognized in the respective period's net investment income.

Impairment of Financial Instruments

Our Group assesses on a forward-looking basis the ECL associated with its debt instrument assets carried at amortized cost and FVOCI.

FINANCIAL INFORMATION

ECL is the weighted average of credit losses with the respective risks of a default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to our Group in accordance with the contract and all the cash flows that our Group expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for POCI financial assets).

Our Group measures the ECL of a financial instrument reflects:

- (i) an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- (ii) the time value of money; and
- (iii) reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

For financial instruments whose impairment losses are measured using the ECL model, our Group assesses whether their credit risk has increased significantly since their initial recognition, and applies a three-stage impairment model to calculate their impairment allowance and recognize their ECL, as follows:

- (i) Stage I: Our Group measures the loss allowance for a financial instrument at an amount equal to the next 12 months ECL if the credit risk of that financial instrument has not increased significantly since initial recognition.
- (ii) Stage II: Our Group measures the loss allowance for a financial instrument at an amount equal to the lifetime ECL if the credit risk of that financial instrument has increased significantly since initial recognition, but is not yet deemed to be credit-impaired.
- (iii) Stage III: Our Group measures the loss allowance for a financial instrument at an amount equal to the lifetime ECL if the financial instrument is credit-impaired.

FINANCIAL INFORMATION

As of December 31, 2022, 2023 and 2024, and as of June 30, 2025, the ECL rate of receivables are determined as follows:

	As of December 31,			As of
	2022	2023	2024	June 30,
				2025
Deposits with exchange-clearing organizations	0.21%	0.30%	0.45%	0.30%
Trade receivables ⁽ⁱ⁾	82.34%	5.00%	5.03%	5.10%
Other current assets	10.85%	3.55%	12.71%	10.72%
Commission receivable	/	5.45%	5.00%	5.00%

- (i) In view of the material uncertainties surrounding the collectibility, a full impairment provision was recognized against the entire accounts receivable balance from Shanghai Hanrui Industrial Development Co., Ltd. as of December 31, 2022. This impaired receivable was subsequently derecognized through a write-off on June 28, 2023.

Our Group applies the impairment requirements for the recognition and measurement of loss allowance for debt instruments that are measured at FVOCI. The loss allowance is recognized in OCI and the impairment loss is recognized in profit or loss, and it should not reduce the carrying amount of the financial asset in the statement of financial position.

Our Group has measured the loss allowance for a financial instrument at an amount equal to the lifetime ECL in the previous reporting period, but determines to measure it at an amount equal to the next 12 months ECL at the current reporting date since the credit risk of that financial instrument has increased significantly since initial recognition is no longer met, and the amount of ECL reversal is recognized in profit or loss. Excluding POCI financial assets.

The inputs, assumptions and estimation techniques our Group used in ECL models for its debt instrument assets carried at amortized cost and FVOCI refer to note 4.1(a) to the Accountant's Report in Appendix I.

FINANCIAL INFORMATION

Derecognition of Financial Instruments

A financial asset is derecognized, when one of the following criteria is satisfied:

- the contractual rights to receive cash flows from the assets have expired; or
- our Group has transferred its rights to receive cash flows from the asset; or has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; and (a) our Group has transferred substantially all the risks and rewards of ownership of the financial asset; or (b) our Group has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset, but not retain control of the asset.

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability.

When our Group has made substantial modifications to a part of the contract terms of an existing financial liability, the relevant portion of the existing financial liability is derecognized, while the financial liability under modified terms is recognized as a new financial liability.

On derecognition of a financial liability in its entirety or partially, the difference between the carrying amount and the consideration paid (including non-cash assets transferred or new financial liabilities assumed) shall be recognized in profit or loss.

If our Group repurchases a part of a financial liability, our Group shall allocate the previous carrying amount of the financial liability between the part that continues to be recognized and the part that is derecognized based on the relative fair values of those parts on the date of the repurchase. The difference between the carrying amount allocated to the part derecognized and the consideration paid (including any non-cash assets transferred or liabilities assumed) for the part derecognized shall be recognized in profit or loss.

FINANCIAL INFORMATION

Material Accounting Judgment and Estimates

Classification of Financial Assets

When our Group determines the classification of financial assets, a number of significant judgments in the business model and the contractual cash flow characteristics of the financial assets are required.

Factors considered by our Group in determining the business model for a group of financial assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, how risks are assessed and managed and how managers or trustees are compensated.

When our Group assesses whether the contractual cash flows of the financial assets are consistent with basic lending arrangements, the main judgments are described as below: whether the principal amount may change over the life of the financial asset (for example, if there are repayments of principal); whether the interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin and cost, associated with holding the financial asset for a particular period of time.

Fair Value of Financial Instruments

The fair value of financial instruments that are not traded in active markets are determined by using valuation techniques. These techniques include discounted cash flow analysis model, Binomial Model and Black-Scholes Model etc. Observable input are used at arm's length in spite of areas such as credit risk (both own and counterparty) require management to make estimates. Changes in assumptions about these factors could affect reported fair value of financial instruments.

Income Taxes

Our Group is mainly subject to income taxes in China. There are many transactions and calculations for which the ultimate tax determination is uncertain. Our Group recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Taxation matters such as tax deductible due to asset impairment loss are subject to the decision of taxation authorities. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax and deferred tax assets and liabilities in the period in which such determination is made.

Determination of Consolidation Scope

All facts and circumstances must be taken into consideration in the assessment of whether our Group, as an investor, controls the investee. The principle of control includes three elements: (a) power over the investee; (b) exposure, or rights, to variable returns from involvement with the investee; and (c) the ability to use power over the investee to affect the amount of investors' returns. Our Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

FINANCIAL INFORMATION

DESCRIPTION OF MAJOR COMPONENTS OF OUR RESULTS OF OPERATIONS

The following table summarizes our results of operations for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)

FINANCIAL INFORMATION

Net Commission and Fee Income

The following table summarizes our net commission and fee income for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)	
Futures brokerage services	423,940	503,331	446,298	220,957	196,484
Asset management services	21,351	33,873	25,763	12,871	9,362
Mutual fund services	40,301	67,601	58,093	32,204	23,264
Other commission income ⁽¹⁾	12,446	6,854	12,243	6,316	5,429
Net commission and fee income	498,038	611,659	542,397	272,348	234,539

(1) Other commission income include income from stock option fee income, foreign exchange income and securities business income.

Futures Brokerage Services

We generate a majority of our net commission and fee income from futures brokerage services in 2022, 2023 and 2024 and for the six months ended June 30, 2024 and 2025, which represented 85.1%, 82.3%, 82.3%, 81.1% and 83.8% of our net commission and fee income for the same periods, respectively.

The commission and fee income from our futures brokerage services are generated by trading futures on behalf of clients. During the Track Record Period, our commission and fee income from futures brokerage services were primarily affected by (i) the average brokerage commission rate in the PRC markets, (ii) the trading value in the PRC markets and the trading volume in the overseas markets, and (iii) the scale of client equity. In 2022, 2023 and 2024 and for the six months ended June 30, 2024 and 2025, our average brokerage commission rate in the PRC markets was 0.275 bps, 0.334 bps, 0.225 bps, 0.265 bps and 0.158 bps, respectively. For the same periods, our trading value in the PRC markets amounted to RMB12,742.8 billion, RMB12,111.2 billion, RMB13,332.9 billion, RMB5,904.0 billion and RMB7,137.9 billion, respectively, and our trading volume in the overseas markets amounted to 38.6 million lots, 64.6 million lots, 119.7 million lots, 55.3 million lots and 57.7 million lots, respectively. As of December 31, 2022, 2023 and 2024 and as of June 30, 2024 and June 30, 2025, our client equity in the PRC futures brokerage business stood at RMB19.1 billion, RMB21.2 billion, RMB31.6 billion, RMB25.8 billion and RMB27.3 billion, respectively, and our client equity in the overseas futures brokerage business stood at HK\$9.9 billion, HK\$10.4 billion, HK\$11.9 billion, HK\$10.8 billion and HK\$15.3 billion, respectively.

FINANCIAL INFORMATION

Asset Management Services

We generate commission and fee income from asset management services by managing our customers' asset portfolio. During the Track Record Period, our commission and fee income from asset management services were primarily affected by the number of schemes and the AUM. As of December 31, 2022, 2023 and 2024 and as of June 30, 2024 and June 30, 2025, for our PRC asset management, we had 17 schemes with an AUM of RMB732 million, 24 schemes with an AUM of RMB1,283 million, 14 schemes with an AUM of RMB159 million, 20 schemes with an AUM of RMB198 million and 20 schemes with an AUM of RMB255 million, respectively. As of December 31, 2022, 2023 and 2024 and as of June 30, 2024 and June 30, 2025, for our overseas asset management, we had 38 funds with an AUM of HK\$1,953 million, 47 funds with an AUM of HK\$2,303 million, 52 funds with an AUM of HK\$2,520 million, 48 funds with an AUM of HK\$2,595 million and 49 funds with an AUM of HK\$3,376 million, respectively.

Mutual Fund Services

We generate commission and fee income from mutual funds business by managing mutual funds issued by us and from the agency sale of funds from other financial institutions to investors. During the Track Record Period, our commission and fee income from mutual funds business were primarily affected by (i) the number of mutual funds and the AUM, and (ii) the agency sale of securities investment funds. As of December 31, 2022, 2023 and 2024 and as of June 30, 2024 and June 30, 2025, we had 14 mutual funds with an AUM of RMB11,697.6 million, 15 mutual funds with an AUM of RMB17,254.7 million, 19 mutual funds with an AUM of RMB14,804.8 million, 18 mutual funds with an AUM of RMB16,148.3 million and 20 mutual funds with an AUM of RMB21,526.9 million, respectively. In 2022, 2023 and 2024 and for the six months ended June 30, 2024 and 2025, the agency sale of securities investment funds completed by us amounted to RMB1,518.1 million, RMB507.8 million, RMB171.3 million, RMB49.1 million and RMB143.9 million, respectively.

Other Commission Income

We also generate other commission income from stock option fee income, foreign exchange income and securities business income.

FINANCIAL INFORMATION

Net Interest Income

The following table summarizes our net interest income for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)	
Interest income from own funds	52,993	66,917	81,971	44,939	29,392
Interest income from client funds	312,959	536,914	644,121	333,600	243,806
Interest expense on loans, bonds and others	(37,605)	(59,791)	(42,362)	(22,501)	(19,747)
Consolidated structured entities' distribution	(1,809)	1,335	(1,930)	(5,245)	(162)
Net interest income	326,538	545,375	681,800	350,793	253,289

Our interest income includes (i) interest income from own funds deposits, (ii) interest income from client funds, and (iii) consolidated structured entities' distribution, which includes distributions of earnings to unit holders of asset management products other than the Company, or continuing inputs received from other unit holders of asset management products. Our interest expense primarily includes interest expense on loans, bonds and others.

Interest income from client funds is the largest component of our net interest income, which accounted for 95.8%, 98.4%, 94.5%, 95.1% and 96.3% of our net interest income in 2022, 2023 and 2024 and for the six months ended June 30, 2024 and 2025, respectively. We generate interest income from client funds deposited with exchanges or banks. The following table summarizes our interest income from client funds for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)	
Interest income from client funds in the PRC	194,360	164,164	195,462	100,668	81,057
Interest income from client funds overseas	118,599	372,750	448,659	232,932	162,749
Interest income from client funds	312,959	536,914	644,121	333,600	243,806

FINANCIAL INFORMATION

During the Track Record Period, our interest income from client funds was mainly affected by (i) interest rates as determined based on the market conditions, and (ii) the scale of client equity. As of December 31, 2022, 2023 and 2024 and as of June 30, 2024 and June 30, 2025, our client equity in PRC futures brokerage business stood at RMB19.1 billion, RMB21.2 billion, RMB31.6 billion, RMB25.8 billion and RMB27.3 billion, respectively, and our client equity in the overseas futures brokerage business stood at HK\$9.9 billion, HK\$10.4 billion, HK\$11.9 billion, HK\$10.8 billion and HK\$15.3 billion, respectively. As of the same time, our total client equity from our overseas futures, securities, and leveraged foreign exchange brokerage services stood at HK\$11.9 billion, HK\$12.5 billion, HK\$13.8 billion, HK\$13.4 billion and HK\$17.8 billion, respectively.

Net Investment Gains

The following table summarizes our net investment gains for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)	
Net realized gains/(losses) of					
Financial assets at fair value through profit or loss	(146,323)	(22,894)	(250,001)	(215,074)	66,697
Financial liabilities at fair value through profit or loss	97,462	198,650	312,998	141,819	63,015
Others	15,505	55,595	41,862	12,116	(6,954)
Unrealized fair value changes of					
Financial assets at fair value through profit or loss	104,700	(79,760)	12,765	102,349	(35,368)
Financial liabilities at fair value through profit or loss	26,950	6,243	(36,644)	(16,239)	(10,347)
Executory contracts	26,415	(67,690)	(1,748)	14,085	(4,368)
Physical commodities	(12,331)	6,433	(750)	(5,116)	(1,789)
Exchange losses	(10,615)	(1,685)	(8,146)	(3,837)	9,161
	101,763	94,892	70,336	30,103	80,047

Our net investment gains are primarily attributable to (i) our risk management services, (ii) proprietary investment, and (iii) exchange gains or losses from overseas business and foreign exchange operations.

FINANCIAL INFORMATION

To add clarity to the analysis of our investment activities, we have included a separate table below that illustrates our net investment gains by the type of activity:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)	
Risk management services	121,196	43,346	89,157	32,527	31,929
Proprietary investment	(8,819)	53,230	(10,675)	1,412	38,957
Exchange losses	(10,614)	(1,684)	(8,145)	(3,836)	9,161
Net investment gains	101,763	94,892	70,336	30,103	80,047

Risk Management Services

The following table sets out the net investment gains from our risk management services by segments:

	For the year ended December 31			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)	
Basis trading	26,437	31,751	27,309	19,092	10,223
OTC derivatives	28,345	28,407	70,271	21,551	41,642
Market making	66,415	(16,812)	(8,423)	(8,117)	(19,936)
	121,196	43,346	89,157	32,527	31,929

For basis trading business, our net investment gains increased from RMB26.4 million in 2022 to RMB31.8 million in 2023 primarily due to favorable changes in the commodity market and our trading strategies, and decreased to RMB27.3 million in 2024, primarily due to adjustments in our basis trading strategies in response to macroeconomic conditions and commodity market trends. Our net investment gains decreased from RMB19.1 million for the six months ended June 30, 2024 to RMB10.2 million for the six months ended June 30, 2025, primarily due to (i) the intensification of macroeconomics and credit risk, which led to a reduction in the scale of our basis trading activities, and (ii) the commodity market conditions and lower basis volatility, which resulted in fewer trading opportunities and narrower profit margins.

FINANCIAL INFORMATION

For OTC derivatives business, our net investment gains remained stable from RMB28.3 million in 2022 to RMB28.4 million in 2023 and further increased to RMB70.3 million in 2024 primarily due to the relatively stable commodity market which contributed to the performance in the commodity business. Our net investment gains increased from RMB21.6 million for the six months ended June 30, 2024 to RMB41.6 million for the six months ended June 30, 2025, primarily due to the commodity price volatility caused by U.S. tariff policies in 2025, which led to an increase in volatility long positions to realize gains.

For market making business, we generated net investment gains of RMB66.4 million in 2022 while incurred net investment losses of RMB16.8 million in 2023, primarily due to volatile market conditions and the increasing competition for the market making business. Our investment losses from market making business decreased to RMB8.4 million in 2024, primarily due to our internal control over the market making business to actively reduce the probability of risk events and optimization and adjustment of market making strategies. Our investment losses from market making business increased from RMB8.1 million for the six months ended June 30, 2024 to RMB19.9 million for the six months ended June 30, 2025, primarily as a result of volatile market conditions due to U.S. tariff policies and increasing competition for the market making business.

Comprehensive Gains from Risk Management Services

We use comprehensive gains, which consist of trade income from basis trading and net investment gains or losses relating to risk management services, to evaluate the performance of our risk management services. Using comprehensive gains from risk management services allows us to consider the combined impact of spot transactions and hedging transactions on the futures and derivatives and equity markets, providing a more useful analysis of investment gains and effectiveness of our risk management services. The following table illustrates the calculation of comprehensive gains from our risk management services:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)	
Trade income from basis trading	374	–	1,873	330	61
Net investment gains/(losses) of risk management services	121,196	43,346	89,157	32,527	31,929
Comprehensive gains from risk management services	121,570	43,346	91,029	32,857	31,990

FINANCIAL INFORMATION

We generated comprehensive gains from risk management services of RMB121.6 million, RMB43.3 million and RMB91.0 million in 2022, 2023 and 2024, and RMB32.9 million and RMB32.0 million for the six months ended June 30, 2024 and 2025, respectively.

Proprietary Investment

We generate net investment gains from proprietary investment primarily through investment in financial products, including fixed income securities, asset management products and cash management products.

The following table shows our investment portfolio and the respective amount as of the dates indicated:

	As of December 31,			As of June 30,
	2022	2023	2024	2025
	(RMB'000)			
Debt securities	516,996	2,067,432	1,360,052	1,404,555
Financing products	465,502	3	200,000	10,002
Equity instruments	493,964	686,687	408,057	254,130
	1,476,462	2,754,122	1,968,109	1,668,687

The above investment portfolio from our proprietary investment generated net investment losses of RMB8.8 million in 2022, net investment gains of RMB53.2 million in 2023, net investment losses of RMB10.7 million in 2024 and net investment gains of RMB39.0 million for the six months ended June 30, 2025.

In terms of proprietary investment, we primarily allocate towards net-value products with transparent structures issued by public funds, trusts, asset management firms, and private equity funds. Our investment generally focuses on the principle of fair valuation of the underlying assets while meeting the liquidity requirements. The product strategies involve, among others, managed futures, relative value strategies, equity strategies, options strategies and bond strategies.

Before investing a prospective product, we conduct thorough due diligence on the management team and evaluate the product's risk and return profile. The evaluation criteria include characteristics of the strategy, risk control mechanisms, suitable market conditions, scalability limits, development team expertise, and historical performance attribution. Specifically, we focus on assets that highlight the fund manager's capabilities to generate returns that exceed the performance of a benchmark or the overall market while cautiously allocating towards speculative assets with strong market sensitivity. With such strategies, we aim to achieve a stable long-term growth of proprietary funds.

FINANCIAL INFORMATION

Exchange Losses

Although our reporting currency is Renminbi, our overseas operations generated income and expenses principally from foreign currencies, primarily HKD and USD. Exchange losses represent the market fluctuations of foreign exchange rates between Renminbi and other currencies.

Trade Income

Our trade income primarily includes trading income from our agricultural trading business.

Other Operating Income

The following table summarizes our other operating income for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	<i>(RMB'000)</i>			<i>(unaudited)</i>	
Government grants	9,054	13,057	1,367	778	734
“Insurance + Futures” income	2,230	14,031	28,640	14,026	3,542
Other income	14,172	13,234	27,969	6,345	20,736
Other operating income	25,456	40,322	57,976	21,149	25,012

Our other operating income consists of (i) government grants, which are one-off grants we received from the local government to support our business, (ii) the income from “Insurance + Futures” business, (iii) other income comprising income for investor education and IT infrastructure fee from clients and (iv) certain market making income from risk management services.

FINANCIAL INFORMATION

Operating Expenses

The following table summarizes our operating expenses for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)	
Staff costs	(360,008)	(434,687)	(428,655)	(206,638)	(194,249)
Reversal/(Impairment losses) of impairment losses on financial assets, net	2,817	(10,346)	(19,501)	(21,618)	3,682
Depreciation and amortization	(48,844)	(48,895)	(50,977)	(26,806)	(26,022)
Trade expenses	(1,900)	(625)	(478)	(223)	(192)
Other operating expenses ⁽¹⁾	(250,427)	(311,396)	(336,664)	(149,301)	(117,787)
Operating expenses	(658,362)	(805,949)	(836,275)	(404,586)	(334,568)

(1) Other operating expenses mainly consist of (i) information service fees, (ii) office expenses, (iii) “Insurance + Futures” expenses, (iv) information system maintenance fees, and (v) other expenses.

Staff Costs

Our staff costs mainly consist of salaries and bonuses paid to employees, pension, employee social security plans, labor union charges, employee education fees, and other welfare.

Reversal/(Impairment Losses) of Impairment Losses on Financial Assets, Net

Our impairment losses on financial assets consist of net impairment losses on deposits receivable and account receivable. In the overseas markets, we deposit certain funds with qualified financial service providers and/or dealers to assist with the clearing of certain products. We will make a provision for impairment losses based on the scale of the deposited funds at the end of the accounting period.

Depreciation and Amortization

Our depreciation and amortization mainly consist of (i) depreciation of right-of-use assets, (ii) depreciation of property and equipment, (iii) amortization of intangible assets, (iv) amortization of long-term deferred expenses, and (v) depreciation of investment properties.

FINANCIAL INFORMATION

Trade Expenses

Our trade expenses primarily include trading expenses from our agricultural trading business.

Operating Profit

Our operating profit is calculated as our operating income less operating expenses.

Income Tax Expenses

We are subject to income tax on an entity basis on profits arising in or derived from the jurisdictions in which members of our Group are domiciled and operate. During the Track Record Period, the statutory EIT rate in the PRC is 25% and the Hong Kong profit tax rate is 16.5%. Our effective income tax rate was 16.6%, 10.2%, 12.2% and 10.1% in 2022, 2023 and 2024 and for the six months ended June 30, 2025, respectively. As of the Latest Practicable Date and during the Track Record Period, we fulfilled all our tax obligations and did not have any unresolved tax disputes. See note 19 to the Accountant's Report in Appendix I.

RESULTS OF OPERATIONS

Six Months Ended June 30, 2025 Compared to Six Months Ended June 30, 2024

Net Commission and Fee Income

Our net commission and fee income decreased by 13.9% from RMB272.3 million for the six months ended June 30, 2024 to RMB234.5 million for the six months ended June 30, 2025 primarily due to futures brokerage services, asset management services, and mutual fund services. In particular:

- *Futures brokerage services:* Our net commission and fee income from futures brokerage decreased by 11.1% to RMB196.5 million for the six months ended June 30, 2025 from RMB221.0 million for the six months ended June 30, 2024, mainly due to lower income in the PRC markets. Despite a higher trading value in the PRC markets, our net commission and fee income from futures brokerage decreased from RMB155.3 million for the six months ended June 30, 2024 to RMB113.1 million for the six months ended June 30, 2025, primarily due to the decrease of average brokerage commission rates from 0.265 bps for the six months ended June 30, 2024 to 0.158 bps for the six months ended June 30, 2025. The decrease in average brokerage commission rates was primarily due to changes in the product mix traded by our clients in the six months ended June 30, 2025 as compared to the six months ended June 30, 2024, which were: (i) a shift in our clients' trading activity toward products with lower commission rates; and (ii) a higher proportion of trading of products charged under a volume-based commission model instead of a value-based commission model. Overseas, net commission and fee income rose from RMB77.2 million to RMB96.9 million.

FINANCIAL INFORMATION

- *Asset management services:* Our net commission and fee income from asset management services decreased by 27.3% to RMB9.4 million for the six months ended June 30, 2025 from RMB12.9 million for the six months ended June 30, 2024. This was primarily attributable to a reduction of the scale of our PRC asset management services, with AUM declining from RMB1,283 million as of December 31, 2023 to RMB198 million as of June 30, 2024 compared to AUM increasing from RMB159 million as of December 31, 2024 to RMB255 million as of June 30, 2025. As the decline of AUM during the six months ended June 30, 2024 was from the peak recorded at the end of 2023, the average AUM during this period remained relatively high, which resulted in higher commission income compared to the six months ended June 30, 2025. Overseas, the AUM under asset management rose from HK\$2,595 million as of June 30, 2024 to HK\$3,376 million as of June 30, 2025. Our operating income from overseas asset management services rose from RMB7.8 million for the six months ended June 30, 2024 to RMB9.1 million for six months ended June 30, 2025.
- *Mutual fund services:* Our net commission and fee income from mutual fund services decreased by 27.8% to RMB23.3 million for the six months ended June 30, 2025 from RMB32.2 million for the six months ended June 30, 2024. This decline was primarily attributable to the reduction of average AUM of our mutual fund businesses.
- *Other commission income:* Our net commission and fee income from other commission income decreased by 14.0% to RMB5.4 million for the six months ended June 30, 2025 from RMB6.3 million for the six months ended June 30, 2024. This decline was primarily attributable to (i) the decline of investment consulting income due to decreased client advisory demand and (ii) the decline of income from foreign exchange due to decreased foreign exchange transactions.

Net Interest Income

Our net interest income decreased by 27.8% to RMB253.3 million for the six months ended June 30, 2025 from RMB350.8 million for the six months ended June 30, 2024, primarily due to the decline in interest rates both in the PRC and overseas.

Net Investment Gains

Our net investment gains increased by 165.9% to RMB80.0 million for the six months ended June 30, 2025 from RMB30.1 million for the six months ended June 30, 2024. This increase was primarily attributable to (i) the increase in net investment gains generated from OTC derivatives business as a result of the commodity price volatility caused by the U.S. tariff policies in 2025, which led to an increase in volatility long positions and (ii) the increase in net investment gains generated from proprietary investment.

FINANCIAL INFORMATION

Trade Income

Our trade income slightly decreased from RMB0.5 million for the six months ended June 30, 2024 to RMB0.3 million for the six months ended June 30, 2025.

Other Operating Income

Our other operating income from government grants remained stable, amounting to RMB0.8 million for the six months ended June 30, 2025 and RMB0.7 million for the six months ended June 30, 2024.

Our other operating income from “Insurance + Futures” decreased by 74.7% to RMB3.5 million for the six months ended June 30, 2025 from RMB14.0 million for the six months ended June 30, 2024, primarily due to the revenue recognition of certain “Insurance + Futures” projects undertaken with Dalian Commodity Exchange in prior years, resulting a higher amount in the six months ended June 30, 2024.

Our other operating income from other income increased by 226.8% to RMB20.7 million for the six months ended June 30, 2025 from RMB6.3 million for the six months ended June 30, 2024, primarily due to the inclusion of certain market making income from risk management services in 2025 under other income, in accordance with the policies of the relevant exchange.

Operating Expenses

Staff Costs

Our staff costs remained relatively stable, amounting to RMB194.2 million for the six months ended June 30, 2025 and RMB206.6 million for the six months ended June 30, 2024.

Reversal/(Impairment Losses) of Impairment Losses on Financial Assets, Net

Our credit impairment reversal amounted to RMB3.7 million for the six months ended June 30, 2025 as compared to credit impairment losses of RMB21.6 million for the six months ended June 30, 2024, primarily due to lower balance of receivable deposits with dealers in the overseas markets as of June 30, 2025 compared to June 30, 2024. We deposit certain funds with qualified financial service providers and/or dealers to assist with the clearing of certain products, thus having receivable deposits with dealers in the overseas markets.

Depreciation and Amortization

Our depreciation and amortization remained stable, amounting to RMB26.0 million for the six months ended June 30, 2025 and RMB26.8 million for the six months ended June 30, 2024.

FINANCIAL INFORMATION

Trade Expenses

Our trade expenses remained stable, amounting to RMB0.2 million for the six months ended June 30, 2025 and RMB0.2 million for the six months ended June 30, 2024.

Other Operating Expenses

Our other operating expenses decreased by 21.1% to RMB117.8 million for the six months ended June 30, 2025 from RMB149.3 million for the six months ended June 30, 2024, primarily due to the decreasing cost of our “Insurance + Futures” business, in line with the decrease of income from “Insurance + Futures” business as certain “Insurance + Futures” projects undertaken with Dalian Commodity Exchange in prior years were recognized for the six months ended June 30, 2024.

Operating Profit

As a result of the foregoing, our operating profit slightly decreased to RMB258.6 million for the six months ended June 30, 2025 from RMB270.3 million for the six months ended June 30, 2024.

Other (Losses)/Gains, Net

Our other gains amounted to RMB1.2 million for the six months ended June 30, 2024 while we had a loss of RMB1.3 million for the six months ended June 30, 2025, primarily due to the recovery of certain losses from previous years and an increase in breach penalty from clients due to their contractual breach.

Profit before Income Tax

As a result of the foregoing, our profit before income tax slightly decreased to RMB257.4 million for the six months ended June 30, 2025 from RMB271.2 million for the six months ended June 30, 2024.

Income Tax Expenses

Our income tax expenses decreased by 35.9% to RMB26.1 million for the six months ended June 30, 2025 from RMB40.7 million for the six months ended June 30, 2024, which was in line with the decrease of our taxable profit.

FINANCIAL INFORMATION

Year Ended December 31, 2024 Compared to Year Ended December 31, 2023

Net Commission and Fee Income

Our net commission and fee income decreased by 11.3% from RMB611.7 million in 2023 to RMB542.4 million in 2024 primarily due to decreases in those attributable to futures brokerage services, asset management services, and mutual fund services. In particular:

- *Futures brokerage services:* Our net commission and fee income from futures brokerage decreased by 11.3% to RMB446.3 million in 2024 from RMB503.3 million in 2023, mainly due to lower income in the PRC markets. In the PRC markets, our net commission and fee income from futures brokerage decreased by 25.8% to RMB300.0 million in 2024 from RMB404.3 million in 2023. Despite higher trading value and growing client equity in the PRC markets, our average commission rate for PRC futures brokerage fell from 0.334 bps in 2023 to 0.225 bps in 2024. Overseas, net commission and fee income rose by 45.7% from RMB100.0 million in 2023 to RMB145.7 million in 2024, as a result of increasing trading volume. Although our net commission and fee income declined, the growth in trading value and client equity in the PRC markets and the trading volume in the overseas markets highlight our ability to attract and retain clients, ensuring we adapt to market and regulatory changes while maintaining stability.
- *Asset management services:* Our net commission and fee income from asset management services decreased by 23.9% to RMB25.8 million in 2024 from RMB33.9 million in 2023. This was primarily attributable to a reduction in the number of schemes under management in our PRC asset management, resulting in a decrease of AUM for the business. The reduction of AUM was a result of our initiation of a clean-up of bond-related business under our asset management operations out of prudence. This shift refocused our schemes on commodities, futures, and derivatives, aligning our asset management business more closely with our core strengths and market opportunities. These adjustments reflect our commitment to an efficient and compliant asset management business for long-term sustainability. Overseas, the AUM under asset management rose from HK\$2,303 million as of December 31, 2023 to HK\$2,520 million as of December 31, 2024. Our operating income from overseas asset management services rose by 8.9% from RMB19.2 million in 2023 to RMB20.9 million in 2024.
- *Mutual fund services:* Our net commission and fee income from mutual fund services decreased by 14.1% to RMB58.1 million in 2024 from RMB67.6 million in 2023. This decline was primarily attributable to the redemption of funds in consideration of market conditions and clients' risk preference adjustment, which resulted in a decrease of the AUM of our mutual funds. Our net commission and fee income from agency sale of funds business decreased by 77.8% from RMB4.5 million in 2023 to RMB1.0 million in 2024, primarily attributed to a decline in sales volume by 66.3% from RMB507.8 million in 2023 to RMB171.3 million in 2024.

FINANCIAL INFORMATION

- *Other commission income:* Our net commission and fee income from other commission income increased by 78.6% to RMB12.2 million in 2024 from RMB6.9 million in 2023. This growth was driven by higher commission income from overseas securities services, increased commission income from stock options, and a rise in investment consulting income. Net commission and fee income from overseas securities services rose by 152.4% from RMB2.1 million in 2023 to RMB5.3 million in 2024. This increase highlights the success of our efforts to diversify revenue streams and capitalize on opportunities in other service areas.

Net Interest Income

Our net interest income increased by 25.0% to RMB681.8 million in 2024 from RMB545.4 million in 2023, primarily due to higher interest income from our own funds and client funds. The increase of net interest income from client funds was attributed to the growth in client equity for both the PRC futures brokerage and the total overseas business from 2023 to 2024. Despite the downward trend in the PRC and overseas markets interest rates in the second half of 2024, we took active and effective interest rate management measures to lock in favorable rates which helped with mitigating the impact of the rate reduction.

Net Investment Gains

Our net investment gains decreased by 25.9% to RMB70.3 million in 2024 from RMB94.9 million in 2023. This decline was primarily attributable to a decrease in net investment gains generated from proprietary investment as a result of our investment strategies and changes in market conditions. The increase in gains from hedging transactions in our risk management services partially offsetted the effect of the decline.

Trade Income

Our trade income slightly increased from RMB0.6 million in 2023 to RMB2.3 million in 2024.

Other Operating Income

Our other operating income from government grants decreased by 89.5% to RMB1.4 million in 2024 from RMB13.1 million in 2023, primarily due to the non-recurring subsidies we received in 2023.

Our other operating income from “Insurance + Futures” increased by 104.1% to RMB28.6 million in 2024 from RMB14.0 million in 2023. This growth was primarily driven by the increase in the scale of our “Insurance + Futures” business.

Our other operating income from other income amounted to RMB28.0 million in 2024, which primarily consists of income from investor education and IT infrastructure fee from clients.

FINANCIAL INFORMATION

Operating Expenses

Staff Costs

Our staff costs remained stable, amounting to RMB428.7 million in 2024 as compared to RMB434.7 million in 2023.

Reversal/(Impairment Losses) of Impairment Losses on Financial Assets, Net

Our impairment losses on financial assets increased by 88.5% to RMB19.5 million in 2024 from RMB10.3 million in 2023, primarily due to higher receivable deposits with dealers balance in the overseas markets as of December 31, 2024, as a result of our overseas services expansion. We deposit certain funds with qualified financial service providers and/or dealers to assist with the clearing of certain products, thus having receivable deposits with dealers in the overseas markets.

Depreciation and Amortization

Our depreciation and amortization increased by 4.3% to RMB51.0 million in 2024 from RMB48.9 million in 2023, primarily due to our increased leasing of office properties which are right-of-use assets.

Trade Expenses

Our trade expenses remained stable, amounting to RMB0.5 million in 2024 and RMB0.6 million in 2023.

Other Operating Expenses

Our other operating expenses increased by 8.1% to RMB336.7 million in 2024 from RMB311.4 million in 2023, primarily due to the rising cost of our “Insurance + Futures” business, in line with the expanding business scale.

Operating Profit

As a result of the foregoing, our operating profit increased by 6.5% to RMB518.6 million in 2024 from RMB486.9 million in 2023.

Other (Losses)/Gains, Net

Our other gains amounted to RMB3.7 million in 2024 while we had a loss of RMB38.1 million in 2023, primarily due to the recovery of certain losses from previous years and an increase in breach penalty from clients due to their contractual breach.

FINANCIAL INFORMATION

Profit before Income Tax

As a result of the foregoing, our profit before income tax increased by 16.3% to RMB521.7 million in 2024 from RMB448.4 million in 2023.

Income Tax Expenses

Our income tax expenses increased by 39.5% to RMB63.6 million in 2024 from RMB45.6 million in 2023, which was in line with the increase of our taxable profit.

Year Ended December 31, 2023 Compared to Year Ended December 31, 2022

Net Commission and Fee Income

Our net commission and fee income increased by 22.8% to RMB611.7 million in 2023 from RMB498.0 million in 2022. We recorded growth in net commission and fee income across futures brokerage services, asset management services, and mutual fund services, which offset the decline in net commission income and fee income from other commission income. In particular:

- *Futures brokerage services:* Our net commission and fee income from futures brokerage services increased by 18.7% to RMB503.3 million in 2023 from RMB423.9 million in 2022. This growth was primarily attributed to an increase of the average PRC futures brokerage commission rate from 0.275 bps in 2022 to 0.334 bps in 2023 and a growth of trading volume in the overseas markets.
- *Asset management services:* Our net commission and fee income from asset management services increased by 58.6% to RMB33.9 million in 2023 from RMB21.4 million in 2022, primarily due to an increase in the number of schemes under management and AUM for both of our PRC asset management and overseas asset management, having 17 schemes with an AUM of RMB732 million as of December 31, 2022 to 24 schemes with an AUM of RMB1,283 million as of December 31, 2023 for the PRC asset management and 38 funds with an AUM of HK\$1,953 million as of December 31, 2022 to 47 funds with an AUM of HK\$2,303 million as of December 31, 2023 for the overseas asset management.
- *Mutual fund services:* Our net commission and fee income from mutual fund services increased by 67.7% to RMB67.6 million in 2023 from RMB40.3 million in 2022. This increase was primarily due to an increase of mutual funds under management with an AUM of RMB11,697.6 million as of December 31, 2022, to an AUM of RMB17,254.7 million as of December 31, 2023.
- *Other commission income:* Our net commission and fee income from other commission income decreased by 44.9% to RMB6.9 million in 2023 from RMB12.4 million in 2022, mainly due to reduced commission income from securities services and stock options.

FINANCIAL INFORMATION

Net Interest Income

Our net interest income increased by 67.0% to RMB545.4 million in 2023 from RMB326.5 million in 2022. This growth was primarily attributed to (i) higher interest income from own funds and client funds, which aligned with the growth in client equity for both the PRC futures brokerage and the total overseas business from 2022 to 2023, and (ii) higher interest rates in the overseas markets during 2023.

Net Investment Gains

Our net investment gains decreased by 6.8% to RMB94.9 million in 2023 from RMB101.8 million in 2022. This decrease was primarily due to a reduction of gains from our market making business as a result of volatile market conditions and the increasing competition for the market making business. However, the decline in gains generated from risk management services was partially mitigated by a significant increase in the scale of proprietary investment and exchange gains during the same period.

Trade Income

Our trade income slightly decreased from RMB2.6 million in 2022 to RMB0.6 million in 2023.

Other Operating Income

Our other operating income from government grants increased by 44.2% to RMB13.1 million in 2023 from RMB9.1 million in 2022, primarily due to certain non-recurring government grants we received in 2023 to support our business.

Our other operating income from “Insurance + Futures” increased by 529.2% to RMB14.0 million in 2023 from RMB2.2 million in 2022, primarily due to the growth of our “Insurance + Futures” business.

Our other operating income from other income slightly decreased by 6.6% to RMB13.2 million in 2023 from RMB14.2 million in 2022.

Operating Expenses

Staff Costs

Our staff costs increased by 20.7% to RMB434.7 million in 2023 from RMB360.0 million in 2022, primarily due to an increase of incentive payments and bonuses we paid to employees, which was in line with the growth of our business scale.

FINANCIAL INFORMATION

Reversal/(Impairment Losses) of Impairment Losses on Financial Assets, Net

Our impairment losses on financial assets amounted to RMB10.3 million in 2023 as compared to a credit impairment reverse of RMB2.8 million in 2022, primarily due to higher receivable deposits with dealers balance in the overseas markets as of December 31, 2023, as a result of our overseas services expansion. We deposit certain funds with qualified financial service providers and/or dealers to assist with the clearing of certain products, thus having receivable deposits with dealers in the overseas markets.

Depreciation and Amortization

Our depreciation and amortization increased slightly from RMB48.8 million in 2022 to RMB48.9 million in 2023.

Trade Expenses

Our trade expenses slightly decreased from RMB1.9 million in 2022 to RMB0.6 million in 2023.

Other Operating Expenses

Our other operating expenses increased by 24.3% to RMB311.4 million in 2023 from RMB250.4 million in 2022, primarily due to increases in (i) information service fees, and (ii) office expenses.

Operating Profit

As a result of the foregoing, our operating profit increased by 64.5% to RMB486.9 million in 2023 from RMB296.0 million in 2022.

Other (Losses)/Gains, Net

Our other losses amounted to RMB38.1 million in 2023 as compared to RMB0.7 million in 2022, primarily due to the accounting treatment for inventory with recourse.

Profit before Income Tax

As a result of the foregoing, our profit before income tax increased by 52.1% to RMB448.4 million in 2023 from RMB294.8 million in 2022.

Income Tax Expenses

Our income tax expenses decreased by 6.8% to RMB45.6 million in 2023 from RMB48.9 million in 2022, primarily due to a decrease of taxable income domestically and increases of non-taxable income and low tax rate income for our overseas business.

FINANCIAL INFORMATION

Profit for the Year/Period and Net Margin

The following table sets forth the key measurements of our profitability for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	<i>(RMB'000, except for %)</i>				
	<i>(unaudited)</i>				
Operating profit	296,044	486,923	518,568	270,344	258,563
Operating margin ⁽¹⁾	31.0%	37.7%	38.3%	40.1%	43.6%
Profit for the year/period	245,912	402,822	458,037	230,476	231,327
Net margin ⁽²⁾	25.8%	31.2%	33.8%	34.1%	39.0%

(1) Operating profit as divided by operating income.

(2) Profit for the year/period as divided by operating income.

Our business lines and services have different operating margins, growth prospects and driving forces. Despite varying growth trends under different economic conditions, our business lines and services collectively contribute to the overall growth of our business operations. With diverse business lines and a growing domestic and international footprint, we are able to strategically allocate resources to maximize returns. Our continuous improvements highlight the effectiveness of our strategic focus on key business segments and operational efficiency. Specifically, our performance has been driven by the “four pillars” of PRC futures brokerage, PRC wealth management, PRC risk management services and overseas financial services. These segments have been further supported by our disciplined cost control measures, ensuring that we maximize operational efficiency while scaling our business.

Additionally, our robust mid-and back-office capabilities, including in-depth research, IT infrastructure, and system support, have played a critical role in enhancing our operational resilience and ability to capture market opportunities. These capabilities not only enable us to deliver high-quality services to clients but also ensure seamless execution across our diversified business lines. By leveraging these strengths, we have achieved consistent improvements in operating margin and net margin, reflecting our ability to manage costs effectively while driving growth in our businesses.

Comparisons between six months ended June 30, 2024 and six months ended June 30, 2025

Our profit for the period remained stable for the six months ended June 30, 2024 compared to the six months ended June 30, 2025, amounting to RMB230.5 million and RMB231.3 million, respectively.

FINANCIAL INFORMATION

Comparisons between 2024 and 2023

In 2024, our profit for the year grew by 13.7%, rising from RMB402.8 million in 2023 to RMB458.0 million. This growth was accompanied by an improvement in both operating margin and net margin, primarily driven by higher profitability from overseas financial services and PRC risk management services, as well as a reduction in losses from our PRC wealth management.

Comparisons between 2023 and 2022

In 2023, our profit for the year increased by 63.8%, from RMB245.9 million in 2022 to RMB402.8 million. The improvement in operating margin and net margin during this period was largely attributable to enhanced profitability from overseas financial services.

SUMMARY SEGMENT RESULTS

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments.

We have five principal business segments: (i) PRC futures brokerage, (ii) PRC wealth management, (iii) PRC risk management services, (iv) overseas financial services, and (v) others. The following discussions of our segment operating income, segment operating expenses and segment results take into account our intersegment operating income and inter-segment operating expenses.

Operating Income

The following table sets forth our segment operating income for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	(RMB'000)			(unaudited)	
PRC futures brokerage	536,199	571,099	494,386	257,040	190,436

Operating margin	31.0	37.7	38.3	40.1	43.6

PRC Futures Brokerage

Our PRC futures brokerage involves commodity futures and financial futures. Futures brokerage is our founding business and our cornerstone. It serves as an enabler and driver of growth for our other business segments. Segment operating income from our PRC futures brokerage primarily consists of commission income and interest income. Segment operating expenses primarily consist of staff costs, information service costs, office expenses and other operating expenses.

The decrease in segment profit margin of our PRC futures brokerage during the Track Record Period was primarily driven by intensified market competition and a prevailing industry trend of declining average brokerage commission rates. While staff costs may fluctuate to some extent in response to the increase in trading volume, the determination of staff costs is based on our Group's comprehensive remuneration policy. This policy involves an overall assessment that takes into account not only the performance and specific requirements of the PRC futures brokerage segment, but also the performance and strategic needs of other business segments within our Group. Factors such as market benchmarks, employee contributions, and our Group's long-term business objectives are also considered to ensure that salary and remuneration levels remain competitive and aligned with our Group's broader goals.

FINANCIAL INFORMATION

Comparisons between six months ended June 30, 2024 and six months ended June 30, 2025

Segment operating income of our PRC futures brokerage decreased by 25.9% to RMB190.4 million for the six months ended June 30, 2025 from RMB257.0 million for the six months ended June 30, 2024, primarily due to (i) decrease of interest income and (ii) decrease of average brokerage commission rates from 0.265 bps for the six months ended June 30, 2024 to 0.158 bps for the six months ended June 30, 2025. The decrease in average brokerage commission rates was primarily due to changes in the product mix traded by our clients in the six months ended June 30, 2025 as compared to the six months ended June 30, 2024, which were: (i) a shift in our clients' trading activity toward products with lower commission rates; and (ii) a higher proportion of trading of products charged under a volume-based commission model instead of a value-based commission model.

Segment operating expenses for our PRC futures brokerage also declined, decreasing by 16.4% to RMB178.7 million for the six months ended June 30, 2025 from RMB213.8 million for the same period in 2024, primarily due to lower staff costs. However, the reduction in operating expenses was not sufficient to offset the decrease in operating income. As a result, segment operating profit decreased from RMB43.3 million for the six months ended June 30, 2024 to RMB11.7 million for the six months ended June 30, 2025.

Comparisons between 2024 and 2023

Segment operating income of our PRC futures brokerage decreased by 13.4% to RMB494.4 million in 2024 from RMB571.1 million in 2023, primarily due to the decrease of average brokerage commission rates from 0.334 bps in 2023 to 0.225 bps in 2024. Despite a growing trading value from RMB12,111.2 billion in 2023 to RMB13,332.9 billion in 2024 and a rising client equity from RMB21.2 billion as of December 31, 2023, to RMB31.6 billion as of December 31, 2024, such increases for our PRC futures brokerage only partially set off the deduction of commission rates. Segment operating expenses of our PRC futures brokerage business decreased by 1.4% to RMB458.6 million in 2024 from RMB465.1 million in 2023.

As a result, the segment operating profit of our PRC futures brokerage decreased by 66.3% to RMB35.8 million in 2024 from RMB106.0 million in 2023. The segment operating margin of our PRC futures brokerage decreased to 7.2% in 2024 from 18.6% in 2023.

Comparisons between 2023 and 2022

Segment operating income increased by 6.5% to RMB571.1 million in 2023 from RMB536.2 million in 2022, primarily due to the increase of average brokerage commission rates from 0.275 bps in 2022 to 0.334 bps in 2023. Our segment operating expenses increased by 12.5% from RMB413.4 million in 2022 to RMB465.1 million in 2023 as a result of increasing staff costs.

As a result, the segment operating profit of our PRC futures brokerage decreased by 13.6% to RMB106.0 million in 2023 from RMB122.8 million in 2022. The segment operating margin of our PRC futures brokerage business decreased to 18.6% in 2023 from 22.9% in 2022.

FINANCIAL INFORMATION

PRC Wealth Management

Our PRC wealth management includes the provision of asset management, mutual fund management, and the agency sale of funds to retail and institutional clients in China. Segment operating income from our PRC wealth management primarily consists of management fees. Segment operating expenses primarily consist of staff costs, information service costs, office expenses, and other operating expenses.

Comparisons between six months ended June 30, 2024 and six months ended June 30, 2025

Segment operating income from our PRC wealth management business decreased by 30.3% to RMB27.6 million for the six months ended June 30, 2025 from RMB39.6 million for the same period in 2024. This decline was primarily due to a reduction in (i) the scale of our PRC asset management services, with AUM declining from RMB1,283 million as of December 31, 2023 to RMB198 million as of June 30, 2024 compared to AUM increasing from RMB159 million as of December 31, 2024 to RMB255 million as of June 30, 2025 and (ii) the average AUM of our mutual fund businesses.

Segment operating expenses for our PRC wealth management business also decreased by 13.0% to RMB38.5 million for the six months ended June 30, 2025, from RMB44.3 million for the same period in 2024, primarily reflecting the reduced AUM. However, the decrease in operating expenses was not sufficient to offset the decline in operating income. As a result, the segment operating loss amounted to RMB4.7 million for the six months ended June 30, 2024, and further increased to RMB10.9 million for the six months ended June 30, 2025.

Comparisons between 2024 and 2023

Segment operating income decreased by 24.3% to RMB68.2 million in 2024 from RMB90.1 million in 2023, primarily due to a reduction in the number of schemes under management and a decline in AUM in the PRC for our asset management service, from 24 asset management schemes with an AUM of RMB1,283 million as of December 31, 2023, to 14 asset management schemes with an AUM of RMB159 million as of December 31, 2024. Such reduction was a result of our initiation of a clean-up of bond-related business under our asset management operations out of prudence. In addition, in terms of our mutual funds business, the AUM decreased due to the redemption of funds in consideration of market conditions and clients' risk preference adjustment. Segment operating expenses decreased by 27.9% to RMB71.6 million in 2024 from RMB99.3 million in 2023, primarily in line with the reduced AUM. Despite the reduction, as we took prudent cost control measures, the segment operating loss of our PRC wealth management decreased by 63.6% to RMB3.3 million in 2024 from RMB9.2 million in 2023.

FINANCIAL INFORMATION

Comparisons between 2023 and 2022

Segment operating income increased by 48.7% from RMB60.6 million in 2022 to RMB90.1 million in 2023, primarily due to the increase of income from asset management business and mutual fund management fees. The increase was mainly attributable to the growth of (i) our PRC asset management, from 17 asset management schemes with an AUM of RMB732 million as of December 31, 2022, to 24 asset management schemes with an AUM of RMB1,283 million as of December 31, 2023, and (ii) our mutual fund services, from 14 mutual funds with an AUM of RMB11,697.6 million as of December 31, 2022 to 15 mutual funds with an AUM of RMB17,254.7 million as of December 31, 2023. Segment operating expenses increased by 37.6% to RMB99.3 million in 2023 from RMB72.2 million in 2022, primarily in line with the expanding AUM. As a result, the segment operating loss of our PRC wealth management decreased by 20.7% to RMB9.2 million in 2023 from RMB11.6 million in 2022.

PRC Risk Management Services

Our PRC risk management services offering includes OTC derivatives, basis trading and market making. Segment operating income from our PRC risk management services business primarily consists of trading income and investment income. Segment operating expenses primarily consist of trading expenses, staff costs, storage costs for spot trading, and other operating expenses.

Comparisons between six months ended June 30, 2024 and six months ended June 30, 2025

Segment operating income from our PRC risk management services decreased by 16.3% to RMB45.1 million for the six months ended June 30, 2025, from RMB53.9 million for the same period in 2024. This decline was primarily due to losses incurred in the market making business, caused by heightened market volatility resulting from U.S. tariff policies and intensified competition. The impact was partially offset by increased income from the OTC derivatives business, which benefited from commodity price fluctuations linked to the U.S. tariff measures in 2025, leading to an increase in volatility long positions.

Segment operating expenses for our PRC risk management services also decreased, by 41.5%, to RMB31.7 million for the six months ended June 30, 2025, from RMB54.2 million for the same period in 2024, primarily due to the reduced scale of “Insurance + Futures” projects, which was attributable to lower market volatility and insurance demand in the first half of 2025, leading to lower costs associated with the business. As a result, the segment operating profit for our PRC risk management services was RMB13.4 million for the six months ended June 30, 2025 while we incurred operating losses of RMB0.3 million for the six months ended June 30, 2024.

FINANCIAL INFORMATION

Comparisons between 2024 and 2023

The operating income for our PRC risk management services increased by 182.5% to RMB127.7 million in 2024 from RMB45.2 million in 2023, primarily due to the increase of income from our OTC derivatives business. The operating expenses increased by 65.4% to RMB118.1 million in 2024 from RMB71.4 million in 2023, primarily due to the inclusion of “Insurance + Futures” projects in the scope of policy-based agricultural insurance subsidies in certain provinces, where high levels of government premium subsidies led to higher costs associated with the business. As a result, our PRC risk management services had an operating profit of RMB9.6 million in 2024 while incurred operating losses of RMB26.2 million in 2023.

Comparisons between 2023 and 2022

The operating income for our PRC risk management services decreased by 62.9% to RMB45.2 million in 2023 from RMB121.7 million in 2022 primarily due to the decrease of income from our market making business as a result of volatile market conditions, the increasing competition for the market making business, and less favorable results from our trading strategies and business team. The operating expenses slightly decreased by 3.5% from RMB74.0 million in 2022 to RMB71.4 million in 2023. As a result, our PRC risk management services had an operating loss of RMB26.2 million in 2023, compared to a segment operating profit of RMB47.7 million in 2022.

Overseas Financial Services

Our overseas financial services include futures services, asset management, securities services, and leveraged forex trading. Segment operating income from our overseas financial services primarily consists of overseas commission income and interest income. Segment operating expenses primarily consist of staff costs, information service costs, and other operating expenses.

Comparisons between six months ended June 30, 2024 and six months ended June 30, 2025

Segment operating income of our overseas financial services remained stable, amounting to RMB321.0 million and RMB326.9 million, respectively, for the six months ended June 30, 2024 and 2025. Segment operating expenses of our overseas financial services also remained stable with a slight decrease to RMB85.6 million for the six months ended June 30, 2025 from RMB92.3 million for the six months ended June 30, 2024. As a result, the segment operating profit for our overseas financial services was RMB241.3 million for the six months ended June 30, 2025 compared to RMB228.7 million for the six months ended June 30, 2024.

FINANCIAL INFORMATION

Comparisons between 2024 and 2023

Segment operating income increased by 15.3% to RMB654.2 million in 2024 from RMB567.3 million in 2023, primarily due to increases in (i) client equity from our overseas brokerage services (covering securities, futures, and foreign exchange), which increased from HK\$12.5 billion as of December 31, 2023 to HK\$13.8 billion as of December 31, 2024, and (ii) our trading volume for our futures brokerage in the overseas markets, which increased from 64.6 million lots in 2023 to 119.7 million lots in 2024. The increases were in line with the continuous implementation of our strategies overseas as we continue engaging in international markets and offering core services such as brokerage, clearing, and asset management. Segment operating expenses increased by 10.5% to RMB188.0 million in 2024 from RMB170.2 million in 2023, in line with the increase of segment operating income.

The segment operating profit of our overseas financial services increased by 17.4% to RMB466.2 million in 2024 from RMB397.1 million in 2023. Among one of the firsts in the industry to implement an internationalization strategy, we have laid a solid foundation for our international expansion into various markets and continue to seize market opportunities. In line with the rising demand that comes with Chinese enterprises expanding overseas, our overseas financial services have significant potential for further growth. As a result, the segment operating margin of our overseas financial services remained at a high level and further increased slightly to 71.3% in 2024 from 70.0% in 2023.

Comparisons between 2023 and 2022

Segment operating income increased by 145.5% to RMB567.3 million in 2023 from RMB231.1 million in 2022 as a result of increases in (i) client equity from our overseas brokerage services (covering securities, futures, and foreign exchange) amounted to HK\$12.5 billion as of December 31, 2023, from HK\$11.9 billion as of December 31, 2022, (ii) our trading volume for our futures brokerage in the overseas markets, which increased from 38.6 million lots in 2022 to 64.6 million lots in 2023, and (iii) the overseas interest rate. The rise in client equity and trading volume is attributed to our internationalization strategy as we continue engaging in international markets and offering core services such as brokerage, clearing, and asset management. Segment operating expenses increased by 72.3% to RMB170.2 million in 2023 from RMB98.8 million in 2022, in line with the increase of segment operating income.

The segment operating profit of our overseas financial services increased by 200.1% to RMB397.1 million in 2023 from RMB132.3 million in 2022. With the implementation of our internationalization strategy and expanding global footprint, the segment operating margin of our overseas financial services remained at a high level and further increased to 70.0% in 2023 from 57.3% in 2022.

FINANCIAL INFORMATION

LIQUIDITY AND CAPITAL RESOURCES

Overview

We have in the past funded our working capital and other capital requirements primarily by cash flows from our business operations, with subordinated debts and bank loans as supplement. We manage liquidity primarily by monitoring the maturities of our assets and liabilities in an effort to ensure that we have sufficient funds to meet payment obligations when they fall due, through the use of low-risk instruments such as bank deposits.

We seek to maintain stable sources of funding and liquidity but will vary our positions in such low-risk instruments, primarily on the basis of the interest rates offered or charges on different instruments at different times. We prepare our annual budget to forecast our cash flows and cash balances and to estimate our working capital needs for business expansion and other investments.

After the Global Offering, we intend to finance our future capital requirements through cash flows from operating activities.

Taking into account the net proceeds from the Global Offering and the financial resources available to us, including cash and bank balances and cash flows from operating activities, our Directors believe that we have sufficient working capital for our present requirements, that is at least 12 months from the date of this prospectus.

The following discussion of liquidity and capital resources principally focuses on our consolidated statements of cash flows, assets and liabilities, and indebtedness.

FINANCIAL INFORMATION

Cash Flows

The following table sets forth selected cash flow statement information for the periods indicated:

	For the year ended December 31,			For the six months ended June 30,	
	2022	2023	2024	2024	2025
	<i>(RMB'000)</i>			<i>(unaudited)</i>

FINANCIAL INFORMATION

Operating Activities

Our cash flows from operating activities primarily include cash-related profit before income tax operating items from our various businesses, such as futures brokerage and asset management. Cash flows from operating activities reflect (i) profit before income tax adjusted for non-cash and non-operating items (such as depreciation, amortization, and impairment losses or gains); (ii) the effects of movement in working capital, such as changes in bank balances held for clients, margins deposited with exchange-clearing organizations, and changes in financial assets measured at fair value through profit or loss; and (iii) other cash items such as income taxes paid.

For the six months ended June 30, 2025, our net outflow used for operating activities was RMB442.0 million. The net cash outflow was primarily due to cash outflows related to net increase in deposits with exchange-clearing organizations of RMB3,025.6 million and net increase in accounts payables to brokerage clients of RMB2,321.2 million, caused by changes in client equity.

The cash flow changes relating to operating activities for the six months ended June 30, 2025, were primarily attributable to fluctuations in client deposits, withdrawals and trading activities, and our deposits with banks and exchanges to satisfy margin requirements. Pursuant to the regulatory requirements of the CSRC, client margin funds are maintained in segregated accounts and may only be utilised for deposits, withdrawals, and trading activities on behalf of clients. The volume and timing of fund movements are largely determined by clients' own decisions, which are beyond our control. During the six months ended June 30, 2025, certain clients' equity account balances experienced significant volatility in line with their trading activities. In addition, our own deposits with banks and exchanges to satisfy margin requirements also contributed to the fluctuations in operating cash flows. While cash flow remains stable during trading days, material fund transfers may occur around public holidays due to the suspension of trading, resulting in greater cash flow volatility.

We aim to expand our client base for the PRC markets and overseas markets, which are expected to maintain steady growth in client deposits and enhance our operating cash flow position. To ensure robust internal controls, we have established a dedicated treasury department, implemented comprehensive operational procedures, and assigned specific personnel to oversee the daily management of margin fund inflows and outflows, as well as the reconciliation of account balances.

In 2024, our net outflow used for operating activities was RMB700.4 million. The cash outflow was primarily due to (i) cash outflows related to other operating liabilities of RMB1,264.2 million, primarily caused by the repayment of clients' derivative financial instrument performance margins that were previously included under trade and other payables of current liabilities, with a total repayment amount of approximately RMB1,184.8 million, resulting in a decrease in margin received from clients of our OTC derivatives business and (ii) profit before income tax of RMB574.1 million from cash-related operating items.

FINANCIAL INFORMATION

The cash flow changes relating to operating activities in 2024 were primarily influenced by the deposits made with banks, exchanges, and third-party entities to fulfill margin requirements. When our clients engage in futures trading, they are required to deposit margin funds with us, which results in cash inflows from operating activities. Conversely, when we deposit margins with exchanges on behalf of clients or refunds margin funds to clients, such results in cash outflows from operating activities. Our operating cash flow at the year-end is affected by the timing of client margin deposits or refunds, which may present either inflows or outflows. These variations, however, do not have a material impact on our overall annual operating activities.

We have established measures and procedures to safeguard proper management of funds and improve cash flow. We strictly manage client margin funds in closed-loop segregated accounts in compliance with the regulatory requirements of the CSRC, ensuring rigorous segregation from proprietary funds. Daily transaction records and balances of client margin funds are reported and verified in accordance with regulatory standards. For internal controls, we have established a dedicated treasury department, implemented operational procedures, and assigned specific roles to oversee daily inflows and outflows of margin funds and to manage closed-loop account balances. Daily reports are submitted to senior management, who review and approve the documentation on a daily basis.

In 2023, our net cash inflow from operating activities was RMB1,152.5 million. The cash inflow was primarily due to (i) net cash inflows related to futures brokerage clients of RMB239.8 million, mainly due to changes in the scale of client equity related to futures brokerage; (ii) profit before income tax from cash-related operating items of RMB449.6 million; and (iii) cash inflows related to other operating liabilities of RMB591.9 million, mainly resulting from an increase in margin received from clients of our OTC derivatives business.

In 2022, our net cash inflow from operating activities was RMB558.0 million. The cash inflow was primarily due to (i) cash inflows related to other operating liabilities of RMB550.0 million, mainly resulting from an increase in margin received from clients of our OTC derivatives business; and (ii) profit before income tax from cash-related operating items of RMB300.8 million; and these inflows were partially offset by net cash outflows related to brokerage clients of RMB361.6 million.

Investing Activities

Our cash flow from investing activities consists primarily of net proceeds on disposal of property, plant and equipment, intangible assets and other long-term assets, net cash received from investment of financial instruments, and net cash received relating to other investing activities.

For the six months ended June 30, 2025, we had net cash inflow from investing activities of RMB531.9 million primarily due to net cash inflow from other investing activities of RMB351.2 million.

In 2024, we had net cash inflow generated from investing activities of RMB1,343.0 million primarily due to net cash received from investment of financial instruments of RMB1,536.8 million, partially set off by net cash received relating to other investing activities of RMB182.9 million.

FINANCIAL INFORMATION

In 2023, we had net cash outflow generated from investing activities of RMB463.0 million primarily due to net cash received from investment of financial instruments of RMB668.7 million, partially set off by net cash received relating to other investing activities of RMB258.5 million.

In 2022, we had net cash outflow generated from investing activities of RMB1,450.9 million primarily due to net cash received from investment of financial instruments of RMB1,389.0 million.

Financing Activities

Our cash flow from financing activities consists primarily of cash received from external investment, cash received from borrowings, net other cash received relating to financing activities, cash paid for repayment of debts and cash paid for distribution of dividend and profit or repayment of interest.

For the six months ended June 30, 2025, we had net cash inflow generated from financing activities of RMB110.1 million primarily due to cash received from issuing bonds of RMB198.6 million and cash received from borrowings of RMB170.4 million.

In 2024, we had net cash outflow generated from financing activities of RMB381.6 million primarily due to the outflow as a result of (i) cash paid for repayment of debts of RMB565.7 million, and (ii) cash paid for distribution of dividend and profit or repayment of interest of RMB81.8 million, partially set off by cash received from borrowings of RMB336.2 million.

In 2023, we had net cash outflow generated from financing activities of RMB414.9 million primarily due to the outflow as a result of cash paid for repayment of debts due to (i) cash paid for repayment of debts of RMB923.7 million, and (ii) cash paid for distribution of dividend and profit or repayment of interest of RMB85.4 million, partially set off by cash received from borrowings of RMB606.4 million.

In 2022, we had net cash inflow generated from financing activities of RMB691.0 million due to the cash inflow from (i) cash received from borrowings of RMB1,067.0 million, and (ii) cash received from external investment of RMB498.7 million, partially set off by cash paid for repayment of debts of RMB829.4 million.

Assets and Liabilities

To ensure appropriate cash liquidity management and capital allocation, we monitor the scale and composition of our balance sheet and seek to maintain our balance sheet with sufficient liquidity. Given the highly liquid nature of our business, major portion of our balance sheet consists of current assets and liabilities.

FINANCIAL INFORMATION

Current Assets and Liabilities

The following table sets forth the components of our current assets and liabilities as of the dates indicated:

	As of December 31,			As of	As of

FINANCIAL INFORMATION

Deposits with Exchange-Clearing Organizations

Our deposits with exchange-clearing organizations primarily consist of currency margin receivable, pledge margin receivable, settlement guarantees receivable, and settlement provision.

Our deposits with exchange-clearing organizations increased by 25.7% to RMB14,808.4 million as of June 30, 2025 from RMB11,782.8 million as of December 31, 2024, primarily due to an increase in client positions, which led to higher margin requirements and a corresponding increase in receivables from exchanges. Our deposits with exchange-clearing organizations increased by 7.7% to RMB11,782.8 million as of December 31, 2024 from RMB10,939.0 million as of December 31, 2023, primarily due to growing PRC futures brokerage and overseas financial services, resulting in the increase in currency margin receivable. Our deposits with exchange-clearing organizations decreased by 12.1% to RMB10,939.0 million as of December 31, 2023 from RMB12,443.6 million as of December 31, 2022, primarily due to the decrease of pledge margin receivable as a result of the decrease of client's pledge collateral offsetting margin in futures exchanges.

Financial Assets at Fair Value through Profit or Loss

Our financial assets at fair value through profit or loss primarily consist of (i) fixed-income securities, (ii) asset management products, and (iii) cash management products.

Our financial assets at fair value through profit or loss increased by 86.5% from RMB1,476.5 million as of December 31, 2022 to RMB2,754.1 million as of December 31, 2023, while decreased by 28.5% to RMB1,968.1 million as of December 31, 2024, reflecting our liquidity management decisions. Our financial assets at fair value through profit or loss further decreased to RMB1,668.7 million as of June 30, 2025, primarily due to the redemption of financing products and certain equity instruments.

Details of the fair value measurement of financial assets at FVPL and debt instrument FVOCI, particularly the fair value hierarchy, the valuation techniques and key inputs, including significant unobservable inputs, and the relationship of unobservable inputs to fair value are disclosed in note 3.2 to the Accountant's Report in Appendix I. We intend to continue our investments strictly in accordance with our internal control policy, Articles of Association and, to the extent that such investment is a notifiable transaction under Chapter 14 of the Listing Rules, our Company will comply with the relevant requirements under Chapter 14 of the Listing Rules, including the announcement, reporting and/or shareholders' approval requirements (if applicable).

Our investment strategy related to such products focuses on minimizing the financial risks by reasonably and conservatively matching the maturities of the portfolio to anticipated operating cash needs, while generating desirable investment returns. To control our risk exposure, we make investment decisions related to low-risk fixed income securities and wealth management products, after thoroughly considering a number of factors, including, but not limited to, the macroeconomic environment, general market conditions, risk control and credit of issuing financial institutions, our own working capital conditions, and the expected profit or potential loss of the investment.

FINANCIAL INFORMATION

Level 3 of Fair Value Measurement

In respect of the valuation of level 3 financial instruments of wealth management products, equity instrument investments, derivatives, hedged items and etc., with reference to the guidance under the “Guidance note on directors’ duties in the context of valuations in corporate transactions” issued by the SFC in May 2017 applicable to directors of companies listed on the Stock Exchange, our Directors adopted the following procedures:

- (i) selected qualified persons with adequate knowledge and conducted valuation on the financial instruments above without readily determinable fair value;
- (ii) carefully considered available information in assessing the financial data and assumptions including but not limited to interest rate, price, volatility level, etc.; and
- (iii) reviewed the valuation reports where applicable.

Based on the above procedures, our Directors are of the view that the valuation analysis is fair and reasonable and our financial statements are properly prepared.

Derivative Financial Assets

Our derivative financial assets primarily include hedging transactions on the futures and derivatives. Our derivative financial assets decreased by 32.6% from RMB1,587.2 million as of December 31, 2022 to RMB1,070.1 million as of December 31, 2023 and further decreased by 61.7% to RMB410.3 million as of December 31, 2024, primarily due to settlement of the client’s OTC derivatives contracts. Our derivative financial assets increased by 47.4% to RMB605.0 million as of June 30, 2025, primarily due to the rise of futures contracts under PRC risk management services.

Other Current Assets

Our other current assets primarily consist of exchange performance securities, hedged items, deductible VAT, credit loss and others. Our other current assets remained stable, amounting to RMB323.9 million as of June 30, 2025 and RMB313.2 million as of December 31, 2024. Our other current assets decreased by 33.7% to RMB313.2 million as of December 31, 2024 from RMB472.1 million as of December 31, 2023, primarily due to a decrease of exchange performance securities for reduced client margin in the exchanges. Our other current assets decreased by 8.3% to RMB472.1 million as of December 31, 2023 from RMB514.8 million as of December 31, 2022 primarily due to reduced commodity holding of our basis trading business at the reporting period end.

FINANCIAL INFORMATION

Trade and Other Payables

Our trade and other payables primarily consist of other payables, including the funds payable to clients, construction fees, and software fees. Changes in our trade and other payables primarily reflect fluctuations in OCT derivatives. When clients engage in derivative transactions, they are required to post margin with our Group. The scale of these transactions varies with the volume of client trading, resulting in corresponding movements in funds payable to clients.

Our trade and other payables increased by 9.8% from RMB716.8 million as of December 31, 2024 to RMB787.0 million as of June 30, 2025, primarily due to the increase of client advance payment received for our basis trading business. Our trade and other payables further increased by 13.4% to RMB892.2 million as of October 31, 2025, primarily due to the increase in the funds payable to clients for OTC derivatives business. Our trade and other payables decreased by 63.9% from RMB1,988.3 million as of December 31, 2023 to RMB716.8 million as of December 31, 2024 primarily due to the settlement of the client's OTC derivatives contracts, causing in a decrease in the funds payable to clients. Our trade and other payables increased by 30.3% from RMB1,526.5 million as of December 31, 2022 to RMB1,988.3 million as of December 31, 2023 primarily due to the increase in OTC derivatives contracts, causing in an increase in the funds payable to clients.

As of October 31, 2025, RMB587.5 million, or 74.7% of our trade and other payables as of June 30, 2025 had been utilized, RMB51.4 million, or 6.5% of our trade and other payables as of June 30, 2025 had been settled and RMB115.0 million, or 14.6% of our trade and other payables as of June 30, 2025 had been recognized as revenue.

FINANCIAL INFORMATION

Non-current Assets and Liabilities

The following table sets forth the components of non-current assets and non-current liabilities as of the dates indicated:

	As of December 31,			As of June 30,
	2022	2023	2024	2025
	(RMB'000)			
Non-current assets				
Property, plant and equipment	229,077	242,891	226,230	227,277
Investment properties	235	157	79	41
Right-of-use assets	195,321	184,466	186,341	185,686
Intangible assets	6,109	8,354	8,025	8,869
Investments in associates	2,725	2,351	1,777	1,952
Deferred tax assets	7,456	7,533	2,458	13,252
Other non-current assets	49,286	57,628	36,364	50,219
Total non-current assets	490,209	503,380	461,274	487,296
Non-current liabilities				
Debt instrument issued	510,291	510,951	511,611	708,569
Lease liabilities	23,138	14,789	18,213	21,119
Deferred income tax liabilities	18,975	2,715	2,144	206
Employee benefit obligations	1,370	1,785	1,742	1,809
Total non-current liabilities	553,774	530,240	533,710	731,703

Our non-current assets consist primarily of property, plant and equipment, right-of-use assets and other non-current assets. Our non-current liabilities consist primarily of debt instruments issued.

As of June 30, 2025, our total non-current assets increased by 5.6% to RMB487.3 million as compared to RMB461.3 million as of December 31, 2024. As of June 30, 2025, our total non-current liabilities increased by 37.1% to RMB731.7 million as compared to RMB533.7 million as of December 31, 2024.

As of December 31, 2024, our total non-current assets decreased by 8.4% to RMB461.3 million as compared to RMB503.4 million as of December 31, 2023, primarily due to a decrease of property, plant and equipment as a result of depreciation and amortization. As of December 31, 2024, our total non-current liabilities increased slightly by 0.7% to RMB533.7 million from RMB530.2 million as of December 31, 2023.

FINANCIAL INFORMATION

As of December 31, 2023, our total non-current assets increased slightly by 2.7% to RMB503.4 million as compared to RMB490.2 million as of December 31, 2022. As of December 31, 2023, our total non-current liabilities decreased by 4.2% to RMB530.2 million from RMB553.8 million as of December 31, 2022 mainly due to the decrease of deferred tax liabilities.

INDEBTEDNESS

The following table sets forth the balance and breakdown of our indebtedness as of the dates indicated:

	As of December 31,			As of	As of
	2022	2023	2024	June 30,	October 31,
				2025	2025
			(RMB'000)		(unaudited)
Current:					
Borrowings	926,290	609,661	380,677	368,273	577,943
– Including: Related party borrowings (non-trade)	–	46,455	47,274	47,274	92,211
Lease liabilities	13,747	14,983	18,355	16,264	12,126
Non-Current:					
Debt instrument issued	510,291	510,951	511,611	708,569	505,002
Lease liabilities	23,138	14,789	18,213	21,119	22,564
Total	1,473,466	1,150,384	928,856	1,114,225	1,117,635

Our borrowings mainly contain guaranteed loans, pledged loans, and credit loans. Our borrowings decreased from RMB926.3 million as of December 31, 2022 to RMB609.7 million as of December 31, 2023, primarily due to the repayment of prior loans. Our borrowings further decreased to RMB380.7 million as of December 31, 2024, as a result of the repayment of outstanding guaranteed loans while no additional guaranteed loans were secured. As of October 31, 2025, all related-party guaranteed loans with Hengdian Holdings were fully repaid. Subsequent to October 31, 2025 and until this prospectus, we did not enter into any related-party guaranteed loans with Hengdian Holdings. During the Track Record Period, our related-party borrowings (non-trade) comprised entirely of working capital loans from our related party, China Zheshang Bank Co., Ltd., and such amount reached RMB92.2 million as of October 31, 2025. We also finance our long-term business by issuing subordinated bonds with a term exceeding one year. Our debt instrument issued remained stable over the Track Record Period and as of October 31, 2025, we had one outstanding subordinated issuance, with a remaining balance of RMB505.0 million.

Our lease liabilities pertain to payment obligations for properties leased primarily involve our offices. Our lease liabilities decreased from RMB36.9 million as of December 31, 2022 to RMB29.8 million as of December 31, 2023 due to payment of lease contracts and the expiry of certain leasing contracts. Our lease liabilities further increased to RMB36.6 million as of December 31, 2024, as we entered into new leasing contracts in our normal course of business.

FINANCIAL INFORMATION

As of June 30, 2025, our borrowings decreased to RMB368.3 million from RMB380.7 million as of December 31, 2024 and further increased to RMB577.9 million as of October 31, 2025. Our debt instrument issued increased to RMB708.6 million as of June 30, 2025 from RMB511.6 million as of December 31, 2024 and decreased to RMB505.0 million as of October 31, 2025. Our lease liabilities increased slightly to RMB37.4 million as of June 30, 2025 from RMB36.6 million as of December 31, 2024 and remained stable at RMB34.7 million as of October 31, 2025.

Additionally, we maintain facilities with a number of commercial banks in support of our operations. As of October 31, 2025, we had total credit facilities of RMB4,394.0 million from major lending banks, of which RMB673.2 million had been utilized and RMB3,720.8 million remained unutilized.

Convertible Bonds

On March 31, 2023, April 12, 2024 and March 31, 2025, our shareholders approved our plan to issue convertible bonds for replenishing our working capital. Our Directors confirmed that the offering size is not more than RMB1.2 billion. As of the Latest Practicable Date, it was still pending final approval by the CSRC and Shanghai Stock Exchange. The exact timing, size and terms of the issuance are still subject to market conditions, regulatory approvals and our working capital needs.

In accordance with the provisions of the Rules Governing the Listing of Stocks on Shanghai Stock Exchange (《上海證券交易所股票上市規則》), the related parties' subscription of shares, convertible bonds, or other derivative instruments issued by the listed company to unspecified parties in cash can be exempted from disclosure and independent shareholders' approval requirements. The future issuance of convertible bonds will be proceeded pursuant to the respective approval obtained from the shareholders' meetings of the Company. Accordingly, no separate Shareholders' approval will be required after the Listing.

Except as disclosed above, from October 31, 2025 up to the date of this prospectus, we did not have any material mortgages, charges, debentures, loan capital, debt securities, loans, bank overdrafts or other indebtedness, finance lease or hire purchase commitments, liabilities under acceptances (other than normal trade bills), acceptance credits, which are either guaranteed, unguaranteed, secured or unsecured, or guarantees.

Our Directors confirm that from October 31, 2025 up to the date of this prospectus, there was no material covenant on any of our outstanding debt and there was no breach of any covenant during the Track Record Period and from October 31, 2025 up to the date of this prospectus. Our Directors further confirm that we did not experience any difficulty in obtaining bank loans and other borrowings, default in payment of bank loans and other borrowings or breach of covenants during the Track Record Period and from October 31, 2025 up to the date of this prospectus. Our Directors also confirm that there has not been any material change in our indebtedness since October 31, 2025 and up to the date of this prospectus.

FINANCIAL INFORMATION

CAPITAL EXPENDITURES

Our capital expenditures during the Track Record Period were primarily for IT equipment and servers.

Our capital expenditures amounted to RMB10.8 million, RMB40.9 million, RMB9.4 million RMB2.1 million and RMB15.8 million in 2022, 2023 and 2024 and for the six months ended June 30, 2024 and 2025, respectively.

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

Our capital commitments are related to contracted, but not provided for purchase of property, plant and equipment and the acquisition consideration to be paid. The details of our capital commitments as of the dates indicated are set forth below:

	As of December 31,			As of June 30,
	2022	2023	2024	2025
	(RMB'000)			
Contracted, but not provided for	<u>2,467</u>	<u>484</u>	<u>6,969</u>	<u>2,714</u>

Contingent Liabilities

As of the Latest Practicable Date, we were not involved in any material legal, arbitration or administrative proceedings that if adversely determined, we expect would materially adversely affect our financial position or results of operations, although there can be no assurance that this will be the case in the future.

Our Directors confirm that there has been no material change in our contingent liabilities since October 31, 2025 to the date of this prospectus.

RELATED PARTY TRANSACTIONS

During the Track Record Period, we entered into transactions with certain of our related parties, such as engaging in futures trading, subscribing to funds and asset management products, subscribing to subordinated debts and engaging in OTC derivatives transactions. These transactions were conducted on normal commercial terms and in the ordinary course of our business. Our Directors believe that these related party transactions were carried out on an arm's-length basis and would not distort our results of operations during the Track Record Period or cause such results not to be reflective of our future performance. See "Appendix I – Accountant's Report – II Notes to the Historical Financial Information – Note 49 Related Party Transactions." for further details.

FINANCIAL INFORMATION

OFF-BALANCE SHEET ARRANGEMENTS

As of the Latest Practicable Date, we did not have any off-balance sheet commitments or arrangements.

CAPITAL ADEQUACY AND RISK CONTROL INDEX REQUIREMENTS

According to the Administrative Measures for the Risk Control Indicators of Futures Firms in China, we have established a dynamic net capital monitoring mechanism to comply with statutory net capital requirements and other regulatory standards to maintain capital adequacy.

The following table sets forth certain information relating to our net capital and key regulatory risk control index as of the dates indicated.

	As of December 31,			As of June 30,	Regulatory index	Warning index
	2022	2023	2024	2025		
Net capital (<i>RMB in millions</i>)	1,116.9	1,518.0	1,509.7	1,434.4	≥30	36
Net capital/total risk capital reserves (%)	203	246	166	180	≥100	120
Net capital/net assets (%)	36	47	48	46	≥20	24
Current assets/current liabilities (%)	534	511	525	641	≥100	120
Total liabilities/net assets (%)	28	28	28	34	≤150	120
Reserve settlement funds (<i>RMB in millions</i>)	148.6	1,169.7	1,160.4	1,072.7	≥26.8	–

DIVIDEND

After the completion of the Global Offering, we may distribute dividends in the form of cash or by other means that we consider appropriate. Any proposed distribution of dividends shall be formulated by our Board and will be subject to our Shareholders' approval. A decision to declare or to pay any dividends in the future, and the amount of any dividends, will depend on a number of factors, including our results of operations, cash flows, financial condition, capital adequacy ratio, payments by our subsidiaries of cash dividends to us, business prospects, statutory, regulatory and contractual restrictions on our declaration and payment of dividends and other factors that our Board may consider important.

According to the relevant PRC laws and regulations governing A-share listed companies and our Articles of Association, our annual profit distributed in cash shall not be less than 10% of our distributable profit realized in that year. We do not have a fixed dividend distribution ratio. Any proposed distribution of dividends is subject to the discretion of our Board and approval at our Shareholders' meetings. In 2022, 2023 and 2024, we distributed cash dividends of RMB24.4 million, RMB34.2 million and RMB40.3 million to our Shareholders, respectively. A dividend of RMB45.9 million for the year ended December 31, 2024 was distributed on May 23, 2025. No other dividend was paid during the Track Record Period. Dividends paid in prior periods shall not be indicative of future dividend payment.

FINANCIAL INFORMATION

UNAUDITED PRO FORMA ADJUSTED NET TANGIBLE ASSETS

The following unaudited pro forma statement of adjusted consolidated net tangible assets of our Group as of June 30, 2025 was prepared in accordance with Rule 4.29 of the Listing Rules to illustrate the effects of the Global Offering as if it had taken place on June 30, 2025 and was based on the audited consolidated net tangible assets of our Group attributable to the owners of the Company as of June 30, 2025, assuming the Over-allotment Option is not exercised.

The unaudited pro forma statement of adjusted consolidated net tangible assets is prepared for illustrative purpose only, and because of its hypothetical nature, it may not give a true picture of the consolidated net tangible assets of our Group attributable to the owners of the Company immediately after completion of the Global Offering or any future date after completion of the Global Offering.

	Audited consolidated net tangible assets of the Group attributable to owners of the Company as of June 30, 2025 ⁽¹⁾	Estimated net proceeds from the Global Offering ⁽²⁾	Unaudited pro forma adjusted consolidated net tangible assets attributable to the owners of the Company as of June 30, 2025 ⁽³⁾	Unaudited pro forma adjusted consolidated net tangible assets per H Share as of June 30, 2025 ⁽⁴⁾	
	(RMB'000)	(RMB'000)	(RMB'000)	(RMB)	(HK\$)
Based on an Offer Price of					
HK\$12.00 per H Share	4,273,298	1,094,110	5,368,908	7.48	8.23
Based on an Offer Price of					
HK\$16.00 per H Share	4,273,298	1,469,892	5,745,202	8.00	8.80

- (1) The audited consolidated net tangible assets of the Group attributable to the owners of the Company as of June 30, 2025 is extracted from the Accountant's Report set out in Appendix I, which is based on the audited consolidated net assets of the Group attributable to the owners of the Company as of June 30, 2025 of RMB4,282,167,000 with adjustments for the intangible assets of RMB8,869,000 attributable to the owners of the Company.
- (2) The estimated net proceeds from the Global Offering are based on 107,659,000 H Shares at the indicative Offer Price of HK\$12.00, and HK\$16.00 per share, respectively, after deduction of the underwriting fees and other related expenses payable by the Company (excluding listing expenses of RMB558,000 which have been accounted for in the consolidated statements of profit or loss prior to 30 June 2025) and takes no account of any H Shares which may be allotted and issued by the Company pursuant to the exercise of the Over-allotment Option.
- (3) The unaudited pro forma adjusted consolidated net tangible assets per H Share is arrived at after the adjustments referred to in the preceding paragraphs and on the basis that 717,724,893 Shares were in issue assuming that the Global Offering has been completed on June 30, 2025, but takes no account of any H Shares which may be allotted and issued by the Company pursuant to the exercise of the Over-allotment Option.
- (4) For the purpose of this unaudited pro forma adjusted consolidated net tangible assets per H Share, the amounts stated in Hong Kong dollars are converted into Renminbi at the rate of RMB1.00 to HK\$1.1000. No representation is made that Hong Kong dollars has been, could have been or may be converted to Renminbi, or vice versa, at that rate.
- (5) No adjustment has been made to reflect any trading results or other transactions of the Group entered into subsequent to June 30, 2025.

FINANCIAL INFORMATION

QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in foreign exchange rates, interest rates, equity prices and commodity prices and other changes in the economic environment. The market risk to which we are primarily exposed includes credit risk, price risk, interest rate risk, currency risk and liquidity risk.

Credit Risk

Credit risk refers to the risk of counterparty's failure or inability to meet its payment obligations, or the risk of loss due to declining credit rating.

Our Group's credit risks mainly come from financial assets which include bank balances, financial assets held under resale agreements, bank balances held for clients, deposits with exchange-clearing organizations, financial assets at fair value through profit or loss, contract assets, refundable deposits and other current assets.

In terms of the default risk from its commodity trading and risk management business, our Group has established certain criteria in selecting the counterparty, including but not limited to inspection on the credit status and credit enhancement measures on a case-by-case basis, so as to determine its credit exposure to each counterparty. Our Group also reviews the credit status of individual customers at least once in a year, including business performance, repayment ability, as well as industrial outlook in which the customers operate.

Our Group's bank balances and bank balances held for clients are mainly deposited with state-owned commercial banks, joint-stock commercial banks and major city commercial banks. Meanwhile, deposits with exchange-clearing organizations and refundable deposits are all placed with authorized exchange-clearing organizations, with a relatively low level of credit risk.

Our Group's credit risk also arises from its futures brokerage service. Under clearing rules, a minimum margin requirement is set by the respective futures exchanges. Therefore, a minimum margin deposit is to be placed with the futures broker when an individual customer has a position. However, our Group has to fulfill the obligation on daily settlements by using its own funds if the customer margin deposit balance is insufficient and the customer fails to replenish the balance by the end of each trading day. Credit risks are mainly associated to customer's inability to meet the daily settlement obligation. To mitigate the credit risk from futures brokerage service, our Group usually requires the customers to maintain a margin deposit balance that is higher than the minimum margin required by futures exchanges. Our Group also monitors each customer's credit status on a real-time basis and, therefore, may require customers to deposit additional collateral and/or reduce positions when necessary. Since trading rules set a daily limit move for every futures contract, our Group's credit exposure under normal market conditions at the end of each trading day is generally not significant.

FINANCIAL INFORMATION

To mitigate risks, our Group also requests the customers to provide standard warehouse warrants or government bonds as collateral where appropriate. An operating procedure for such collateral has been developed, and there is a guideline to specify the suitability of accepting such collateral. Fair value of the collateral is estimated by our Group with reference to the latest prices of the underlying physical commodities of standard warehouse warrants or the latest tradable prices of government bonds.

Our Group maintains an ECL model to recognize a loss allowance for assets carried at amortized cost. Our Group assesses whether or not the credit risk of relevant instrument has increased significantly since the initial recognition and measures their impairment allowance, ECL and future variance in ECL under the “three stage” impairment model.

Forward-looking Information Incorporated in the ECL Models

Both the assessment of SICR and the calculation of ECL allowances incorporate forward-looking information. Our Group has performed historical analysis and identified the key economic variables regarding credit risk for each portfolio.

As of December 31, 2022, 2023 and 2024, and June 30, 2025, the key economic variables used by our Group is the growth rate of GDP. Under the 2023 baseline scenario, the average forecast value is about 5.10%, the optimistic scenario forecast is 0.60 percentage points higher than the baseline, and the pessimistic scenario forecast is 0.30 percentage points lower than the baseline. Under the 2024 baseline scenario, the average forecast value is about 4.80%, the optimistic scenario forecast is 0.30 percentage points higher than the baseline, and the pessimistic scenario forecast is 0.30 percentage points lower than the baseline. Under the 2025 baseline scenario, the average forecast value is about 4.70%, the optimistic scenario forecast is 0.40 percentage points higher than the baseline, and the pessimistic scenario forecast is 0.40 percentage points lower than the baseline.

The weightings assigned to each economic scenario as of December 31, 2022, 2023 and 2024 and June 30, 2025 are as follows:

	<u>Base</u>	<u>Optimistic</u>	<u>Pessimistic</u>
All portfolios	60%	10%	30%

Impairment of Financial Assets

Our Group’s bank balances, bank balances held for clients, deposits with exchange-clearing organizations and refundable deposits are all deposited in banks and exchange-clearing organizations which have decent credit rating and no history of default. There are no unfavorable current conditions and forecast of future economic conditions for these assets as of December 31, 2022, 2023 and 2024 and June 30, 2025. Therefore, their credit risk is considered low and the expected credit loss is limited. For financial assets held under resale agreements, our Group receives sufficient debt securities or warehouse receipts as collateral. Therefore, the expected credit loss is immaterial.

All of these assets are classified under stage 1.

FINANCIAL INFORMATION

Maximum Exposure to Credit Risk

Before considering collaterals or other credit enhancement methods, the maximum credit risk exposure is the carrying amount of financial assets (net of provisions for impairment). The maximum credit risk exposure is as follows:

	As of December 31,			As of June 30,
	2022	2023	2024	2025
Cash and bank balances	1,689,615	1,773,052	2,273,931	2,070,471
Deposits with exchange-clearing organizations	12,443,556	10,939,043	11,782,759	14,808,388
Bank balances held for clients	15,924,857	18,723,106	31,551,141	26,814,520
Other current assets (excluding non-financial assets)	326,973	343,625	68,338	70,522
Commission receivable	–	12,071	13,433	9,535
Prepayments and trade receivables (excluding prepayments)	1,214	2	71	24
Buyback financial assets	–	7,064	–	9,660
Financial assets at fair value through profit or loss	1,476,462	2,754,122	1,968,109	1,668,687
Derivative financial assets	1,587,179	1,070,105	410,360	604,999
Financial assets at fair value through other comprehensive income	36,664	40,917	50,616	54,146
	<u>33,486,520</u>	<u>35,663,107</u>	<u>48,118,758</u>	<u>46,110,952</u>

Price Risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Our Group's price risk exposure mainly relates to investments in equity securities, derivatives, asset management schemes, private securities investment funds and trust schemes with the underlying investments in equity instruments. The market prices of those financial instruments could lead to the fluctuation of investment value. A majority of these investments are traded in relevant capital markets, such as domestic and overseas futures exchanges as well as domestic stock exchanges. Our Group is facing high market risk due to the volatility of those investments.

FINANCIAL INFORMATION

Our Group's price risk management policy involves setting investment objectives, scales and loss-cut limits for each individual investment. Two main measures are adopted by management level to mitigate the risk: (i) holding an appropriately diversified investment portfolio, setting limits for investments in different type of investments and monitoring the investment portfolio to reduce the risk of concentration in any one specific commodity type, industry or issuer; and (ii) monitoring the fluctuation of market price and execution of investment limit management.

Sensitivity Analysis

The analysis below shows the impact on profit before income tax and other comprehensive income before income tax due to change in the prices of equity instruments and derivatives by 5%, assuming all other variables remain unchanged. A positive result indicates an increase in profit before income tax, while a negative result indicates otherwise.

	For the year ended December 31,			For the six months ended June 30,
	2022	2023	2024	2025
	(RMB'000)			
Profit before income tax				
Increase by 5%	1,200	1,274	1,710	(740)
Decrease by 5%	(1,200)	(1,274)	(1,710)	740

Interest Rate Risk

Interest rate risk is defined that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The main interest bearing assets of our Group are bank deposits, bank balances held for clients, deposits with exchange-clearing organizations, buyback financial assets and investments. The interest rates of bank deposits are determined by the agreement established with banks, and the interest rate of deposits with exchange-clearing organizations is determined by the clearing organizations.

FINANCIAL INFORMATION

The table below presents the contractual re-pricing dates or the residual maturities of the financial assets and liabilities (whichever are earlier):

As of December 31, 2022	Within 1 month	1-3 months	3 months to 1 year	1 year to 3 years	over 3 years	Non- Interest bearing	Total

FINANCIAL INFORMATION

Sensitivity Analysis

The sensitivity analysis below has been determined based on the exposure to the interest rate risks for interest-bearing assets and liabilities. A 100 basis points increases or decreases in the relevant interest rates will be applied in the sensitivity analysis as possible reasonable shift, assuming all other variables remain unchanged. A positive result below indicates an increase in profit before income tax, while a negative result indicates otherwise.

	For the year ended December 31,			For the six months ended June 30,
	2022	2023	2024	2025
	(RMB'000)			
Net interest income				
Increases by 100bps	255,747	297,917	383,495	434,331
Decreases by 100bps	(255,747)	(297,917)	(383,495)	(434,331)

When conducting interest rate sensitivity analysis, our Group makes the following general assumptions in determining commercial terms and financial parameters:

- different interest-bearing assets and interest-bearing liabilities have the same amplitude of interest rate volatility;
- all assets and liabilities are re-priced in the middle of relevant period;
- analysis is based on the static gap on the financial position reporting date, without considering subsequent changes;
- impact of interest rate changes on customer behaviors not considered;
- impact of interest rate changes on market prices not considered;
- interest rate of demand deposits moving in the same direction and extend; and
- necessary measures that may be adopted by our Group in response to interest rate changes not considered.

FINANCIAL INFORMATION

Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in foreign exchange rates.

Our Group's currency risk primarily relates to our Group's operating activities whose settlements and payments are denominated in foreign currencies different from the functional currency of our Group.

The foreign currency assets and liabilities held by our Group are not material compared to the total assets and liabilities. In terms of our Group's revenue structure, the majority of the business transactions are denominated in RMB, with only insignificant revenue from foreign currency transactions. Our Group considers that its currency risk is immaterial.

As of December 31, 2022 and 2023 and 2024 and June 30, 2025, our Group's major financial assets/liabilities exposed to foreign exchange risk, representing those financial assets/liabilities denominated in USD and HKD and included in a group entity with different functional currency:

	As of December 31,			As of June 30,
	2022	2023	2024	2025
	(RMB'000)			
Financial assets denominated in:				
USD	7,412,284	7,531,012	9,949,613	11,554,487
HKD	1,448,195	496,055	407,872	431,550
Others	924,868	839,476	244,205	217,995
	As of December 31,			As of June 30,
	2022	2023	2024	2025
	(RMB'000)			
Financial liabilities denominated in:				
USD	1,373,120	8,171,353	9,633,237	11,259,220
HKD	7,104,849	531,134	372,617	386,689
Others	665,753	1,012,578	234,108	209,045

FINANCIAL INFORMATION

As shown in the table above, our Group is primarily exposed to changes in USD and HKD exchange rates. The sensitivity of profit or loss to changes in the exchange rates arises mainly from USD and HKD denominated financial instruments is as below:

	For the year ended December 31,			For the six months ended June 30,
	2022	2023	2024	2025
	(RMB'000)			
USD exchange rate				
Increase 5%	301,958	(32,017)	15,819	14,763
Decrease 5%	(301,958)	32,017	(15,819)	(14,763)
HKD exchange rate				
Increase 5%	(282,833)	(1,754)	1,763	2,243
Decrease 5%	282,833	1,754	(1,763)	(2,243)

Other foreign currencies of changes have no significant impact on foreign exchange risk.

Liquidity Risk

Liquidity risk is the risk that our Group will encounter difficulty in meeting obligations associated with financial liabilities due to lack of capital or funds. During the normal course of business, our Group may suffer from liquidity risk caused by macroeconomic policy changes, market volatility, poor operations, credit downgrades, mismatches between assets and liabilities, low turnover rate of assets, significant proprietary trading position, or an excessive high ratio of long-term investments. If our Group fails to address any liquidity risk by adjusting the asset structure or comply with regulatory requirements on the risk indicators, our Group could be faced with penalties by the regulatory authorities in the form of restrictions on our Group's business operations, which would cause bad effects on our Group's operations and reputation.

Our Group manages and controls funds in a centralized manner. Our Group's liquidity risk management principles are comprehensiveness, prudence and foreseeability and the overall objective is to build a sound liquidity risk management system so that we can identify, measure, monitor and control liquidity risk effectively and ensure that the requirement of liquidity could be met timely with an appropriate cost.

Our Group's finance department organizes the cash budget annually and sets up the fund plan based on it. Under the approval of the Company, the funds will be scheduled and arranged uniformly in order to ensure the consistence of funds demand and cost of the capital control.

After approved by the Board of Directors, the finance department decides the scale and the structure of a high quality liquid assets, by analyzing the condition of the Company's business scale, total liability, financing ability, and duration of the asset and liability prudently, so as to improve the liquidity and the risk resistance.

FINANCIAL INFORMATION

Our Group invests surplus cash above balance required for working capital management in time deposits, and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient head-room as determined by the above-mentioned forecasts.

The tables below present the cash flows payable by our Group for financial liabilities by remaining contractual maturities as of December 31, 2022, 2023, 2024 and June 30, 2025. The amounts disclosed in the tables are the contractual undiscounted cash flows, including both interest and principal cash flows. For items with floating interest rates, the undiscounted amounts are derived using interest rates at the end of each reporting period.

The liquidity risk will be offset by the movement of deposits with exchange-clearing organizations and bank balances held for clients.

The tables below analyze our Group's financial liabilities that will be settled into relevant maturity groupings based on the remaining period at each balance sheet date to their contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

DISTRIBUTABLE RESERVES

As of June 30, 2025, we had RMB2,129.7 million in retained profits, as determined under IFRSs, available for distribution to our shareholders.

DIRECTORS' CONFIRMATION OF NO MATERIAL ADVERSE CHANGE

The Directors have confirmed that there has been no material adverse change in our financial and trading position or prospects since June 30, 2025, being the date to which our latest audited consolidated financial statements have been prepared.

DISCLOSURE REQUIRED UNDER THE HONG KONG LISTING RULES

We confirm that, as of the Latest Practicable Date, we are not aware of any circumstances that would give rise to a disclosure under Rules 13.13 to 13.19 of Chapter 13 of the Hong Kong Listing Rules.

FINANCIAL INFORMATION

LISTING EXPENSES

We expect to incur listing expenses of approximately RMB88.7 million (assuming an Offer Price of HK\$14.0 per H Share, being the mid-point of the indicative Offer Price range as stated in this prospectus, and assuming the Over-allotment Option is not exercised), accounting for approximately 6.5% of the estimated gross proceeds of the Global Offering accruing to us. Our estimated listing expenses include (i) underwriting-related expenses, representing underwriting commission and fees of approximately RMB53.2 million; and (ii) non-underwriting-related expenses, comprising professional fees to the legal advisors and reporting accountant of approximately RMB17.3 million for their services rendered in relation to the Global Offering and the Listing, and (iii) other fees and expenses of approximately RMB18.2 million. We incurred listing expenses of approximately RMB17.1 million during the Track Record Period. We expect to further incur listing expenses of approximately RMB71.6 million upon completion of the Global Offering, out of which approximately RMB7.5 million is expected to be charged to our consolidated statements of comprehensive income and approximately RMB64.1 million is expected to be accounted for as a deduction from equity. The listing expenses above are the latest practicable estimate for reference only, and the actual amount may differ from this estimate. We do not expect such expenses to have a material adverse impact on our results of operations for the year ending December 31, 2025.

FUTURE PLANS AND USE OF PROCEEDS

FUTURE PLANS

See “Business – Our Strategies” for a detailed description of our future plans.

USE OF PROCEEDS

Assuming that the Over-allotment Option is not exercised, after deducting the underwriting commissions and other estimated offering expenses payable by us in connection with the Global Offering, and assuming an Offer Price of HK\$14.00 per Share (being the mid-point of the indicative Offer Price range), we estimate that we will receive net proceeds of approximately HK\$1,409.6 million from the Global Offering.

We intend to allocate all net proceeds from the Global Offering to HGNH International, which plans to enhance the capital base of our overseas subsidiaries in Hong Kong, the United Kingdom, the United States, and Singapore. This initiative aims to expand our overseas operations, optimize our overseas business structure, and enhance our competitiveness and risk resilience in global markets. Specifically, we intend to use the proceeds from the Global Offering as follows:

- approximately 30% of the net proceeds, or HK\$422.9 million, is expected to be used to increase the capital base of our Hong Kong operations to accommodate our potential business growth in Hong Kong and East Asia, and to establish a subsidiary in Malaysia to expand our business capabilities in the region; in particular,
 - o approximately 25% of the net proceeds, or HK\$352.4 million, is expected to be used to support our expansion in Hong Kong. We plan to utilize the proceeds to strengthen HGNH International’s capital support for its subsidiaries by providing short-term loans, subordinated loans, or increasing registered capital as needed to meet their short-, medium-, and long-term liquidity and capital requirements. For HGNH International Securities, we aim to inject additional capital to support its expanding securities business, particularly in margin financing and IPO subscription services, leveraging the recovery of the Hong Kong securities market to enhance profitability. For HGNH International Futures, as we shift focus to industrial and institutional clients, including high-frequency traders and high-net-worth individuals, we will assess and provide the necessary capital injections or subordinated loans to ensure its business expansion is well-supported. To support the development of our futures business in Hong Kong, we plan to further expand our sales team and deepen our cooperation with financial institutions in Hong Kong. In addition, we will strengthen collaboration with other subsidiaries within the Group to actively attract and support overseas clients trading HKFE products.

FUTURE PLANS AND USE OF PROCEEDS

- o approximately 5% of the net proceeds, or HK\$70.5 million, is expected to be used to support our expansion in Malaysia. We plan to expand into the Malaysian market as part of our globalization strategy, focusing on the opportunities presented by the commodity futures market, particularly palm oil futures. To achieve this, we intend to apply for trading and clearing memberships with Bursa Malaysia Derivatives, enabling us to directly participate in futures and derivatives trading and perform independent clearing. This plan includes securing sufficient funding for license applications, compliance systems, IT development, office leasing and renovation, and local team recruitment. Additionally, we will establish a local team covering management, compliance, risk, and market development to ensure operational readiness and effectively capture market opportunities, as well as contingency reserves to address potential uncertainties in the new market, in the next three years;
- approximately 30% of the net proceeds, or HK\$422.9 million, is expected to be used to increase the capital base of our operations in the United Kingdom to accommodate our potential business growth in the UK and Europe, primarily for futures brokerage and clearing services; since the beginning our membership with LME and up to the Latest Practicable Date, we had been in compliance with the capital requirements set by LME; the capital requirement set by the LME depends on the size of the positions we hold. We plan to strengthen our net capital to ensure our continual compliance with LME's requirements so and to support the potential business growth brought on by our membership with ICE; we will also invest in compliance reporting, clearing, and risk management systems, while expanding our sales and operational teams, including a new European sales team and specialized teams for ICE energy and agricultural products. These efforts will address growing client demand and ensure sustainable business growth;
- approximately 20% of the net proceeds, or HK\$281.9 million, is expected to be used to increase the capital base of our operations in the United States to accommodate our potential business growth in North America, primarily for futures brokerage and clearing services; and to build a local marketing network to continue growing our client base in North America; in particular, we plan to upgrade our back-office clearing and risk management systems to meet the needs of institutional and cross-market trading clients; additionally, we will expand our local team, including sales and customer service, to deepen our collaboration with introducing brokers and grow our local client base; by prioritizing compliance, liquidity, and technology, we aim to attract high-net-worth clients and institutional investors, further solidifying our presence in the North American market;
- approximately 10% of the net proceeds, or HK\$141.0 million, is expected to be used to increase the capital base of our Singapore operations to accommodate our potential growth in Singapore and other Southeast Asian countries, primarily for futures brokerage and clearing services and asset management services, and to expand our physical commodity delivery capabilities for Southeast Asian clients; in particular, we will target high-frequency trading firms, proprietary trading desks, regional brokers, and energy clients, while also engaging asset managers and family offices with tailored multi-asset solutions; and

FUTURE PLANS AND USE OF PROCEEDS

- approximately 10% of the net proceeds, or HK\$141.0 million, is expected to be used for general corporate purposes and to supplement the working capital of our overseas operations.

In the event that the Offer Price is set at the maximum Offer Price or the minimum Offer Price of the indicative Offer Price range, the net proceeds of the Global Offering will increase by approximately HK\$206.7 million or decrease by approximately HK\$206.7 million.

The additional net proceeds that we would receive if the Over-allotment Option was to be exercised in full would be: (i) HK\$248.1 million (assuming an Offer Price of HK\$16.00 per Share, being the maximum Offer Price of the indicative Offer Price range); (ii) HK\$217.1 million (assuming an Offer Price of HK\$14.00 per Share, being the mid-point of the indicative Offer Price range); and (iii) HK\$186.1 million (assuming an Offer Price of HK\$12.00 per Share, being the minimum Offer Price of the indicative Offer Price range).

To the extent that the net proceeds from the Global Offering are either more or less than expected, we will adjust our allocation of the net proceeds for the above purposes on a pro rata basis.

To the extent that the net proceeds of the Global Offering are not immediately used for the aforementioned purposes, we will only deposit such funds into short-term interest-bearing accounts at licensed commercial banks and/or other authorized financial institutions (as defined under the Securities and Futures Ordinance, or applicable laws and regulations in other jurisdictions). In such event, we will comply with the appropriate disclosure requirements under the Hong Kong Listing Rules.

UNDERWRITING

This prospectus is published solely in connection with the Hong Kong Public Offering. The Hong Kong Public Offering is fully underwritten by the Hong Kong Underwriters on a conditional basis on the terms and conditions set out in this prospectus and the Hong Kong Underwriting Agreement. The International Offering is expected to be fully underwritten by the International Underwriters subject to the terms and conditions of the International Underwriting Agreement. If, for any reason, the Offer Price is not agreed between the Overall Coordinators (for themselves and on behalf of the Underwriters) and our Company, the Global Offering will not proceed and will lapse.

The Global Offering comprises the Hong Kong Public Offering of initially 10,766,000 Hong Kong Offer Shares and the International Offering of initially 96,893,000 International Offer Shares, subject, in each case, to reallocation on the basis as described in the section headed “Structure of the Global Offering” in this prospectus as well as to the Over-allotment Option in the case of the International Offering.

UNDERWRITING ARRANGEMENTS AND EXPENSES

Hong Kong Public Offering

Hong Kong Underwriting Agreement

Pursuant to the Hong Kong Underwriting Agreement, our Company is offering initially 10,766,000 Hong Kong Offer Shares for subscription by way of a Hong Kong Public Offering at the Offer Price on and subject to the terms and conditions of this prospectus.

UNDERWRITING

Subject to (i) the Listing Committee of the Stock Exchange granting listing of, and permission to deal in, the H Shares (including additional H Shares which may be issued pursuant to the exercise of the Over-allotment Option) as mentioned herein, and such listing and permission not having been subsequently revoked prior to the commencement of trading of our H Shares on the Main Board of the Stock Exchange and (ii) to certain other conditions set out in the Hong Kong Underwriting Agreement, the Hong Kong Underwriters have agreed severally to subscribe or procure subscribers for their respective applicable proportions of the Hong Kong Offer Shares now being offered which are not taken up under the Hong Kong Public Offering on the terms and conditions of this prospectus and the Hong Kong Underwriting Agreement.

The Hong Kong Underwriting Agreement is conditional upon and subject to, amongst other things, the International Underwriting Agreement having been signed and becoming unconditional and not having been terminated in accordance with its terms.

Grounds for termination

The obligations of the Hong Kong Underwriters to subscribe or procure subscribers for the Hong Kong Offer Shares under the Hong Kong Underwriting Agreement are subject to termination, if at any time prior to 8:00 a.m. on the Listing Date:

- (a) there develops, occurs, exists or comes into force:
 - (i) any new law or regulation or any change or development involving a prospective change or any event or series of events or circumstances likely to result in a change or a development involving a prospective change in existing laws or regulations, or the interpretation or application thereof by any court or any competent Authority (as defined in the Hong Kong Underwriting Agreement) in or affecting Hong Kong, the PRC, the United States, the United Kingdom, the European Union (or any member thereof), Japan, Singapore or other jurisdictions relevant to our Group or the Global Offering (collectively, the “**Relevant Jurisdictions**”, and each, a “**Relevant Jurisdiction**”); or
 - (ii) any change or development involving a prospective change, or any event or series of events or circumstances likely to result in a change or prospective change, in any local, national, regional or international financial, political, military, industrial, economic, fiscal, legal, regulatory, currency, credit or market conditions or sentiments, Taxation (as defined in the Hong Kong Underwriting Agreement), equity securities or currency exchange rate or controls or any monetary or trading settlement system, or foreign investment regulations (including, without limitation, a devaluation of the Hong Kong dollars, US dollars or Renminbi against any foreign currencies, a change in the system under which the value of the Hong Kong dollars is linked to that of the US dollars or the Renminbi is linked to any foreign currency or currencies) or other financial markets (including, without limitation, conditions and sentiments in stock

UNDERWRITING

and bond markets, money and foreign exchange markets, the inter-bank markets and credit markets) in or affecting any Relevant Jurisdictions, or affecting an investment in the Offer Shares; or

- (iii) any event or series of events, or circumstances in the nature of force majeure (including, without limitation, any acts of government, declaration of a regional, national or international emergency or war, calamity, crisis, economic sanctions, strikes, labor disputes, other industrial actions, lock-outs, fire, explosion, flooding, tsunami, earthquake, volcanic eruption, civil commotion, riots, rebellion, public disorder, paralysis in government operations, acts of war, epidemic, pandemic, outbreak or escalation, mutation or aggravation of diseases, accident or interruption or delay in transportation, local, national, regional or international outbreak or escalation of hostilities (whether or not war is or has been declared), act of God or act of terrorism (whether or not responsibility has been claimed)) in or affecting any of the Relevant Jurisdictions; or
- (iv) the imposition or declaration of any moratorium, suspension or limitation (including without limitation, any imposition of or requirement for any minimum or maximum price limit or price range) on (i) the trading in shares or securities generally on the Stock Exchange, the Shanghai Stock Exchange, the Shenzhen Stock Exchange, the Tokyo Stock Exchange, the Singapore Stock Exchange, the New York Stock Exchange, the NASDAQ Global Market or the London Stock Exchange; or (ii) the trading in any securities of our Company listed or quoted on a stock exchange or an over-the-counter market; or
- (v) the imposition or declaration of any general moratorium on banking activities in or affecting any of the Relevant Jurisdictions or any disruption in commercial banking or foreign exchange trading or securities settlement or clearing services, procedures or matters in or affecting any of the Relevant Jurisdictions; or
- (vi) other than with the prior written consent of the Overall Coordinators, the issue or requirement to issue by our Company of a supplement or amendment to this prospectus or other documents in connection with the offer and sale of the Offer Shares pursuant to the Companies (Winding up and Miscellaneous Provisions) Ordinance or the Listing Rules or upon any requirement or request of the Stock Exchange and/or the SFC; or
- (vii) the commencement or the announcement of the commencement by any Authority (as defined in the Hong Kong Underwriting Agreement) or other regulatory or political body or organization of any public action or investigation against a company of our Group or a director or a senior management member of any company of our Group; or

UNDERWRITING

- (viii) the imposition of sanctions or export controls in whatever form, directly or indirectly, on any company of our Group or any of the Controlling Shareholders or by or on any Relevant Jurisdiction, or the withdrawal of trading privileges which existed on the date of the Hong Kong Underwriting Agreement, in whatever form, directly or indirectly, by, or for, any Relevant Jurisdiction; or
- (ix) any valid demand by creditors for payment or repayment of indebtedness of any member of our Group or in respect of which any member of our Group is liable prior to its stated maturity; or
- (x) any non-compliance of this prospectus (or any other documents used in connection with the contemplated offering, allotment, issue, subscription or sale of any of the Offer Shares), the CSRC Filings or any aspect of the Global Offering with the Listing Rules or any other applicable Laws (as defined in the Hong Kong Underwriting Agreement); or
- (xi) any litigation, dispute, legal action or claim or regulatory or administrative investigation or action being threatened, instigated or announced against any member of our Group or any of our Controlling Shareholders or any director or senior management members of our Company as named in the section headed “Directors and Senior Management” in this prospectus; or
- (xii) any contravention by any company of our Group or director or senior management members of our Company as named in the section headed “Directors and Senior Management” in this prospectus of the Listing Rules or applicable Laws (as defined in the Hong Kong Underwriting Agreement); or
- (xiii) any change or prospective change, or a materialisation of, any of the risks set out in the section headed “Risk Factors” in this prospectus,

which, in any such case individually or in the aggregate, in the sole and absolute opinion of the Sole Sponsor and the Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters):

- (A) has or will or is likely to have a material adverse effect, whether directly or indirectly, on the assets, liabilities, business, general affairs, management, prospects, shareholders’ equity, profits, losses, results of operations, position or condition, financial or otherwise, or performance of our Company or our Group as a whole; or
- (B) has or will or is likely to have a material adverse effect on the success of the Global Offering or the level of applications under the Hong Kong Public Offering or the level of indications of interest under the International Offering; or

UNDERWRITING

- (C) makes or will make or is likely to make it impracticable, inadvisable, inexpedient or incapable for any material part of the Hong Kong Underwriting Agreement, the Hong Kong Public Offering or the Global Offering to be performed or implemented as envisaged, or for the Hong Kong Public Offering and/or the Global Offering to proceed, or to market the Global Offering or the delivery or distribution of the Offer Shares on the terms and in the manner contemplated by the Offering Documents; or
 - (D) has or will or is likely to have the effect of making any part of the Hong Kong Underwriting Agreement (including underwriting) incapable of performance in accordance with its terms or preventing the processing of applications and/or payments pursuant to the Global Offering or pursuant to the underwriting thereof; or
- (b) there has come to the notice of the Sole Sponsor and the Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters) that:
- (i) any statement contained in the any of the Offering Documents (as defined in the Hong Kong Underwriting Agreement), the CSRC Filings and/or any notices, announcements, advertisements, communications or other documents issued or used by, for and on behalf of our Company in connection with the Hong Kong Public Offering (including any supplement or amendment thereto)) (the “**Global Offering Documents**”) was, when it was issued, or has become untrue, incorrect, inaccurate in any material respect or misleading; or that any estimate, forecast, expression of opinion, intention or expectation contained in any of the Offering Related Documents, was, when it was issued, or has become unfair or misleading in any respect or based on untrue, dishonest or unreasonable assumptions or given in bad faith; or
 - (ii) any matter has arisen or has been discovered which would, had it arisen or been discovered immediately before the date of this prospectus, constitute a material omission or misstatement in any Global Offering Documents; or
 - (iii) any breach of, or any event or circumstance rendering untrue, incorrect or misleading in any respect, any of the representations, warranties and undertakings given by our Company in the Hong Kong Underwriting Agreement or the International Underwriting Agreement; or
 - (iv) any event, act or omission which gives rise or is likely to give rise to any liability of the Indemnifying Party (as defined in the Hong Kong Underwriting Agreement) pursuant to the indemnities in the Hong Kong Underwriting Agreement; or
 - (v) any material breach of any of the obligations or undertakings imposed upon our Company under the Hong Kong Underwriting Agreement or the International Underwriting Agreement; or

UNDERWRITING

- (vi) there is any change or development involving a prospective change, constituting or having a Material Adverse Effect (as defined in the Hong Kong Underwriting Agreement); or
- (vii) the chairman of our Board, any director or any member of senior management of our Company as named in the section headed “Directors and Senior Management” in this prospectus is removed from office or vacating his/her office, or is being charged with an indictable offence, prohibited by operation of law or otherwise disqualified from taking part in the management or taking directorship of a company; or
- (viii) our Company withdraws this prospectus (and/or any other documents used in connection with the subscription or sale of any of the Offer Shares pursuant to the Global Offering) or the Global Offering; or
- (ix) that the approval by the Listing Committee of the listing of, and permission to deal in, the H Shares to be issued pursuant to the Global Offering (including any additional H Shares that may be issued pursuant to any exercise of the Over-allotment Option) is refused or not granted, other than subject to customary conditions, on or before the Listing Date, or if granted, the approval is subsequently withdrawn, cancelled, qualified (other than by customary conditions), revoked or withheld; or
- (x) any person named as an expert in this prospectus has withdrawn its consent to the issue of this prospectus with the inclusion of its reports, letters and/or legal opinions (as the case may be) and references to its name included in the form and context in which it respectively appears; or
- (xi) any prohibition on our Company for whatever reason from offering, allotting, issuing or selling any of the Offer Shares pursuant to the terms of the Global Offering; or
- (xii) any person named as an expert in this prospectus has withdrawn or sought to withdraw its consent to being named in any of the Offering Documents (as defined in the Hong Kong Underwriting Agreement) or to the issue of any of the Offering Documents (as defined in the Hong Kong Underwriting Agreement); or
- (xiii) an order or petition is presented for the winding-up or liquidation of any member of our Group, or any member of our Group makes any composition or arrangement with its creditors or enters into a scheme of arrangement or any resolution is passed for the winding-up of any member of our Group or a provisional liquidator, receiver or manager is appointed over all or part of the assets or undertaking of any member of our Group or anything analogous thereto occurs in respect of any member of our Group; or

UNDERWRITING

- (xiv) (i) the notice of acceptance of the CSRC Filings issued by the CSRC and/or the results of the CSRC Filings published on the website of the CSRC is rejected, withdrawn, revoked or invalidated; or (ii) other than with the prior written consent of the Overall Coordinators, the issue or requirement to issue by our Company of a supplement or amendment to the CSRC Filings pursuant to the CSRC Rules or upon any requirement or request of the CSRC; or (iii) any non-compliance of the CSRC Filings with the CSRC Rules or any other applicable Laws (as defined in the Hong Kong Underwriting Agreement); or
- (xv) that a material portion of the orders placed or confirmed in the bookbuilding process has been withdrawn, terminated or cancelled, as a result the payment of the relevant investment amount not being received or settled in the stipulated time and manner or otherwise

then, in each case, the Sole Sponsor and the Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters) may, in their sole and absolute discretion and upon giving notice in writing to our Company, terminate the Hong Kong Underwriting Agreement with immediate effect.

Undertakings to the Stock Exchange Pursuant to the Listing Rules

Undertakings by our Company

We have undertaken to the Stock Exchange that within six months from the Listing Date, except in certain circumstances prescribed by Rule 10.08 of the Listing Rules or pursuant to the Global Offering and the Over-allotment Option, no further shares or securities convertible into equity securities of our Company (whether or not of a class already listed) may be issued or sold or transferred out of treasury or form the subject of any agreement to such an issue or sale or transfer out of treasury within six months from the Listing Date (whether or not such issue of shares or securities, or sale or transfer of treasury Shares will be completed within six months from the Listing Date).

Undertakings by our Controlling Shareholders

Pursuant to Rule 10.07 of the Listing Rules, our Controlling Shareholders have undertaken to the Stock Exchange and our Company that, except pursuant to the Global Offering (including the exercise of the Over-allotment Option), they will not (and will procure that any other registered holder (if any) of the Shares in which any of them has a beneficial interest will not) without the prior written consent of the Stock Exchange or unless otherwise in compliance with the Listing Rules:

- (i) in the period commencing on the date of this prospectus and ending on the date which is six months from the Listing Date, dispose of, or enter into any agreement to dispose of or otherwise create any options, rights, interests or encumbrances in respect of, any of the Shares in respect of which any of them is shown by this prospectus to be the beneficial owner (the “**Relevant Shares**”); and

UNDERWRITING

- (ii) in the period of six months commencing on the date on which the period referred to in paragraph (i) above expires, dispose of, or enter into any agreement to dispose of or otherwise create any options, rights, interests or encumbrances in respect of, the Relevant Shares if, immediately following such disposal or upon the exercise or enforcement of such options, rights, interests or encumbrances, they would cease to be a group of controlling shareholders of our Company for the purpose of the Listing Rules.

Pursuant to Note 3 to Rule 10.07(2) of the Listing Rules, our Controlling Shareholders have further undertaken to each of the Stock Exchange and our Company that, within the period commencing on the date of this prospectus and ending on the date which is 12 months from the Listing Date, they will:

- (i) when they pledge or charge any Shares or other securities of our Company beneficially owned by them in favour of an authorized institution (as defined in the Banking Ordinance (Chapter 155 of the Laws of Hong Kong)) relying on Note (2) to Rule 10.07(2) of the Listing Rules, immediately inform our Company of such pledge or charge together with the number of securities so pledged or charged; and
- (ii) when they receive indications, either verbal or written, from the pledgee or chargee that any of the pledged or charged Shares or such other securities of our Company will be disposed of, immediately inform our Company of such indications.

Our Company will inform the Stock Exchange as soon as we have been informed of the matters referred to in paragraph (i) and (ii) above (if any) by our Controlling Shareholders and subject to the then applicable requirements of the Listing Rules disclose such matters by way of an announcement.

Undertakings to the Hong Kong Underwriters pursuant to the Hong Kong Underwriting Agreement

Undertakings by our Company

Pursuant to the Hong Kong Underwriting Agreement, we have undertaken to each of the Sole Sponsor, the Sponsor-Overall Coordinator, the Overall Coordinators, the Joint Global Coordinators, the Joint Bookrunners, the Joint Lead Managers, the Capital Market Intermediaries and the Hong Kong Underwriters that except pursuant to the Global Offering (including pursuant to the Over-Allotment Option), at any time during the period commencing on the date of the Hong Kong Underwriting Agreement and ending on, and including, the date that is six months after the Listing Date (the “**First Six-Month Period**”), we will not, without the prior written consent of the Sole Sponsor and the Overall Coordinators (for themselves and on behalf of the Hong Kong Underwriters) and unless in compliance with the Listing Rules:

- (a) allot, issue, sell, accept subscription for, offer to allot, issue or sell, contract or agree to allot, issue or sell, assign, mortgage, charge, pledge, hypothecate, lend, grant or sell any option, warrant, contract or right to subscribe for or purchase, grant or purchase any option, warrant, contract or right to allot, issue or sell, or otherwise transfer or dispose of or create an Encumbrance (as defined in the Hong Kong Underwriting Agreement) over, or agree to transfer or dispose of or create an Encumbrance over, either directly or indirectly, conditionally or unconditionally, or repurchase, any legal or beneficial interest in the share capital or any other securities of our Company or any interest in any of the foregoing

UNDERWRITING

(including, without limitation, any securities convertible into or exchangeable or exercisable for or that represent the right to receive, or any warrants or other rights to purchase any share capital or other securities of our Company, as applicable), or deposit any share capital or other securities of our Company, as applicable, with a depositary in connection with the issue of depositary receipts; or

- (b) enter into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences of ownership (legal or beneficial) of the Shares or any other securities of our Company, or any interest in any of the foregoing (including, without limitation, any securities convertible into or exchangeable or exercisable for or that represent the right to receive, or any warrants or other rights to purchase, any Shares); or
- (c) enter into any transaction with the same economic effect as any transaction described in (a) or (b) above; or
- (d) offer or agree to do any of the foregoing specified in (a), (b) or (c) above or announce any intention to do so,

in each case, whether any of the foregoing transactions specified in (a), (b) or (c) above is to be settled by delivery of share capital or such other securities, in cash or otherwise (whether or not the issue of such share capital or other securities will be completed within the First Six-Month Period).

We have further agreed that, in the event that during the six-month period commencing on the date on which the First Six-Month Period expires (the “**Second Six-Month Period**”) our Company is allowed to enter into any of the transactions specified in (a), (b) or (c) above or offers to or agrees to or announces any intention to effect any such transaction, our Company will take all reasonable steps to ensure that such an issue or disposal will not, and no other act of our Company will, create a disorderly or false market for any Shares or other securities of our Company.

Indemnity

We have agreed to indemnify the Sole Sponsor, the Overall Coordinators, the Joint Global Coordinators, the Joint Bookrunners, the Joint Lead Managers and the Hong Kong Underwriters for certain losses which they may suffer, including losses incurred arising from our performance of our obligations under the Hong Kong Underwriting Agreement and any breach by our Company of the Hong Kong Underwriting Agreement.

The International Offering

In connection with the International Offering, it is expected that our Company will enter into the International Underwriting Agreement with the International Underwriters, among others. Under the International Underwriting Agreement, the International Underwriters will, subject to certain conditions set out therein, severally and not jointly, agree to procure subscribers or purchasers for the International Offer Shares, failing which they agree to subscribe for or purchase their respective proportions of the International Offer Shares which are not taken up under the International Offering.

UNDERWRITING

Our Company is expected to grant to the International Underwriters the Over-allotment Option, exercisable by the Overall Coordinators (for themselves and on behalf of the International Underwriters) at any time from the date of the International Underwriting Agreement until Friday, January 16, 2026, being the 30th day from the last day for the lodging of applications under the Hong Kong Public Offering, to require our Company to issue and allot up to an aggregate of 16,148,500 additional Offer Shares, representing 15% of the initial Offer Shares, at the Offer Price under the International Offering to cover, among other things, over allocations (if any) in the International Offering.

It is expected the International Underwriting Agreement may be terminated on similar grounds as the Hong Kong Underwriting Agreement. Potential investors shall be reminded that in the event that the International Underwriting Agreement is not entered into, the Global Offering will not proceed.

Underwriting Commission and Expenses

The Underwriters will receive an underwriting commission of 2.5% of the aggregate Offer Price of all the Offer Shares (including any Offer Shares to be issued pursuant to the exercise of the Over-allotment Option) (the “**Fixed Fees**”), out of which they will pay any sub-underwriting commission and other fees. For unsubscribed Hong Kong Offer Shares reallocated to the International Offering, our Company will pay an underwriting commission to the relevant International Underwriters (but not the Hong Kong Underwriters). The Company may also in its sole discretion pay the Underwriters an additional incentive fee of up to 1.5% of the aggregate Offer Price of all the Offer Shares (including any Offer Shares to be issued pursuant to the exercise of the Over-allotment Option) (the “**Discretionary Fees**”).

Assuming that all of the 1.5% Discretionary Fees will be paid in full to the Underwriters, the aggregate amount of fees payable by us to all syndicate members will be 4.0% of the gross proceeds from the Global Offering, comprising 62.5% in Fixed Fees and 37.5% in Discretionary Fees.

Assuming an Offer Price of HK\$14.00 per Offer Share (being the mid-point of the indicative Offer Price range), the aggregate commissions and fees (assuming the full payment of Discretionary Fees and no exercise of the Over-allotment Option), together with listing fees, SFC transaction levy, AFRC transaction levy, Stock Exchange trading fee, legal and other professional fees and printing and other expenses, payable by our Company relating to the Global Offering are estimated to be approximately HK\$97.6 million in total.

The commission and expenses were determined after arm’s length negotiation between the Company and the Hong Kong Underwriters or other parties by reference to the current market conditions.

HONG KONG UNDERWRITERS’ INTERESTS IN THE COMPANY

Save for its obligations under the Hong Kong Underwriting Agreement or otherwise disclosed in this prospectus, none of the Hong Kong Underwriters has any shareholding interests in our Company or the right or option (whether legally enforceable or not) to subscribe for or nominate persons to subscribe for securities in our Company.

UNDERWRITING

Following the completion of the Global Offering, the Underwriters and their affiliated companies may hold a certain portion of the H Shares as a result of fulfilling their obligations under the Underwriting Agreements.

SOLE SPONSOR'S INDEPENDENCE

CITIC Securities (Hong Kong) Limited satisfies the independence criteria applicable to sponsors set out in Rule 3A.07 of the Listing Rules.

RESTRICTIONS ON THE OFFER SHARES

No action has been taken to permit a public offering of the Offer Shares other than in Hong Kong, or the distribution of this prospectus in any jurisdiction other than in Hong Kong. Accordingly, this prospectus may not be used for the purpose of, and does not constitute, an offer or invitation in any jurisdiction or in any circumstances in which such an offer or invitation is not authorised or to any person to whom it is unlawful to make such an offer or invitation. In particular, the Offer Shares have not been offered or sold, and will not be offered or sold, directly or indirectly, in China and the U.S.

ACTIVITIES BY SYNDICATE MEMBERS

The underwriters of the Hong Kong Public Offering and the International Offering (together, the “**Syndicate Members**”) and their affiliates may each individually undertake a variety of activities (as further described below) which do not form part of the underwriting or stabilising process.

The Syndicate Members and their affiliates are diversified financial institutions with relationships in countries around the world. These entities engage in a wide range of commercial and investment banking, brokerage, funds management, trading, hedging, investing and other activities for their own account and for the account of others. In the ordinary course of their various business activities, the Syndicate Members and their respective affiliates may purchase, sell or hold a broad array of investments and actively trade securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments for their own account and for the accounts of their customers. Such investment and trading activities may involve or relate to assets, securities and/or instruments our Company and/or persons and entities with relationships with our Company and may also include swaps and other financial instruments entered into for hedging purposes in connection with our Group's loans and other debt.

In relation to the H Shares, the activities of the Syndicate Members and their affiliates could include acting as agent for buyers and sellers of the H Shares, entering into transactions with those buyers and sellers in a principal capacity, including as a lender to initial purchasers of the H Shares (which financing may be secured by the H Shares) in the Global Offering, proprietary trading in the H Shares, and entering into over the counter or listed derivative transactions or listed or unlisted securities transactions (including issuing securities such as derivative warrants listed on a stock exchange) which have as their underlying assets, assets including the H Shares. Such transactions may be carried out as bilateral agreements or trades with selected counterparties. Those activities may require hedging activity by those entities involving, directly or indirectly, the buying and selling of the H Shares, which may have a negative impact

UNDERWRITING

on the trading price of the H Shares. All such activities could occur in Hong Kong and elsewhere in the world and may result in the Syndicate Members and their affiliates holding long and/or short positions in the H Shares, in baskets of securities or indices including the H Shares, in units of funds that may purchase the H Shares, or in derivatives related to any of the foregoing.

In relation to issues by Syndicate Members or their affiliates of any listed securities having the H Shares as their underlying securities, whether on the Stock Exchange or on any other stock exchange, the relevant rules of the exchange may require the issuer of those securities (or one of its affiliates or agents) to act as a market maker or liquidity provider in the security, and this will also result in hedging activity in the H Shares in most cases.

All such activities may occur both during and after the end of the stabilising period described in “Structure of the Global Offering” in this prospectus. Such activities may affect the market price or value of the H Shares, the liquidity or trading volume in the H Shares and the volatility of the price of the H Shares, and the extent to which this occurs from day to day cannot be estimated.

It should be noted that when engaging in any of these activities, the Syndicate Members will be subject to certain restrictions, including the following:

- (a) the Syndicate Members (other than the Stabilising Manager or any person acting for it) must not, in connection with the distribution of the Offer Shares, effect any transactions (including issuing or entering into any option or other derivative transactions relating to the Offer Shares) whether in the open market or otherwise, with a view to stabilising or maintaining the market price of any of the Offer Shares at levels other than those which might otherwise prevail in the open market; and
- (b) the Syndicate Members must comply with all applicable laws and regulations, including the market misconduct provisions of the SFO, including the provisions prohibiting insider dealing, false trading, price rigging and stock market manipulation.

Certain of the Syndicate Members or their respective affiliates expect to provide in the future, investment banking and other services to our Company and its affiliates for which such Syndicate Members or their respective affiliates will receive customary fees and commissions. In addition, the Syndicate Members or their respective affiliates may provide financing to investors to finance their subscriptions of Offer Shares in the Global Offering.

OVER-ALLOTMENT AND STABILISATION

Details of the arrangements relating to the Over-allotment Option and stabilisation are set forth in the section headed “Structure of the Global Offering.”

STRUCTURE OF THE GLOBAL OFFERING

THE GLOBAL OFFERING

This prospectus is published in connection with the Hong Kong Public Offering as part of the Global Offering.

The Global Offering comprises:

- (a) the Hong Kong Public Offering of initially 10,766,000 H Shares (subject to reallocation as mentioned below) in Hong Kong as described in “– The Hong Kong Public Offering” below in this section; and
- (b) the International Offering of initially 96,893,000 H Shares (subject to reallocation and the Over-allotment Option as mentioned below) to be offered only outside the United States (including to professional and institutional investors within Hong Kong) in offshore transactions in reliance on Regulation S, as described in “– The International Offering” below in this section.

Investors may apply for the Hong Kong Offer Shares under the Hong Kong Public Offering, or apply for or indicate an interest for the International Offer Shares under the International Offering, but may not do both.

The Offer Shares will represent approximately 15% of the enlarged registered share capital of our Company immediately after completion of the Global Offering without taking into account the exercise of the Over-allotment Option, if any. If the Over-allotment Option is exercised in full, the additional International Offer Shares will represent approximately 2.2% of the enlarged registered share capital of our Company immediately after completion of the Global Offering and the exercise of the Over-allotment Option as set out in “– Over-allotment Option” below in this section.

References in this prospectus to applications, application monies or the procedure for applications relate solely to the Hong Kong Public Offering.

The number of Offer Shares to be offered under the Hong Kong Public Offering and the International Offering, respectively, may be subject to reallocation as described in “The Hong Kong Public Offering – Reallocation” below in this section.

THE HONG KONG PUBLIC OFFERING

Number of Offer Shares Initially Offered

Our Company is initially offering 10,766,000 H Shares for subscription by the public in Hong Kong at the Offer Price, representing approximately 10% of the total number of Offer Shares initially available under the Global Offering.

STRUCTURE OF THE GLOBAL OFFERING

The number of Offer Shares initially offered under the Hong Kong Public Offering, subject to any reallocation of Offer Shares between the International Offering and the Hong Kong Public Offering and assuming that the Over-allotment Option is not exercised, will represent approximately 1.50% of the total Shares in issue immediately following the completion of the Global Offering.

The Hong Kong Public Offering is open to members of the public in Hong Kong as well as to institutional and professional investors. Professional investors generally include brokers, dealers, companies (including fund managers) whose ordinary business involves dealing in shares and other securities and corporate entities that regularly invest in shares and other securities.

Completion of the Hong Kong Public Offering is subject to the conditions set out in “– Conditions of the Global Offering” below in this section.

Allocation

The allocation of Hong Kong Offer Shares to investors under the Hong Kong Public Offering will be based solely on the level of valid applications received under the Hong Kong Public Offering. The basis of allocation may vary, depending on the number of Hong Kong Offer Shares validly applied for by applicants. Such allocation could, where appropriate, consist of balloting, which could mean that some applicants may receive a higher allocation than others who have applied for the same number of Hong Kong Offer Shares, and those applicants who are not successful in the ballot may not receive any Hong Kong Offer Shares.

For allocation purposes only, the total number of Hong Kong Offer Shares available under the Hong Kong Public Offering (after taking into account any reallocation referred to below) will be divided equally into two pools: pool A and pool B (with any odd board lots being allocated to pool A). The Hong Kong Offer Shares in pool A will be allocated on an equitable basis to applicants who have applied for Hong Kong Offer Shares with an aggregate subscription price of HK\$5 million (excluding the brokerage, SFC transaction levy, AFRC transaction levy and the Stock Exchange trading fee payable) or less. The Hong Kong Offer Shares in pool B will be allocated on an equitable basis to applicants who have applied for Hong Kong Offer Shares with an aggregate subscription price of more than HK\$5 million (excluding the brokerage, SFC transaction levy, AFRC transaction levy and the Stock Exchange trading fee payable) and up to the total value in pool B.

Investors should be aware that applications in pool A and applications in pool B may receive different allocation ratios. If any Hong Kong Offer Shares in one (but not both) of the pools are unsubscribed, such unsubscribed Hong Kong Offer Shares will be transferred to the other pool to satisfy demand in that other pool and be allocated accordingly. For the purpose of the immediately preceding paragraph only, the “price” for Hong Kong Offer Shares means the price payable on application therefor (without regard to the Offer Price as finally determined). Applicants can only receive an allocation of Hong Kong Offer Shares from either pool A or pool B and not from both pools. Multiple or suspected multiple applications under the Hong Kong Public Offering and any application for more than 5,383,000 Hong Kong Offer Shares (being 50% of the Offer Shares initially available under the Hong Kong Public Offering) is liable to be rejected.

STRUCTURE OF THE GLOBAL OFFERING

Reallocation

The Offer Shares to be offered in the Hong Kong Public Offering and the International Offering may, in certain circumstances, be reallocated as between these offerings at the discretion of the Overall Coordinators. Subject to the allocation cap described in the subsequent paragraph, the Overall Coordinators may in their discretion reallocate Offer Shares from the International Offering to the Hong Kong Public Offering to satisfy valid applications under the Hong Kong Public Offering. In addition, if the Hong Kong Public Offering is not fully subscribed, the Overall Coordinators will have the discretion (but shall not be under any obligation) to reallocate to the International Offering all or any unsubscribed Hong Kong Offer Shares in such amounts as they deem appropriate.

In each case, the additional Offer Shares reallocated to the Hong Kong Public Offering will be allocated between Pool A and Pool B and the number of Offer Shares allocated to the International Offering will be correspondingly reduced in such manner as the Overall Coordinators deem appropriate. In the event of reallocation of Offer Shares between the International Offering and the Hong Kong Public Offering in the circumstances where (a) the International Offer Shares are fully subscribed or oversubscribed and the Hong Kong Offer Shares are fully subscribed or oversubscribed irrespective of the number of times, or (b) the International Offer Shares are undersubscribed and the Hong Kong Offer Shares are fully subscribed or oversubscribed irrespective of the number of times, then up to 5,382,500 Offer Shares may be reallocated from the International Offering to the Hong Kong Public Offering, so that the total number of Offer Shares available for subscription under the Hong Kong Public Offering will increase up to 16,148,500 Offer Shares, representing approximately 15% of the number of Offer Shares initially available under the Global Offering (before any exercise of the Over-allotment Option) and the final Offer Price should be fixed at the lower end of the indicative Offer Price range (that is, HK\$12.00 per Offer Share) stated in this prospectus, in accordance with Chapter 4.14 of the Guide for New Listing Applicants.

Given the initial allocation of the Offer Shares to the Hong Kong Public Offering and the International Offering follows Mechanism B set out under paragraph 2 of Chapter 4.14 of the Guide for New Listing Applicants and the provision of Paragraph 4.2(b) of Practice Note 18 of the Listing Rules, no mandatory clawback or reallocation mechanism is required to increase the number of Offer Shares under the Hong Kong Public Offering to a certain percentage of the total number of Offer Shares offered under the Global Offering.

Applications

Each applicant under the Hong Kong Public Offering will be required to give an undertaking and confirmation in the application submitted by him/her/it that he/she/it and any person(s) for whose benefit he/she/it is making the application has not applied for or taken up, or indicated an interest for, and will not apply for or take up, or indicate an interest for, any International Offer Shares under the International Offering. Such applicant's application is liable to be rejected if such undertaking and/or confirmation is/are breached and/or untrue (as the case may be) or if he/she/it has been or will be placed or allocated International Offer Shares under the International Offering.

STRUCTURE OF THE GLOBAL OFFERING

Applicants under the Hong Kong Public Offering may be required to pay, on application (subject to application channels), the maximum Offer Price of HK\$16.00 per Offer Share in addition to the brokerage, SFC transaction levy, AFRC transaction levy and the Stock Exchange trading fee payable on each Offer Share, amounting to a total of HK\$8,080.68 for one board lot of 500 Shares. If the Offer Price, as finally determined in the manner described in “– Pricing and Allocation” below, is less than the maximum Offer Price of HK\$16.00 per Offer Share, appropriate refund payments (including the brokerage, SFC transaction levy, AFRC transaction levy and the Stock Exchange trading fee attributable to the surplus application monies) will be made to successful applicants (subject to application channels), without interest. See “How to Apply for Hong Kong Offer Shares”.

THE INTERNATIONAL OFFERING

Number of Offer Shares Initially Offered

The number of International Offer Shares initially offered under the International Offering, subject to any reallocation of Offer Shares between the International Offering and the Hong Kong Public Offering, will consist of an initial offering of 96,893,000 H Shares, representing approximately 90% of the total number of Offer Shares initially available under the Global Offering (assuming that the Over-allotment Option is not exercised).

Allocation

The International Offering will involve private placements of the Offer Shares to institutional and professional investors and other investors anticipated to have a sizeable demand for our International Offer Shares. Professional investors generally include brokers, dealers, companies (including fund managers) whose ordinary business involves dealing in shares and other securities and corporate entities which regularly invest in shares and other securities. Allocation of Offer Shares pursuant to the International Offering will be effected in accordance with the “book-building” process described in “Pricing and Allocation” below in this section and based on a number of factors, including the level and timing of demand, the total size of the relevant investor’s invested assets or equity assets in the relevant sector and whether or not it is expected that the relevant investor is likely to buy further H Shares and/or hold or sell its H Shares after the Listing. Such allocation is intended to result in a distribution of the H Shares on a basis which would lead to the establishment of a solid professional and institutional shareholder base to the benefit of our Group and our Shareholders as a whole.

The Overall Coordinators (for themselves on behalf of the Underwriters) may require any investor who has been offered Offer Shares under the International Offering and who has made an application under the Hong Kong Public Offering to provide sufficient information to the Overall Coordinators so as to allow them to identify the relevant applications under the Hong Kong Public Offering and to ensure that they are excluded from any allocation of Offer Shares under the International Offering.

STRUCTURE OF THE GLOBAL OFFERING

Reallocation

The total number of International Offer Shares to be issued or sold pursuant to the International Offering may change as a result of the reallocation arrangement described in “– The Hong Kong Public Offering – Reallocation” above in this section or the exercise of the Over-allotment Option in whole or in part and/or any reallocation of unsubscribed Offer Shares originally included in the Hong Kong Public Offering.

OVER-ALLOTMENT OPTION

In connection with the Global Offering, our Company is expected to grant the Over-allotment Option to the International Underwriters, exercisable by the Overall Coordinators (for themselves and on behalf of the International Underwriters).

Pursuant to the Over-allotment Option, the International Underwriters will have the right, exercisable by the Overall Coordinators (for themselves and on behalf of the International Underwriters) at any time from the Listing Date until 30 days after the last day for lodging applications under the Hong Kong Public Offering, to require our Company to issue up to an aggregate of 16,148,500 additional Offer Shares, representing not more than 15% of the total number of Offer Shares under the Global Offering, at the Offer Price under the International Offering to cover over-allocations in the International Offering, if any.

If the Over-allotment Option is exercised in full, the additional Offer Shares to be issued pursuant thereto will represent approximately 2.2% of the total Shares in issue immediately following the completion of the Global Offering and the exercise of the Over-allotment Option. If the Over-allotment Option is exercised, an announcement will be made.

STABILISATION

Stabilisation is a practise used by underwriters in some markets to facilitate the distribution of securities. To stabilise, the underwriters may bid for, or purchase, the securities in the secondary market during a specified period of time, to retard and, if possible, prevent a decline in the initial public market price of the securities below the offer price. Such transactions may be effected in all jurisdictions where it is permissible to do so, in each case in compliance with all applicable laws and regulatory requirements, including those of Hong Kong. In Hong Kong, the price at which stabilisation is effected is not permitted to exceed the offer price.

In connection with the Global Offering, the Stabilising Manager (or any person acting for it), on behalf of the Underwriters, may over-allocate or effect transactions with a view to stabilising or supporting the market price of our H Shares at a level higher than that which might otherwise prevail for a limited period after the Listing Date. However, there is no obligation on the Stabilising Manager (or any person acting for it) to conduct any such stabilising action. Such stabilising action, if taken, (a) will be conducted at the absolute discretion of the Stabilising Manager (or any person acting for it) and in what the Stabilising Manager reasonably regards as the best interest of our Company, (b) may be discontinued at any time and (c) is required to be brought to an end within 30 days from the last day for lodging applications under the Hong Kong Public Offering.

STRUCTURE OF THE GLOBAL OFFERING

Stabilisation actions permitted in Hong Kong pursuant to the Securities and Futures (Price Stabilizing) Rules of the SFO include (a) over-allocating for the purpose of preventing or minimising any reduction in the market price of our H Shares, (b) selling or agreeing to sell our H Shares so as to establish a short position in them for the purpose of preventing or minimising any reduction in the market price of our H Shares, (c) purchasing, or agreeing to purchase, our H Shares pursuant to the Over-allotment Option in order to close out any position established under paragraph (a) or (b) above, (d) purchasing, or agreeing to purchase, any of our H Shares for the sole purpose of preventing or minimising any reduction in the market price of our H Shares, (e) selling or agreeing to sell any H Shares in order to liquidate any position established as a result of those purchases and (f) offering or attempting to do anything as described in paragraph (b), (c), (d) or (e) above.

Specifically, prospective applicants for and investors in our Offer Shares should note that:

- (a) the Stabilising Manager (or any person acting for it) may, in connection with the stabilising action, maintain a long position in our H Shares;
- (b) there is no certainty as to the extent to which and the time or period for which the Stabilising Manager (or any person acting for it) will maintain such a long position;
- (c) liquidation of any such long position by the Stabilising Manager (or any person acting for it) and selling in the open market may have an adverse impact on the market price of our H Shares;
- (d) no stabilising action can be taken to support the price of our H Shares for longer than the stabilisation period, which will begin on the Listing Date, and is expected to expire on the 30th day after the last day for lodging applications under the Hong Kong Public Offering. After this date, when no further stabilising action may be taken, demand for our H Shares, and therefore the price of the H Shares, could fall;
- (e) the price of our H Shares cannot be assured to stay at or above the Offer Price by the taking of any stabilising action; and
- (f) stabilising bids or transactions effected in the course of the stabilising action may be made at any price at or below the Offer Price and can, therefore, be done at a price below the price paid by applicants for, or investors in, the Offer Shares.

In order to effect stabilisation actions, the Stabilising Manager may arrange cover of up to an aggregate of 16,148,500 Offer Shares, representing up to 15% of the total number of our Offer Shares under the Global Offering, through delayed delivery arrangements with investors who have been allocated Offer Shares in the International Offering. The delayed delivery arrangements (if specifically agreed to by an investor) relate only to the delay in the delivery of our Offer Shares to such investor and the Offer Price for the Offer Shares allocated to such investor will be fully paid prior to Listing, accordingly there will be no delayed settlement of payment of our Offer Shares. Both the size of such cover and the extent to which the Over-allotment Option can be exercised will depend on whether arrangements can be made with

STRUCTURE OF THE GLOBAL OFFERING

investors such that a sufficient number of Offer Shares can be delivered on a delayed basis. If no investor in the International Offering agrees to the delayed delivery arrangements, no stabilising actions will be undertaken by the Stabilising Manager and the Over-allotment Option will not be exercised.

Our Company will ensure or procure that an announcement in compliance with the Securities and Futures (Price Stabilizing) Rules of the SFO will be made within seven days of the expiration of the stabilisation period.

PRICING AND ALLOCATION

Pricing for the Offer Shares for the purpose of the various offerings under the Global Offering will be fixed on the Price Determination Date, which is expected to be on or before Thursday, December 18, 2025 and, in any event, no later than 12:00 noon on Thursday, December 18, 2025 by agreement between the Overall Coordinators (for themselves and on behalf of the Underwriters) and our Company, and the number of Offer Shares to be allocated under the various offerings will be determined shortly thereafter.

The Offer Price will not be more than HK\$16.00 per Offer Share and is expected to be not less than HK\$12.00 per Offer Share, unless otherwise announced, as further explained below. Applicants under the Hong Kong Public Offering may be required to pay, on application (subject to application channels), the maximum Offer Price of HK\$16.00 per Offer Share plus brokerage of 1.0%, SFC transaction levy of 0.0027%, AFRC transaction levy of 0.00015% and Stock Exchange trading fee of 0.00565%, amounting to a total of HK\$8,080.68 for one board lot of 500 Shares. **Prospective investors should be aware that the Offer Price to be determined on the Price Determination Date may be, but is not expected to be, lower than the minimum Offer Price stated in this prospectus.**

The International Underwriters will be soliciting from prospective investors indications of interest in acquiring Offer Shares in the International Offering. Prospective professional and institutional investors will be required to specify the number of Offer Shares under the International Offering they would be prepared to acquire either at different prices or at a particular price. This process, known as “book-building,” is expected to continue up to, and to cease on or about, the last day for lodging applications under the Hong Kong Public Offering.

The Overall Coordinators (for themselves and on behalf of the Underwriters) may, where it deems appropriate, based on the level of interest expressed by prospective investors during the book-building process in respect of the International Offering, and with the consent of our Company, reduce the number of Offer Shares offered and/or the Offer Price range below that stated in this prospectus at any time on or prior to the morning of the last day for lodging applications under the Hong Kong Public Offering. In such a case, our Company will, as soon as practicable following the decision to make such reduction, and in any event not later than the morning of the last day for lodging applications under the Hong Kong Public Offering, cause to be published on the websites of our Company at <http://www.nanhua.net> and the Stock Exchange at www.hkexnews.hk, respectively, an announcement, cancel the Global Offering and relaunch the Global Offering at the revised number of Offer Shares and/or the revised Offer Price range and the requirements under Rule 11.13 of the Listing Rules (which include the issue of a supplemental prospectus or a new prospectus (as appropriate)). Upon issue of such announcement or supplemental prospectus (as

STRUCTURE OF THE GLOBAL OFFERING

appropriate), the number of Offer Shares offered in the Global Offering and/or the revised Offer Price range will be final and conclusive, and the Offer Price, if agreed upon by the Overall Coordinators (for themselves and on behalf of the Underwriters) and the Company, will be fixed within such revised Offer Price range. The Global Offering must first be cancelled and subsequently relaunched on FINI pursuant to the supplemental prospectus.

Before submitting applications for the Hong Kong Offer Shares, applicants should have regard to the possibility that any announcement of a reduction in the number of Offer Shares and/or the Offer Price range may not be made until the last day for lodging applications under the Hong Kong Public Offering. In the absence of any such announcement so published, the number of Offer Shares will not be reduced and/or the Offer Price, if agreed upon by the Overall Coordinators (for themselves and on behalf of the Underwriters) and our Company, will under no circumstances be set outside the Offer Price range as stated in this prospectus.

In the event of a reduction in the number of Offer Shares, the Overall Coordinators (for themselves and on behalf of the Underwriters) may, at their discretion, reallocate the number of Offer Shares to be offered in the Hong Kong Public Offering and the International Offering. The Offer Shares to be offered in the Hong Kong Public Offering and the Offer Shares to be offered in the International Offering may, in certain circumstances, be reallocated between these offerings at the discretion of the Overall Coordinators (for themselves and on behalf of the Underwriters).

ANNOUNCEMENT OF FINAL OFFER PRICE

The final Offer Price, the level of indications of interest in the International Offering, the level of applications in the Hong Kong Public Offering, the basis of allocations of the Hong Kong Offer Shares and the results of allocations in the Hong Kong Public Offering are expected to be announced on Friday, December 19, 2025 on the website of our Company at <http://www.nanhua.net> and the website of the Stock Exchange at www.hkexnews.hk.

HONG KONG UNDERWRITING AGREEMENT

The Hong Kong Public Offering is fully underwritten by the Hong Kong Underwriters under the terms and conditions of the Hong Kong Underwriting Agreement and is subject to the Overall Coordinators (for themselves and on behalf of the Underwriters) and our Company agreeing on the Offer Price. Our Company expects to enter into the International Underwriting Agreement relating to the International Offering on the Price Determination Date.

These underwriting arrangements, including the Underwriting Agreements, are summarised in the section headed “Underwriting” of this prospectus.

STRUCTURE OF THE GLOBAL OFFERING

CONDITIONS OF THE GLOBAL OFFERING

Acceptance of all applications for Offer Shares will be conditional on:

- (a) the Stock Exchange granting approval for the listing of, and permission to deal in, the H Shares to be offered pursuant to the Global Offering (including any additional H Shares which may be issued pursuant to the exercise of the Over-allotment Option), on the Main Board of the Stock Exchange, and such approval not subsequently having been withdrawn or revoked prior to the Listing Date;
- (b) the Offer Price having been agreed between the Overall Coordinators (for themselves and on behalf of the Underwriters) and our Company;
- (c) the execution and delivery of the International Underwriting Agreement on or about the Price Determination Date; and
- (d) the obligations of the Hong Kong Underwriters under the Hong Kong Underwriting Agreement and the obligations of the International Underwriters under the International Underwriting Agreement becoming and remaining unconditional and not having been terminated in accordance with the terms of the respective agreements,

in each case on or before the dates and times specified in the respective Underwriting Agreements (unless and to the extent such conditions are validly waived on or before such dates and times).

If, for any reason, the Offer Price is not agreed between the Overall Coordinators (for themselves and on behalf of the Underwriters) and our Company by 12:00 noon on Thursday, December 18, 2025, the Global Offering will not proceed and will lapse.

The consummation of each of the Hong Kong Public Offering and the International Offering is conditional upon the other offering becoming unconditional and not having been terminated in accordance with its terms.

If the above conditions are not fulfilled or waived prior to the dates and times specified, the Global Offering will lapse and the Stock Exchange will be notified immediately. Notice of the lapse of the Hong Kong Public Offering will be published by our Company on the websites of our Company at <http://www.nanhua.net> and the Stock Exchange at www.hkexnews.hk, respectively, on the next day following such lapse. In such a situation, all application monies will be returned (subject to application channels), without interest, on the terms set out in the section headed “How to Apply for Hong Kong Offer Shares – D. Despatch/Collection of H Share Certificates and Refund of Application Monies.”

STRUCTURE OF THE GLOBAL OFFERING

H Share certificates for the Offer Shares will only become valid evidence of title at 8:00 a.m. on Monday, December 22, 2025 provided that the Global Offering has become unconditional in all respects at or before that time and the right of termination as described in the section headed “Underwriting – Underwriting Arrangements and Expenses – Hong Kong Public Offering – Grounds for Termination” in this prospectus has not been exercised.

ADMISSION OF THE H SHARES INTO CCASS

All necessary arrangements have been made enabling the H Shares to be admitted into CCASS.

If the Stock Exchange grants the listing of, and permission to deal in, the H Shares and the Company complies with the stock admission requirements of HKSCC, the H Shares will be accepted as eligible securities by HKSCC for deposit, clearance and settlement in CCASS with effect from the date of commencement of dealings in the H Shares on the Stock Exchange or any other date HKSCC chooses. Settlement of transactions between participants of the Stock Exchange is required to take place in CCASS on the second settlement day after any trading day.

All activities under CCASS are subject to the General Rules of HKSCC and the HKSCC Operational Procedures in effect from time to time.

Investors should seek the advice of their stockbroker or other professional advisor for details of the settlement arrangements as such arrangement may affect their rights and interests.

DEALINGS ARRANGEMENTS

Assuming that the Hong Kong Public Offering becomes unconditional at or before 8:00 a.m. in Hong Kong on Monday, December 22, 2025, it is expected that dealings in the H Shares on the Stock Exchange will commence at 9:00 a.m. on Monday, December 22, 2025. The H Shares will be traded in board lots of 500 Shares each and the stock code of our Shares will be 2691.

HOW TO APPLY FOR HONG KONG OFFER SHARES

IMPORTANT NOTICE TO INVESTORS OF HONG KONG OFFER SHARES

FULLY ELECTRONIC APPLICATION PROCESS

We have adopted a fully electronic application process for the Hong Kong Public Offering and below are the procedures for application.

This prospectus is available at the website of the Stock Exchange at www.hkexnews.hk under the “HKEXnews > New Listings > New Listing Information” section, and our website at <http://www.nanhua.net>.

The contents of this prospectus are identical to the prospectus as registered with the Registrar of Companies in Hong Kong pursuant to Section 342C of the Companies (Winding Up and Miscellaneous Provisions) Ordinance.

A. APPLICATION FOR HONG KONG OFFER SHARES

1. Who Can Apply

You can apply for Hong Kong Offer Shares if you or the person(s) for whose benefit you are applying for:

- are 18 years of age or older;
- have a Hong Kong address (*for the **White Form eIPO** service only*); and
- are outside the United States (within the meaning of Regulation S), and are a person described in paragraph (h)(3) of Rule 902 of Regulation S.

Unless permitted by the Listing Rules or a waiver and/or consent has been granted by the Stock Exchange to us, you cannot apply for any Hong Kong Offer Shares if you or the person(s) for whose benefit you are applying for:

- are an existing Shareholder or close associates; or
- are a Director or any of his/her close associates.

HOW TO APPLY FOR HONG KONG OFFER SHARES

2. Application Channels

The Hong Kong Public Offering period will begin at 9:00 a.m. on Friday, December 12, 2025 and end at 12:00 noon on Wednesday, December 17, 2025 (Hong Kong time).

To apply for Hong Kong Offer Shares, you may use one of the following application channels:

<u>Application Channel</u>	<u>Platform</u>	<u>Target Investors</u>	<u>Application Time</u>
White Form eIPO service	<u>www.eipo.com.hk</u>	Applicants who would like to receive a physical H Share certificate. Hong Kong Offer Shares successfully applied for will be allotted and issued in your own name	From 9:00 a.m. on Friday, December 12, 2025 to 11:30 a.m. on Wednesday, December 17, 2025, Hong Kong time. The latest time for completing full payment of Application monies will be 12:00 noon on Wednesday, December 17, 2025, Hong Kong time.
HKSCC EIPO channel	Your broker or custodian who is a HKSCC Participant will submit electronic application instruction on your behalf through HKSCC's FINI system in accordance with your instruction.	Applicants who would not like to receive a physical H Share certificate. Hong Kong Offer Shares successfully applied for will be allotted and issued in the name of HKSCC Nominees, deposited directly into CCASS and credited to your designated HKSCC Participant's stock account	Contact your broker or custodian for the earliest and latest time for giving such instructions, as this may vary by broker or custodian.

The **White Form eIPO** service and the **HKSCC EIPO** channel are facilities subject to capacity limitations and potential service interruptions and you are advised not to wait until the last day of the application period to apply for Hong Kong Offer Shares.

HOW TO APPLY FOR HONG KONG OFFER SHARES

For those applying through the **White Form eIPO** service, once you complete payment in respect of any application instructions given by you or for your benefit through the **White Form eIPO** Service Provider to make an application for Hong Kong Offer Shares, an actual application shall be deemed to have been made. If you are a person for whose benefit the electronic application instructions are given, you shall be deemed to have declared that only one set of electronic application instructions has been given for your benefit. If you are an agent for another person, you shall be deemed to have declared that you have only given one set of electronic application instructions for the benefit of the person for whom you are an agent and that you are duly authorised to give those instructions as an agent.

For the avoidance of doubt, giving an application instruction under the **White Form eIPO** service more than once and obtaining different application reference numbers without effecting full payment in respect of a particular reference number will not constitute an actual application.

If you apply through the **White Form eIPO** service, you are deemed to have authorised the **White Form eIPO** Service Provider to apply on the terms and conditions in this prospectus, as supplemented and amended by the terms and conditions of the **White Form eIPO** service.

By instructing your broker or custodian to apply for the Hong Kong Offer Shares on your behalf through the **HKSCC EIPO** channel, you (and, if you are joint applicants, each of you jointly and severally) are deemed to have instructed and authorised HKSCC to cause HKSCC Nominees (acting as nominee for the relevant HKSCC Participants) to apply for Hong Kong Offer Shares on your behalf and to do on your behalf all the things stated in this prospectus and any supplement to it.

For those applying through **HKSCC EIPO** channel, an actual application will be deemed to have been made for any application instructions given by you or for your benefit to HKSCC (in which case an application will be made by HKSCC Nominees on your behalf) provided such application instruction has not been withdrawn or otherwise invalidated before the closing time of the Hong Kong Public Offering.

HKSCC Nominees will only be acting as a nominee for you and neither HKSCC nor HKSCC Nominees shall be liable to you or any other person in respect of any actions taken by HKSCC or HKSCC Nominees on your behalf to apply for Hong Kong Offer Shares or for any breach of the terms and conditions of this prospectus.

HOW TO APPLY FOR HONG KONG OFFER SHARES

3. Information Required to Apply

You must provide the following information with your application:

For Individual Applicants

- Full name(s)² as shown on your identity document
- Identity document's issuing country or jurisdiction
- Identity document type, with order of priority
 - i. HKID card; or
 - ii. National identification document; or
 - iii. Passport; and
- Identity document number

For Corporate Applicants

- Full name(s)² as shown on your identity document
- Identity document's issuing country or jurisdiction
- Identity document type, with order of priority:
 - i. LEI registration document; or
 - ii. Certificate of incorporation; or
 - iii. Business registration certificate; or
 - iv. Other equivalent document; and
- Identity document number

Notes:

1. If you are applying through the **White Form eIPO** service, you are required to provide a valid e-mail address, a contact telephone number and a Hong Kong address. You are also required to declare that the identity information provided by you follows the requirements as described in Note 2 below. In particular, where you cannot provide a HKID number, you must confirm that you do not hold a HKID card. The number of joint applicants may not exceed four. If you are a firm, the applicant must be in the individual members' names.
2. The applicant's full name as shown on their identity document must be used and the surname, given name, middle and other names (if any) must be input in the same order as shown on the identity document. If an applicant's identity document contains both an English and Chinese name, both English and Chinese names must be used. Otherwise, either English or Chinese names will be accepted. The order of priority of the applicant's identity document type must be strictly followed and where an individual applicant has a valid HKID card (including both Hong Kong Residents and Hong Kong Permanent Residents), the HKID number must be used when making an application to subscribe for Hong Kong Offer Shares. Similarly for corporate applicants, a LEI number must be used if an entity has a LEI certificate.

HOW TO APPLY FOR HONG KONG OFFER SHARES

3. If the applicant is a trustee, the client identification data (“CID”) of the trustee, as set out above, will be required. If the applicant is an investment fund (i.e. a collective investment scheme, or CIS), the CID of the asset management company or the individual fund, as appropriate, which has opened a trading account with the broker will be required, as above.
4. The maximum number of joint account holders on FINI is capped at 4¹ in accordance with market practise.
5. If you are applying as a nominee, you must provide: (i) the full name (as shown on the identity document), the identity document’s issuing country or jurisdiction, the identity document type; and (ii) the identity document number, for each of the beneficial owners or, in the case(s) of joint beneficial owners, for each joint beneficial owner. If you do not include this information, the application will be treated as being made for your benefit.
6. If you are applying as an unlisted company and (i) the principal business of that company is dealing in securities; and (ii) you exercise statutory control over that company, then the application will be treated as being for your benefit and you should provide the required information in your application as stated above.

“Unlisted company” means a company with no equity securities listed on the Stock Exchange or any other stock exchange.

“Statutory control” means you:

- control the composition of the board of directors of the company;
- control more than half of the voting power of the company; or
- hold more than half of the registered share capital of the company (not counting any part of it which carries no right to participate beyond a specified amount in a distribution of either profits or capital).

For those applying through **HKSCC EIPO** channel, and making an application under a power of attorney, we and the Overall Coordinators, as our agents, have discretion to consider whether to accept it on any conditions we think fit, including evidence of the attorney’s authority.

Failing to provide any required information may result in your application being rejected.

¹ Subject to change, if the Company’s Articles of Incorporation and applicable company law prescribe a lower cap.

HOW TO APPLY FOR HONG KONG OFFER SHARES

4. Permitted Number of Hong Kong Offer Shares for Application

Board lot size : 500 H Shares

Permitted number of Hong Kong Offer Shares for application and amount payable on application/successful allotment

Hong Kong Offer Shares are available for application in specified board lot sizes only. Please refer to the amount payable associated with each specified board lot size in the table below.

The maximum Offer Price is HK\$16.00 per Offer Share.

If you are applying through the **HKSCC EIPO** channel, your broker or custodian may require you to pre-fund your application in such amount as determined by the broker or custodian, based on the applicable laws and regulations in Hong Kong. You are responsible for complying with any such pre-funding requirement imposed by your broker or custodian with respect to the Hong Kong Offer Shares you applied for.

By instructing your broker or custodian to apply for the Hong Kong Offer Shares on your behalf through the **HKSCC EIPO** channel, you (and, if you are joint applicants, each of you jointly and severally) are deemed to have instructed and authorised HKSCC to cause HKSCC Nominees (acting as nominee for the relevant HKSCC Participants) to arrange payment of the final Offer Price, brokerage, SFC transaction levy, the Stock Exchange trading fee and the AFRC transaction levy by debiting the relevant nominee bank account at the Designated Bank for your broker or custodian.

If you are applying through the **White Form eIPO** service, you may refer to the table below for the amount payable for the number of H Shares you have selected. You must pay the respective maximum amount payable on application in full upon application for Hong Kong Offer Shares.

- (1) Maximum number of Hong Kong Offer Shares you may apply for.
- (2) The amount payable is inclusive of brokerage, SFC transaction levy, the Stock Exchange trading fee and AFRC transaction levy. If your application is successful, brokerage will be paid to the Exchange Participants (as defined in the Listing Rules) and the SFC transaction levy, the Stock Exchange trading fee and AFRC transaction levy are paid to the Stock Exchange (in the case of the SFC transaction levy, collected by the Stock Exchange on behalf of the SFC; and in the case of the AFRC transaction levy, collected by the Stock Exchange on behalf of the AFRC).

5. Multiple Applications Prohibited

You or your joint applicant(s) shall not make more than one application for your own benefit, except where you are a nominee and provide the information of the underlying investor in your application as required under the paragraph headed “– A. Applications for Hong Kong Offer Shares – 3. Information Required to Apply” in this section. If you are suspected of submitting or cause to submit more than one application, all of your applications will be rejected.

Multiple applications made either through (i) the **White Form eIPO** service, (ii) **HKSCC EIPO** channel, or (iii) both channels concurrently are prohibited and will be rejected. If you have made an application through the **White Form eIPO** service or **HKSCC EIPO** channel, you or the person(s) for whose benefit you have made the application shall not apply further for any Offer Shares.

HOW TO APPLY FOR HONG KONG OFFER SHARES

6. Terms and Conditions of an Application

By applying for Hong Kong Offer Shares through the **White Form eIPO** service or **HKSCC EIPO** channel, you (or as the case may be, HKSCC Nominees will do the following things on your behalf):

- (i) undertake to execute all relevant documents and instruct and authorise us and/or the Overall Coordinators, as our agents, to execute any documents for you and to do on your behalf all things necessary to register any Hong Kong Offer Shares allocated to you in your name or in the name of HKSCC Nominees as required by the Articles of Association, and (if you are applying through the **HKSCC EIPO** channel) to deposit the allotted Hong Kong Offer Shares directly into CCASS for the credit of your designated HKSCC Participant's stock account on your behalf;
- (ii) confirm that you have read and understand the terms and conditions and application procedures set out in this prospectus and the designated website of the **White Form eIPO** service (or as the case may be, the agreement you entered into with your broker or custodian), and agree to be bound by them;
- (iii) (if you are applying through the **HKSCC EIPO** channel) agree to the arrangements, undertakings and warranties under the participant agreement between your broker or custodian and HKSCC and observe the General Rules of HKSCC and the HKSCC Operational Procedures for giving application instructions to apply for Hong Kong Offer Shares;
- (iv) confirm that you are aware of the restrictions on offers and sales of shares set out in this prospectus and they do not apply to you, or the person(s) for whose benefit you have made the application;
- (v) confirm that you have read this prospectus and any supplement to it and have relied only on the information and representations contained therein in making your application (or as the case may be, causing your application to be made) and will not rely on any other information or representations;

HOW TO APPLY FOR HONG KONG OFFER SHARES

- (vi) agree that the Relevant Persons, the H Share Registrar and HKSCC will not be liable for any information and representations not in this prospectus and any supplement to it;
- (vii) agree to disclose the details of your application and your personal data and any other personal data which may be required about you and the person(s) for whose benefit you have made the application to us, the Relevant Persons, the H Share Registrar, HKSCC, HKSCC Nominees, the Stock Exchange, the SFC and any other statutory regulatory or governmental bodies or otherwise as required by laws, rules or regulations, for the purposes under the paragraph headed “– G. Personal Data – 3. Purposes and – 4. Transfer of personal data” in this section;
- (viii) agree (without prejudice to any other rights which you may have once your application (or as the case may be, HKSCC Nominees’ application) has been accepted) that you will not rescind it because of an innocent misrepresentation;
- (ix) agree that subject to Section 44A(6) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance, any application made by you or HKSCC Nominees on your behalf cannot be revoked once it is accepted, which will be evidenced by the notification of the result of the ballot by the H Share Registrar by way of publication of the results at the time and in the manner as specified in the paragraph headed “– B. Publication of Results” in this section;
- (x) confirm that you are aware of the situations specified in the paragraph headed “– C. Circumstances In Which You Will Not Be Allocated Hong Kong Offer Shares” in this section;
- (xi) agree that your application or HKSCC Nominees’ application, any acceptance of it and the resulting contract will be governed by and construed in accordance with the laws of Hong Kong;
- (xii) agree to comply with the Companies Ordinance, the Companies (Winding Up and Miscellaneous Provisions) Ordinance, the Articles of Association and laws of any place outside Hong Kong that apply to your application and that neither we nor the Relevant Persons will breach any law inside and/or outside Hong Kong as a result of the acceptance of your offer to purchase, or any action arising from your rights and obligations under the terms and conditions contained in this prospectus;

HOW TO APPLY FOR HONG KONG OFFER SHARES

- (xiii) confirm that (a) your application or HKSCC Nominees' application on your behalf is not financed directly or indirectly by the Company, any of the directors, chief executives, substantial Shareholder(s) or existing shareholder(s) of our Company or any of our subsidiaries or any of their respective close associates; and (b) you are not accustomed or will not be accustomed to taking instructions from our Company, any of the directors, chief executives, substantial shareholder(s) or existing shareholder(s) of our Company or any of our subsidiaries or any of their respective close associates in relation to the acquisition, disposal, voting or other disposition of the H Shares registered in your name or otherwise held by you;
- (xiv) warrant that the information you have provided is true and accurate;
- (xv) confirm that you understand that we and the Overall Coordinators will rely on your declarations and representations in deciding whether or not to allocate any Hong Kong Offer Shares to you and that you may be prosecuted for making a false declaration;
- (xvi) agree to accept Hong Kong Offer Shares applied for or any lesser number allocated to you under the application;
- (xvii) declare and represent that this is the only application made and the only application intended by you to be made to benefit you or the person for whose benefit you are applying;
- (xviii) (if the application is made for your own benefit) warrant that no other application has been or will be made for your benefit by giving electronic application instructions to HKSCC directly or indirectly or through the application channel of the **White Form eIPO** Service Provider or by any one as your agent or by any other person; and
- (xix) (if you are making the application as an agent for the benefit of another person) warrant that (1) no other application has been or will be made by you as agent for or for the benefit of that person or by that person or by any other person as agent for that person by giving electronic application instructions to HKSCC or the **White Form eIPO** Service Provider and (2) you have due authority to give electronic application instructions on behalf of that other person as its agent.

HOW TO APPLY FOR HONG KONG OFFER SHARES

B. PUBLICATION OF RESULTS

Results of Allocation

You can check whether you are successfully allocated any Hong Kong offer Shares through:

Platform	Date/Time

Applying through the **White Form eIPO** services or **HKSCC EIPO** channel:

Website	The designated results of allocation at www.iporesults.com.hk or https://www.eipo.com.hk/eIPOAllotment/ with a “search by ID” function.	24 hours, from 11:00 p.m. on Friday, December 19, 2025 to 12:00 midnight on Thursday, December 25, 2025 (Hong Kong time)

The full list of (i) wholly or partially successful applicants using the **White Form eIPO** service and **HKSCC EIPO** channel, and (ii) the number of Hong Kong Offer Shares conditionally allotted to them, among other things, will be displayed on the “Allotment Results” page of the **White Form eIPO** service at www.iporesults.com.hk (alternatively: www.eipo.com.hk/eIPOAllotment/).

The Stock Exchange’s website at www.hkexnews.hk and our website at http://www.nanhua.net which will provide links to the above mentioned websites of the H Share Registrar.	No later than 11:00 p.m. on Friday, December 19, 2025 (Hong Kong time).

Telephone	+852 2862 8555 – the allocation results telephone enquiry line provided by the H Share Registrar	between 9:00 a.m. and 6:00 p.m., on Monday, December 22, 2025, Tuesday, December 23, 2025, Wednesday, December 24, 2025 and Monday, December 29, 2025 (Hong Kong time) on a business day

For those applying through **HKSCC EIPO** channel, you may also check with your broker or custodian from 6:00 p.m. on Thursday, December 18, 2025 (Hong Kong time).

HKSCC Participants can log into FINI and review the allotment result from 6:00 p.m. on Thursday, December 18, 2025 (Hong Kong time) on a 24-hour basis and should report any discrepancies on allotments to HKSCC as soon as practicable.

HOW TO APPLY FOR HONG KONG OFFER SHARES

Allocation Announcement

We expect to announce the results of the final Offer Price, the level of indications of interest in the International Offering, the level of applications in the Hong Kong Public Offering and the basis of allocations of Hong Kong Offer Shares on the Stock Exchange's website at www.hkexnews.hk and our website at <http://www.nanhua.net> by no later than 11:00 p.m. on Friday, December 19, 2025 (Hong Kong time).

C. CIRCUMSTANCES IN WHICH YOU WILL NOT BE ALLOCATED HONG KONG OFFER SHARES

You should note the following situations in which Hong Kong Offer Shares will not be allocated to you or the person(s) for whose benefit you are applying for:

1. If your application is revoked:

Your application or the application made by HKSCC Nominees on your behalf may be revoked pursuant to Section 44A(6) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance.

2. If we or our agents exercise our discretion to reject your application:

We, the Overall Coordinators, the H Share Registrar and their respective agents and nominees have full discretion to reject or accept any application, or to accept only part of any application, without giving any reasons.

3. If the allocation of Hong Kong Offer Shares is void:

The allocation of Hong Kong Offer Shares will be void if the Stock Exchange does not grant permission to list the Shares either:

- within three weeks from the closing date of the application lists; or
- within a longer period of up to six weeks if the Stock Exchange notifies us of that longer period within three weeks of the closing date of the application lists.

4. If:

- you make multiple applications or suspected multiple applications. See “– A. Application for Hong Kong Offer Shares – 5. Multiple Applications Prohibited” on what constitutes multiple applications;
- your application instruction is incomplete;

HOW TO APPLY FOR HONG KONG OFFER SHARES

- your payment (or confirmation of funds, as the case may be) is not made correctly;
- the Underwriting Agreements do not become unconditional or are terminated;
- we or the Overall Coordinators believe that by accepting your application, it or we would violate applicable securities or other laws, rules or regulations.

5. If there is money settlement failure for allotted Shares:

Based on the arrangements between HKSCC Participants and HKSCC, HKSCC Participants will be required to hold sufficient application funds on deposit with their Designated Bank before balloting. After balloting of Hong Kong Offer Shares, the Receiving Banks will collect the portion of these funds required to settle each HKSCC Participant's actual allotment of Hong Kong Offer Shares from their Designated Bank.

There is a risk of money settlement failure. In the extreme event of money settlement failure by a HKSCC Participant (or its Designated Bank), who is acting on your behalf in settling payment for your allotted shares, HKSCC will contact the defaulting HKSCC Participant and its Designated Bank to determine the cause of failure and request such defaulting HKSCC Participant to rectify or procure to rectify the failure.

However, if it is determined that such settlement obligation cannot be met, the affected Hong Kong Offer Shares will be reallocated to the International Offering. Hong Kong Offer Shares applied for by you through the broker or custodian may be affected to the extent of the settlement failure. In the extreme case, you will not be allocated any Hong Kong Offer Shares due to the money settlement failure by such HKSCC Participant. None of us, the Relevant Persons, the H Share Registrar and HKSCC is or will be liable if Hong Kong Offer Shares are not allocated to you due to the money settlement failure.

D. DESPATCH/COLLECTION OF H SHARE CERTIFICATES AND REFUND OF APPLICATION MONIES

You will receive one H Share certificate for all Hong Kong Offer Shares allotted to you under the Hong Kong Public Offering (except pursuant to applications made through the **HKSCC EIPO** channel where the H Share certificates will be deposited into CCASS as described below).

No temporary document of title will be issued in respect of the H Shares. No receipt will be issued for sums paid on application.

H Share certificates will only become valid evidence of title at 8:00 a.m. on Monday, December 22, 2025 (Hong Kong time), provided that the Global Offering has become unconditional and the right of termination described in the section headed "Underwriting" has not been exercised. Investors who trade H Shares prior to the receipt of H Share certificates or the H Share certificates becoming valid do so entirely at their own risk.

HOW TO APPLY FOR HONG KONG OFFER SHARES

The right is reserved to retain any H Share certificate(s) and (if applicable) any surplus application monies pending clearance of application monies.

The following sets out the relevant procedures and time:

	<u>White Form eIPO service</u>	<u>HKSCC EIPO channel</u>

Application monies paid through multiple bank accounts	Refund cheque(s) will be despatched to the address as specified in your application instructions by ordinary post at your own risk	

E. SEVERE WEATHER ARRANGEMENTS

The Opening and Closing of the Application Lists

The application lists will not open or close on Wednesday, December 17, 2025 if, there is/are:

- a tropical cyclone warning signal number 8 or above;
- a black rainstorm warning; and/or
- Extreme Conditions

(collectively, “**Severe Weather Signals**”),

in force in Hong Kong at any time between 9:00 a.m. and 12:00 noon on Wednesday, December 17, 2025.

HOW TO APPLY FOR HONG KONG OFFER SHARES

Instead they will open between 11:45 a.m. and 12:00 noon and/or close at 12:00 noon on the next business day which does not have **Severe Weather Signals** in force at any time between 9:00 a.m. and 12:00 noon.

Prospective investors should be aware that a postponement of the opening/closing of the application lists may result in a delay in the listing date. Should there be any changes to the dates mentioned in the section headed “Expected Timetable” in this prospectus, an announcement will be made and published on the Stock Exchange’s website at www.hkexnews.hk and our website at <http://www.nanhua.net> of the revised timetable.

If a **Severe Weather Signal** is hoisted on Friday, December 19, 2025, the H Share Registrar will make appropriate arrangements for the delivery of the H Share certificates to the CCASS Depository’s service counter so that they would be available for trading on Monday, December 22, 2025.

If a **Severe Weather Signal** is hoisted on Friday, December 19, 2025, for physical share certificates of less than 1,000,000 Offer Shares issued under your own name, the despatch of physical H Share certificate(s) will be made by ordinary post when the post office re-opens after the **Severe Weather Signal** is lowered or cancelled (e.g. in the afternoon of Friday, December 19, 2025 or on Monday, December 22, 2025).

If a **Severe Weather Signal** is hoisted on Monday, December 22, 2025, for physical share certificates of 1,000,000 or more Offer Shares issued under your own name, physical H Share certificate(s) will be available for collection in person at the H Share Registrar’s office after the **Severe Weather Signal** is lowered or cancelled (e.g. in the afternoon of Monday, December 22, 2025 or on Tuesday, December 23, 2025).

Prospective investors should be aware that if they choose to receive physical H Share certificates issued in their own name, there may be a delay in receiving the H Share certificates.

F. ADMISSION OF THE H SHARES INTO CCASS

If the Stock Exchange grants the listing of, and permission to deal in, the H Shares on the Stock Exchange and we comply with the stock admission requirements of HKSCC, the H Shares will be accepted as eligible securities by HKSCC for deposit, clearance and settlement in CCASS with effect from the date of commencement of dealings in the H Shares or any other date HKSCC chooses. Settlement of transactions between Exchange Participants is required to take place in CCASS on the second settlement Day after any trading day.

All activities under CCASS are subject to the General Rules of HKSCC and the HKSCC Operational Procedures in effect from time to time.

All necessary arrangements have been made enabling the H Shares to be admitted into CCASS.

HOW TO APPLY FOR HONG KONG OFFER SHARES

You should seek the advice of your broker or other professional advisor for details of the settlement arrangement as such arrangements may affect your rights and interests.

G. PERSONAL DATA

The following Personal Information Collection Statement applies to any personal data collected and held by our Company, the H Share Registrar, the Receiving Banks and the Relevant Persons about you in the same way as it applies to personal data about applicants other than HKSCC Nominees. This personal data may include client identifier(s) and your identification information. By giving application instructions to HKSCC, you acknowledge that you have read, understood and agree to all of the terms of the Personal Information Collection Statement below.

1. Personal Information Collection Statement

This Personal Information Collection Statement informs the applicant for, and holder of, Hong Kong Offer Shares, of the policies and practices of our Company and the H Share Registrar in relation to personal data and the Personal Data (Privacy) Ordinance (Chapter 486 of the Laws of Hong Kong).

2. Reasons for the Collection of Your Personal Data

It is necessary for applicants and registered holders of Hong Kong Offer Shares to ensure that personal data supplied to our Company or our agents and the H Share Registrar is accurate and up-to-date when applying for Hong Kong Offer Shares or transferring Hong Kong Offer Shares into or out of their names or in procuring the services of the H Share Registrar.

Failure to supply the requested data or supplying inaccurate data may result in your application for Hong Kong Offer Shares being rejected, or in the delay or the inability of our Company or the H Share Registrar to effect transfers or otherwise render their services. It may also prevent or delay registration or transfers of Hong Kong Offer Shares which you have successfully applied for and/or the despatch of H Share certificate(s) to which you are entitled.

It is important that applicants for and holders of Hong Kong Offer Shares inform our Company and the H Share Registrar immediately of any inaccuracies in the personal data supplied.

3. Purposes

Your personal data may be used, held, processed, and/or stored (by whatever means) for the following purposes:

- processing your application and refund cheque and **White Form** e-Refund payment instruction(s), where applicable, verification of compliance with the terms and application procedures set out in this prospectus and announcing results of allocation of Hong Kong Offer Shares;

HOW TO APPLY FOR HONG KONG OFFER SHARES

- compliance with applicable laws and regulations in Hong Kong and elsewhere;
- registering new issues or transfers into or out of the names of the holders of the Shares including, where applicable, HKSCC Nominees;
- maintaining or updating the register of members of our Company;
- verifying identities of applicants for and holders of the Shares and identifying any duplicate applications for the Shares;
- facilitating the balloting of Hong Kong Offer Shares balloting;
- establishing benefit entitlements of holders of the Shares, such as dividends, rights issues, bonus issues, etc.;
- distributing communications from our Company and our subsidiaries;
- compiling statistical information and profiles of the holder of the H Shares;
- disclosing relevant information to facilitate claims on entitlements; and
- any other incidental or associated purposes relating to the above and/or to enable our Company and the H Share Registrar to discharge our and their obligations to applicants and holders of the H Shares and/or regulators and/or any other purposes to which applicants and holders of the H Shares may from time to time agree.

4. Transfer of Personal Data

Personal data held by our Company and the H Share Registrar relating to the applicants for and holders of Hong Kong Offer Shares will be kept confidential but our Company and the H Share Registrar may, to the extent necessary for achieving any of the above purposes, disclose, obtain or transfer (whether within or outside Hong Kong) the personal data to, from or with any of the following:

- our Company's appointed agents such as financial advisers, Receiving Banks and overseas principal share registrar;
- HKSCC or HKSCC Nominees, who will use the personal data and may transfer the personal data to the H Share Registrar, in each case for the purposes of providing its services or facilities or performing its functions in accordance with its rules or procedures and operating FINI and CCASS (including where applicants for the Hong Kong Offer Shares request a deposit into CCASS);

HOW TO APPLY FOR HONG KONG OFFER SHARES

- any agents, contractors or third-party service providers who offer administrative, telecommunications, computer, payment or other services to the Company or the H Share Registrar in connection with their respective business operation;
- the Stock Exchange, the SFC and any other statutory regulatory or governmental bodies or otherwise as required by laws, rules or regulations, including for the purpose of the Stock Exchange's administration of the Listing Rules and the SFC's performance of its statutory functions; and
- any persons or institutions with which the holders of Hong Kong Offer Shares have or propose to have dealings, such as their bankers, solicitors, accountants or brokers etc.

5. Retention of Personal Data

Our Company and the H Share Registrar will keep the personal data of the applicants and holders of Hong Kong Offer Shares for as long as necessary to fulfil the purposes for which the personal data were collected. Personal data which is no longer required will be destroyed or dealt with in accordance with the Personal Data (Privacy) Ordinance (Chapter 486 of the Laws of Hong Kong).

6. Access to and Correction of Personal Data

Applicants for and holders of Hong Kong Offer Shares have the right to ascertain whether our Company or the H Share Registrar hold their personal data, to obtain a copy of that data, and to correct any data that is inaccurate. Our Company and the H Share Registrar have the right to charge a reasonable fee for the processing of such requests. All requests for access to data or correction of data should be addressed to our Company and the H Share Registrar, at their registered address disclosed in the section headed "Corporate information" in this prospectus or as notified from time to time, for the attention of the company secretary, or the H Share Registrar for the attention of the privacy compliance officer.

The following is the text of a report set out on pages I-1 to I-4, received from the Company's reporting accountant, Confucius International CPA Limited, Certified Public Accountants, Hong Kong, for the purpose of incorporation in this prospectus. It is prepared and addressed to the directors of the Company and to the Sole Sponsor pursuant to the requirements of HKSIR 200, Accountants' Reports on Historical Financial Information in Investment Circulars issued by the Hong Kong Institute of Certified Public Accountants.

ACCOUNTANT'S REPORT ON HISTORICAL FINANCIAL INFORMATION TO THE DIRECTORS OF NANHUA FUTURES CO., LTD. AND CITIC SECURITIES (HONG KONG) LIMITED

Introduction

We report on the historical financial information of Nanhua Futures Co., Ltd. (the “**Company**”) and its subsidiaries (together, the “**Group**”) set out on pages I-5 to I-107, which comprises the consolidated statements of financial position of the Group and the statements of financial position of the Company as at December 31, 2022, 2023, 2024, and June 30, 2025, and the consolidated statements of profit or loss, and the consolidated statements of comprehensive income, the consolidated statements of changes in equity and the consolidated statements of cash flows for each of the years ended December 31, 2022, 2023, 2024 and the six months ended 2024 and 2025 (the “**Track Record Period**”) and material accounting policy information and other explanatory information (together, the “**Historical Financial Information**”). The Historical Financial Information set out on pages I-5 to I-107 forms an integral part of this report, which has been prepared for inclusion in the prospectus of the Company dated December 12, 2025 (the “**Prospectus**”) in connection with the initial listing of H Shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited.

Directors' responsibility for the Historical Financial Information

The directors of the Company are responsible for the preparation of Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in Note 2.1 to the Historical Financial Information, and for such internal control as the directors determine is necessary to enable the preparation of Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountant's responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200, *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountant's judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountant considers internal control relevant to the entity's preparation of Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in Note 2.1 to the Historical Financial Information in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the Historical Financial Information gives, for the purposes of the accountant's report, a true and fair view of the financial position of the Company as at December 31, 2022, 2023 and 2024, and June 30, 2025 and the consolidated financial position of the Group as at December 31, 2022, 2023 and 2024, and June 30, 2025 and of its consolidated financial performance and its consolidated cash flows for the Track Record Period in accordance with the basis of preparation set out in Note 2.1 to the Historical Financial Information.

Review of stub period comparative financial information

We have reviewed the stub period comparative financial information of the Group which comprises the consolidated statement of profit or loss, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the six months ended June 30, 2024 and other explanatory information (the "**Stub Period Comparative Financial Information**"). The directors of the Company are responsible for the presentation and preparation of the Stub Period Comparative Financial Information in accordance with the basis of preparation set out in Note 2.1 to the Historical Financial Information. Our responsibility is to express a conclusion on the Stub Period Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410, *Review of Interim Financial Information*

Performed by the Independent Auditor of the Entity issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Stub Period Comparative Financial Information, for the purposes of the accountant's report, is not prepared, in all material respects, in accordance with the basis of preparation set out in Note 2.1 to the Historical Financial Information.

Report on matters under the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules") and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments

In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page I-4 have been made.

Dividends

We refer to note 20 to the Historical Financial Information which contains information about the dividends paid by Nanhua Futures Co., Ltd. in respect of the Track Record Period.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1 GENERAL INFORMATION

Nanhua Futures Co., Ltd. (the “**Company**”) is incorporated in Zhejiang Province, the People’s Republic of China (the “**PRC**”) as a joint stock financial institution.

The Company was set up upon approval from the China Securities Regulatory Commission (the “**CSRC**”) in May 1996 as a limited liability company with an initial registered capital of RMB10 million. After a series of share transfers and capital increases and upon approval by relevant government authorities, the Company was converted from a limited liability company into a joint-stock company. After the conversion, the registered share capital of the Company was RMB640 million and the Company’s Chinese name was changed accordingly (南華期貨股份有限公司). The Company holds the business license No. 91330000100023242A. The registered address of the Company is Hengdian Building, Shangcheng District, Hangzhou City, Zhejiang Province.

The Company and its subsidiaries (the “**Group**”) are principally engaged in financial futures brokerage, commodity futures brokerage, futures investment consultancy, futures asset management, commodity trading and other business activities as permitted by the CSRC.

2 BASIS OF PREPARATION

2.1 Basis of preparation

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (“**IFRS Accounting Standards**”).

The Financial Information have been prepared under the historical cost convention, as modified by the revaluation of certain financial assets and liabilities (including derivative instruments), which are carried at fair value.

The preparation of Financial Information in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the Financial Information are disclosed in Note 5.

The Group continues to adopt the going concern basis in preparing its consolidated financial statements.

Standards, amendments and interpretations that are effective during the relevant periods have been adopted and applied by the Group consistently throughout the relevant periods.

2.2 New and amendments to standards not yet adopted

At the date of this report, the Group has not adopted the following new and amendments to IFRS Accounting Standards which have been issued and are not yet effective:

Standards and amendments	Effective for accounting periods beginning on or after
Amendments to IFRS 10 and IAS 28 ‘Sale or Contribution of Assets between an Investor and its Associate or Joint Venture’	To be determined
Amendments to IAS 21 ‘Lack of Exchange ability’	January 1, 2025
Amendments to IFRS 9 and IFRS 7 ‘Amendments to the Classification and Measurement of Financial Instruments’	January 1, 2026
Annual Improvements – Volume 11 IFRS accounting standards	January 1, 2026
Amendments to IFRS 9 and IFRS 7 ‘Contracts Referencing Nature-dependent Electricity’	January 1, 2026
IFRS 18 ‘Presentation and Disclosure in Financial Statements’	January 1, 2027
IFRS 19 ‘Subsidiaries without Public Accountability: Disclosures’	January 1, 2027

The directors have performed assessment on the new standards and amendments, and has concluded on a preliminary basis that these new standards and amendments would not have a significant impact on the Group's consolidated financial statements when they become effective, except for IFRS 18 which will mainly impact the presentation of profit and loss statements.

IFRS 18 sets out requirements on presentation and disclosures in financial statements and will replace IAS 1 Presentation of Financial Statements. IFRS 18 introduces new requirements to present specified categories and defined subtotals in the statement of profit or loss; provide disclosures on management defined performance measures in the notes to the financial statements and improve aggregation and disaggregation of information to be disclosed in the financial statements. Minor amendments to IAS 7 "Statement of Cash Flows" and IAS 33 "Earnings per Share" are also made.

IFRS 18, and the consequential amendments to other IFRS Accounting Standards, will be effective for annual periods beginning on or after 1 January 2027, with early application permitted.

The application of IFRS 18 is not expected to have material impact on the financial position of the Group but is expected to affect the presentation of the consolidated statement of profit or loss and other comprehensive income and consolidated statement of cash flows and disclosures in the future financial statements. The Group will continue to assess the impact of IFRS 18 on the consolidated financial statements of the Group.

3 MATERIAL ACCOUNTING POLICIES

3.1 Principles of consolidation and equity accounting

(a) Subsidiaries

Subsidiaries are entities (including a structured entity) over which the Group has control. The Group controls an entity where the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only, and the relevant activities are directed by means of contractual arrangements. A structured entity often has some or all of the following features or attributes: (a) restricted activities; (b) a narrow and well-defined objective, such as to provide investment opportunities for investors by passing on risks and rewards associated with the assets of the structured entity to investors; (c) insufficient equity to permit the structured entity to finance its activities without subordinated financial support; and (d) financing in the form of multiple contractually linked instruments to investors that create concentrations of credit or other risks (tranches).

Management applies its judgment to determine whether the Group is acting as agent or principal in relation to the structured entities ("SEs") in which the Group acts as an asset manager or an investor. In assessing whether the Group is acting as agent or principal, the Group considers factors such as scope of the asset manager's decision-making authority, rights held by other parties, remuneration to which it is entitled, and exposure to variability of returns by other arrangements (such as direct investments).

Inter-company transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of comprehensive income, statement of changes in equity and statement of financial position respectively.

(b) Associates and joint ventures

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the Group holds between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method, after initially being recognized at cost.

Interests in joint ventures are accounted for using the equity method, after initially being recognized at cost in the consolidated statement of financial position.

(c) Equity method

Under the equity method of accounting, the investments are initially recognized at cost and adjusted thereafter to recognize the Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates are recognized as a reduction in the carrying amount of the investment.

Where the Group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognize further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in these entities. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees have been changed where necessary to ensure consistency with the policies adopted by the Group.

(d) Changes in ownership interests

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognized in a separate reserve within equity attributable to owners of the Group.

When the Group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognized in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable IFRSs.

3.2 Financial instruments

(a) Initial recognition, classification and measurement of financial instruments

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on trade date, the date on which the Group commits to purchase or sell the asset.

At initial recognition, the Group measures a financial asset or financial liability at its fair value, in the case of a financial asset or financial liability not at fair value through profit or loss, plus or minus transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs of financial assets and financial liabilities carried at fair value through profit or loss are expensed in profit or loss.

Financial assets are classified on the basis of the Group's business model for managing the asset and the cash flow characteristics of the assets:

- (i) Amortised cost;
- (ii) Fair value through other comprehensive income ("FVOCI"); or
- (iii) Fair value through profit or loss ("FVPL").

Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

Business model reflects how the Group manages the assets in order to generate cash flows. That is, whether the Group's objective is solely to collect the contractual cash flows from the assets or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e. g. financial assets are held for trading purposes), then the financial assets are classified as part of "other" business model and measured at FVPL. Factors considered by the Group in determining the business model for a group of assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, how risks are assessed and managed and how managers are compensated.

Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Group assesses whether the financial instruments' cash flows represent solely payments of principal and interest ("SPPI"). In making this assessment, the Group considers whether the contractual cash flows are consistent with a basic lending arrangement. i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determine whether their cash flows are SPPI.

The classification requirements for debt instruments and equity instruments are described as below:

Debt Instruments

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective.

Classification and subsequent measurement of debt instruments depend on: (i) the Group's business model for managing the asset; and (ii) the cash flow characteristics of asset.

Based on these factors, the Group classifies its debt instruments into one of the following three measurement categories:

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent SPPI, and that are not designated at FVPL, are measured at amortised cost.
- FVOCI: Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets' cash flows represent SPPI, and that are not designated at FVPL, are measured at FVOCI.
- FVPL: Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL.

The Group may also irrevocably designate financial assets at FVPL if doing so significantly reduces or eliminates a mismatch created by assets and liabilities being measured on different bases.

Equity instruments

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets. Examples of equity instruments include basic ordinary shares.

The Group subsequently measures all equity investments at FVPL, except where the Group's management has elected, at initial recognition, to irrevocably designate an equity investment at FVOCI.

Financial liabilities

Financial liabilities are classified as subsequently measured at amortised cost, except for financial liabilities at FVPL, which is applied to derivatives, financial liabilities held for trading (e. g. short positions in the trading books) and other financial liabilities designated as such at initial recognition.

Contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies. Such contingent consideration shall subsequently be measured at fair value with changes recognised in profit or loss.

An entity may, at initial recognition, irrevocably designate a financial liability as measured at fair value through profit or loss: (i) it eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as 'an accounting mismatch'); (ii) a group of financial liabilities or financial assets and financial liabilities is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the Group is provided internally on that basis to the entity's key management personnel.

(b) *Reclassification of financial assets*

When the Group changes the business model for managing its financial assets, it shall reclassify all affected financial assets, and apply the reclassification prospectively from the reclassification date. The Group does not restate any previously recognised gains, losses (including impairment gains or losses) or interest. Reclassification date is the first day of the first reporting period following the change in business model that results in an entity reclassifying financial assets.

(c) *Fair value of financial instruments*

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

The fair values of quoted financial assets and financial liabilities in active markets are based on quoted market prices. If there is no active market, the Group establishes fair value by using valuation techniques. These include the use of market approach, income approach and cost approach. When using valuation techniques, the Group uses observable inputs. Unobservable market inputs would not be used unless relevant observable inputs are not available or not practicable to access.

Default Valuation Adjustments are applied to the Group's financial liabilities at fair value through profit or loss, and assumes that Default Valuation Adjustments stay the same before and after the transfer of the liability. Default Valuation Adjustments refer to risk that enterprises fail to perform the obligation, including but not limited to their own credit risk.

The Group uses the following hierarchy for determining and disclosing the fair values of financial assets and financial liabilities based on the inputs used when determining the fair value:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2: Valuation technique using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: Valuation technique using inputs for the asset or liability that is not based on observable market data (unobservable inputs).

The level of fair value measurement depends on the lowest level of input that is significant to the entire fair value measurement.

(d) Subsequent measurement of financial instruments

Subsequent measurement of financial instruments depends on the categories:

Amortised cost

The amortised cost is the amount at which the financial asset or financial liability is measured at initial recognition: (i) minus the principal repayments; (ii) plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount; and (iii) for financial assets, adjusted for any loss allowance. Interest income from these financial assets is included in "Interest income" using the effective interest rate method.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e. its amortised cost before any impairment allowance) or to the amortised cost of a financial liability. The calculation does not consider expected credit losses ("ECL") and includes transaction costs, premiums or discounts and fees and points paid or received that are integral to the effective interest rate. For purchased or originated credit-impaired ("POCI") financial assets, the Group calculates the credit adjusted effective interest rate, which is calculated based on the amortised cost of the financial asset instead of its gross carrying amount and incorporates the impact of expected credit losses in estimated future cash flows.

When the Group revises the estimates of future cash flows, the carrying amount of the respective financial asset or financial liability is adjusted to reflect the new estimate discounted using the original effective interest rate. Any changes are recognised in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of financial assets and is included in "Interest income", except for: (i) POCI financial assets, whose interest income is calculated, since initial recognition, by applying the credit-adjusted effective interest rate to their amortised cost; and (ii) financial assets that are not POCI but have subsequently become credit-impaired, whose interest income is calculated by applying the effective interest rate to their amortised cost (i.e. net of the expected credit loss allowance). If, in a subsequent period, the financial assets improve their qualities so that they are no longer credit-impaired and the improvement in credit quality is related objectively to a certain event occurring after the application of the above-mentioned rules, then the interest income is calculated by applying the effective interest rate to their gross carrying amount.

*Financial assets at fair value through other comprehensive income*Debt instruments

Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses and interest revenue on the instrument's amortised cost which are recognised in profit or loss. Interest income from these financial assets is included in "interest income" using the effective interest rate method. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in "Investment income".

Equity instruments

The equity instrument investments that are held for purposes other than to generate investment returns are designated as FVOCI. When this election is used, fair value gains and losses are recognised in OCI and are not subsequently reclassified to profit or loss, including on disposal. Impairment losses (and reversal of impairment losses) are not reported separately from other changes in fair value. Dividends, when representing a return on such investments, continue to be recognised in profit or loss as investment income when the Group's right to receive payments is established, and it is probable that future economic benefits associated with the item will flow to the Group, and the amounts of the dividends can be measured reliably.

*Financial assets at fair value through profit or loss*Debt instruments

A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented in the profit or loss statement within "Investment income" in the period in which it arises.

Equity instruments

Gains and losses on equity investments at FVPL are included in the "Investment income" line in the statement of profit or loss.

Contracts for the purchase or sale of non-financial items that are within the scope of financial instruments accounting standards

The Group enters into commodity purchase and sale contracts in the ordinary course of business. With respect to commodity basis trading, the Group engages in spot commodity transactions with customers while concurrently executing commodity futures trades to hedge risks, thereby generating basis profits. As the Group typically receives and subsequently resells the underlying commodities covered by these business contracts within a short period to profit from short-term price fluctuations, these contracts are not entered into and held for the purpose of taking delivery or delivering non-financial items in accordance with predetermined purchase, sale, or usage requirements. Consequently, the Group classifies such contracts as financial instruments, to which the financial instruments accounting standards apply. The difference between the sales consideration received and the carrying value of the commodities sold is recognized in the current period's net investment income.

(e) ***Impairment of financial instruments***

The Group assesses on a forward-looking basis the ECL associated with its debt instrument assets carried at amortised cost and FVOCI.

ECL is the weighted average of credit losses with the respective risks of a default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for POCI financial assets).

The Group measures the ECL of a financial instrument reflects:

- (i) an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- (ii) the time value of money; and
- (iii) reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

For financial instruments whose impairment losses are measured using the ECL model, the Group assesses whether their credit risk has increased significantly since their initial recognition, and applies a three-stage impairment model to calculate their impairment allowance and recognise their ECL, as follows:

Stage I: The Group measures the loss allowance for a financial instrument at an amount equal to the next 12 months ECL if the credit risk of that financial instrument has not increased significantly since initial recognition.

Stage II: The Group measures the loss allowance for a financial instrument at an amount equal to the lifetime ECL if the credit risk of that financial instrument has increased significantly since initial recognition, but is not yet deemed to be credit-impaired.

Stage III: The Group measures the loss allowance for a financial instrument at an amount equal to the lifetime ECL if the financial instrument is credit-impaired.

As at December 31, 2022, 2023 and 2024, and as at June 30, 2025, the ECL rate of receivables are determined as follows:

	As at December 31,			As at
	2022	2023	2024	June 30, 2025
Deposits with exchange-clearing organizations	0.21%	0.30%	0.45%	0.30%
Trade receivables ⁽ⁱ⁾	82.34%	5.00%	5.03%	5.10%
Other current assets	10.85%	3.55%	12.71%	10.72%
Commission receivable	/	5.45%	5.00%	5.00%

- (i) In view of the material uncertainties surrounding the collectibility, a full impairment provision was recognized against the entire accounts receivable balance from Shanghai Hanrui Industrial Development Co., Ltd. as at December 31, 2022. This impaired receivable was subsequently derecognized through a write-off on June 28, 2023.

The Group applies the impairment requirements for the recognition and measurement of loss allowance for debt instruments that are measured at FVOCI. The loss allowance is recognised in OCI and the impairment loss is recognised in profit or loss, and it should not reduce the carrying amount of the financial asset in the statement of financial position.

The Group has measured the loss allowance for a financial instrument at an amount equal to the lifetime ECL in the previous reporting period, but determines to measure it at an amount equal to the next 12 months ECL at the current reporting date since the credit risk of that financial instrument has increased significantly since initial recognition is no longer met, and the amount of ECL reversal is recognised in profit or loss. Excluding POCI financial assets.

The inputs, assumptions and estimation techniques the Group used in ECL models for its debt instrument assets carried at amortised cost and FVOCI refer to Note 4.1(a).

(f) *Derecognition of financial instruments*

A financial asset is derecognised, when one of the following criteria is satisfied:

- (i) the contractual rights to receive cash flows from the assets have expired; or
- (ii) the Group has transferred its rights to receive cash flows from the asset; or has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; and (a) the Group has transferred substantially all the risks and rewards of ownership of the financial asset; or (b) the Group has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset, but not retain control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability.

When the Group has made substantial modifications to a part of the contract terms of an existing financial liability, the relevant portion of the existing financial liability is derecognised, while the financial liability under modified terms is recognised as a new financial liability.

On derecognition of a financial liability in its entirety or partially, the difference between the carrying amount and the consideration paid (including non-cash assets transferred or new financial liabilities assumed) shall be recognised in profit or loss.

If the Group repurchases a part of a financial liability, the Group shall allocate the previous carrying amount of the financial liability between the part that continues to be recognised and the part that is derecognized based on the relative fair values of those parts on the date of the repurchase. The difference between the carrying amount allocated to the part derecognised and the consideration paid (including any non-cash assets transferred or liabilities assumed) for the part derecognised shall be recognised in profit or loss.

3.3 Derivative financial instruments and hedge accounting

Derivative financial instruments

The Group uses derivatives, such as foreign currency contracts, interest rate swaps, contracts of stock index and contracts for difference to economically hedge its foreign currency risk, interest rate risk and stock price risk, respectively. Derivatives financial instruments are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative. Fair values are obtained from quoted market prices in active markets, including recent market transactions, and valuation techniques, including the discounted cash flow analysis and option pricing models, as appropriate. Credit Valuation Adjustments (CVA) and Debit Valuation Adjustments (DVA) are applied to the Group's over-the-counter derivatives to reflect the credit risk of the counterparties and the Group itself, respectively.

Hedge accounting

At the inception of a hedging relationship, the Group formally designates the hedge instruments and the hedged items, and documents the hedging relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to meet the hedge effectiveness in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to analyse the sources of hedge ineffectiveness which are expected to affect the hedging relationship in remaining hedging period. If a hedging relationship ceases to meet the hedge effectiveness requirement relating to the hedge ratio, but the risk management objective for that designated hedging relationship remains the same, the Group would rebalance the hedging relationship.

The Group designates such hedged items as debt securities issued with floating interest that expose the Group to the risk of variability of its cash flows.

Certain derivative transactions, while providing effective economic hedges under the Group's risk management positions, do not qualify for hedge accounting and are therefore treated as derivatives held for trading with fair value gains or losses recognised in profit or loss. Hedges which meet the strict criteria for hedge accounting are accounted for in accordance with the Group's accounting policy as set out below.

Fair value hedges

Fair value hedges are hedges of the Group's exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment, or an identified portion of such an asset, liability or unrecognised firm commitment, that is attributable to a particular risk and could affect the profit or loss or other comprehensive income. Among them, the circumstances affecting other comprehensive income are limited to the hedging for the risk exposure from fair value change of non-trading equity investment designated as at FVOCI. For fair value hedges, the carrying amount of the hedged item is adjusted for gains and losses attributable to the risk being hedged, the derivative is remeasured at fair value and the gains and losses from both are taken to profit or loss or other comprehensive income. For hedged items recorded at amortised cost, the difference between the carrying value of the hedged item and the face value is amortised over the remaining term of the original hedge using the effective interest rate method.

When an unrecognised firm commitment is designated as a hedged item, the subsequent cumulative change in the fair value of the firm commitment attributable to the hedged risk is recognised as an asset or liability with a corresponding gain or loss recognised in profit or loss. The changes in the fair value of the hedging instrument are also recognised in profit or loss.

The Group discontinues fair value hedge accounting when the hedging relationship ceases to meet the qualifying criteria after taking into account any rebalancing of the hedging relationship, including the hedging instrument has expired or has been sold, terminated or exercised. If the hedged items are derecognised, the unamortised fair value is recorded in profit or loss.

3.4 Revenue recognition**(a) Commission and fee income**

The Group provides brokerage service to its customers, which contains a series of distinct services that are substantially the same and have the same pattern of transfer. Therefore, the services are identified as one performance obligation. Revenue is recognized upon completion of each service, usually on the date of the transaction or the completion of fund settlement with the exchange.

The Group provides asset management service to its customers, which contains a series of distinct services that are substantially the same and have the same pattern of transfer. Therefore, the services are identified as one performance obligation. Revenue is recognized when services are rendered according to the provisions of the underlying contracts.

Consultancy and advisory fees are recognized when the relevant transactions have been arranged or the relevant services have been rendered.

(b) Interest income

Interest income is recognized using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses.

(c) Dividend income

Dividend income is recognized when the right to receive payment is established.

(d) Trading gains from financial assets at fair value through profit or loss

Trading gains from financial assets at fair value through profit or loss is recognized on a trade date basis whilst the unrealized profits or losses are recognized from valuation at the end of reporting period. Gains/(losses) on physical commodities trading is realized on delivering the physical commodities to customers, which generally coincides with the time when physical commodities are delivered to the customers and the ownership has been transferred.

(e) Trade income

Trade income mainly comes from agricultural products sales of the Group's PRC risk management subsidiary.

The Group recognises sales revenue in the gross amount from agricultural products when fulfil the Group's performance obligations in the contract, that is, the revenue is recognised when the customer obtains control of the relevant agricultural products.

The China Futures Association issued the Rules for the Management of Commodity Risk Management Business of Futures Risk Management Companies (New RM Rules). The New RM Rules requires a futures company's risk management subsidiary to recognize revenue on a net basis for certain types of trading transactions. The Group adopted the net recognition method for reporting operating income associated with the above certain types of trading transactions based on the New RM Rules in the reporting period, save for the commodity basis trading that falls within the scope of financial instruments standards, in accordance with the Implementation Q&A on Accounting Treatment for Standard Warehouse Receipt Transactions issued by the accounting department of MOF, whose accounting policy has been disclosed in note 3.2 (d).

3.5 Current and deferred income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

Current income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the company and its subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation, and it considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The group measures its tax balances either based on either the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

Deferred income tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

The deferred tax liability in relation to investment property that is measured at fair value is determined assuming that the property will be recovered entirely through sale.

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in foreign operations where the company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset where there is a legally enforceable right to offset current tax assets and liabilities and where the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

4 FINANCIAL RISK MANAGEMENT**Overview**

The Group's business activities expose to a variety of financial risks and those activities involve analysis, evaluation, acceptance and management of some degree of risks or combination of risks. Managing risks are core to the financial business, and operational risks are an inevitable consequence of being in business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimize potential adverse effects on the Group's financial performance.

The Group's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Group regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

The Group is subject to a number of financial risks, primarily including credit risk, market risk, foreign exchange risk and liquidity risk.

This section describes the Group's position with respect to the above risk exposures, and the Group's objectives, policies and procedures in managing those risk exposures, as well as the Group's capital management.

4.1 Credit risk

Credit risk refers to the risk of counterparty's failure or inability to meet its payment obligations, or the risk of loss due to declining credit rating.

The Group's credit risks mainly come from financial assets which include bank balances, financial assets held under resale agreements, bank balances held for clients, deposits with exchange-clearing organizations, financial assets at fair value through profit or loss, contract assets, refundable deposits and other current assets.

In terms of the default risk from its commodity trading and risk management business, the Group has established certain criteria in selecting the counterparty, including but not limited to inspection on the credit status and credit enhancement measures on a case-by-case basis, so as to determine its credit exposure to each counterparty. The Group also reviews the credit status of individual customers at least once in a year, including business performance, repayment ability, as well as industrial outlook in which the customers operate.

The Group's bank balances and bank balances held for clients are mainly deposited with state-owned commercial banks, joint-stock commercial banks and major city commercial banks. Meanwhile, deposits with exchange-clearing organizations and refundable deposits are all placed with authorized exchange-clearing organizations in the PRC, with a relatively low level of credit risk.

The Group's credit risk also arises from its futures brokerage service. Under clearing rules, a minimum margin requirement is set by the respective futures exchanges. Therefore a minimum margin deposit is to be placed with the futures broker when an individual customer has a position. However, the Group has to fulfil the obligation on daily settlements by using its own funds if the customer margin deposit balance is insufficient and the customer fails to replenish the balance by the end of each trading day. Credit risks are mainly associated to customer's inability to meet the daily settlement obligation. To mitigate the credit risk from futures brokerage service, the Group usually requires the customers to maintain a margin deposit balance that is higher than the minimum margin required by futures exchanges. The Group also monitors each customer's credit status on a real-time basis and, therefore, may require customers to deposit additional collateral and/or reduce positions when necessary. Since trading rules set a daily limit move for every futures contract, the Group's credit exposure under normal market conditions at the end of each trading day is generally not significant.

To mitigate risks, the Group also requests the customers to provide standard warehouse warrants or government bonds as collateral where appropriate. An operating procedure for such collateral has been developed, and there is a guideline to specify the suitability of accepting such collateral. Fair value of the collateral is estimated by the Group with reference to the latest prices of the underlying physical commodities of standard warehouse warrants or the latest tradable prices of government bonds.

The Group maintains an ECL model to recognize a loss allowance for assets carried at amortized cost. The Group assesses whether or not the credit risk of relevant instrument has increased significantly since the initial recognition and measures their impairment allowance, ECL and future variance in ECL under the "three stage" impairment model.

(a) Forward-looking information incorporated in the ECL models

Both the assessment of SICR and the calculation of ECL allowances incorporate forward-looking information. The Group has performed historical analysis and identified the key economic variables regarding credit risk for each portfolio.

As at December 31, 2022, 2023 and 2024, and as at June 30, 2025, the key economic variables used by the Group is the growth rate of GDP. Under the 2023 baseline scenario, the average forecast value is about 5.10%, the optimistic scenario forecast is 0.60 percentage points higher than the baseline, and the pessimistic scenario forecast is 0.30 percentage points lower than the baseline. Under the 2024 baseline scenario, the average forecast value is about 4.80%, the optimistic scenario forecast is 0.30 percentage points higher than the baseline, and the pessimistic scenario forecast is 0.30 percentage points lower than the baseline. Under the 2025 baseline scenario, the average forecast value is about 4.70%, the optimistic scenario forecast is 0.40 percentage points higher than the baseline, and the pessimistic scenario forecast is 0.40 percentage points lower than the baseline.

The weightings assigned to each economic scenario at December 31, 2022, 2023 and 2024 and June 30, 2025 are as follows:

	Base	Optimistic	Pessimistic
All portfolios	60%	10%	30%

(b) Impairment of financial assets

The Group's bank balances, bank balances held for clients, deposits with exchange-clearing organizations and refundable deposits are all deposited in banks and exchange-clearing organizations which have decent credit rating and no history of default. There are no unfavorable current conditions and forecast of future economic conditions for these assets at December 31, 2022, 2023 and 2024 and June 30, 2025. Therefore, their credit risk is considered low and the expected credit loss is limited. For financial assets held under resale agreements, the Group receives sufficient debt securities or warehouse receipts as collateral. Therefore, the expected credit loss is immaterial.

All of these assets are classified under stage 1.

(c) Maximum exposure to credit risk

Before considering collaterals or other credit enhancement methods, the maximum credit risk exposure is the carrying amount of financial assets (net of provisions for impairment). The maximum credit risk exposure is as follows:

	Year ended December 31,			Six months ended June 30,
	2022	2023	2024	2025
Cash and bank balances	1,689,615	1,773,052	2,273,931	2,070,471
Deposits with exchange-clearing organizations	12,443,556	10,939,043	11,782,759	14,808,388
Bank balances held for clients	15,924,857	18,723,106	31,551,141	26,814,520
Other current assets (excluding non-financial assets)	326,973	343,625	68,338	70,522
Commission receivable	–	12,071	13,433	9,535
Prepayments and trade receivables (excluding prepayments)	1,214	2	71	24
Buyback financial assets	–	7,064	–	9,660
Financial assets at fair value through profit or loss	1,476,462	2,754,122	1,968,109	1,668,687
Derivative financial assets	1,587,179	1,070,105	410,360	604,999
Financial assets at fair value through other comprehensive income	36,664	40,917	50,616	54,146
	<u>33,486,520</u>	<u>35,663,107</u>	<u>48,118,758</u>	<u>46,110,952</u>

4.2 Market risk

Market risk is from loss in fair value of financial instruments or cash flows movement, due to key factors such as price risk, interest rate risk and currency risk.

(a) Price risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Group's price risk exposure mainly relates to investments in equity securities, derivatives, asset management schemes, private securities investment funds and trust schemes with the underlying investments in equity instruments. The market prices of those financial instruments could lead to the fluctuation of investment value. A majority of these investments are traded in relevant capital markets, such as domestic and overseas futures exchanges as well as domestic stock exchanges. The Group is facing high market risk due to the volatility of those investments.

The Group's price risk management policy involves setting investment objectives, scales and loss-cut limits for each individual investment. Two main measures are adopted by management level to mitigate the risk: (a) holding an appropriately diversified investment portfolio, setting limits for investments in different type of investments and monitoring the investment portfolio to reduce the risk of concentration in any one specific commodity type, industry or issuer; (b) monitoring the fluctuation of market price and execution of investment limit management.

Sensitivity analysis

The analysis below shows the impact on profit before income tax and other comprehensive income before income tax due to change in the prices of equity instruments and derivatives by 5%, assuming all other variables remain unchanged. A positive result indicates an increase in profit before income tax, while a negative result indicates otherwise.

	Year ended December 31,			Six months ended June 30,
	2022	2023	2024	2025
Profit before income tax				
Increase by 5%	1,200	1,274	1,710	(740)
Decrease by 5%	(1,200)	(1,274)	(1,710)	740

(b) Interest rate risk

Interest rate risk is defined that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The main interest bearing assets of Group are bank deposits, bank balances held for clients, deposits with exchange-clearing organizations, buyback financial assets, and investments in debt instruments. The interest rates of bank deposits are determined by the agreement established with banks, and the interest rate of deposits with exchange-clearing organizations is determined by the clearing organizations.

The table below presents the contractual re-pricing dates or the residual maturities of the financial assets and liabilities (whichever are earlier):

As at December 31, 2022	Within 1 month	1-3 months	3 months to 1 year	1 year to 3 years	over 3 years	Non- Interest bearing	Total
Cash and bank balances	849,306	207,258	216,605	416,446	–	–	1,689,615

Sensitivity analysis

The sensitivity analysis below has been determined based on the exposure to the interest rate risks for interest-bearing assets and liabilities. A 100 basis points increase or decreases in the relevant interest rates will be applied in the sensitivity analysis as possible reasonable shift, assuming all other variables remain unchanged. A positive result below indicates an increase in profit before income tax, while a negative result indicates otherwise.

	Year ended December 31,			Six months ended June 30,
	2022	2023	2024	2025
Net interest income				
Increases by 100bps	255,747	297,917	383,495	434,331
Decreases by 100bps	(255,747)	(297,917)	(383,495)	(434,331)

When conducting interest rate sensitivity analysis, the Group makes the following general assumptions in determining commercial terms and financial parameters:

- different interest-bearing assets and interest-bearing liabilities have the same amplitude of interest rate volatility;
- all assets and liabilities are re-priced in the middle of relevant period;
- analysis is based on the static gap on the financial position reporting date, without considering subsequent changes;
- impact of interest rate changes on customer behaviors not considered;
- impact of interest rate changes on market prices not considered;
- interest rate of demand deposits moving in the same direction and extend;
- necessary measures that may be adopted by the Group in response to interest rate changes not considered.

(c) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in foreign exchange rates.

The Group's currency risk primarily relates to the Group's operating activities whose settlements and payments are denominated in foreign currencies different from the functional currency of the Group.

The foreign currency assets and liabilities held by the Group are not material compared to the total assets and liabilities. In terms of the Group's revenue structure, the majority of the business transactions are denominated in RMB, with only insignificant revenue from foreign currency transactions. The Group considers that its currency risk is immaterial.

APPENDIX I

ACCOUNTANT'S REPORT

As at December 31, 2022, 2023 and 2024, and as at June 30, 2025, the Group's major financial assets/liabilities exposed to foreign exchange risk, representing those financial assets/liabilities denominated in USD and HKD and included in a group entity with different functional currency:

	As at December 31,			As at June 30,
	2022	2023	2024	2025
	RMB'000	RMB'000	RMB'000	RMB'000
Financial assets denominated in:				
USD	7,412,284	7,531,012	9,949,613	11,554,487
HKD	1,448,195	496,055	407,872	431,550
Others	924,868	839,476	244,205	217,995

	As at December 31,			As at June 30,
	2022	2023	2024	2025
	RMB'000	RMB'000	RMB'000	RMB'000
Financial liabilities denominated in:				
USD	1,373,120	8,171,353	9,633,237	11,259,220
HKD	7,104,849	531,134	372,617	386,689
Others	665,753	1,012,578	234,108	209,045

As shown in the table above, the Group is primarily exposed to changes in USD and HKD exchange rates. The sensitivity of profit or loss to changes in the exchange rates arises mainly from USD and HKD denominated financial instruments is as below:

	Year ended December 31,			Six months ended June 30,
	2022	2023	2024	2025
	RMB'000	RMB'000	RMB'000	RMB'000
USD exchange rate –				
Increase 5%	301,958	(32,017)	15,819	14,763
Decrease 5%	(301,958)	32,017	(15,819)	(14,763)
HKD exchange rate –				
Increase 5%	(282,833)	(1,754)	1,763	2,243
Decrease 5%	282,833	1,754	(1,763)	(2,243)

Other foreign currencies of changes have no significant impact on foreign exchange risk.

(d) *Liquidity risk*

Liquidity risk is the risk that the Group will encounter difficulty in meeting obligations associated with financial liabilities due to lack of capital or funds. During the normal course of business, the Group may suffer from liquidity risk caused by macroeconomic policy changes, market volatility, poor operations, credit downgrades, mismatches between assets and liabilities, low turnover rate of assets, significant proprietary trading position, or an excessive high ratio of long-term investments. If the Group fails to address any liquidity risk by adjusting the asset structure or comply with regulatory requirements on the risk indicators, the Group could be faced with penalties by the regulatory authorities in the form of restrictions on the Group's business operations, which would cause bad effects on the Group's operations and reputation.

The Group manages and controls its funds in a centralized manner. The Group's liquidity risk management principles are comprehensiveness, prudence and foreseeability and its overall objective is to build a sound liquidity risk management system so that it can identify, measure, monitor and control liquidity risk effectively and ensure that the requirement of liquidity could be met timely with an appropriate cost.

The Group's finance department organizes the cash budget annually and sets up the fund plan based on it. Under the approval of the Company, the funds will be scheduled and arranged uniformly in order to ensure the consistence of funds demand and cost of the capital control.

After approved by the Board of Directors, the finance department decides the scale and the structure of a high quality liquid assets, by analysing the condition of the Company's business scale, total liability, financing ability, and duration of the asset and liability prudently, so as to improve the liquidity and the risk resistance.

The Group invests surplus cash above balance required for working capital management in time deposits, and marketable securities, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient head-room as determined by the above-mentioned forecasts.

The tables below present the cash flows payable by the Group for financial liabilities by remaining contractual maturities As at December 31, 2022, 2023 and 2024, and as at June 30, 2025. The amounts disclosed in the tables are the contractual undiscounted cash flows, including both interest and principal cash flows. For items with floating interest rates, the undiscounted amounts are derived using interest rates at the end of each reporting period.

The liquidity risk will be offset by the movement of deposits with exchange-clearing organizations and bank balances held for clients.

APPENDIX I

ACCOUNTANT'S REPORT

The tables below analyze the Group's financial liabilities that will be settled into relevant maturity groupings based on the remaining period at each balance sheet date to their contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

4.3 Fair value of financial assets and liabilities

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The table below analyzes financial instruments measured at fair value at the end of each reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorized.

Level 1	Quoted prices (unadjusted) in active markets for identical assets or liabilities.
Level 2	Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
Level 3	Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The following table presents the financial assets and liabilities that are measured at fair value at December 31, 2022, 2023, 2024 and June 30, 2025.

	As at December 31, 2022			
	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit or loss:				
Debt securities	516,996	–	–	516,996
Equity instruments	75,025	–	418,939	493,964
Wealth management products	–	–	465,502	465,502
Derivative financial assets	1,587,179	–	–	1,587,179
Financial assets at fair value through other comprehensive income	–	–	40,917	40,917
Other current assets – Inventory	–	–	150,367	150,367
Other current assets – hedged items	–	–	128,036	128,036
Accounts receivable financing	–	–	36,664	36,664
Financial liabilities at fair value through profit or loss	–	–	9,328	9,328
Derivative financial liabilities	–	–	44,474	44,474

As at December 31, 2023				
	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit or loss:				
Debt securities	2,067,432	–	–	2,067,432
Equity instruments	43,901	–	642,786	686,687
Wealth management products	–	–	3	3
Derivative financial assets	1,070,105	–	–	1,070,105
Financial assets at fair value through other comprehensive income	–	–	40,917	40,917
Other current assets – Inventory	–	–	140,503	140,503
Other current assets – hedged items	–	–	21,582	21,582
Financial liabilities at fair value through profit or loss	–	–	44,944	44,944
Derivative financial liabilities	–	–	20,058	20,058

As at December 31, 2024				
	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit or loss:				
Debt securities	1,360,052	–	–	1,360,052
Equity instruments	256,713	–	151,344	408,057

Other current assets – Inventory	–	–	176,454	176,454
Other current assets – hedged items	–	–	9,942	9,942
Financial liabilities at fair value through profit or loss	–	–	32,172	32,172
Derivative financial liabilities	–	–	80,710	80,710

As at June 30, 2025				
	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit or loss:				
Debt securities	1,404,555	–	–	1,404,555
Equity instruments	63,984	–	190,147	254,131
Wealth management products	–	–	10,002	10,002
Derivative financial assets	559,106	–	45,893	604,999
Financial assets at fair value through other comprehensive income	–	–	54,146	54,146
Other current assets – Inventory	–	–	208,474	208,474
Other current assets – hedged items	–	–	6,343	6,343
Financial liabilities at fair value through profit or loss	–	–	35,527	35,527
Derivative financial liabilities	–	–	41,015	41,015

(1) Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices date of the statement of financial position. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the closing price within bid-ask spread. These instruments are included in level 1.

(2) Financial instruments in level 2

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

For the year ended December 31, 2022, 2023 and 2024 and six months ended June 30, 2025, there are no significant transfers between level 1 and level 2 of the fair value hierarchy of the Group.

(3) Financial instruments in level 3

A financial instrument is included in level 3 if one or more of the significant inputs is not based on observable market data.

The Group determines the fair value of the financial instrument by valuation techniques when it is difficult to obtain quotations from the open market.

The main parameters of valuation techniques used in financial instruments includes interest rate, stock and equity price, volatility level, prepayment rates, and the credits spreads of counterparty. All of these parameters can be observed and obtained from the open market.

For financial assets measured at fair value through profit or loss, including wealth management products and funds purchased by the Group, the fair value is calculated based on valuations provided by their respective managers.

For hedged items, the Company determines their fair value based on the difference between the spot price at the period-end and the execution price of forward contracts.

For other equity instrument investments (futures membership investment qualifications) measured at fair value, the Company calculates their fair value based on the purchase cost of the futures membership qualifications.

For over-the-counter (OTC) options measured at fair value through profit or loss, the Company use valuation techniques, including option pricing models, to determine their fair value. These models incorporate unobservable parameters such as volatility.

For the interests of other unit holders in consolidated structured entities measured at fair value through profit or loss, the Company using the market prices of the underlying investments to calculate fair value.

As at December 31, 2022, 2023 and 2024, and as at June 30, 2025, a 5% increase or decrease in the volatility applied in the valuation technique would result in insignificant changes in profit before income tax and profit after income tax, respectively.

As at December 31, 2022, 2023 and 2024, and as at June 30, 2025, a 5% increase or decrease in the volatility applied in the valuation technique would result in insignificant changes in other comprehensive income.

4.4 Capital management

The Group's objectives of capital management are:

- To safeguard the ability of the Company and its subsidiary to continue as a going concern so that they could make profits and benefits for shareholders or other stakeholders;
- To support the stability and growth of the Company and its subsidiary;
- To maintain a strong capital base to support the development of their business; and
- To comply with the capital requirements under the PRC regulations.

According to the "Administrative Measures Concerning Risk Control Indicators for Future Companies" (《期貨公司風險監管指標管理辦法》) issued by the CSRC on April 18, 2017, the Company is required to meet the following risk control requirements on a continual basis:

- The net capital shall be no less than RMB30,000,000;
- The ratio of net capital divided by the sum of its various risk capital provisions shall be no less than 100%;
- The ratio of net capital divided by net assets shall be no less than 20%;
- The ratio of current assets divided by current liabilities shall be no less than 100%;
- The ratio of liabilities divided by net capital shall be no greater than 150%;
- The clearing settlement funds shall be greater than RMB26,800,000.

Net capital refers to net assets minus risk adjustments on certain types of assets as defined in the Administrative Measures.

The Group manages its capital risk through timely monitoring, evaluating, reporting and comparing with target position of capital management, and the Group takes on a series of measures such as assets growth control, structure adjustment, internal or external capital accumulation, to make sure all the requirements of monitoring could be met as well as continuous improvement across its business.

5 SUMMARY OF CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The Group continually evaluates its critical accounting estimates and judgments applied based on historical experience and other factors, including reasonable expectations of future events. The critical accounting estimates and key assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next accounting period are outlined below. It is possible that actual results may be materially different from the estimates and judgments referred to below.

5.1 Classification of financial assets

When the Group determines the classification of financial assets, a number of significant judgements in the business model and the contractual cash flow characteristics of the financial assets are required.

Factors considered by the Group in determining the business model for a group of financial assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, how risks are assessed and managed and how managers or trustees are compensated.

When the Group assesses whether the contractual cash flows of the financial assets are consistent with basic lending arrangements, the main judgements are described as below: whether the principal amount may change over the life of the financial asset (for example, if there are repayments of principal); whether the interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin and cost, associated with holding the financial asset for a particular period of time.

5.2 Fair value of financial instruments

The fair value of financial instruments that are not traded in active markets are determined by using valuation techniques. These techniques include discounted cash flow analysis model, Binomial Model and Black-Scholes Model etc. Observable input are used at arm's length in spite of areas such as credit risk (both own and counterparty) require management to make estimates. Changes in assumptions about these factors could affect reported fair value of financial instruments.

5.3 Income taxes

The Group is mainly subject to income taxes in China. There are many transactions and calculations for which the ultimate tax determination is uncertain. The Group recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Taxation matters such as tax deductible due to asset impairment loss are subject to the decision of taxation authorities. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax and deferred tax assets and liabilities in the period in which such determination is made.

5.4 Determination of consolidation scope

All facts and circumstances must be taken into consideration in the assessment of whether the Group, as an investor, controls the investee. The principle of control includes three elements: (a) power over the investee; (b) exposure, or rights, to variable returns from involvement with the investee; and (c) the ability to use power over the investee to affect the amount of investors' returns. The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

6 OPERATING SEGMENT INFORMATION

For management purposes, the Group's operating businesses are structured and managed separately according to the nature of their operations and the services they provide. Each of the Group's operating segments represents a strategic business engaged in the following activities, which are subject to risks and returns that are different from the other operating segments.

PRC Futures Brokerage: mainly provides a solid bridge for clients to participate in commodity and financial futures trading.

PRC Risk Management Services: mainly provides tailored hedging services for enterprises and institutions using specialized tools.

PRC Wealth Management: mainly provides mutual fund management, asset management, and agency sale of funds.

Overseas Financial Services: offering core services such as brokerage, clearing, and asset management in international markets.

Others: businesses not included in the above four segments.

7 The Group's interest in structured entities not included in the scope of consolidation

(a) Interests in structured entities initiated and established

Unconsolidated structured entities established by the Group mainly include asset management plans established by the Group. The nature and objective of the structured entities is to manage investors' assets and collect management fees. Financing is sustained through investment products issued to investors. The interests held by the Group in these unconsolidated structured entities mainly involve management fees and performance fees collected from managed structured entities.

The relevant book values and maximum exposures are as follows:

	As at December 31,						As at June 30,	
	2022		2023		2024		2025	
	Carrying amount	Maximum exposure	Carrying amount	Maximum exposure	Carrying amount	Maximum exposure	Carrying amount	Maximum exposure
Financial assets at fair value through profit or loss	703,984	703,984	1,199,028	1,199,028	95,076	95,076	187,737	187,737

For the years ended December 31, 2022, 2023 and 2024 and the six months ended June 30, 2025, the Group received the following income from these structured entities held not included in the scope of consolidation:

	Year ended December 31,			Six months ended June 30,	
	2022	2023	2024	2024	2025
	<i>(unaudited)</i>				
Investment income	(1,124)	24	–	–	–
management fees	2,862	8,790	384	454	451
performance fees	427	259	182	210	58

As at December 31, 2022, 2023 and 2024, and as at June 30, 2025, the Group has not provided and does not intend to provide any financial support to these structured entities not included in the scope of consolidation.

(b) Interests in structured entities initiated and established by third party

The maximum exposure and the book value of relevant balance sheet items of the Group arising from the interest held in directly invested structured entities such as fund, asset management products that are sponsored by third party financial institutions were set out as below:

	As at December 31,						As at June 30,	
	2022		2023		2024		2025	
	<i>Carrying amount</i>	<i>Maximum exposure</i>	<i>Carrying amount</i>	<i>Maximum exposure</i>	<i>Carrying amount</i>	<i>Maximum exposure</i>	<i>Carrying amount</i>	<i>Maximum exposure</i>
Financial assets at fair value through profit or loss	323,816	323,816	284,611	284,611	357,583	357,583	164,008	164,008

8 NET COMMISSION AND FEE INCOME

	Year ended December 31,			Six months ended June 30,	
	2022	2023	2024	2024	2025
	<i>(unaudited)</i>				
Futures brokerage services	423,940	503,331	446,298	220,957	196,484
Asset management services	21,351	33,873	25,763	12,871	9,362
Mutual fund services	40,301	67,601	58,093	32,204	23,264
Other commission income	12,446	6,854	12,243	6,316	5,429

(i) Xu Lin was appointed as independent non-execute director of the Company in July 2024.

(3) Directors' and Supervisors' Other Benefits

No retirement and termination benefits were paid to the directors and supervisors of the Company by the Group in respect of the director's services as a director and a supervisor of the Group or other services in connection with the management of the affairs of the Group during the Track Record Period.

No consideration provided to third parties for making available directors' and supervisors' services subsisted at the end of each reporting period or at any time during the Track Record Period.

There were no loans, quasi-loans or other dealings entered into in favor of directors, controlled bodies corporate by and connected entities with such directors during the Track Record Period.

Save as disclosed in Note 49, there were no significant transactions, arrangements or contracts in relation to the Group's business to which the Company was a party and in which a director and a supervisor of the Company had a material interest, whether directly or indirectly, subsisted during the Track Record Period.

	2022	2023	2024	2024	2025
				<i>(unaudited)</i>	
Current income tax expenses	50,987	61,952	59,118	34,950	38,854
Deferred income tax expenses	(2,066)	(16,337)	4,504	5,778	(12,732)
	<u>48,921</u>	<u>45,615</u>	<u>63,622</u>	<u>40,728</u>	<u>26,122</u>

The Chinese mainland income tax provision is based on the statutory tax rate of 25% of the taxable income of the Group as determined in accordance with the relevant PRC income tax rules and regulations. Hong Kong subsidiaries apply a tiered CIT rate: 8.25% on taxable income up to HKD2,000,000 and 16.5% on income exceeding HKD2,000,000. Nanhua Singapore Pte. Ltd. is subject to 13.5%, and other Singapore subsidiaries are subject to 17%. Nanhua UK, registered in the UK, was subject to a CIT rate of 19% for the period up to March 2023. For the period from April 2023 onwards, the applicable rate increased to 25%. The U.S. subsidiaries are subject to a CIT rate of 30.5%, the Cayman Islands/Virgin Islands entities are subject to a CIT rate of 0%.

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the taxation rate applicable to profits in the respective countries and regions. The major reconciliation items are as follows:

	Year ended December 31,			Six months ended June 30,	
	2022	2023	2024	2024	2025
				<i>(unaudited)</i>	
Profit before income tax	294,833	448,437	521,659	271,204	257,449
Tax calculated at a tax rate of 25%	73,708	112,109	130,415	67,801	64,362
Different tax rates in other countries/areas	(10,871)	(19,174)	(22,574)	(10,821)	(14,368)
Super deduction for research and development	(3,179)	(6,235)	(2,567)	–	(712)
Utilisation of previously unrecognized tax losses	(2,186)	(11,413)	(20,171)	(1,038)	(1,988)
Income not subject to tax	(14,979)	(35,914)	(32,910)	(24,308)	(25,868)
Items not deductible for tax purpose	1,745	6,260	3,680	1,848	3,056
The impact of investment income accounted for using the equity method	124	94	144	76	(44)
Adjustments in respect of prior years	5,647	136	2,234	2,103	193
Others	(1,088)	(248)	5,371	5,067	1,491

OECD Pillar Two model rules

The group is within the scope of the OECD Pillar Two model rules. Pillar Two legislation was enacted in Hong Kong, the jurisdiction in which some subsidiaries of Nanhua Futures Co., Ltd. is incorporated, and will come into effect from January 1, 2025.

The group is in the process of assessing its exposure to the Pillar Two legislation for when it comes into effect. This assessment indicates for that the subsidiary that operates in jurisdiction A, the estimated weighted average effective tax rate based on accounting profit is 10.1% for the reporting period ended June 30, 2025. However, although the average effective tax rate is below 15%, the group's exposure to paying Pillar Two income taxes might not be for the full difference in tax rates in relation to jurisdiction A. This is due to the impact of specific adjustments envisaged in the Pillar Two legislation which give rise to different effective tax rates compared to those calculated in accordance with HKAS 12.

Based on the current assessment, the application of the Pillar Two legislation is expected to increase the group's annual effective tax rate by 0.5 to 1.0 percentage points once enacted in 2025. The group is currently engaged with tax specialists to assist it with applying the legislation and determining the related impact.

20 DIVIDENDS

	Year ended December 31,		
	2022	2023	2024
Dividends on ordinary shares proposed but not paid	34,164	40,265	45,933
Dividends on ordinary shares paid	24,402	34,164	40,265

Final dividends attributable to owners of the Company in respect of the years ended December 31, 2022, 2023 and 2024 of RMB0.56 yuan per 10 shares (tax inclusive), RMB0.66 yuan per 10 shares (tax inclusive) and RMB0.76 yuan per 10 shares (tax inclusive), were approved by the Shareholders' Meeting, respectively. The dividend for the year 2024 has been paid on May 23, 2025.

21 EARNINGS PER SHARE

(1) Basic earnings per share

Basic earnings per share is calculated by dividing the profit for the year attributable to shareholders of the Company by the weighted average number of ordinary shares in issue during the year.

	Year ended December 31,			Six months ended June 30,	
	2022	2023	2024	2024	2025
	<i>(unaudited)</i>				
Profit attributable to shareholders of the Company <i>(in RMB thousands)</i>	246,060	401,855	457,973	230,184	231,254
Weighted average number of ordinary shares in issue <i>(in thousands)</i>	610,066	610,066	610,066	610,066	610,066
Basic earnings per share <i>(in RMB)</i>	0.40	0.66	0.75	0.38	0.38

(2) Diluted earnings per share

For the year ended December 31, 2022, 2023 and 2024 and six months ended June 30, 2025, there are no potential diluted ordinary shares, so the diluted, earnings per share is the same as the basic earnings per share.

40 TRADE AND OTHER PAYABLES

The Group

	As at December 31,			As at June 30,
	2022	2023	2024	2025
Derivatives performance securities	1,255,076	1,802,769	617,975	616,561
Hedged items	52,052	13,288	3,396	4,165
Payables for construction and software	30,750	32,462	28,247	25,131
Non-current liability matured within one year	9,769	3,660	2,636	13,596
Taxes other than current tax liabilities	6,921	6,869	6,528	3,515
Trade payables	561	36,350	5,641	687
Others	171,381	92,913	52,392	123,359
	<u>1,526,510</u>	<u>1,988,311</u>	<u>716,815</u>	<u>787,014</u>

The changes in trade and other payables are primarily driven by fluctuations in derivatives performance securities. When clients engage in derivative transactions, they are required to post margin with the Group. The amount of derivatives performance securities varies in accordance with the scale of the clients' derivative trading activities.

The Company

	As at December 31,			As at June 30,
	2022	2023	2024	2025
Derivatives performance securities	51,084	48,500	27,204	27,535
Payables for construction and software	30,111	29,377	22,468	23,080

50 OTHER ACCOUNTING POLICIES

50.1 Separate financial statements

When the Group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognized in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable IFRSs.

Impairment testing of the investments in subsidiaries is required upon receiving a dividend from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the consolidated financial statements of the investee's net assets including goodwill.

50.2 Foreign currency translation

(1) *Functional and presentation currency*

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("**the functional currency**"). The financial statements are presented in Renminbi (RMB), which is the Company's functional and the Group's presentation currency.

(2) *Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit or loss.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss.

(3) Group companies

The results and financial position of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- (b) income and expenses for each statement of comprehensive income are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- (c) all resulting currency translation differences are recognized in other comprehensive income.

50.3 Cash and cash equivalents

Cash and cash equivalents are short term, highly liquid assets, which are readily convertible into known amounts of cash and are subject to an insignificant risk of changes in value. Cash and cash equivalents include cash and assets with original maturity of three months or less under cash and bank balances.

50.4 Offsetting financial instruments

Financial assets and financial liabilities are separately presented in the statement of financial position without any offsetting, except when:

- (a) the Group has a legally enforceable right to offset the recognized amounts; and
- (b) the Group has intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

50.5 Buyback financial assets

Buyback financial assets is a contract to purchase a financial asset from a counterparty and sell the related financial asset back to the same counterparty on an agreed-upon date and at an agreed-upon price, as specified in the contract or agreement.

Buying back the sale business shall be recorded as actual payments made and recognized as “buyback financial assets” in the statement of financial position.

50.6 Inventories

Inventories include agricultural products, minerals and other bulk commodities which are used for trading, and they shall be measured at cost when acquired, the cost including purchase cost and purchase expense.

The cost of inventories shall be accounted for on a first-in and first-out basis and their subsequent measurement shall be made at the lower of cost and net realizable value. The net realizable value shall be determined as their estimated selling price less estimated selling expenses and related taxes.

The Group shall determine the net realizable value of inventories separately, at the balance sheet date, and compare it with the corresponding cost to recognize the amount of the accrual or reversal of provision of decline in value of inventories, and account for it in the subject of the provision of decline in value of inventories. The perpetual inventory system was adopted by the Group.

50.7 Property, plant and equipment

The Group's property, plant and equipment includes buildings, motor vehicles, electronic and other equipment that are used for operation purpose and have useful lives of more than one year.

Property, plant and equipment shall be recognized only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The assets purchased or constructed are initially measured at acquisition cost or deemed cost, as appropriate. Subsequent costs are included in an asset's carrying amount, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is de-recognized. All other subsequent expenditures are recognized in profit or loss during the period in which they are incurred.

Depreciation is calculated on the straight-line method to write down the cost of such assets to their residual values over their estimated useful lives. For the assets that have been provided for impairment loss, the related depreciation charge is prospectively determined based upon the adjusted carrying amounts over their remaining useful lives.

The estimated useful lives, the estimated residual values expressed as a percentage of cost and the annual depreciation rates of property, plant and equipment are as follows:

	Estimated useful lives	Estimated residual rates	Annual Depreciation rates
Buildings	5-40	5.00%	2.38%-19.00%
Motor vehicles	5	5.00%	19.00%
Electronics and other equipment	2-5	5.00%	19.00%-47.50%

The estimated useful life, the estimated residual value and the depreciation method applied to an asset are reviewed, and adjusted as appropriate by the Group at the end of each reporting period.

Property, plant and equipment is de-recognized on disposal or when no future economic benefits are expected from its use or disposal. The amount of proceeds from disposals on sale, transfer, retirement or damage of property, plant and equipment net of its carrying amount and related taxes and expenses is recognized in the profit or loss. Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount as set out in Note 22.

50.8 Intangible assets

Intangible assets comprise of computer software, which are initially recognized at cost. The cost less estimated residual values (if any) of the intangible assets is amortized on a straight-line basis over their useful lives, and charged to the profit or loss. Impaired intangible assets are amortized net of accumulated impairment losses.

50.9 Long-term deferred expenses

Long-term deferred expenses include expenditures that have been incurred but should be recognized as expenses over more than one year in the current and subsequent periods. Long-term deferred expenses are amortized on the straight-line basis over the expected useful economic lives and are presented at actual expenditure net of accumulated amortization.

50.10 Impairment of non-financial assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

50.11 Employee benefits

Employee benefits mainly include salaries, bonus, allowances and subsidies, staff welfare benefits, social security contributions and housing funds, labour union funds, employee education funds and other expenditures incurred in exchange for service rendered by employees. Salary and welfare are expensed in operating expenses in the accounting period of services rendered.

A defined contribution scheme is a pension or social security plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. A defined benefit plan is a pension plan that is not a defined contribution plan. During the year, the Group's post-employment schemes mainly include basic pension insurance.

In accordance with the relevant laws and regulations, domestic employees of the Group participate in various social insurance schemes such as basic pension insurance, medical insurance, housing fund schemes and other social security schemes. Insurance expenses and pensions are calculated based on certain percentage of gross salary and are paid to the Labour and Social Security Bureau, and insurance companies, etc. The contribution ratios are defined by stipulating regulations or commercial contracts, which should be no higher than statutory upper ceilings. Contributions are recognized in the profit or loss for the current period.

50.12 Government grants

Grants from the government are recognized at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions.

Government grants relating to property, plant and equipment are included in non-current liabilities as deferred government grants and are credited to profit or loss on a straight-line basis over the expected lives of the related assets.

Government grants relating to costs are deferred and recognized in profit or loss over the period necessary to match them with the costs that they are intended to compensate.

50.13 Leases*As a lessee**(a) Initial measurement of the right-of-use asset and lease liability*

Initial measurement of the right-of-use asset

The right-of-use asset is defined as the right of underlying assets in the lease term for the Group as a lessee. The lease term is defined as the non-cancellable period of the lease for the Group as a lessee.

At the commencement date, a lessee shall measure the right-of-use asset at cost. The cost of the right-of use asset shall comprise:

- (i) the amount of the initial measurement of the lease liability;
- (ii) any lease payments made at or before the commencement date, less any lease incentives received;
- (iii) any initial direct costs incurred by the lessee; and
- (iv) an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

Initial direct costs are defined as incremental costs that would not have been incurred if a lease had not been obtained.

Initial measurement of the lease liability

At the commencement date, a lessee shall measure the lease liability at the present value of the lease payments that are not paid at that date.

The lease payments shall be discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the lessee shall use the lessee's incremental borrowing rate.

The lessee uses as the discount rate the interest rate implicit in the lease – this is the rate of interest that causes the present value of lease payments and the unguaranteed residual value to equal the sum of the fair value of the underlying asset and any initial direct costs of the lessor.

The incremental borrowing rate is defined as the rate of interest that a lessee would have to pay to borrow, over a similar term and with a similar security, the funds necessary to obtain an asset of a similar value to the cost of the right-of-use asset in a similar economic environment.

(b) *Subsequent measurement of the right-of-use asset and lease liability*

Subsequent measurement of the right-of-use asset

At the commencement date, the Group as a lessee shall measure the right-of-use asset at cost and apply the depreciation requirements in IAS 16 Property, Plant and Equipment in depreciating the right-of-use asset. If the lease transfers ownership of the underlying asset to the lessee by the end of the lease term, the lessee shall depreciate the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, the lessee shall depreciate the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. When the recoverable amount is less than the book value of the right-to-use assets, the Group shall write down its book value to the recoverable amount.

Subsequent measurement of the lease liability

After the commencement date, the Group shall recognise interest on the lease liability in profit or loss. Interest on the lease liability in each period during the lease term shall be the amount that produces a constant periodic rate of interest on the remaining balance of the lease liability.

(c) *Recognition of short-term leases and leases for which the underlying asset is of low value*

Short-term leases are defined as leases with a lease term of less than 12 months from the commencement date. Leases for which the underlying asset is of low value are defined as underlying assets of low value when new. The right-of-use asset and lease liability are not recognised by the Group for short-term leases and leases for which the underlying asset is of low value. The lessee shall recognise the lease payments associated with those leases as an expense.

As a lessor

Lease income from operating leases is recognised in income on a straight-line basis over the period of the lease.

50.14 Provisions and contingencies

The obligation pertinent to contingencies shall be recognised as provisions when the following conditions are satisfied concurrently:

- (i) the obligation is a present obligation of the Group;
- (ii) the obligation is probable to cause a future outflow of resources from the Group as a result of performance of the obligation; and
- (iii) the amount of the obligation can be reliably measured.

The amount of a provision is initially measured in accordance with the best estimate of the necessary expenses for the performance of the current obligation. To determine the best estimate, the Group takes into full consideration of risks, uncertainty, time value of money and other factors pertinent to the contingencies. The Group reviews the book value of the provisions at the end of the reporting period. If there is substantial evidence that the amount of provisions cannot actually reflect the current best estimate, the Group will adjust the amount in accordance with the current best estimate.

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. It can also be a present obligation arising from past events that is not recognized because it is not probable that an outflow of economic resources will be required or the amount of obligation cannot be measured reliably.

50.15 Dividend distribution

Dividend distribution to the Company's shareholders is recognized as a liability in the Group's and the Company's financial statements in the period in which the dividends are approved by the Company's shareholders.

50.16 Segment information

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the person or group that allocates resources to and assesses the performance of the operating segments of an entity. The Group's reporting segments are decided based on its operating segments while taking full consideration of various factors such as products and services, geographical location and regulatory environment related to administration of the management. Operating segments meeting the same qualifications are allocated as one reporting segment, providing independent disclosures.

The purpose of segment reporting is to assist the chief operating decision-maker in resource allocation and performance assessment of each operating segment. The same accounting policies as adopted in preparation of the Group's financial statements are used for segment reporting.

50.17 Assets segregated for brokerage clients

Pursuant to requirements of the CSRC, funds deposited by brokerage clients relating to exchange traded futures and options must be deposited in designated bank accounts or with exchange-clearing organizations, which are segregated and accounted for separately from the proprietary funds of the Company as bank balances held for clients and client deposits in the deposits with exchange-clearing organizations in the statement of financial position.

Deposits with exchange-clearing organizations pertain primarily to monetary deposits made to satisfy margin requirements on brokerage clients and to satisfy the requirements set by the futures exchanges for clearing membership.

Deposits with exchange-clearing organizations do not include client's non-monetary pledges to exchange-clearing organizations. Such pledges are not presented on the Group's statement of financial position.

50.18 Accounts payable to brokerage clients

Accounts payable to brokerage clients represent the total of brokerage client accounts with credit or positive monetary balances. Brokerage client accounts are used primarily in connection with exchange traded futures and options transactions and include gains and losses on open positions as well as other deposits made as required by the Group or the exchange-clearing organizations. Brokerage client accounts with credit or positive balances are reported gross of client accounts that contain debit or net deficit balances, except where a right of offset exists.

51 EVENTS OCCURRING AFTER THE REPORTING PERIOD

As of June 30, 2025, the Company has no significant commitments or contingent liabilities to disclose.

III SUBSEQUENT FINANCIAL STATEMENTS

No audited financial statements have been prepared by the Company or any of the companies now comprising the Group in respect of any period subsequent to June 30, 2025 and up to the date of this report.

The following is the text of a report set out on pages IA-1 to IA-2, received from the Company's reporting accountant, Confucius International CPA Limited, Certified Public Accountants, Hong Kong, for the purpose of incorporation in this prospectus. This information set out below is the unaudited interim condensed consolidated financial information of the Group for the nine months ended September 30, 2025 and does not form part of the Accountant's Report from the reporting accountant, Confucius International CPA Limited, Certified Public Accountants, Hong Kong, as set out in Appendix I to this prospectus, and is included herein for information purpose only.

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION TO THE DIRECTORS OF NANHUA FUTURES CO., LTD. AND CITIC SECURITIES (HONG KONG) LIMITED

Introduction

We have reviewed the interim financial information set out on pages IA-3 to IA-30, which comprises the interim condensed consolidated statement of financial position of Nanhua Futures Co., Ltd. (the “**Company**”) and its subsidiaries (together, the “**Group**”) as at September 30, 2025, and the related interim condensed consolidated statement of profit or loss, the interim condensed consolidated statement of comprehensive income, the interim condensed consolidated statement of changes in equity and the interim condensed consolidated statement of cash flows for the nine-month period then ended and selected explanatory notes (together, the “**Interim Financial Information**”). The directors of the Company are responsible for the preparation and presentation of the Interim Financial Information in accordance with International Accounting Standard 34 “Interim Financial Reporting”. Our responsibility is to express a conclusion on the Interim Financial Information based on our review and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Scope of Review

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” as issued by the Hong Kong Institute of Certified Public Accountants. A review of the Interim Financial Information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the Interim Financial Information of the Group is not prepared, in all material respects, in accordance with International Accounting Standard 34 Interim Financial Reporting.

Other Matter

The comparative information for the interim condensed consolidated statement of financial position is based on the audited financial statements as at December 31, 2024. The comparative information for the interim condensed consolidated statement of profit or loss, the interim condensed consolidated statement of comprehensive income, the interim condensed consolidated statement of changes in equity and the interim condensed consolidated statement of cash flows, and related explanatory notes, for the nine-month period ended September 30, 2024 has not been audited or reviewed.

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1 GENERAL INFORMATION

Nanhua Futures Co., Ltd. (the “**Company**”) is incorporated in Zhejiang Province, the People’s Republic of China (the “**PRC**”) as a joint stock financial institution.

The Company was set up upon approval from the China Securities Regulatory Commission (the “**CSRC**”) in May 1996 as a limited liability company with an initial registered capital of RMB10 million. After a series of share transfers and capital increases and upon approval by relevant government authorities, the Company was converted from a limited liability company into a joint-stock company. After the conversion, the registered share capital of the Company was RMB640 million and the Company’s Chinese name was changed accordingly (南華期貨股份有限公司). The Company holds the business license No. 91330000100023242A. The registered address of the Company is Hengdian Building, Shangcheng District, Hangzhou City, Zhejiang Province.

The Company and its subsidiaries (the “**Group**”) are principally engaged in financial futures brokerage, commodity futures brokerage, futures investment consultancy, futures asset management, commodity trading and other business activities as permitted by the CSRC.

2 BASIS OF PREPARATION

2.1 Basis of preparation

This interim condensed consolidated financial information, comprising the interim condensed consolidated statement of financial position as at September 30, 2025, the interim condensed consolidated statement of profit or loss, the interim condensed consolidated statement of comprehensive income, the interim condensed consolidated statement of changes in equity and the interim condensed consolidated statement of cash flows for the nine months ended September 30, 2025 (collectively referred to as the “**Interim Financial Information**”), has been prepared in accordance with International Accounting Standard (“**IAS**”) 34, Interim Financial Reporting, issued by the International Accounting Standards Board (“**IASB**”).

The Interim Financial Information has been prepared in accordance with the same accounting policies adopted in the historical financial information for the years ended December 31, 2022, 2023 and 2024 and the six months ended June 30, 2025 (the “**Historical Financial Information**”) as disclosed in Appendix I to the prospectus issued by Nanhua Futures Co., Ltd. (the “**Company**”).

This Interim Financial Information includes consolidated financial statements and selected explanatory notes. The selected notes are included to explain events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the latest annual consolidated financial statements as at and for the year ended December 31, 2024. The interim condensed consolidated financial statements and the notes thereto do not include all of the information required for a full set of financial statements prepared in accordance with IFRS Accounting Standards (“**IFRS**”). Accordingly, this unaudited Interim Financial Information should be read in conjunction with the Historical Financial Information and the related notes thereto.

2.2 New and amendments to standards not yet adopted

Standards and amendments to standards that have been issued but not yet effective and not been early adopted by the Group are as follows:

Standards and amendments	Effective for accounting periods beginning on or after
Amendments to IFRS 10 and IAS 28 'Sale or Contribution of Assets between an Investor and its Associate or Joint Venture'	To be determined
Amendments to IFRS 9 and IFRS 7 'Amendments to the Classification and Measurement of Financial Instruments'	January 1, 2026
Annual Improvements – Volume 11 IFRS accounting standards	January 1, 2026
Amendments to IFRS 9 and IFRS 7 'Contracts Referencing Nature-dependent Electricity'	January 1, 2026
IFRS 18 'Presentation and Disclosure in Financial Statements'	January 1, 2027
IFRS 19 'Subsidiaries without Public Accountability: Disclosures'	January 1, 2027

The directors have performed assessment on the new standards and amendments, and has concluded on a preliminary basis that these new standards and amendments would not have a significant impact on the Group's consolidated financial statements when they become effective, except for IFRS 18 which will mainly impact the presentation of profit and loss statements.

IFRS 18 sets out requirements on presentation and disclosures in financial statements and will replace IAS 1 Presentation of Financial Statements. IFRS 18 introduces new requirements to present specified categories and defined subtotals in the statement of profit or loss; provide disclosures on management defined performance measures in the notes to the financial statements and improve aggregation and disaggregation of information to be disclosed in the financial statements. Minor amendments to IAS 7 "Statement of Cash Flows" and IAS 33 "Earnings per Share" are also made.

IFRS 18, and the consequential amendments to other IFRS Accounting Standards, will be effective for annual periods beginning on or after 1 January 2027, with early application permitted.

The application of IFRS 18 is not expected to have material impact on the financial position of the Group but is expected to affect the presentation of the consolidated statement of profit or loss and other comprehensive income and consolidated statement of cash flows and disclosures in the future financial statements. The Group will continue to assess the impact of IFRS 18 on the consolidated financial statements of the Group.

2.3 Critical Accounting Estimates and Judgements

The preparation of the interim financial information in conformity with IAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses on a year-to-date basis. Actual results may differ from these estimates.

In preparing the Interim Financial Information, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty are the same as those applied to the Historical Financial Information.

3 FINANCIAL RISK MANAGEMENT**3.1 Financial Risk Factors**

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and interest rate risk), credit risk, liquidity risk and price risk. The Group's overall risk management focuses on the unpredictability of financial markets, seeks a balance between risk and return and minimizes the adverse impact of risk on the Group's finance performance. Based on this risk management objective, the basic strategy of the Group's risk management is to identify and analyze the various risks faced by the Group, establish appropriate risk tolerance thresholds and timely and reliably supervise various risks to control them within a limited range.

The Interim Financial Information does not include all financial risk management information and disclosures required in the annual consolidated financial statements and should be read in conjunction with the Historical Financial Information. There were no significant changes in any material risk management policies during the nine months ended September 30, 2025.

3.2 Impairment of financial instruments

As at December 31, 2024, and as at September 30, 2025, the ECL rate of receivables are determined as follows:

	<u>As at December 31,</u>	<u>As at September 30,</u>
	<u>2024</u>	<u>2025</u>
Deposits with exchange-clearing organizations	0.45%	0.28%
Trade receivables	5.03%	5.10%
Other current assets	12.71%	8.61%
Commission receivable	5.00%	5.00%

3.3 Fair value of financial assets and liabilities

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The table below analyzes financial instruments measured at fair value at the end of each reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorized.

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

APPENDIX IA

UNAUDITED INTERIM CONDENSED CONSOLIDATED FINANCIAL INFORMATION

The following table presents the financial assets and liabilities that are measured at fair value at December 31, 2024 and as at September 30, 2025.

	As at September 30, 2025			
	Level 1	Level 2	Level 3	Total
	RMB'000	RMB'000	RMB'000	RMB'000
Financial assets at fair value through profit or loss:				
Debt securities	2,680,137	–	–	2,680,137
Equity instruments	370,164	–	157,453	527,617
Derivative financial assets	662,524	–	42,157	704,681
Financial assets at fair value through other comprehensive income	18,927	–	33,129	52,056
Other current assets – Inventory – hedged items	–	–	99,333	99,333
Other current assets – hedged items	–	–	3,459	3,459
Financial liabilities at fair value through profit or loss	–	–	33,659	33,659
Derivative financial liabilities	–	–	62,831	62,831
As at December 31, 2024				
	Level 1	Level 2	Level 3	Total
	RMB'000	RMB'000	RMB'000	RMB'000
Financial assets at fair value through profit or loss:				
Debt securities	1,360,052	–	–	1,360,052
Equity instruments	256,713	–	151,344	408,057
Wealth management products	–	–	200,000	200,000
Derivative financial assets	366,815	–	43,545	410,360
Financial assets at fair value through other comprehensive income	16,997	–	33,619	50,616
Other current assets – Inventory	–	–	176,454	176,454
Other current assets – hedged items	–	–	9,942	9,942
Financial liabilities at fair value through profit or loss	–	–	32,172	32,172
Derivative financial liabilities	–	–	80,710	80,710

(1) Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices date of the statement of financial position. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the closing price within bid-ask spread. These instruments are included in level 1.

(2) Financial instruments in level 2

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

For the nine months ended September 30, 2024 and 2025, there are no significant transfers between level 1 and level 2 of the fair value hierarchy of the Group.

(3) Financial instruments in level 3

A financial instrument is included in level 3 if one or more of the significant inputs is not based on observable market data.

The Group determines the fair value of the financial instrument by valuation techniques when it is difficult to obtain quotations from the open market.

The main parameters of valuation techniques used in financial instruments includes interest rate, stock and equity price, volatility level, prepayment rates, and the credits spreads of counterparty. All of these parameters can be observed and obtained from the open market.

For financial assets measured at fair value through profit or loss, including wealth management products and funds purchased by the Group, the fair value is calculated based on valuations provided by their respective managers.

For hedged items, the Company determines their fair value based on the difference between the spot price at the period-end and the execution price of forward contracts.

For other equity instrument investments (futures membership investment qualifications) measured at fair value, the Company calculates their fair value based on the purchase cost of the futures membership qualifications.

For over-the-counter (OTC) options measured at fair value through profit or loss, the Company use valuation techniques, including option pricing models, to determine their fair value. These models incorporate unobservable parameters such as volatility.

For the interests of other unit holders in consolidated structured entities measured at fair value through profit or loss, the Company using the market prices of the underlying investments to calculate fair value.

As at December 31, 2024 and as at September 30, 2025, a 5% increase or decrease in the volatility applied in the valuation technique would result in insignificant changes in profit before income tax and profit before income tax, respectively.

As at December 31, 2024 and as at September 30, 2025, a 5% increase or decrease in the volatility applied in the valuation technique would result in insignificant changes in other comprehensive income.

3.4 Capital management

The Group's objectives of capital management are:

- To safeguard the ability of the Company and its subsidiary to continue as a going concern so that they could make profits and benefits for shareholders or other stakeholders;
- To support the stability and growth of the Company and its subsidiary;
- To maintain a strong capital base to support the development of their business; and
- To comply with the capital requirements under the PRC regulations.

According to the “Administrative Measures Concerning Risk Control Indicators for Future Companies” (《期貨公司風險監管指標管理辦法》) issued by the CSRC on 18 April 2017, the Company is required to meet the following risk control requirements on a continual basis:

- The net capital shall be no less than RMB30,000,000;
- The ratio of net capital divided by the sum of its various risk capital provisions shall be no less than 100%;
- The ratio of net capital divided by net assets shall be no less than 20%;
- The ratio of current assets divided by current liabilities shall be no less than 100%;
- The ratio of liabilities divided by net capital shall be no greater than 150%;
- The clearing settlement funds shall be greater than RMB26,800,000.

Net capital refers to net assets minus risk adjustments on certain types of assets as defined in the Administrative Measures.

The Group manages its capital risk through timely monitoring, evaluating, reporting and comparing with target position of capital management, and the Group takes on a series of measures such as assets growth control, structure adjustment, internal or external capital accumulation, to make sure all the requirements of monitoring could be met as well as continuous improvement across its business.

4 OPERATING SEGMENT INFORMATION

For management purposes, the Group’s operating businesses are structured and managed separately according to the nature of their operations and the services they provide. Each of the Group’s operating segments represents a strategic business engaged in the following activities, which are subject to risks and returns that are different from the other operating segments.

PRC Futures Brokerage: mainly provides a solid bridge for clients to participate in commodity and financial futures trading.

PRC Risk Management Services: mainly provides tailored hedging services for enterprises and institutions using specialized tools.

PRC Wealth Management: mainly provides mutual fund management, asset management, and agency sale of funds.

Overseas Financial Services: offering core services such as brokerage, clearing, and asset management in international markets.

Others: businesses not included in the above four segments.

	<u>41,944</u>	<u>56,429</u>

The Chinese mainland income tax provision is based on the statutory tax rate of 25% of the taxable income of the Group as determined in accordance with the relevant PRC income tax rules and regulations. Hong Kong subsidiaries apply a tiered CIT rate: 8.25% on taxable income up to HKD2,000,000 and 16.5% on income exceeding HKD2,000,000. Nanhua Singapore Pte. Ltd. is subject to 13.5%, and other Singapore subsidiaries are subject to 17%. Nanhua Financial (UK) Co. Limited, registered in the UK, was subject to a CIT rate of 19% for the period up to March 2023. For the period from April 2023 onwards, the applicable rate increased to 25%. The U.S. subsidiaries are subject to a CIT rate of 30.5%, the Cayman Islands/Virgin Islands entities are subject to a CIT rate of 0%.

15 EARNINGS PER SHARE

(1) Basic earnings per share

Basic earnings per share is calculated by dividing the profit for the year attributable to shareholders of the Company by the weighted average number of ordinary shares in issue during the year.

	Nine months ended September 30,	
	2025	2024
	<i>(unaudited)</i>	<i>(unaudited)</i>
Profit attributable to shareholders of the Company <i>(in RMB thousands)</i>	351,449	358,333
Weighted average number of ordinary shares in issue <i>(in thousands)</i>	<u>610,066</u>	<u>610,066</u>
Basic earnings per share <i>(in RMB)</i>	<u>0.58</u>	<u>0.59</u>

(2) Diluted earnings per share

For the nine months ended September 30, 2024 and 2025, there are no potential diluted ordinary shares, so the diluted, earnings per share is the same as the basic earnings per share.

35 EVENTS OCCURRING AFTER THE REPORTING PERIOD

There are no other material subsequent event undertaken by the Company or by the Group after 30 September 2025.

APPENDIX II UNAUDITED PRO FORMA FINANCIAL INFORMATION

The information set out in this Appendix does not form part of the Accountant's Report from Confucius International CPA Limited, Hong Kong, the reporting accountant of the Company, as set out in Appendix I in this prospectus, and is included herein for illustrative purposes only.

The unaudited pro forma financial information should be read in conjunction with the section headed "Financial Information" in this prospectus and the Accountant's Report set out in Appendix I to this prospectus.

A. UNAUDITED PRO FORMA ADJUSTED CONSOLIDATED NET TANGIBLE ASSETS

The following is the unaudited pro forma statement of adjusted consolidated net tangible assets of the Group as at June 30, 2025, (the "**Unaudited Pro Forma Financial Information**") which has been prepared by the Directors in accordance with Rule 4.29 of the Listing Rules to illustrate the effects of the Global Offering as if it had taken place on June 30, 2025, and based on the audited consolidated net tangible assets of the Group attributable to the owners of the Company as at June 30, 2025, assuming the over-allotment is not exercised.

The Unaudited Pro Forma Financial Information is prepared for illustrative purpose only, and because of its hypothetical nature, it may not give a true picture of the consolidated net tangible assets of the Group attributable to the owners of the Company immediately after completion of the Global Offering or any future date after completion of the Global Offering.

	Audited consolidated net tangible assets of the Group attributable to owners of the Company as at June 30, 2025	Estimated net proceeds from the Global Offering	Unaudited pro forma adjusted consolidated net tangible assets attributable to the owners of the Company as at June 30, 2025	Unaudited pro forma adjusted consolidated net tangible assets per Share as at June 30, 2025	
	(Note 1) RMB'000	(Note 2) RMB'000	RMB'000	(Note 3) RMB	(Note 4) HK\$

APPENDIX II UNAUDITED PRO FORMA FINANCIAL INFORMATION

Notes:

- (1) The audited consolidated net tangible assets of the Group attributable to the owners of the Company as at June 30, 2025 is extracted from the Accountant's Report set out in Appendix I to this document, which is based on the audited consolidated net assets of the Group attributable to the owners of the Company as at June 30, 2025 of RMB4,282,167,000 with adjustments for the intangible assets of RMB8,869,000 attributable to the owners of the Company.
- (2) The estimated net proceeds from the Global Offering are based on 107,659,000 Shares at the indicative Offer Price of HK\$12.00, and HK\$16.00 per share, respectively, after deduction of the underwriting fees and other related expenses payable by the Company (excluding listing expenses of RMB558,000 which have been accounted for in the consolidated statements of profit or loss prior to 30 June 2025) and takes no account of any Shares which may be allotted and issued by the Company pursuant to the exercise of the Over-allotment Option.
- (3) The unaudited pro forma adjusted consolidated net tangible assets per Share is arrived at after the adjustments referred to in the preceding paragraphs and on the basis that 717,724,893 Shares were in issue assuming that the Global Offering has been completed on June 30, 2025, but takes no account of any Shares which may be allotted and issued by the Company pursuant to the exercise of the Over-allotment Option.
- (4) For the purpose of this unaudited pro forma adjusted consolidated net tangible assets per Share, the amounts stated in Hong Kong dollars are converted into Renminbi at the rate of RMB1.00 to HK\$1.1000. No representation is made that Hong Kong dollars has been, could have been or may be converted to Renminbi, or vice versa, at that rate.
- (5) No adjustment has been made to reflect any trading results or other transactions of the Group entered into subsequent to June 30, 2025.

APPENDIX II UNAUDITED PRO FORMA FINANCIAL INFORMATION

The following is the text of a report, prepared for the purpose of incorporation in this prospectus, received from the Reporting Accountant, Confucius International CPA Limited, Certified Public Accountants, Hong Kong, in respect of the unaudited pro forma financial information.

B. INDEPENDENT REPORTING ACCOUNTANT’S ASSURANCE REPORT ON THE COMPILED OF UNAUDITED PRO FORMA FINANCIAL INFORMATION

天健國際會計師事務所有限公司
Confucius International CPA Limited

Certified Public Accountants

香港灣仔莊士敦道181號大有大廈1501-08室
Rooms 1501-08, 15th Floor, Tai Yau Building,
181 Johnston Road, Wanchai, Hong Kong
電話 Tel: (852) 3103 6980
傳真 Fax: (852) 3104 0170

To the Directors of NANHUA FUTURES Co., Ltd.

We have completed our assurance engagement to report on the compilation of unaudited pro forma financial information of NANHUA FUTURES Co., Ltd. (the “**Company**”) and its subsidiaries (collectively the “**Group**”) by the directors of the Company (the “**Directors**”) for illustrative purposes only. The unaudited pro forma financial information consists of the unaudited pro forma statement of adjusted consolidated net tangible assets of the Group as at 30 June 2025 and related notes (the “**Unaudited Pro Forma Financial Information**”) as set out on pages II-1 to II-2 of the Company’s prospectus dated December 12, 2025, in connection with the proposed initial public offering of the H shares of the Company (the “**Prospectus**”). The applicable criteria on the basis of which the Directors have compiled the Unaudited Pro Forma Financial Information are described on pages II-1 to II-2 of the Prospectus.

The Unaudited Pro Forma Financial Information has been compiled by the Directors to illustrate the impact of the proposed initial public offering on the Group’s consolidated financial position as at 30 June 2025 as if the proposed initial public offering had taken place at 30 June 2025. As part of this process, information about the Group’s consolidated financial position has been extracted by the Directors from the Group’s audited consolidated financial statements for the period ended 30 June 2025, on which an accountant’s report has been published.

Directors’ Responsibility for the Unaudited Pro Forma Financial Information

The Directors are responsible for compiling the Unaudited Pro Forma Financial Information in accordance with paragraph 4.29 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “**Listing Rules**”) and with reference to Accounting Guideline 7, *Preparation of Pro Forma Financial Information for Inclusion in Investment Circulars*, (“**AG 7**”) issued by the Hong Kong Institute of Certified Public Accountants (“**HKICPA**”).

Our Independence and Quality Management

We have complied with the independence and other ethical requirements of the *Code of Ethics for Professional Accountants* issued by the HKICPA, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

APPENDIX II UNAUDITED PRO FORMA FINANCIAL INFORMATION

Our firm applies Hong Kong Standard on Quality Management (HKSQM) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, issued by the HKICPA, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Reporting Accountant's Responsibilities

Our responsibility is to express an opinion, as required by paragraph 4.29(7) of the Listing Rules, on the Unaudited Pro Forma Financial Information and to report our opinion to you. We do not accept any responsibility for any reports previously given by us on any financial information used in the compilation of the Unaudited Pro Forma Financial Information beyond that owed to those to whom those reports were addressed by us at the dates of their issue.

We conducted our engagement in accordance with Hong Kong Standard on Assurance Engagements 3420, *Assurance Engagements to Report on the Compilation of Pro Forma Financial Information Included in a Prospectus*, issued by the HKICPA. This standard requires that the reporting accountant plans and performs procedures to obtain reasonable assurance about whether the Directors have compiled the Unaudited Pro Forma Financial Information in accordance with paragraph 4.29 of the Listing Rules and with reference to AG 7 issued by the HKICPA.

For purposes of this engagement, we are not responsible for updating or reissuing any reports or opinions on any historical financial information used in compiling the Unaudited Pro Forma Financial Information, nor have we, in the course of this engagement, performed an audit or review of the financial information used in compiling the Unaudited Pro Forma Financial Information.

The purpose of unaudited pro forma financial information included in a prospectus is solely to illustrate the impact of a significant event or transaction on unadjusted financial information of the entity as if the event had occurred or the transaction had been undertaken at an earlier date selected for purposes of the illustration. Accordingly, we do not provide any assurance that the actual outcome of the proposed initial public offering at December 31, 2024 would have been as presented.

A reasonable assurance engagement to report on whether the unaudited pro forma financial information has been properly compiled on the basis of the applicable criteria involves performing procedures to assess whether the applicable criteria used by the Directors in the compilation of the Unaudited Pro Forma Financial Information provide a reasonable basis for presenting the significant effects directly attributable to the event or transaction, and to obtain sufficient appropriate evidence about whether:

- The related unaudited pro forma adjustments give appropriate effect to those criteria; and
- The unaudited pro forma financial information reflects the proper application of those adjustments to the unadjusted financial information.

APPENDIX II UNAUDITED PRO FORMA FINANCIAL INFORMATION

The procedures selected depend on the reporting accountant's judgment, having regard to the reporting accountant's understanding of the nature of the Group, the event or transaction in respect of which the Unaudited Pro Forma Financial Information has been compiled, and other relevant engagement circumstances.

The engagement also involves evaluating the overall presentation of the Unaudited Pro Forma Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our work has not been carried out in accordance with auditing standards or other standards and practices generally accepted in the United States of America or auditing standards of the Public Company Accounting Oversight Board (United States) or standards and practices of any professional body in any other overseas jurisdiction and accordingly should not be relied upon as if it had been carried out in accordance with those standards and practices.

Opinion

In our opinion:

- (a) the Unaudited Pro Forma Financial Information has been properly compiled by the Directors on the basis stated;
- (b) such basis is consistent with the accounting policies of the Group; and
- (c) the adjustments are appropriate for the purposes of the Unaudited Pro Forma Financial Information as disclosed pursuant to paragraph 4.29(1) of the Listing Rules.

Hong Kong,

December 12, 2025

TAXATION OF SECURITY HOLDERS

The income taxes and capital gains tax of holders of H Shares are subject to the laws and practices of the PRC and of jurisdictions in which holders of H Shares are residents or otherwise subject to tax. The following summary of certain relevant taxation provisions is based on current effective laws and practices, and no predictions are made about changes or adjustments to relevant laws or policies, and no legal or tax comments or suggestions will be made accordingly. The discussion has no intention to cover all possible tax consequences resulting from the investment in H shares, nor does it take the specific circumstances of any particular investor into account, some of which may be subject to special regulations. Accordingly, you should consult your own tax advisor regarding the tax consequences of an investment in H Shares. The discussion is based upon laws and relevant interpretations in effect as of the Latest Practicable Date, which is fully subject to change or adjustment and may have retrospective effect.

No issues on PRC taxation other than income tax, capital gains tax and profit tax, business tax/value added tax, stamp duty and estate duty were referred in the discussion. Prospective investors are urged to consult their financial advisors regarding the PRC and Hong Kong tax consequences of owning and disposing of H Share.

TAXATION IN THE PRC**Taxation Regarding Dividends*****Individual Investors***

Pursuant to the Individual Income Tax Law of the PRC (《中華人民共和國個人所得稅法》), which was last amended by the NPCSC on August 31, 2018, and the Implementation Provisions of the Individual Income Tax Law of the PRC (《中華人民共和國個人所得稅法實施條例》), which was last amended on December 18, 2018 and came into effect on January 1, 2019 (collectively, the “**IIT Law**”), dividends distributed by PRC enterprises are subject to an individual income tax levied at a flat rate of 20%. For a foreign individual who is not a resident of the PRC, the receipt of dividends from an enterprise in the PRC is normally subject to an individual income tax of 20% unless specifically exempted by the tax authority of the State Council or reduced by relevant tax treaty. Moreover, pursuant to the Notice on Issues Concerning Differentiated Individual Income Tax Policies for Dividends and Bonuses of Listed Companies (《關於上市公司股息紅利差別化個人所得稅政策有關問題的通知》), which was jointly promulgated by the Ministry of Finance, the State Taxation Administration (the “**STA**”) and the CSRC on September 7, 2015 and came into effect on September 8, 2015, where an individual acquires stocks of a listed enterprise from public offering of the enterprise or from the stock transfer market and holds the stocks for one month or less, the income from dividends distributed by the enterprise shall be fully taxable; if the individual holds the stocks for one month to one year (one year inclusive), 50% of the income from dividends distributed by the enterprise shall be taxable; the aforesaid income is subject to an individual income tax at a flat rate of 20%.

Pursuant to the Notice on Issues Concerning Taxation and Administration of Individual Income Tax After the Repeal of the Document (Guo Shui Fa [1993] No. 045) (《關於國稅發[1993] 045號文件廢止後有關個人所得稅徵管問題的通知》), which was issued by the STA on June 28, 2011, overseas individual shareholders of domestic non-foreign-invested enterprises which have issued shares in Hong Kong are entitled to relevant preferential tax treatment pursuant to the provisions in the tax treaties between the countries in which they are residents and China, and the tax arrangements between Chinese mainland and Hong Kong (or Macao). Generally, domestic non-foreign-invested enterprises that issue shares in Hong Kong are required to withhold individual income tax at a rate of 10% on dividends and profits, without the need for application. For the individual holders receiving dividends who are citizens of countries that have entered into a tax treaty with the PRC with tax rates lower than 10%, the withholding agent must apply for enjoying the lower preferential tax treatments, and, upon approval by the tax authorities, the excessive withholding amount will be refunded. For individual shareholders receiving dividends who are tax residents of countries that have entered into a tax treaty with the PRC that provides for tax rates higher than 10% but lower than 20%, the withholding agents are required to withhold the individual income tax at the effective rates under the treaties for dividends or bonuses paid, and no application procedure is required under such circumstances. If the individual receiving the dividends is a resident of a country that has not entered into a tax treaty with China or other circumstances exist, the withholding agent shall withhold individual income tax at a rate of 20% when distributing dividends and bonus.

Corporate Investors

Pursuant to the Enterprise Income Tax Law of the People's Republic of China (《中華人民共和國企業所得稅法》), which was promulgated by the NPCSC on March 16, 2007 and was most recently amended on December 29, 2018, and the Implementation Regulations for the Corporate Income Tax Law of the People's Republic of China (《中華人民共和國企業所得稅法實施條例》), which was promulgated by the State Council on December 6, 2007, came into effect on January 1, 2008 and was most recently amended on December 6, 2024 (collectively, the “**Enterprise Income Tax Law**”), the enterprise income tax rate is 25%. A non-resident enterprise is generally subject to enterprise income tax at a rate of 10% on PRC-sourced income (including dividends received from a PRC resident enterprise that issues share in Hong Kong) if it does not have an establishment or premise in the PRC or has an establishment or premise in the PRC but its PRC-sourced income has no real connection with such establishment or premise. The aforementioned income tax payable by non-resident enterprises shall be deducted at source, with the payer being the withholding agent, and the income tax shall be withheld by the withholding agent from the amount payable.

The Notice of the State Taxation Administration on Matters Concerning Withholding Enterprise Income Tax When China Resident Enterprises Distribute Dividends to Foreign Non-resident Enterprise Shareholders of H Shares (《國家稅務總局關於中國居民企業向境外H股非居民企業股東派發股息代扣代繳企業所得稅有關問題的通知》), which was promulgated and implemented by the STA on November 6, 2008, further clarifies that PRC resident enterprises distributing dividends for 2008 and for the years onwards to foreign non-resident enterprise shareholders of H shares shall withhold enterprise income

tax at a tax rate of 10%. In addition, the Response to Questions on Enterprise Income Tax over Dividend of B-Shares and Other Shares Received by Non-resident Enterprises (《關於非居民企業取得B股等股票股息徵收企業所得稅問題的批覆》), which was issued by the STA and came into effect on July 24, 2009, further provides that any PRC resident enterprise listed on overseas stock exchanges must withhold enterprise income tax at the rate of 10% from dividends distributed by them for 2008 and for the years onwards to non-resident enterprises. The above tax rates are subject to further changes based on the tax treaties or agreements (if applicable) signed between the PRC and the relevant countries or regions.

Pursuant to the Arrangement between the Mainland and the Hong Kong Special Administrative Region for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income (《內地和香港特別行政區關於對所得避免雙重徵稅和防止偷漏稅的安排》, the “**Arrangement**”), which was signed on August 21, 2006 and took effect on December 8, 2006, the Government of China may tax dividends paid by Chinese companies to Hong Kong residents (including natural persons and legal entities). However, the tax shall not exceed 10% of the gross amount of the dividends, unless a Hong Kong resident directly holds 25% or more of the Chinese company’s equity, in which case the tax shall not exceed 5% of the gross amount of the dividends. The Fifth Protocol of the Arrangement between the Chinese mainland and the Hong Kong Special Administrative Region for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion (《〈內地和香港特別行政區關於對所得避免雙重徵稅和防止偷漏稅的安排〉第五議定書》), which came into effect on December 6, 2019, adds a criteria for the qualification of entitlement to enjoy treaty benefits. Notwithstanding any other provisions in the Arrangement, treaty benefits prescribed by its criteria will not be granted if, considering all relevant facts and circumstances, it is reasonable to conclude that one of the principal purposes of the Arrangement or transaction (resulting directly or indirectly in benefits under the Arrangement) is to obtain such benefits, unless granting those benefits in such circumstances is in accordance with the relevant object and purpose of the Arrangement. The application of the dividend article of the tax treaty is also subject to Chinese tax laws and regulations, such as the Notice of the State Taxation Administration on Issues Concerning the Implementation of Dividend Articles of Tax Treaties (《國家稅務總局關於執行稅收協定股息條款有關問題的通知》).

Tax Treaties

Non-resident investors residing in jurisdictions which have entered into treaties or adjustments for the avoidance of double taxation with the PRC might be entitled to a reduction of the PRC corporate income tax imposed on the dividends received from PRC companies. The PRC currently has entered into avoidance of double taxation treaties or arrangements with a number of countries and regions including Hong Kong Special Administrative Region, Macao Special Administrative Region, Australia, Canada, France, Germany, Japan, Malaysia, the Netherlands, Singapore, the United Kingdom, the United States and etc. Non-PRC resident enterprises entitled to a preferential tax rate under the relevant income tax treaty or arrangement must apply to the Chinese tax authorities for a refund of any enterprise income tax exceeding the treaty rate, and the refund application is subject to approval by the Chinese tax authorities.

Taxes Related to Share Transfer*Value Added Tax and Local Surtax*

Pursuant to the Provisional Regulations of the People's Republic of China on Value-added Tax (《中華人民共和國增值稅暫行條例》), which was promulgated by the State Council on December 13, 1993, and most recently amended on November 19, 2017, and the Detailed Rules for Implementation of the Provisional Regulations of the People's Republic of China on Value-added Tax (《中華人民共和國增值稅暫行條例實施細則》), which was promulgated by the MOF on December 25, 1993, and most recently amended on October 28, 2011, all enterprises and individuals selling products, providing processing, repairing or replacement services, sales services, intangible assets, real estate, and importing goods within the People's Republic of China are required to pay value-added tax at the rates of 0%, 6%, 11%, and 17% on the different goods sold and services provided, unless otherwise stipulated.

Pursuant to the Circular on Comprehensively Promoting the Pilot Program of Replacing Business Tax with Value-Added Tax ((《關於全面推開營業稅改征增值稅試點的通知》) the “**Circular**”), which was issued by the MOF and the STA on March 23, 2016, and most recently amended on April 1, 2019, entities and individuals engaged in providing sales services within China are subject to value-added tax (“**VAT**”). “Engaged in providing sales services within China” refers to situations where either the buyer or seller of the services is located within China. The Circular further stipulates that for general VAT taxpayers or overseas VAT taxpayers, the transfer of financial products (including the transfer of ownership of marketable securities) is subject to VAT at a rate of 6% on the taxable income (i.e., the balance after deducting the purchase price from the selling price). However, individuals are exempt from VAT on the transfer of financial products, as also provided in Appendix 3 of the Circular (namely, the Provisions on Transitional Policies for the Pilot Program of Replacing Business Tax with Value-Added Tax (《營業稅改征增值稅試點過渡政策的規定》)). Pursuant to the laws and regulations, if a holder is a non-resident individual, the sale or disposal of H shares is exempt from PRC value-added tax; if a holder is a non-resident enterprise and the purchaser of H shares is an overseas individual or entity, the holder does not necessarily have to pay PRC value-added tax, but if the purchaser of H shares is a domestic individual or entity, the holder may be required to pay PRC value-added tax. However, it is still uncertain whether non-PRC resident enterprises are required to pay PRC value added tax for the disposal of H shares in practice.

VAT taxpayers are also required to pay urban maintenance and construction tax, education surcharge, and local education surcharge.

Income Tax***Individual Investors***

Pursuant to the IIT Law, gains on the transfer of equity interests in PRC resident enterprises are subject to individual income tax at a rate of 20%. Pursuant to the Notice on the Continued Provisional Exemption from Individual Income Tax on Income from the Transfer of Shares by Individuals (《關於個人轉讓股票所得繼續暫免徵收個人所得稅的通知》), which was issued by the MOF and the STA on March 30, 1998, income derived by individuals from the transfer of shares in listed companies has been provisionally exempt from individual income tax since January 1, 1997. The STA has not expressly stated whether it will continue to exempt tax on income of individuals from transfer of the shares of listed enterprises in the most recently amended IIT Law.

Pursuant to the Announcement of the MOF and STA on the Catalogue of Individual Income Tax Preferential Policies that Remain Effective (《財政部、國家稅務總局關於繼續有效的個人所得稅優惠政策目錄的公告》), which was issued and implemented by the MOF and STA on December 29, 2018, the Notice on the Continued Provisional Exemption from Individual Income Tax on Income from the Transfer of Shares by Individuals (《關於個人轉讓股票所得繼續暫免徵收個人所得稅的通知》) remains in effect.

Corporate Investors

Pursuant to the Enterprise Income Tax Law, if a non-resident enterprise does not have an establishment or place within the PRC, or has an establishment or place within the PRC but the income derived from within the PRC is not effectively connected with such establishment or place, the non-resident enterprise is generally required to pay a 10% corporate income tax on income sourced from within the PRC, including gains derived from the disposal of equity interests in a PRC resident enterprise. The aforementioned income tax for non-resident enterprises is withheld at source, with the payer acting as the withholding agent, and the tax is withheld from the amount payable to the non-resident enterprise. This tax may be reduced or exempted under the relevant tax treaty or agreement for the avoidance of double taxation.

Stamp Duty

Pursuant to the Stamp Duty Law of the People's Republic of China (《中華人民共和國印花稅法》), which was promulgated by the NPCSC on June 10, 2021 and took effect on July 1, 2022, PRC stamp duty is applicable to the entities and individuals that conclude taxable vouchers or conduct securities trading within the territory of the PRC, and the entities and individuals outside the territory of the PRC that conclude taxable vouchers that are used inside China. Therefore, the relevant provisions of China's stamp duty law do not apply to non-PRC investors' purchases and disposals of H-shares outside of China.

Estate Tax

Under Chinese law, China currently does not levy an estate tax.

MAIN TAXES OF THE COMPANY IN CHINA

See “Regulatory Overview”.

Foreign Exchange

The lawful currency of the PRC is Renminbi, which is currently subject to foreign exchange control and cannot be freely converted into foreign currency. The State Administration of Foreign Exchange (the “SAFE”) under the People’s Bank of China (the “PBOC”) is responsible for administering all matters relating to foreign exchange, including the enforcement of foreign exchange control regulations.

The Regulations on the Foreign Exchange System of the People’s Republic of China (《中華人民共和國外匯管理條例》), which was issued by the State Council on January 29, 1996, implemented on April 1, 1996, and most recently amended on August 5, 2008, classifies all international payments and transfers into current account items and capital account items. Current account items are subject to reasonable review by financial institutions engaged in foreign exchange settlement and sale to ensure the authenticity of transaction documents and their consistency with foreign exchange receipts and payments, and are also subject to oversight and inspection by foreign exchange regulatory authorities. For capital account items, foreign institutions and individuals making direct investments in China must register with the foreign exchange regulatory authorities after obtaining approval from the relevant competent authorities. Foreign exchange income received overseas can be repatriated or deposited overseas, and foreign exchange and foreign exchange settlement funds under the capital account are required to be used only for purposes as approved by the competent authorities and foreign exchange administrative authorities. In the event that international revenues and expenditure occur or may occur a material misbalance, or the national economy encounters or may encounter a severe crisis, the State may adopt necessary safeguard and control measures on international revenues and expenditure.

The Regulations for the Administration of Settlement, Sale and Payment of Foreign Exchange (《結匯、售匯及付匯管理規定》), which was issued by the PBOC on June 20, 1996 and took effect on July 1, 1996, abolished all other restrictions on convertibility of foreign exchange under current account items, while retaining the existing restrictions on foreign exchange transactions under capital account items.

Pursuant to Chinese laws and regulations, when PRC enterprises require foreign exchange for current account transactions, they can make payments through foreign exchange accounts opened at designated foreign exchange banks without approval from the foreign exchange administrative authorities, provided that valid transaction receipts and supporting documents are presented. PRC enterprises which, in accordance with regulations, are required to pay dividends to their shareholders in foreign exchange (such as the Company) may, on the strength of resolutions of the board of directors or the shareholders’ meeting approving the distribution of profits, effect payment from their foreign exchange accounts or convert and pay at the designated foreign exchange banks.

Pursuant to the Decision of the State Council on Cancelling and Adjusting a Batch of Items Subject to Administrative Examination and Approval and Other Items (《國務院關於取消和調整一批行政審批項目等事項的決定》), which was promulgated by the State Council on October 23, 2014, it decided to cancel the approval requirement of the State Administration of Foreign Exchange and its branches for the remittance and settlement of the proceeds raised from the overseas listing of the foreign shares into RMB domestic accounts.

Pursuant to the Notice on Relevant Issues Concerning Foreign Exchange Administration for Overseas Listings (《關於境外上市外匯管理有關問題的通知》), which was issued by the SAFE and took effect on December 26, 2014, a domestic company shall, within 15 business days from the date of the end of its overseas listing and issuance, register the overseas listing with the local branch office of the SAFE at the place of its incorporation; the proceeds from an overseas listing of a domestic company may be remitted to the domestic account or deposited in an overseas account, but the use of the proceeds shall be consistent with the content of this document and other disclosure documents. Domestic companies (excluding banking financial institutions) must open a special foreign exchange account at a local bank, based on their overseas listing registration certificate, to handle the remittance and transfer of funds related to their initial public offering (or further offering) and share repurchase activities.

Pursuant to the Notice of the State Administration of Foreign Exchange on Further Simplifying and Improving Policies for the Foreign Exchange Administration of Direct Investment (《國家外匯管理局關於進一步簡化和改進直接投資外匯管理政策的通知》), which was issued by the SAFE on February 13, 2015 and took effect on June 1, 2015 and was amended on December 30, 2019, the registration of foreign exchange under domestic direct investment and the registration of foreign exchange under overseas direct investment shall be directly examined and handled by banks. The SAFE and its local branches indirectly regulate the foreign exchange registration of direct investment through banks.

Pursuant to the Notice of the State Administration of Foreign Exchange on Reforming and Regulating the Administration of Foreign Exchange Settlement from Capital Account Items (《國家外匯管理局關於改革和規範資本項目結匯管理政策的通知》), which was issued by the SAFE and took effect on June 9, 2016, relevant policies have clearly implemented discretionary foreign exchange settlement for foreign exchange income (including funds repatriated from overseas listings) from capital account items, allowing domestic institutions to settle foreign exchange at banks based on their actual business needs. The discretionary foreign exchange settlement ratio for domestic institutions' foreign exchange income from capital account items is tentatively set at 100%, and SAFE may adjust this ratio as appropriate based on the balance of payments situation.

On December 4, 2023, SAFE issued the Notice on Further Deepening Reform to Promote Facilitation of Cross-Border Trade and Investment (《關於進一步深化改革促進跨境貿易投資便利化的通知》). This notice optimizes the administration of foreign exchange for market procurement trade; relaxes the netting of receipts and payments for processing trade; improves cross-border trade fund receipts and payments under agency arrangements; facilitates foreign exchange settlement for domestic institutions' operating lease business; promotes the nationwide pilot policy for facilitating cross-border financing; relaxes the restrictions on the scale of preliminary expenses for overseas direct investment (ODI); improves the negative list management for the use of capital account income; and eliminates the approval requirement for opening foreign debt accounts in different locations.

This Appendix summarizes certain aspects of PRC laws and regulations which are relevant to our Company's operations and business. Laws and regulations relating to taxation in the PRC are discussed separately in "Appendix III – Taxation and Foreign Exchange" to this document. This Appendix also contains a summary of legal and regulatory provisions of the Company Law. The principal objective of this summary is to provide potential investors with an overview of the principal laws and regulatory provisions applicable to our Company. This summary is not intended to include all the information which is important to the potential investors. For a discussion of laws and regulations which are relevant to our Company's business, see "Regulatory Overview" in this document.

PRC LEGAL SYSTEM

The PRC legal system is based on the Constitution of the People's Republic of China (《中華人民共和國憲法》, the "**Constitution**"), and is made up of written laws, administrative regulations, local regulations, separate regulations, rules and regulations of departments of the State Council, rules and regulations of local governments, autonomous regulations, separate regulations of autonomous regions, special administrative region law and international treaties and other regulatory documents signed by the PRC government. Court judgments do not constitute legally binding precedents, although they are used for the purposes of judicial reference and guidance.

Pursuant to the Constitution and the Legislation Law of the People's Republic of China (《中華人民共和國立法法》, the "**Legislation Law**"), the National People's Congress of the People's Republic of China ("**NPC**") and its Standing Committee are empowered to exercise the legislative power of the State in accordance with the Constitution. The NPC has the power to formulate and amend basic laws involving civil and criminal matters, state organs, and other affairs. The NPCSC is empowered to formulate and amend laws other than those required to be enacted by the NPC, and to supplement and amend parts of the laws enacted by the NPC during the adjournment of the NPC, provided that such supplements and amendments are not in conflict with the basic principles of such laws. The NPC may also authorize the NPCSC to enact relevant laws.

The State Council is the highest organ of the PRC administration and has the power to formulate administrative regulations based on the Constitution and laws.

The people's congresses of the provinces, autonomous regions and municipalities and their standing committees may formulate local regulations based on the specific circumstances and actual needs of their respective administrative areas, provided that such local regulations do not contravene any provision of the Constitution, laws or administrative regulations. The people's congresses of cities divided into districts and their standing committees may formulate local regulations on matters such as urban and rural construction and management, environmental protection and historical and cultural protection, and grass-roots level governance based on the specific circumstances and actual needs of such cities, which will be implemented after being reported to and approved by the standing committees of the people's congresses of the provinces and autonomous regions, provided that such local regulations do not contravene any provision of the Constitution, laws, administrative regulations and local regulations of such provinces or autonomous regions. People's congresses of national autonomous areas have the

power to enact autonomous regulations and separate regulations in light of the political, economic and cultural characteristics of the ethnic groups in the areas concerned. Autonomous regulations and separate regulations of autonomous regions will become enforceable after being reported to and approved by the NPCSC. Autonomous regulations and separate regulations of autonomous prefectures and autonomous counties will become enforceable after being reported to and approved by the standing committees of the people's congresses of the provinces, autonomous regions and municipalities.

The ministries and commissions of the State Council, the People's Bank of China, the National Audit Office and other institutions with administrative functions directly under the State Council and institutions prescribed by law may formulate rules within their authority based on the laws and the administrative regulations, decisions, and orders of the State Council. The people's governments of the provinces, autonomous regions, municipalities and cities or autonomous prefectures divided into districts may formulate rules based on the laws, administrative regulations and local regulations of such provinces, autonomous regions and municipalities.

The Constitution has the highest legal effect. No laws, administrative regulations, local regulations, autonomous regulations, separate regulations nor rules shall contravene the Constitution. Laws have a higher legal effect than administrative regulations, local regulations, and rules. Administrative regulations have a higher legal effect than local regulations, and rules. Local regulations have a higher legal effect than the rules of local government of the same or lower tier. The rules enacted by the people's government of provinces and autonomous regions have a higher legal effect than the rules enacted by the people's government of the cities divided into districts or autonomous prefecture within the administrative region of the province or autonomous region.

The NPC has the power to alter or annul any inappropriate laws enacted by the NPCSC, and to annul any autonomous regulations or separate regulations which have been approved by the NPCSC but which contravene the Constitution or the Legislation Law. The NPCSC has the power to revoke any administrative regulations that conflict with the Constitution and laws, the power to revoke any local regulations that conflict with the Constitution, laws or administrative regulations, and the power to revoke any autonomous regulations and separate regulations approved by the standing committees of the people's congresses of any province, autonomous region, or municipality directly under the Central Government that violate the provisions of the Constitution and the Legislation Law. The State Council has the power to change or revoke any inappropriate departmental regulations and local government regulations. The people's congresses of provinces, autonomous regions or municipalities directly under the Central Government have the power to alter or annul any inappropriate local regulations enacted or approved by their respective standing committees. The standing committee of a local people's congress has the authority to annul any inappropriate rules formulated by the people's government at the same level. The people's governments of provinces and autonomous regions have the right to change or revoke any inappropriate regulations formulated by the people's governments at lower levels.

According to the Constitution and the Legislation Law, the power of legal interpretation belongs to the NPCSC. Pursuant to the Resolution of the NPCSC Providing an Improved Interpretation of Laws (《全國人民代表大會常務委員會關於加強法律解釋工作的決議》), which took effect on June 10, 1981, in cases where the scope of provisions of laws or decrees needs to be further defined or additional stipulations need to be made, the NPCSC shall provide interpretations or make stipulations by means of decrees. Issues involving the specific application of laws and decrees in the trial work of the court shall be interpreted by the Supreme People's Court. All issues related to the specific application of laws and decrees in the procuratorial work of the procuratorate shall be interpreted by the Supreme People's Procuratorate. If the interpretations provided by the Supreme People's Court and the Supreme People's Procuratorate are at variance with each other in principle, they shall be submitted to the NPCSC for interpretation or decision. Interpretation of questions involving the specific application of laws and decrees in areas unrelated to judicial and procuratorial work shall be provided by the State Council and competent authorities.

At the local level, in cases where the scope of local regulations needs to be further defined or additional stipulations need to be made, the standing committees of the people's congresses of provinces, autonomous regions, and municipalities directly under the Central Government which have enacted these regulations shall provide the interpretations or make the stipulations. Interpretation on the application of local regulations shall be given by the competent departments under the people's government of the respective provinces, autonomous regions and municipalities.

PRC JUDICIAL SYSTEM

Pursuant to the Constitution and the Law of Organization of the People's Courts of the People's Republic of China (《中華人民共和國人民法院組織法》), the People's Court is composed of the Supreme People's Court, local people's courts, and military courts as well as other special people's courts. The local people's courts are comprised of the basic people's courts, the intermediate people's courts and the higher people's courts. Basic people's courts may set up a number of people's tribunals based on the facts of the region, population and cases. The Supreme People's Court is the highest judicial organ in China, supervising the administration of justice by the local people's courts at all levels and by the special people's courts.

Pursuant to the Constitution and the Law of Organization of the People's Procuratorates of the People's Republic of China (《中華人民共和國人民檢察院組織法》), the people's procuratorates are State organs for legal supervision, composed of the Supreme People's Procuratorate, local people's procuratorates, and military procuratorates as well as other special people's procuratorates. The Supreme People's Procuratorate is the highest procuratorial organ. It leads the work of the people's procuratorates at all levels and specialized people's procuratorates. The people's procuratorates at higher levels lead the work of the people's procuratorates at lower levels.

The Civil Procedure Law of the People's Republic of China (《中華人民共和國民事訴訟法》 the “**Civil Procedure Law**”), which was last amended on September 1, 2023 and took effect on January 1, 2024, prescribes the conditions for instituting a civil action, the jurisdiction of the people's courts, the procedures for conducting a civil action, and the procedures for enforcement of a civil judgment or ruling. All parties to a civil action conducted within the PRC must abide by the Civil Procedure Law. A civil case is generally heard by the court located in the defendant's place of domicile. The parties to a contract may, through the written contract, choose a people's court, which located in the place where the defendant would have his domicile, the contract would be performed, the contract would be signed, the plaintiff would have his domicile, or the subject of the contract would be located, to have jurisdiction over the case, as long as this jurisdiction choice does not violate the provisions regarding the Jurisdiction by Level and the Exclusive Jurisdiction. Judgments or rulings of the second instance at the People's Court are final. A party has the right to appeal against the judgment or ruling of the first instance of a local people's court. The people's procuratorate may present a protest to the higher people's courts in accordance with the procedures stipulated by the laws. In the absence of any appeal by the parties and any protest by the people's procuratorate within the stipulated period, the judgments or rulings of the people's courts are final. Judgments or rulings of the second instance of the intermediate people's courts, the higher people's courts and the Supreme People's Court, as well as those of the first instance of the Supreme People's Court, are final. However, if the Supreme People's Court finds any definite errors in a legally effective final judgment, ruling or paper of mediation of the local people's courts at all levels or the higher people's courts find any definite errors in a legally effective final judgment, ruling or paper of mediation of the people's court at a lower level, the Supreme People's Court or such higher people's courts shall have the power to bring the case to trial or to direct the people's courts at lower levels to conduct a retrial. If the president of a people's court at any level finds some definite errors in a legally effective judgment or ruling or mediation rendered by his court and deems it is necessary to have the case re-adjudicated, he shall refer the case to the adjudication committee for discussion and decision.

Foreign nationals, stateless persons, foreign enterprises, or organizations, which initiate or respond to lawsuits in people's courts, shall have the same litigation rights and obligations as the citizens, legal persons, or other organizations of the PRC. Should the courts of a foreign country impose restrictions on the civil litigation rights of the citizens, legal persons, or other organizations of the PRC, the people's courts of the PRC shall follow the principle of reciprocity regarding the civil litigation rights of the citizens, enterprises, or organizations of that foreign country. When foreign nationals, stateless persons, or foreign enterprises or organizations need to appoint lawyers for filing or respond to a lawsuit in a people's court, they shall appoint the lawyers of the PRC only. In accordance with the international treaties to which China is a signatory or participant or according to the principle of reciprocity, a People's Court and a foreign court may request each other to serve documents, conduct investigation and collect evidence and conduct other litigation actions.

All parties to a civil action shall perform the legally effective judgments and rulings. If any party to a civil action refuses to abide by a judgment or ruling made by a People's Court or an award made by a PRC arbitration tribunal, the other party may apply to the People's Court for enforcement within two years. If a party fails to satisfy within the stipulated period a judgment which the court has granted an enforcement approval, the court may, upon the application of the other party, mandatorily enforce the judgment against such party.

Where a party requests for enforcement of an effective judgment or ruling made by a People's Court, but the opposite party or his property is not within the territory of the PRC, the party may directly apply to the foreign court with jurisdiction for recognition and enforcement. If China has concluded or acceded to an international treaty with the relevant foreign country that provides for the recognition and enforcement of judgments and rulings, or if such judgment or ruling meets the conditions for recognition under the principle of reciprocity following review by a people's court of the PRC, the people's court may recognize and enforce it in accordance with Chinese enforcement procedures. However, recognition and enforcement will be denied if the people's court deems the judgment or ruling to violate the basic principles of Chinese law or to infringe upon China's sovereignty, security, or social and public interests.

Arbitration and Enforcement of Arbitral Awards

Pursuant to the Arbitration Law of the People's Republic of China ((《中華人民共和國仲裁法》) the "**Arbitration Law**"), which was promulgated by the NPCSC on August 31, 1994, amended on September 1, 2017 and took effect on January 1, 2018, and last amended on September 12, 2025 and will take effect on March 1, 2026, the Arbitration Law applies to foreign-related economic disputes where the parties have concluded a written agreement to submit the dispute to an arbitration commission established in accordance with the Arbitration Law. The Arbitration Law stipulates that before the China Arbitration Association promulgates arbitration rules, an arbitration commission may formulate interim arbitration rules in accordance with the Arbitration Law and the Civil Procedure Law. Where the parties involved have agreed to an arbitration agreement, a People's Court will refuse to accept a lawsuit initiated by one of the parties, unless the arbitration agreement is invalid.

Under the Arbitration Law and Civil Procedure Law, an arbitral award shall be final and binding on the parties involved in the arbitration. If one of the parties refuses to execute the award, the other party may apply for enforcement with the people's court. However, the people's court may refuse to enforce the arbitral award if, after review by a collegial panel, it finds that the arbitral proceedings were unlawful, including but not limited to instances where the composition of the arbitral tribunal or the arbitral procedure violated statutory procedures, the arbitration commission lacked jurisdiction, or the matters decided were not within the scope of the arbitration agreement.

Any party seeking to enforce an award of a foreign affairs arbitration organ of the PRC against a party who or whose property is not located within the PRC may directly apply to a foreign court with jurisdiction over the relevant matters for recognition and enforcement of the award. Likewise, an arbitral award made by a foreign arbitration body may be recognized and enforced by PRC courts in accordance with the principle of reciprocity or any international treaties concluded or acceded to by the PRC.

On December 2, 1986, the NPCSC adopted a resolution whereby China acceded to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (《承認與執行外國仲裁裁決公約》) (the “**New York Convention**”), which was adopted on June 10, 1958. The New York Convention provides that all arbitral awards made in a state which is a party to the New York Convention shall be recognized and enforced by other parties thereto, subject to their rights to refuse such recognition and enforcement under certain circumstances, including where the recognition or enforcement of the award is against the public policy of that state. Upon accession, the NPCSC made two declarations: (i) China will apply the New York Convention to the recognition and enforcement of arbitral awards made in the territory of another Contracting State only on the basis of reciprocity; and (ii) the New York Convention will only apply to disputes arising out of legal relationships, whether contractual or not, which are considered as commercial under Chinese law.

An arrangement for mutual enforcement of arbitral awards between Hong Kong and the Supreme People’s Court of China was reached. The Supreme People’s Court of China adopted the Arrangement Concerning Mutual Enforcement of Arbitral Awards between the Mainland and the Hong Kong Special Administrative Region (《最高人民法院關於內地與香港特別行政區相互執行仲裁裁決的安排》) on June 18, 1999, which came into effect on February 1, 2000. Under this arrangement, arbitral awards rendered by arbitration institutions in Chinese mainland pursuant to the Arbitration Law are enforceable in Hong Kong, and arbitral awards rendered by Hong Kong arbitration institutions pursuant to the Arbitration Ordinance of Hong Kong Special Administrative Region (《香港特別行政區仲裁條例》) are enforceable in Chinese mainland. If the Mainland courts deem the enforcement of awards made by the Hong Kong arbitral bodies in the Chinese mainland to be against public interests of the Chinese mainland, or if the Hong Kong SAR courts deem the enforcement of such arbitration awards to be against the public policies in the Hong Kong SAR, such awards may not be enforced. On November 26, 2020, the Supreme People’s Court of China promulgated the Supplemental Arrangement of the Supreme People’s Court for the Mutual Enforcement of Arbitral Awards between the Chinese mainland and the Hong Kong Special Administrative Region ((《最高人民法院關於內地與香港特別行政區相互執行仲裁裁決的補充安排》) the “**Supplemental Arrangement**”). Pursuant to the Supplemental Arrangement, before or after accepting an application for enforcement of an arbitral award, the court concerned may, upon application and in accordance with the law of the place where the arbitral award is to be enforced, take measures of preservation or enforcement.

JUDICIAL JUDGMENT AND ITS ENFORCEMENT

In accordance with the Arrangement on Reciprocal Recognition and Enforcement of Judgments in Civil and Commercial Matters by the Courts of the Chinese mainland and of the Hong Kong Special Administrative Region (《最高人民法院關於內地與香港特別行政區法院相互認可和執行民商事案件判決的安排》), which was promulgated by the Supreme People’s Court on January 25, 2024, and took effect on January 29, 2024, courts of Hong Kong and courts of the People’s Republic of China reciprocally recognize and enforce legally effective judgments in civil and commercial matters. The scope of reciprocal recognition and enforcement covers monetary and non-monetary judgments. Specifically, regarding monetary judgments, enforcement includes the adjudged payment of assets and corresponding interest, litigation costs, late payment fees, and interest on late payments, but excludes taxes and fines.

PRC LAWS AND REGULATIONS ON SECURITIES

In October 1992, the State Council established the securities committee and the CSRC. The securities committee was responsible for coordinating the drafting of securities laws and regulations, formulating securities-related policies, planning the development of the securities market, guiding, coordinating, and supervising all securities-related institutions in China, and administering the CSRC. The CSRC, as the regulatory arm of the securities committee, was responsible for drafting regulations for the securities market, supervising securities companies, regulating the public offering of securities by Chinese companies domestically and overseas, overseeing securities trading, compiling securities-related statistics, and conducting related research and analysis. In April 1998, the State Council merged these two entities, and restructured the CSRC.

The Provisional Regulations on Issuance and Trading of Shares (《股票發行與交易管理暫行條例》), which was promulgated and took effect on April 22, 1993, involve the application and approval procedures for public offerings of equity securities, trading of equity securities, takeovers by listed companies, deposit, liquidation and transfer of listed equity securities, the disclosure of information, investigation, sanctions and dispute resolutions with respect to listed companies.

On December 25, 1995, the State Council promulgated and implemented the Regulations of the State Council Concerning Domestic Listed Foreign Shares of Joint Stock Limited Companies (《國務院關於股份有限公司境內上市外資股的規定》). These regulations mainly involve the issue, subscription, trading, and declaration of dividends and other distributions of domestic listed foreign shares, as well as the information disclosure of joint stock limited companies with domestic listed foreign shares.

The Securities Law, which took effect on July 1, 1999, and last amended on December 28, 2019, governs the issuance and trading of securities, the acquisition of listed companies, and the duties and responsibilities of stock exchanges, securities companies, and the State Council's securities regulatory authority. The Securities Law comprehensively regulates activities in China's securities market and stipulates that domestic enterprises must comply with relevant State Council regulations to list their shares overseas. Currently, the issuance and trading of securities overseas are primarily regulated by laws and regulations promulgated by the State Council and the CSRC.

COMPANY LAW, TRIAL MEASURES OF OVERSEAS SECURITIES OFFERING AND LISTING AND THE GUIDANCE ON ARTICLES OF ASSOCIATION FOR LISTED COMPANIES

Joint stock limited companies established in China seeking a listing on the Hong Kong Stock Exchange are primarily governed by the following laws and regulations of Chinese mainland.

The Company Law was adopted by the NPCSC at its Fifth Session on December 29, 1993, and came into effect on July 1, 1994. The Company Law was revised on December 25, 1999, August 28, 2004, October 27, 2005, December 28, 2013, October 26, 2018, and December 29, 2023, respectively. The current PRC Company Law was implemented as of July 1, 2024.

On February 17, 2023, the CSRC promulgated the Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies ((《境內企業境外發行證券和上市管理試行辦法》), the “**Trial Measures of Overseas Securities Offering and Listing**”) and five relevant regulatory guidelines, which came into effect on March 31, 2023. The Trial Measures of Overseas Securities Offering and Listing are applicable to the overseas issuance and listing of securities by domestic companies.

The Guidance on Articles of Association for Listed Companies ((《上市公司章程指引》) the “**Articles of Association Guidance**”), which was issued by the CSRC on December 16, 1997, and last amended and took effect on March 28, 2025, provides guidance on the articles of association.

The following is a summary of the key provisions of the Company Law, the Trial Measures of Overseas Securities Offering and Listing, and the Articles of Association Guidance applicable to the Company.

General Provisions

A joint stock limited company refers to a corporate legal entity established within China in accordance with the Company Law, possessing independent legal personality and enjoying the rights to its corporate assets. The company’s capital is divided into shares. All shares of the company shall, pursuant to the company’s articles of association, adopt either par value or no-par value. Where par value is adopted, each share shall have an equal value. Shareholders of a joint stock limited company are liable to the company to the extent of their subscribed shares, and the company is liable for its debts to the extent of all its assets.

A joint stock limited company shall conduct its business in compliance with laws and administrative regulations. A joint stock limited company may invest in other limited liability companies and joint stock limited companies, and its liabilities with respect to such investee companies are limited to the amount invested. Unless otherwise provided by law, a joint stock limited company may not, as an investor, bear joint and several liability for the debts of the investee companies.

According to the Trial Measures of Overseas Securities Offering and Listing, domestic enterprises that conduct an initial public offering or listing overseas shall file a record with the CSRC within three business days after submitting the application documents for overseas offering and listing. Domestic enterprises are allowed to raise funds in foreign currency or RMB and pay dividends in the same currencies during overseas offering and listing.

Incorporation

A joint stock limited company may be established by promotion or public subscription. A joint stock limited company may be incorporated by a minimum of one but not more than 200 promoters, and at least half of the promoters must have residence within the PRC. The registered capital of a joint stock limited company shall be the total share capital of the issued shares registered with the company registration authority. Shares shall not be raised from others before the promoters fully pay the shares subscribed by them. Where laws, administrative regulations, or decisions of the State Council provide otherwise for the minimum registered capital of a joint stock limited company, such provisions shall prevail.

In the case of a joint stock limited company established by promotion, the promoters shall subscribe for the full amount of shares to be issued at the time of the company's establishment as stipulated in the articles of association and shall pay the full amount of the share capital prior to the establishment of the company. Where a shareholder contributes capital in monetary form, the full amount of the monetary contribution shall be deposited into the company's bank account. Where a shareholder contributes capital in non-monetary form, the transfer procedures for the property rights shall be handled in accordance with the law. If a promoter fails to pay for the shares subscribed for or the actual value of the non-monetary property contributed is significantly lower than the value of the shares subscribed for, the other promoters shall bear joint and several liability with the defaulting promoter for the shortfall in capital contribution. After the promoters have subscribed for capital contributions under the articles of association, a board of directors and a supervisory committee shall be elected, and the board of directors shall apply for registration of establishment by filing the articles of association as well as other documents required by laws and administrative regulations with the company registration authority.

The convening and voting procedures of the establishment meeting of a joint stock limited company established by way of promotion shall be stipulated in the company's articles of association or the agreement between the promoters. Where the shares issued remain undersubscribed by the time of incorporation of the company, or where the promoters fail to convene an inauguration meeting within 30 days of the subscription monies for the shares issued being fully paid up, the subscribers may demand that the promoters refund the subscription monies so paid together with the interest at bank rates of a deposit for the same period. After the promoters and subscribers have paid the share capital or delivered the non-monetary capital contribution, their share capital shall not be withdrawn except in the case where the shares are not fully subscribed as scheduled, or where the promoters fail to convene an inauguration meeting as scheduled, or where the inauguration meeting resolves not to establish the company. An application for establishment registration shall be submitted to the company registration authority within 30 days after the conclusion of the company's inauguration meeting. The company is formally established

and acquires legal personality upon approval of registration and issuance of a business license by the relevant company registration authority. When a limited liability company is converted into a joint stock limited company, the total amount of converted paid-in capital shall not exceed the company's net assets. When a limited liability company is converted into a joint stock limited company and publicly issues shares to increase registered capital, it shall do so in accordance with applicable laws.

SHARE CAPITAL

The company's promoters may contribute capital in monetary form or with non-monetary assets that can be valued in monetary terms and legally transferred, such as physical assets, intellectual property rights, land use rights, equity interests, and creditor's rights; however, assets prohibited by laws and administrative regulations from being used as capital contributions are excluded. Non-monetary assets contributed as capital shall be assessed and valued, and the assets shall be verified. Overvaluation or undervaluation is prohibited.

The issuance of shares shall be conducted in a fair and equitable manner. Each share of the same class shall carry equal rights. Shares issued at the same time and within the same class must be issued on the same conditions and at the same price. The issue price of par value shares may be at par value or at a premium, but not below par value.

Pursuant to the Trial Measures of Overseas Securities Offering and Listing, domestic companies undertaking an initial public offering or listing overseas shall file a record with the CSRC within three business days after submitting the application documents for overseas issuance and listing. Enterprises in the PRC that issue and list their shares overseas may raise funds and pay dividends in foreign currencies or RMB.

Increase of Share Capital

According to the Company Law, when a company issues new shares, the shareholders' meeting shall, in accordance with the company's articles of association, adopt resolutions regarding the type and number of new shares, the issue price, the start and end dates of the issuance, and the type and number of new shares to be issued to existing shareholders.

After the company has raised the full amount of share capital through the issuance of new shares, it must register the change with the company registration authority and make a public announcement. When a company issues new shares to increase its registered capital, the subscription for new shares by shareholders shall be governed by the relevant provisions on capital contribution for company establishment.

Reduction of Share Capital

When a company needs to reduce its registered capital, it must prepare a balance sheet and an inventory of assets. The company shall notify its creditors within ten days from the date of the resolution to reduce registered capital and announce the reduction in a newspaper or on the National Enterprise Credit Information Publicity System within 30 days after the resolution is adopted. The creditors are entitled to require the company to repay its debts or provide corresponding guarantees within 30 days from receipt of the notification or within 45 days from the date of the announcement if they have not received any notification. When a company reduces its registered capital, the capital contributions or shares held by shareholders shall be reduced proportionately, unless otherwise stipulated by law or the articles of association of the joint stock limited company.

Share Buy-Back

According to the Company Law, a joint stock limited company may not purchase its shares other than for one of the following purposes: (i) to reduce its registered capital; (ii) to merge with another company that holds the company's shares; (iii) to grant shares to implement an employee stock ownership plan or an equity incentive plan; (iv) to purchase the company's shares from shareholders who dissent from a resolution at a shareholders' meeting relating to a merger or division with another company; (v) to use the shares in the conversion of the convertible corporate bonds issued by the listed Company; and (vi) share purchase is essential for listed companies to maintain company value and protect shareholder interests.

Purchase of the company's shares for reasons stated in items (i) and (ii) above requires approval by a resolution of the shareholders' meeting. Purchase of shares pursuant to items (iii), (v), or (vi) above requires a resolution passed by a meeting of the board of directors at which more than two-thirds of the directors are present, in accordance with the company's articles of association or as authorized by the shareholders' meeting.

Following the purchase of the company's shares pursuant to item (i), the relevant shares must be cancelled within ten days from the date of acquisition. If the share purchase is carried out pursuant to items (ii) or (iv), the shares must be transferred or cancelled within six months. Following the purchase of shares pursuant to items (iii), (v), or (vi), the aggregate number of shares held by the company must not exceed 10% of the total number of issued shares of the company, and these shares must be transferred or cancelled within three years.

A listed company purchasing its own shares must fulfill information disclosure obligations in accordance with securities laws. Share purchase pursuant to items (iii), (v), or (vi) must be conducted through open market transactions.

The company shall not accept the shares of the company as the subject of pledge.

Share Transfer

According to the Company Law, shares held by shareholders may be transferred in accordance with relevant laws and regulations. Shareholders transferring their shares should conduct the transfer at legally established securities trading venues or in accordance with other methods stipulated by the State Council. The transfer of shares shall be conducted by endorsement of shareholders or by other means stipulated by laws or administrative regulations.

Within 20 days before the convening of a shareholders' meeting or within five days before the record date for dividend distribution determined by the company, no changes shall be made to the register of shareholders. However, if laws, administrative regulations, or the securities regulatory authority under the State Council have other provisions regarding the registration of changes to the register of shareholders of listed companies, such provisions shall prevail.

According to the Company Law, shares issued prior to the public issuance of shares shall not be transferred within one year from the date of the joint stock limited company's listing on a stock exchange. Where laws, administrative regulations or the State Council's securities regulatory authority have other provisions on the transfer of shares held by shareholders or actual controllers of listed companies, such provisions shall prevail. Directors, supervisors, and senior management shall declare to the company the shares of the company they hold and any changes in their holdings. During their term of office, as determined at the time of their appointment, the shares transferred annually shall not exceed 25% of the total number of the company's shares they hold. They shall not transfer the shares they hold within one year from the date of the company's listing on a stock exchange, nor within six months after they resign from the company. The articles of associations may set out other restrictive provisions in respect of the transfer of shares held by its directors, supervisor(s) and the senior management.

Shareholders

According to the Company Law and the Articles of Associations Guidance, shareholders of a joint stock limited company are entitled to the following rights:

- To receive dividends and other distributions in proportion to their shareholdings;
- To request to hold, convene, chair, attend or appoint a proxy to attend shareholders' meetings and to exercise corresponding voting rights in accordance with the law;
- To supervise the company's operations and make suggestions or inquiries;
- To transfer, grant or pledge the shares he or she holds in accordance with the laws, administrative regulations and the provisions hereof;
- To review and copy the company's articles of association, register of shareholders, minutes of shareholders' meetings, resolutions of the board of directors, financial accounting reports, and to review the Company's accounting books and accounting documents (for shareholders who meet the requirements);

- In the event of the termination or liquidation of the Company, to participate in the distribution of the remaining assets of the company in proportion to the number of shares held;
- To request the company to purchase their shares for the shareholders who object to the company's resolution on merger or division made by the shareholders' meetings; and
- Other rights stipulated in laws, administrative regulations, departmental rules, or the articles of association.

Shareholders' obligations include complying with laws, administrative regulations, and the company's articles of association; paying for their subscribed shares in accordance with the subscribed amount and method of contribution; refraining from withdrawing the share capitals unless required by the laws and regulations; refraining from abusing shareholder rights to harm the company or other shareholders' interests; refraining from abusing the company's independent legal personality and limited liability status to harm the interests of the company's creditors; and any other shareholder obligations stipulated in laws, administrative regulations and the company's articles of association.

Shareholders' Meeting

The shareholders' meeting is a company's governing body and exercises its powers in accordance with the Company Law. The shareholders' meeting exercises the following powers and functions:

- To elect and remove directors and supervisors, and to decide on matters concerning their remuneration;
- To examine and approve reports of the board of directors;
- To examine and approve reports of the supervisor committee;
- To examine and approve the company's proposals for profit distribution plans and loss recovery plans;
- To resolve on increasing or decreasing the company's registered capital;
- To resolve on the company's issuance of bonds;
- To resolve on the merger, division, dissolution, liquidation or change of corporate form of a company;
- To amend the articles of association; and
- Other functions and powers specified in the articles of association.

A shareholders' meeting is required to be held once every year. In accordance with the Company Law, a company shall convene an extraordinary shareholders' meeting of within two months after the occurrence of any of the following circumstances:

- The number of directors is less than the number stipulated by the law or less than two-thirds of the number specified in the articles of association;
- The company's accumulated uncovered losses reach one-third of the total amount of the company's share capital;
- Shareholders individually or jointly holding 10% or more of the company's shares request;
- The board of directors deems it necessary;
- The supervisory committee proposes to convene it; or
- Other circumstances stipulated by the articles of associations.

A shareholders' meeting shall be convened by the board of directors and presided over by the chairman. In the event that the chairman is incapable of performing or not performing his duties, the meeting shall be presided over by the deputy chairman. In the event that the deputy chairman is incapable of performing or not performing his duties, a director nominated by more than half of the directors shall preside. Where the board of directors is incapable of performing or is not performing its duties to convene the shareholders' meeting, the supervisory committee shall convene and preside over the meeting in a timely manner. If the supervisory committee fails to convene and preside over the meeting, shareholders individually or in aggregate holding 10% or more of the company's shares for 90 days or more consecutively may unilaterally convene and preside over the shareholders' meeting.

Pursuant to the Company Law, to convene a shareholders' meeting, each shareholder must be notified of the meeting's time, place, and agenda items no less than 20 days prior to the meeting. Extraordinary shareholders' meetings require notification to each shareholder no less than 15 days prior to the meeting. Shareholders individually or jointly holding at least one percent of the company's shares may submit written temporary proposals to the board of directors up to ten days before the shareholders' meeting. The board must notify other shareholders of the temporary proposal within two days of receipt and submit the proposal for deliberation at the shareholders' meeting, unless the proposal violates laws, administrative regulations, or the articles of association, or goes beyond the authority of the shareholders' meeting. The shareholders' meetings shall not resolve matters not specified in the notice.

According to the Company Law, shareholders present at a shareholders' meeting have one vote for each share they hold, except for class shareholders. Shares of the company held by the company do not carry voting rights.

The election of directors and supervisors at a shareholders' meeting may utilize a cumulative voting system if provided for in the company's articles of association or authorized by a resolution adopted at that meeting. Under the cumulative voting system, each share shall be entitled to vote equivalent to the number of directors or supervisors to be elected at the shareholders' meeting, and shareholders may consolidate their voting rights.

Pursuant to the Company Law, resolutions made at a shareholders' meeting require approval by a majority of the voting rights held by the shareholders present thereat. However, resolutions concerning amendments to the articles of association, increases or decreases in registered capital, or resolutions regarding the company's mergers, divisions, dissolution, or changes in corporate form require approval by at least two-thirds of the voting rights held by the shareholders present thereat. Where the Company Law and the articles of association require resolutions of the shareholders' meeting for matters such as the purchase or sale of material assets or the provision of guarantees for third parties, the board of directors shall promptly convene a shareholders' meeting for shareholders to vote on such matters.

The shareholders' meeting shall ensure a record of minutes is made for matters deliberated at each shareholders' meeting and shareholders present thereat shall sign or seal the minutes.

Board of Directors

Pursuant to the Company Law, a joint stock limited company shall establish a board of directors with no fewer than three members, unless it is small in scale or has a limited number of shareholders. The board of directors may include employee representatives, elected democratically by the company's workforce via employee representative assemblies, employee general assemblies, or similar processes. The term of office of a director shall be stipulated in the articles of associations, provided that no term of office shall last for more than three years. Directors may be re-elected upon expiration of their term of office. If a director is not re-elected in time upon expiration of his/her term of office, or if a director resigns during his/her term of office and as a result the number of members of the board of directors is less than a quorum, the original director shall continue to perform his/her duties as a director in accordance with the provisions of the laws, administrative regulations, and the company's articles of association until a duly re-elected director assumes his/her duties as a director of the company.

Under the Company Law, the board of directors mainly exercises the following functions and powers:

- To convene shareholders' meetings and report on its work to the shareholders' meeting;
- To implement the resolutions of the shareholders' meeting;
- To decide the company's business plan and investment proposals;
- To formulate the company's profit distribution proposals and loss recovery proposals;

- To formulate proposals for the increase or reduction of registered capital and the issue of corporate bonds;
- To formulate plans for merger, division, dissolution or change of corporate form of the company;
- To decide on the company's internal management structure;
- To decide on the appointment or dismissal of the company's manager and his/her remuneration and, based on the manager's nomination, to decide on the appointment or dismissal of any deputy manager and financial officer of the company and their remuneration;
- To formulate the company's basic management systems; and
- To exercise other functions and powers specified in the articles of association or granted by the shareholders' meeting.

The board of directors shall convene at least two meetings each year, and notice of each meeting must be given to all directors and supervisors ten days prior to the meeting date. An extraordinary board meeting may be proposed to be convened by shareholders representing one-tenth or more of the voting rights, one-third or more of the directors or the supervisory committee. The chairman shall convene and preside over a meeting of the board of directors within ten days from the receipt of such proposal. The board of directors may otherwise determine the means and the period of notice for convening an extraordinary board meeting. Meetings of the board of directors shall be attended by more than one-half of the directors before they can be held. A resolution of the board of directors is valid only with the approval of more than one-half of all the directors. Each director shall have one vote for resolutions to be approved by the board of directors. Directors shall attend meetings of the board of directors in person. If a director is unable to attend for any reason, he/she may appoint another director to attend the meeting on his/her behalf by a written power of attorney specifying the scope of authorization.

Directors are responsible for the resolutions of the board of directors. If a resolution of the board of directors violates laws, administrative regulations, the company's articles of association, or resolutions of the shareholders' meeting and causes significant losses to the company, the directors involved in passing the resolutions shall be liable to the company for compensation; however, a director may be relieved of liability if it is proven that they expressed their dissent during the voting and it was recorded in the meeting minutes.

Pursuant to the Company Law, a person may not serve as a director of the company under any of the following circumstances: (i) a person who is unable or has limited ability to undertake any civil liabilities; (ii) a person who has been sentenced to any criminal penalty due to an offense of corruption, bribery, encroachment of property, misappropriation of property, or disrupting the order of the socialist market economy, or has been deprived of political rights due to a crime, where a five-year period has not elapsed since the date of completion of the sentence; if he/she is pronounced for suspension of sentence,

a two-year period has not elapsed since the expiration of the suspension period; (iii) a person who was a director, factory manager or manager of a company or enterprise which has entered into insolvent liquidation and who was personally liable for the insolvency of such company or enterprise, where less than three years have elapsed since the date of the completion of the insolvency and liquidation of such company or enterprise; (iv) a person who is a former legal representative of a company or enterprise which had its business license revoked or had been ordered to close down due to violation of the laws and has incurred personal liability, where less than three years have lapsed since the date of the revocation of such business license and close down of such company or enterprise; and (v) a person who is liable for a relatively large amount of debts that are overdue and being listed as a dishonest person subject to enforcement by the People's Court. If a company violates the provisions of the preceding paragraph in electing or appointing a director, the election or appointment shall be invalid. During a director's term of office, if the aforementioned circumstances occur, the company shall terminate his or her duties.

Pursuant to the Company Law, the board of directors shall appoint a chairman and may appoint a deputy chairman. The chairman and the deputy chairman shall be elected with approval of more than one-half of all the directors. The chairman shall convene and preside over meetings of the board of directors and examine the implementation of resolutions of the board of directors. The deputy chairman shall assist the chairman to perform his/her duties. Where the chairman is incapable of performing, or is not performing his/her duties, the duties shall be performed by the deputy chairman. Where the deputy chairman is incapable of performing, or is not performing his/her duties, a director jointly elected by more than one-half of all the directors shall perform his/her duties.

Supervisory Committee

Pursuant to the Company Law, a joint stock limited company must establish a supervisory committee consisting of at least three members, unless it has an audit committee within the board of directors exercising the functions and powers of a supervisory committee or is small in scale with a limited number of shareholders. The supervisory committee must be composed of shareholder representatives and an appropriate proportion of employee representatives, the specific proportions to be defined in the company's articles of association, provided that employee representation constitutes no less than one-third of the supervisors. Employee representatives at the supervisory committee shall be elected democratically by the company's workforce via employee representative assemblies, employee general assemblies, or similar processes.

Each supervisor shall serve for a term of three years. Supervisors may be re-elected upon expiration of their term of office. If a supervisor is not re-elected in time upon expiration of his/her term of office, or if a supervisor resigns during his/her term of office and as a result the number of members of the supervisory committee is less than a quorum, the original supervisor shall continue to perform his/her duties as a supervisor in accordance with the provisions of the laws, administrative regulations, and the company's articles of association until a duly re-elected supervisor assumes his/her duties as a supervisor of the company.

The directors and senior management may not act concurrently as supervisors.

The supervisory committee shall appoint a chairman and may appoint a vice chairman. The chairman and vice chairman of the supervisory committee shall be elected by a majority of all the supervisors. The meetings of the supervisory committee shall be convened and chaired by the chairman of the supervisory committee. Where the chairman of the supervisory committee cannot or does not perform her duties, the vice chairman of the supervisory committee shall convene and preside over the meetings of the supervisory committee. In the event that the vice chairman of the supervisory committee is incapable of performing or not performing his duties, a supervisor nominated by more than half of the supervisors shall convene and preside over the meetings of the supervisory committee.

The supervisory committee shall hold at least one meeting every six months. Pursuant to the Company Law, resolutions of the supervisory committee shall be adopted by a majority vote of all supervisors.

The supervisory committee shall exercise the following functions and powers:

- To examine company financials;
- To supervise the conduct of directors and senior management in the performance of their duties and to propose the removal of directors and senior management who have violated laws, regulations, the articles of association or resolutions of the shareholders' meeting;
- To demand rectification from the directors and senior management when the actions of the directors and senior management are harmful to the company's interests;
- To propose the convening of extraordinary shareholders' meetings, and to convene and preside over shareholders' meetings when the board of directors fails to do so as required by this law;
- To submit proposals to the shareholders' meeting;
- To initiate legal proceedings against directors and senior management in accordance with article 189 of the Company Law; and
- Other functions and powers specified in the articles of association.

Supervisors may attend meetings of the board of directors and raise questions or make suggestions regarding matters to be resolved thereat. If the supervisory committee discovers irregularities in the company's operations, it may conduct an investigation, and engage an accounting firm, when necessary, to assist in its work, at the expense of the company.

Manager and Senior Management

Pursuant to the Company Law, senior management refers to managers, deputy managers, financial officers, secretaries of the board of director of listed companies and other personnel as stipulated in the articles of associations.

The company shall have a manager, who shall be appointed or dismissed by the board of directors. The manager shall be responsible to the board of directors and exercise his/her functions and powers according to the articles of association or the authorization of the board of directors. The manager shall attend meetings of the board of directors.

Obligations of Directors, Supervisors and Senior Management

Pursuant to the Company Law, directors, supervisors, and senior management shall comply with laws, administrative regulations, and the articles of associations, and have a fiduciary obligation and a duty of diligence to the Company.

Directors, supervisors and senior management are prohibited from the following behaviors:

- To embezzle any property or misappropriate any funds of the company;
- To deposit company funds into accounts under their own name or the name of other individuals;
- To commit bribery or accept any other illegal revenue by taking advantage of his or her functions and powers;
- To accept for their own benefit commissions from other parties dealing with the company;
- To divulge secrets of the company without authorization; or
- Other acts that violate the fiduciary obligation to the company.

Without reporting to the board of directors or the shareholders' meeting and obtaining approval through a resolution passed by the board of directors or the shareholders' meeting in accordance with the provisions of the company's articles of association, directors, supervisors and senior management shall not directly or indirectly enter into contracts or conduct transactions with the company, shall not take advantage of their positions to seek business opportunities that belong to the company and can be utilized by the company for themselves or others, and shall not operate a business of the same type as the company they hold a position in, either for themselves or for others. When the board of directors makes a resolution on the aforementioned matters, related directors shall not participate in the voting, and their voting rights shall not be counted in the total number of voting rights. If the number of non-related directors attending a meeting of the board of directors is less than three, the matter shall be submitted to a shareholders' meeting for deliberation.

Income obtained by directors and senior management in violation of their fiduciary obligations shall belong to the company.

A director, supervisor or senior management who contravenes laws, administrative regulations or the articles of association in the performance of his/her duties, and thereby causes any loss to the company shall be liable to the company for compensation.

If the presence of the directors, supervisors and senior management at meetings is requested by the shareholders' meeting, the directors, supervisors and senior management shall do so and address inquiries from shareholders. The supervisory committee may request directors and senior management to submit reports on the performance of their duties. Directors and senior management shall furnish all true information and data to the supervisory committee, without impeding the discharge of duties by the supervisory committee or supervisor(s).

Where a director or senior management violates laws, administrative regulations or the articles of association in the performance of their duties, causing losses to the company, shareholder(s) holding individually or in aggregate more than 1% of the company's shares consecutively for more than 180 days may request in writing that the supervisory committee institute litigation at the People's Court. Where the supervisors violate the provisions of laws, administrative regulations or the articles of association in the performance of their duties of the company and cause losses to the company, the aforesaid shareholders may submit a written request to the board of directors to file a lawsuit with the People's Court. If the supervisory committee or the board of directors refuses to institute litigations after receiving such written request from the shareholder(s), or fails to institute litigations within 30 days of the date of receiving the request, or in case of emergency where failure to institute litigations immediately will result in irrecoverable damage to the company's interests, the aforementioned shareholder(s) shall have the power to institute litigations directly at the People's Court in his/their own name for the company's benefit. For other parties who infringe the lawful interests of the company resulting in loss to the company, such shareholder(s) may institute litigation at the People's Court in accordance with the procedure described above. Where a director, supervisor or senior management of a wholly-owned subsidiary of the company is involved in the aforementioned circumstances, or where others infringe upon the lawful rights and interests of the wholly-owned subsidiary causing losses, shareholder(s) holding individually or in aggregate more than 1% of the company's shares consecutively for more than 180 days may request in writing that the supervisory committee and the board of directors of the wholly-owned subsidiary institute litigation at the People's Court, or institute litigation directly at the People's Court in his/their own name.

Finance and Accounting

Pursuant to the Company Law, a company shall establish its financial and accounting system in accordance with laws, administrative regulations, and the provisions issued by the finance department of the State Council. It shall prepare financial accounting reports at the end of each financial year and shall have them audited by an accounting firm in accordance with the law. The financial accounting reports shall be prepared in accordance with the provisions of laws, administrative regulations, and the finance department of the State Council.

A company is required to make available at the company for inspection by shareholders its financial report 20 days before its annual shareholders' meeting. A joint stock limited company of which the shares are publicly issued must publish its financial report.

After a company distributes its after-tax profits of the current year, it shall set aside 10% of the profits as funds of the statutory reserve fund. The company may discontinue setting aside funds of the statutory provident fund if the cumulative amount of the statutory provident fund is 50% or more of the registered capital of the company. If the company's statutory provident fund is insufficient to cover prior year losses, current year profits shall first be used to make up for the losses before any appropriation is made to the statutory provident fund. After the company appropriates the statutory provident fund from its after-tax profits, it may, upon a resolution passed by the shareholders' meeting, also appropriate a discretionary provident fund from its after-tax profits. After the company has made up for its losses and made allocations to its discretionary provident fund, the remaining after-tax profits shall be distributed in proportion to the shareholding percentages of the shareholders, unless distributed otherwise as provided in the articles of association.

The premium received by the company from the issuance of shares at an issue price in excess of the nominal value of the shares, proceeds from the issuance of no-par shares not included in the registered capital, and other items as required by the finance department of the State Council to be treated as the capital reserve fund shall be accounted for as the company's capital reserve fund. Provident fund of a company shall be used to make up for its losses, expand its production and operation, or increase its registered capital. The discretionary provident fund and statutory provident fund shall be used first to make up for the company's losses; if the losses still cannot be made up, the capital reserve fund may be used in accordance with regulations. Upon the transfer of the statutory provident fund into registered capital, the balance of the fund shall not be less than 25% of the registered capital of the company before such transfer.

The company shall have no accounting books other than the statutory accounting books. Company funds shall not be deposited in any account opened under an individual's name.

Appointment and Dismissal of Accounting Firms

Pursuant to the Company Law, the appointment or dismissal of accounting firms responsible for a company's auditing business shall be determined by the shareholders' meeting, the board of directors or the supervisory committee in accordance with the provisions of the articles of associations. When the shareholders' meeting, board of directors, or supervisory committee votes on dismissing an accounting firm, the accounting firm should be allowed to state its opinions. The company shall provide the engaged accounting firm with true and complete accounting vouchers, accounting books, financial accounting reports, and other accounting materials, and shall not refuse, conceal or falsely report them.

Profit Distribution

Pursuant to the Company Law, a company shall not distribute profits before losses are covered and the statutory provident fund is provided. Shareholders must refund any profit to the company if it is distributed in violation of regulations of the Company Law. Shares of the company held by the company shall not be entitled to any distribution of profit.

Amendment to the Articles of Association

Pursuant to the Company Law, a resolution at a shareholders' meeting to amend the articles of association must be passed by more than two-thirds of the voting rights held by shareholders attending the meeting. Any amendment to the company's articles of association must be made in accordance with the procedures set out in the company's articles of association. Amendments involving matters subject to company registration must be filed with the company registration authority.

Dissolution and Liquidation

Pursuant to the Company Law, a company shall be dissolved for the following reasons: (i) expiry of term of business stipulated in the articles of association or occurrence of any other trigger for dissolution stipulated in the articles of association; (ii) dissolution by resolution of the shareholders' meeting; (iii) dissolution is necessary due to a merger or demerger of the company; (iv) revocation of the business license, order to close down, or forced dissolution in accordance with the law; or (v) court-ordered dissolution upon petition by shareholders holding 10% or more of the voting rights due to insurmountable operational difficulties that cannot be otherwise resolved and where continued operation would cause significant shareholder losses.

In the event of the occurrence of any cause leading to the dissolution of the company as stipulated in the preceding paragraph, such dissolution cause shall be published on the National Enterprise Credit Information Publicity System within 10 days of its occurrence.

In the event of (i) or (ii) above and in case that no assets have been distributed to shareholders, it may carry on its existence by amending its articles of association or by a resolution adopted at a shareholders' meeting. Amendments to the articles of association in accordance with the provisions set out above shall be approved by more than two-thirds of the shareholders with voting rights who attend the shareholders' meeting.

Where the company is dissolved in the circumstances described in subparagraphs (i), (ii), (iv), or (v) above, a liquidation group shall be established and the liquidation procedures shall commence within 15 days after the occurrence of an event of dissolution.

The company's liquidation group shall be composed of directors, individuals eligible as stipulated in the articles of association, or those appointed by resolution of the shareholders' meeting. If a liquidation group is not formed within the prescribed period, interested parties of the company may apply to the People's Court to appoint relevant personnel to form the liquidation group. The People's Court should accept such application and form a liquidation group to conduct a liquidation in a timely manner.

The liquidation group shall exercise the following functions and powers during the liquidation period:

- To liquidate company assets and prepare a balance sheet and an inventory of assets;
- To notify creditors through notice or public announcement;
- To deal with the company's outstanding business related to liquidation;
- To pay any tax overdue as well as tax amounts arising from the process of liquidation;
- To settle the company's claims and debts;
- To distribute the remaining assets after the company's debts have been discharged; and
- Represent the company in civil litigation.

The liquidation group shall notify the creditors within 10 days of its establishment and publish an announcement in newspapers or the National Enterprise Credit Information Publicity System within 60 days. A creditor shall lodge his claim with the liquidation group within 30 days of receipt of the notification or within 45 days of the date of the announcement if he has not received any notification. Creditors submitting claims shall specify the relevant details of the claims and provide supporting documentation. The liquidation group shall register the claims. During the claim submission period, the liquidation group shall not make payments to creditors.

After liquidating the company's assets and preparing the balance sheet and inventory of assets, the liquidation group shall formulate a liquidation plan and submit it to the shareholders' meeting or the People's Court for confirmation. The company's remaining assets, after payment of liquidation expenses, employees' wages, social insurance expenses and statutory compensation, outstanding taxes and the company's debts, shall be distributed to shareholders according to the proportion of their shareholding. During liquidation, the company continues to exist, but may not conduct any operation irrelevant to liquidation. The company's properties shall not be distributed to the shareholders before repayments are made in accordance to the foregoing provisions.

If, after liquidating the company's assets and preparing the balance sheet and inventory of assets, the liquidation group finds that the company's assets are insufficient to discharge its debts, it shall apply to the People's Court for bankruptcy liquidation in accordance with the law. Following the acceptance of application for bankruptcy by the People's Court, the liquidation group shall hand over the liquidation affairs to the bankruptcy administrator appointed by the People's Court.

Upon completion of the company's liquidation, the liquidation group shall prepare a liquidation report and submit it to the shareholders' meeting or the People's Court for confirmation, and file it with the company registration authority, applying for the cancellation of the company's registration. Members of the liquidation group shall fulfill their duties with fidelity and diligence. Members of the liquidation group who neglect their liquidation duties and cause losses to the company shall bear liability for compensation; if losses are caused to creditors due to intentional misconduct or gross negligence, they shall also bear liability for compensation.

If the company is declared bankrupt according to the law, bankruptcy liquidation shall be implemented in accordance with the relevant laws on enterprise bankruptcy.

Merger and Division

Pursuant to the Company Law, companies may merge through absorption or consolidation. If the company adopts the method of merger through absorption, the company being absorbed shall be dissolved; if the company adopts the method of merger through consolidation, both merging companies shall be dissolved.

A company merger requires the parties involved to sign a merger agreement and prepare a balance sheet and an inventory of assets. The company shall notify its creditors within ten days of the resolution to merge and announce the merger publicly within 30 days in a newspaper or on the National Enterprise Credit Information Publicity System. A creditor may, within 30 days from the date of receipt of the notification, or within 45 days from the date of the announcement if he has not received such notification, request the company to settle any outstanding debts or provide corresponding guarantees. In the case of a merger, the credits and debts of the companies involved shall be succeeded by the company that survives the merger or by the newly established company.

In the event of a division of the company, its properties shall be divided up accordingly. When a company divides, it shall prepare a balance sheet and an inventory of assets. The company shall notify its creditors within ten days of the resolution to divide and announce the division publicly within 30 days in a newspaper or on the National Enterprise Credit Information Publicity System. The post-division companies shall bear joint liabilities for the debts of the former company before it is divided. Unless it is otherwise prescribed by the company and the creditors before the division with regard to the clearance of debts in written agreement.

Overseas Listing

Pursuant to the Trial Measures of Overseas Securities Offering and Listing, a domestic enterprise shall file its overseas offering and listing application documents with the CSRC within three business days of submitting them to the relevant overseas exchange. After the overseas offering and listing, if the domestic enterprise issues securities in the same overseas market, it shall file a record with the CSRC within three business days of the issuance completion. If the domestic enterprise seeks a listing in another overseas market after its initial overseas offering and listing, it shall file its offering and listing application documents with the CSRC within three business days of submitting them to the relevant overseas exchange. If the filing materials are complete and comply with regulations, the CSRC shall complete the filing within 20 business days of receipt and publicly disclose the filing information on its website. If the filing materials are incomplete or non-compliant, the CSRC shall inform the issuer of the required supplementary materials within five business days of receipt. The domestic enterprise shall submit the supplementary materials within 30 business days. The remittance and cross-border flow of funds related to the overseas offering and listing of domestic enterprises shall comply with national regulations on cross-border investment and financing, foreign exchange administration, and cross-border RMB management.

The primary purpose of this appendix is to provide potential investors with an overview of the Company's Articles of Association. As the information contained in this section is only a summary, it may not include all information that is important to potential investors.

GENERAL PROVISIONS

The Company is a joint stock limited liability company in perpetual existence.

The liability of its shareholders for the Company is limited to the extent of the shares they subscribe for and the liability of the Company for its own debts is limited to all the properties it owns.

From the date on which the Articles of Association come into effect, it shall become a legally binding document regulating the Company's organization and behavior, and the rights and obligations between the Company and its Shareholders and among the Shareholders inter se, and shall be legally binding on the Company, Shareholders, Directors, and senior management. Pursuant to the Articles of Association, Shareholders may institute legal proceedings against Shareholders, Directors, and senior management of the Company as well as against the Company; and the Company may institute legal proceedings against Shareholders, Directors, and senior management.

BUSINESS SCOPE

Upon lawful registration, the business scope of the Company shall cover: commodity futures brokerage, financial futures brokerage, futures investment consulting, asset management, and securities investment fund distribution. Any change to the Company's business scope shall be approved or filed by the national securities and futures regulatory authorities, and the Articles of Association shall be amended in accordance with legal procedures. Such changes shall also be registered with the Company's registration authority.

SHARES

Issuance of Shares

The shares of the Company shall be in form of registered share certificates.

The shares of the Company shall be issued in a transparent, fair and equal manner and shares of the same class shall rank *pari passu* in all respects. Each of the shares of the same class shall be issued under the same conditions and at the same price in each issuance, and the same price shall be paid for each of the shares subscribed for by subscribers.

Increase, Reduction and Repurchase of Shares

Based on its operating and development needs, the Company may, pursuant to the laws and regulations and with the approval by resolution at a shareholders' meeting, increase its capital in the following ways:

- (i) Offering of shares to unspecified investors;
- (ii) Offering of shares to specified investors;
- (iii) Allotting bonus shares to its existing Shareholders;
- (iv) Transfer of reserve fund into share capital; and
- (v) Other methods as permitted by laws, administrative regulations, and the Securities Regulatory Authority in the places where the Company's shares are listed.

When the Company issues convertible corporate bonds, matters such as the issuance of such bonds, the procedures and arrangements for share conversion, and the resulting changes in the Company's share capital shall be handled in accordance with applicable laws, administrative regulations, departmental rules, normative documents, the securities regulatory rules of the jurisdiction where the Company's shares are listed, and the terms set forth in the Company's prospectus for the convertible corporate bonds.

The Company may reduce its registered capital. The Company shall reduce its registered capital in accordance with the procedures stipulated in the Company Law, other relevant regulations, and the Articles of Association.

The Company shall not acquire its own shares, except under any of the following circumstances:

- (i) To reduce the registered capital of the Company;
- (ii) To merge with another company that holds the shares of the Company;
- (iii) To use the shares for the Employee Stock Ownership Plan (the "ESOP") or as an equity incentive;
- (iv) To request the Company to acquire the shares from shareholders who vote against any resolution adopted at the shareholders' meeting on the merger or demerger of the Company;
- (v) To use shares to satisfy the conversion of corporate bonds issued by the Company that are convertible into shares; and
- (vi) To safeguard the Company's value and protect the interests of its shareholders.

The Company may repurchase its shares through public and centralized trading or other methods as permitted by laws, regulations, and the Securities Regulatory Authority in the places where the Company's shares are listed.

Where the Company acquires its shares under the circumstances set out in items (iii), (v) or (vi) above, the acquisition shall be conducted through open centralized trading.

The Company's acquisition of its own shares in the circumstances as set out in items (i) to (ii) above shall be subject to the resolution of the shareholders' meeting. The Company's acquisition of its own shares in the circumstances as set out in items (iii), (v), and (vi) above shall be subject to compliance with the securities regulatory rules of the place where the Company's shares are listed, and approval by way of resolution at the Board meeting attended by over two-thirds of the Directors.

After the Company acquires its own shares in accordance with the foregoing provisions, if the shares fall under the circumstances stipulated in item (i), they shall be cancelled within ten days from the date of acquisition; the shares shall be assigned or cancelled within six months if the repurchase of shares is made under the circumstances stipulated in either item (ii) or item (iv). In the event of the circumstances set out in items (iii), (v) and (vi), the total shares held by the Company shall not exceed 10% of the total shares issued by the Company, and shall be assigned or canceled within three years.

Transfer of Shares

The shares of the Company shall be transferred according to laws. The Company shall not accept its shares as the subject of pledges.

No shares issued by the Company prior to its A-Share IPO may be transferred prior to the expiration of one year following their listing on the stock exchange. In the event that the securities regulatory rules of the Company's listing jurisdiction prescribe supplementary restrictions on the transfer of the Company's shares, all relevant parties shall be bound to adhere to such provisions.

The Directors, and senior management of the Company shall declare to the Company their shareholdings in the Company and the changes therein, and shall transfer no more than 25% of the total number of shares of the same class held by them in the Company each year during their term of office specified at the time of taking office. Furthermore, their shares in the Company are subject to a one-year lock-up period commencing from the Company's listing date. The aforementioned individuals are prohibited from transferring their shares in the Company for a period of six months subsequent to the cessation of their service. If there are any other provisions regarding the transfer of the Company's shares held by shareholders as stipulated by laws, administrative regulations, or the securities regulatory rules of the place where the Company's shares are listed, such provisions shall prevail.

In the event that the Company's shareholders who hold 5% or more of the Company's shares, directors or senior management engages in the sale or repurchase of shares or other equity securities within six months of the respective purchase or sale date, any profits arising therefrom shall vest in the Company, and the Board shall be responsible for recovering such profits. Notwithstanding the foregoing, this restriction shall not apply to securities companies that hold 5% or more of the shares due to their underwriting of unsubscribed shares in an offering, nor shall it apply to any other circumstances as prescribed by the CSRC.

The shares or equity securities held by the Directors, senior management, and natural person Shareholders referenced above, including but not limited to those held by their spouses, parents, children, or through third-party accounts, shall be governed by the terms set forth herein.

In the event that the Company's Board fails to adhere to the aforementioned provision, any Shareholder shall be entitled to require the Board to take necessary action within a period of 30 days. In the event that the Company's Board fails to act within the specified period, the Shareholders shall be entitled to initiate legal proceedings directly with the people's court in their own names for the benefit of the Company. In the event that the Company's Board fails to adhere to the aforementioned provisions, the responsible Directors shall bear joint and several liability in accordance with applicable laws.

Provision of Financial Assistance for the Acquisition of Shares in the Issuer or Its Affiliated Companies

The Company or its subsidiaries (including affiliates of the Company) shall not provide any financial assistance in the form of gifts, advances, guarantees or loans for the acquisition of the Company's shares or shares of its parent company by any person, except where the Company implements an employee shareholding schemes. In the interests of the Company, the Company may, by resolution of the shareholders' meeting, or by resolution of the Board of Directors in accordance with the Articles of Association or the authorisation of the shareholders' meeting, provide financial assistance to others for the acquisition of shares in the Company or its parent company, provided that the cumulative total amount of such financial assistance shall not exceed 10% of the total issued share capital. The resolutions of the Board of Directors shall be approved by no less than two-thirds of the total number of directors.

SHAREHOLDERS AND SHAREHOLDERS' MEETINGS

Shareholders

The rights of the Company's Shareholders are as follows:

- (i) To be entitled to dividends and other distributions in proportion to their respective shareholdings;
- (ii) To lawfully request to hold, convene, preside over, or attend shareholders' meetings, or to appoint proxies to represent them at such meetings, and to exercise their corresponding voting rights;

- (iii) To supervise, and make recommendations or inquiries on the operation of the Company;
- (iv) To transfer, gift, or pledge their shares in compliance with applicable laws, administrative regulations, and the provisions of the Articles of Association;
- (v) To inspect and copy the Articles of Association, register of shareholder, minutes of Shareholders' meeting, resolutions of the Board of Directors and financial and accounting reports, and shareholders who meet the requirements may inspect the accounting books and accounting documents of the Company;
- (vi) To participate in the distribution of the Company's remaining assets in proportion to their shareholdings upon the termination or liquidation of the Company;
- (vii) To require the Company to repurchase the shares of dissenting Shareholders who oppose a merger or division resolution passed by the shareholders' meetings; and
- (viii) Other rights conferred by applicable laws, administrative regulations, departmental rules, securities regulatory rules of the jurisdiction where the Company's shares are listed, or the Articles of Association.

If any resolution made by the shareholders' meeting and the Board of Directors of the Company violates laws, administrative regulations and the securities regulatory rules of the place where the Company's shares are listed, the shareholders are entitled to apply to the People's Court to affirm it as invalid. If the convening procedure or voting method of the shareholders' meeting or the meeting of the Board of Directors contravenes laws, administrative regulations or the Articles of Association, or if the content of the resolutions of such meeting contravenes the Articles of Association, the shareholders may request the People's Court to revoke the resolution within sixty days of the resolution, except where the procedures for convening a meeting of the shareholders' meeting or the Board of Directors or the voting method only has some minor defects, which produces no substantial effect on the resolution.

Where relevant parties such as the Board of Directors or the shareholders dispute the validity of a resolution passed at the shareholders' meeting, they should file a lawsuit with the People's Court in a timely manner. Before the Peoples Court hands down any judgement or ruling as rescinded the resolution, the relevant parties shall have to implement the resolution of the shareholders' meeting. The Company, the directors and senior management shall diligently perform their duties and ensure the normal operation of the Company.

Where the People's Court has handed down a judgement or ruling on the relevant matter, the Company shall fulfill the obligation of information disclosure in accordance with the laws, administrative regulations and the securities regulatory rules of the place where the Company's shares are listed, which shall include a full account of the impact, and shall actively implement in compliance with such judgement or ruling after the same comes into effect. Where rectification of previous executed matters is involved, such rectification shall be promptly processed and the obligation of information disclosure shall be fulfilled accordingly.

In the event of one of the following circumstances, a resolution of the shareholders' meeting or the Board of Directors shall not be valid:

- (i) The resolution has been made without the convening of the shareholders' meeting or the meeting of the Board of Directors;
- (ii) The resolution has been made without voting at the shareholders' meeting or the meeting of the Board of Directors;
- (iii) The number of persons attending or votes represented at the meeting does not reach the number of persons attending or votes represented as stipulated under the Company Law or the Articles of Association;
- (iv) The number of persons attending or votes represented at the meeting voting in favour of the matter to be resolved does not reach the number of persons attending or votes represented as stipulated under the Company Law or the Articles of Association.

The Company establishes the register of shareholders based on the vouchers provided by the securities registration and clearing institution. The register of shareholders serves as sufficient evidence to prove that shareholders hold shares in the Company. The original register of Shareholders of H shares is kept in Hong Kong and is available for inspection by Shareholders, but the Company may suspend the shareholder registration procedure in accordance with applicable laws and regulations and the securities regulatory rules of the place where the Company's shares are listed. Shareholders shall enjoy rights and assume obligations according to the class of shares they hold. Shareholders holding shares of the same class shall enjoy the same rights and assume the same obligations.

When the Company convenes the shareholders' meeting, distributes dividends, undergoes liquidation and engages in other activities requiring confirmation of Shareholders' identities, the Board of Directors or the convener of the shareholders' meeting shall decide the shareholding registration date and the Shareholders whose names appear on the register after the close of trading on the shareholding registration date shall be the Shareholders enjoying relevant rights and interests.

In the event of any loss caused to the Company as a result of violation of laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed or the Articles of Association by the Directors or senior management other than the Audit Committee members when performing company duties, any of the shareholders who holds 1% or more of the shares individually or jointly for no less than 180 consecutive days shall have the right to request the Audit Committee in writing to initiate litigation before the People's Court. In the event of any loss caused to the Company as a result of violation of laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed or the Articles of Association by the Audit Committee members when performing company duties, any of the aforesaid shareholders may request the Board in writing to initiate litigation before the People's Court.

In the event that the Audit Committee or the Board refuses to institute litigation upon the receipt of the written request of any of the shareholders as specified in the preceding paragraph, or withholds from instituting litigation within 30 days of the receipt of the request, or that the failure to institute litigation immediately may otherwise cause irreparable damage to the interest of the Company in an urgent circumstance, such shareholder(s) as mentioned in the preceding paragraph shall have the right to initiate litigation before the People's Court in the name(s) of such shareholder(s) in the interest of the Company.

Where the lawful rights and interests of the Company are infringed upon by others, thereby causing losses to the Company, Shareholders who individually or collectively hold more than 1% of the Company's shares for more than 180 consecutive days may, in accordance with the provisions mentioned above, file a lawsuit with the People's Court.

The Shareholders of the Company shall have the following obligations:

- (i) To abide by laws, administrative regulations, securities regulatory rules of the Company's listing jurisdiction, and the Articles of Association;
- (ii) To pay subscription monies in respect of the shares subscribed for and the method of subscription;
- (iii) Save as stipulated by laws or regulations, no share capital shall be withdrawn;
- (iv) No shareholders may abuse their rights in a manner harmful to the Company or other shareholders, nor exploit the Company's independent legal person status or their limited liability to the prejudice of the Company's creditors; and
- (v) To fulfill other obligations stipulated by applicable laws, administrative regulations, securities regulatory rules of the Company's listing jurisdiction, and the Articles of Association.

Shareholders who abuse their rights, thereby causing losses to the Company or other shareholders, shall bear liability for compensation. Where any shareholder abuses the Company's independent legal person status and the principle of limited liability to evade debts, thereby materially prejudicing the interests of the Company's creditors, such shareholder shall bear joint and several liability for the Company's debts.

The controlling shareholder or de facto controller of the Company shall comply with the following provisions:

- (i) To exercise their rights as shareholders in accordance with the law and not abuse their control or use their affiliation to prejudice the legitimate interests of the Company or other shareholders;
- (ii) To strictly implement the public statements and undertakings made and shall not change or waive them;

- (iii) To fulfil information disclosure obligations in strict accordance with the relevant regulations, to proactively cooperate with the Company in information disclosure and to inform the Company in a timely manner of material events that have occurred or are proposed to occur;
- (iv) Not to appropriate the Company's funds in any way;
- (v) Not to order, instruct or request the Company and relevant personnel to provide guarantees in violation of laws and regulations;
- (vi) Not to make use of the Company's undisclosed material information to gain benefits, not to divulge in any way undisclosed material information relating to the Company, and not to engage in insider trading, short-swing trading, market manipulation and other illegal and unlawful acts;
- (vii) Not to prejudice the legitimate rights and interests of the Company and other shareholders through unfair related transactions, profit distribution, asset restructuring, external investment or any other means;
- (viii) To ensure the integrity of the Company's assets, and the independence of personnel, finance, organisation and business, and not to affect the independence of the Company in any way;
- (ix) Other provisions prescribed by laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association.

Where the controlling shareholder or de facto controller of the Company instructs a director or senior management to engage in an act that is detrimental to the interests of the Company or the shareholders, he/she shall be jointly and severally liable with such director or senior management.

Any shareholder holding more than 5% of the Company's shares or any de facto controller shall, upon the occurrence of any of the following events, provide the Company with prompt and accurate written notice within two trading days, disclosing all material details:

- (i) Shares of the Company they hold have been frozen or under enforcement measures;
- (ii) Shares of the Company they hold are pledged or the pledged shares are released;
- (iii) They decide to transfer shares of the Company they hold;
- (iv) Inability to exercise shareholder rights or perform shareholder obligations in a normal manner, which would materially compromise the Company's governance structure;
- (v) Becoming subject to investigation by competent regulatory authorities or compulsory measures due to suspected material violations of applicable laws or regulations;

- (vi) Imposition of administrative penalties or criminal sanctions for material violations of applicable laws or regulations;
- (vii) Change of names;
- (viii) Undergoing merger, division, or material asset/debt restructuring;
- (ix) Becoming subject to regulatory interventions such as business suspension orders, license revocation, receivership/trusteeship, or insolvency proceedings such as dissolution, bankruptcy, or liquidation;
- (x) Material changes in equity ownership or material alterations to business scope or operations;
- (xi) Changes in the Chairman, the General Manager, or any acting director or senior management member performing equivalent functions;
- (xii) Any national laws, regulations, major policy changes, or force majeure events that could significantly adversely affect the Company's operations and management; and
- (xiii) Other circumstances that may affect share changes of the Company or operation of the Company as a going concern.

Any shareholder holding more than 5% of the Company's shares that meets the condition under item (ii) shall submit a written report to the Company on the same day the event occurs. Where such shareholders fall under any prescribed circumstances, the Company shall report to the local CSRC office at its domicile within three business days of receiving notice. Where the Company's de facto controller falls under any circumstances listed in items (v) to (ix), the Company shall report to both the CSRC and its local office within three business days of receiving notice.

General Provisions of the Shareholders' Meeting

The shareholders' meeting of the Company consists of all shareholders. The shareholders' meeting is the organ of authority of the Company and shall exercise the following functions and powers in accordance with laws:

- (i) To elect and remove directors not being staff representatives and to determine matters relating to the remuneration of the directors;
- (ii) To consider and approve the reports of the Board of Directors;
- (iii) To consider and approve the Company's proposals for profit distribution plans and loss recovery plans;

- (iv) To resolve on the increase or reduction of the Company's registered capital;
- (v) To resolve on the issuance of corporate bonds;
- (vi) To resolve on the merger, division, dissolution, liquidation, or change of corporate form of the Company;
- (vii) To amend the Articles of Association;
- (viii) To decide on the engagement and dismissal of the accounting firm that undertakes the Company's auditing matters;
- (ix) To resolve on material transactions (including connected transactions) that should be considered and approved at the shareholders' meeting under the Articles of Association;
- (x) To review the Company's acquisition or disposal of material assets exceeding 30% of its most recent audited total assets within any 12-month period;
- (xi) To review and approve any modifications to the use of proceeds;
- (xii) To review the equity incentive plan and the ESOP; and
- (xiii) To review other matters mandating the shareholders' meeting approval under applicable laws, administrative regulations, departmental rules, securities regulatory rules of the Company's listing jurisdiction, and the Articles of Association.

The shareholders' meeting may delegate the Board to resolve on the issuance of corporate bonds. The Company may, by resolution at the shareholders' meeting, or by resolution at the Board authorized by the Articles of Association or the shareholders' general meeting, issue shares or corporate bonds convertible into shares, the specific implementation of which shall comply with the laws, administrative regulations and the securities regulatory rules of the place where the Company's shares are listed. Unless otherwise stipulated in the laws, administrative regulations and the securities regulatory rules of the place where the Company's shares are listed, the aforesaid functions and powers of the shareholders' meeting shall not be exercised by the Board or by other organizations and individuals on behalf of shareholders through authorization.

The shareholders' meeting are divided into annual shareholders' meeting and extraordinary shareholders' meeting. Annual shareholders' meetings are held once a year and within six months from the end of the preceding financial year.

The Company shall convene an extraordinary shareholders' meeting within two months upon the occurrence of any of the following events:

- (i) Where the number of Directors is less than that provided for in the Company Law or less than two-thirds of the number prescribed in the Articles of Association;
- (ii) The uncovered loss of the Company reaches one-third of the total paid-in share capital;
- (iii) The Shareholders with 10% or more shares of the Company separately or jointly request;
- (iv) When the Board considers it necessary;
- (v) When the Audit Committee proposes the convening of the meeting; and
- (vi) Other circumstances conferred by applicable laws, administrative regulations, departmental rules, securities regulatory rules of the Company's listing jurisdiction, and the Articles of Association.

Convening of the Shareholders' Meeting

Shareholders who individually or together hold 10% or more of the shares of the Company shall request the Board of Directors to convene an extraordinary shareholders' meeting and such request shall be made to the Board of Directors in writing. The Board of Directors shall give a written reply as to whether it agrees or disagrees to hold an extraordinary shareholders' meeting within ten days upon receipt of the request in accordance with laws, administrative regulations and the Articles of Association. Where the Board of Directors agrees to hold an extraordinary shareholders' meeting, it shall issue a notice of the shareholders' meeting within five days after the resolution was made. Any change to the original request in the notice shall be subject to the approval from the relevant shareholders. Where the Board of Directors does not agree to hold an extraordinary shareholders' meeting or fails to give a reply within ten days upon receipt of the request, it shall be deemed that shareholders who individually or together hold 10% or more of the shares of the Company shall submit a proposal to the Audit Committee on holding an extraordinary shareholders' meeting, such request shall be made to the Audit Committee in writing.

Where the audit committee agrees to hold an extraordinary shareholders' meeting, it shall issue a notice of shareholders' meeting within five days after receiving the request. Any changes to the original request in the notice shall be subject to the approval from the relevant shareholders. Where the audit committee fails to give the notice of the shareholders' meeting within the specified time limit, it shall be deemed that the audit committee does not convene or preside over the meeting, in which case, shareholders who individually or together hold 10% or more of the shares of the Company for 90 or more consecutive days may convene and preside over the meeting on their own.

Where the audit committee or shareholders decide to convene an extraordinary shareholders' meeting on its/their own, it/they shall give a written notice to the Board of Directors and report the same to the Shanghai Stock Exchange for the record. When issuing the notice of the shareholders' meeting and the announcement of the resolution(s) of the shareholders' meeting, the Audit Committee or shareholders who convene the meeting shall submit relevant supporting materials to the Shanghai Stock Exchange.

As approved by more than half of all independent directors, independent Directors have the right to propose to the Board for the convening of an extraordinary shareholders' meeting. In response to the proposal from the independent Directors for the convening of an extraordinary shareholders' meeting, the Board shall, in accordance with laws, administrative regulations, and the Articles of Association, provide a written feedback within ten days after receiving the proposal with respect to whether it agrees with the proposal to convene an extraordinary shareholders' meeting. In the event that the Board agrees to convene an extraordinary shareholders' meeting, a notice of the shareholders' meeting shall be given within five days of such resolution by the Board; in the event that the Board disagrees with the convening of an extraordinary shareholders' meeting, the reasons for such shall be stated and announced.

Where the audit committee proposes to the Board of Directors to convene an extraordinary shareholders' meeting, it shall put forward its proposal to the Board of Directors in writing. The board shall, pursuant to the laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association, furnish a written reply on whether or not to convene the extraordinary shareholders' meeting within ten days after receiving such proposal. If the board agrees to convene the extraordinary shareholders' meeting, it shall issue a notice of the shareholders' meeting within five days after the resolution is passed by the Board of Directors. Any change to the original proposal in the notice shall be subject to the approval from the audit committee. If the Board of Directors does not agree to convene the extraordinary shareholders' meeting or fails to furnish a written reply within ten days after receiving such proposal, the Board of Directors shall be deemed to be unable or fail to perform the duty of convening the shareholders' meeting, and the audit committee may convene and preside over the meeting on its own.

Any necessary expenses incurred in connection with the convening and holding of the shareholders' meeting by the audit committee or the shareholders on its or their own shall be borne by the Company.

Proposals and Notices of the Shareholders' Meeting

The conveners will notify the shareholders by means of an announcement 21 days prior to the annual shareholders' meeting and the extraordinary shareholders' meeting will be notified by means of an announcement 15 calendar days prior to the date of the meeting. The Company shall not include the day on which the meeting is held in calculating the starting period.

When the Company convenes the shareholders' meeting, the Board of Directors, the audit committee and shareholder(s), individually or in aggregate, holding 1% or more of the shares of the Company shall have the right to propose proposals. Shareholder(s) individually or jointly holding 1% or more of the Company's shares may submit an extraordinary proposals to the convener in writing ten days prior to date of the meeting. The convener shall dispatch a supplementary notice of the shareholders' meeting and announce the contents of such provisional proposal within two days upon receipt of the proposal, and submit the extraordinary proposal to the shareholders' meeting for consideration, except for any proposal that violates laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed or the Articles of Association, or any proposal that falls outside the purview of the shareholders' meeting. Except as provided in the preceding paragraph, after the convener issues a public notice of the shareholders' meeting, conveners shall not amend the proposals or add any new proposals in the notice of the shareholders' meeting. The shareholders' meeting shall not vote for or pass a resolution on any proposal not stated in the notice of shareholders' meeting or not complying with the provisions of the Articles of Association.

The meeting notice shall contain the following:

- (i) The date, place and duration of the meeting;
- (ii) The matters and proposals to be reviewed at the meeting;
- (iii) A clear statement that all shareholders may attend the shareholders' meetings in person or appoint a proxy in writing to attend and vote on their behalf. The appointed proxy need not be a shareholder of the Company;
- (iv) The record date for determining shareholders entitled to attend the shareholders' meeting;
- (v) The name and telephone number of the regular contact person for the meeting; and
- (vi) Voting time and voting procedures on the Internet or in other ways.

The meeting notice and the supplemental notice shall fully disclose the complete details of all proposals.

The online or alternative voting period for the shareholders' meeting shall open between 3:00 p.m. on the business day prior to the on-site meeting and 9:30 a.m. on the meeting day, and close no earlier than 3:00 p.m. on the meeting day.

The interval between the record date and the meeting date shall not exceed seven business days. Once the equity registration date is established, it shall become irrevocable and not subject to modification.

Convening of the Shareholders' Meetings

All shareholders or their proxies registered in the share register as of the record date shall be entitled to attend the shareholders' meeting and exercise speaking and voting rights, subject to compliance with applicable laws, regulations, securities regulatory rules of the Company's listing jurisdiction, and the Articles of Association (unless any shareholder is required under such rules to abstain from voting on specific matters). Shareholders may attend the shareholders' meeting in person, and also may appoint a proxy to attend, speak and vote on their behalf. The proxy need not be a shareholder of the Company.

If a shareholders' meeting requires the attendance of Directors or senior management, the Directors or senior management shall do so and answer shareholders' inquiries.

The shareholders' meeting shall be presided over by the Chairman of the Board. In the event that the chairman of the board of directors is unable to or does not perform his duties, the meeting shall be presided over by a director jointly elected by a majority of the directors. Where a shareholders' meeting is convened by the audit committee on its own, the meeting shall be presided over by the convener of the audit committee. In the event that the convener of the audit committee is unable to or does not perform his duties, the meeting shall be presided over by a member of the audit committee jointly elected by a majority of the members of the audit committee. Where a meeting is convened by shareholders on their own, the meeting shall be presided over by the convening shareholders or a representative elected by them. When a shareholders' meeting is held and the chairman of the meeting violates the rules of procedure in a way that makes it difficult for the shareholders' meeting to continue, a person may be elected at the shareholders' general meeting to act as the chairman so as to carry on with the meeting, subject to the approval of more than half of the attending shareholders holding voting rights.

The Company shall develop Rules of Procedure for the Shareholders' Meeting, outlining the convening and voting procedures, including notice, registration, consideration of proposals, voting, counting of votes, announcement of voting results, formation of meeting resolutions, minutes of the meeting and the signing thereof, and announcements as well as the principle of authorization from the shareholders' meeting to the Board. The content of authorization shall be clear and specific. The rules of procedure for the shareholders' general meeting shall be included in or annexed to the Articles of Association and shall be prepared by the Board and approved by the shareholders' meeting.

Voting and Resolutions of the Shareholders' Meetings

The resolutions of a shareholders' meeting are classified into ordinary resolutions and special ones. Ordinary resolutions of a shareholders' general meeting shall be adopted by more than half of the voting rights held by the shareholders present at the meeting. Special resolutions of a shareholders' general meeting shall be adopted by more than two-thirds of the voting rights held by the shareholders present at the meeting.

The following matters shall be approved by the shareholders' meeting through ordinary resolutions:

- (i) Work reports of the Board;
- (ii) Plans of earnings distribution and loss make-up schemes drafted by the Board;
- (iii) Appointment or dismissal of the members of the Board, and their remunerations and payment methods;
- (iv) Matters other than those approved by special resolutions stipulated in applicable laws, administrative regulations, securities regulatory rules of the Company's listing jurisdiction, or the Articles of Association.

The following matters shall be resolved by way of a special resolution of the shareholders' meeting:

- (i) The increase or reduction of the registered capital of the Company;
- (ii) The division, spin-off, merger, dissolution, and liquidation of the Company;
- (iii) Amendment to the Articles of Association;
- (iv) The purchase or disposal of material assets or provision of a guarantee to other parties by the Company within one year of a value exceeding 30% of the total audited assets in the most recent period of the Company;
- (v) The equity incentive plan; and
- (vi) Other matters as required by applicable laws, administrative regulations, securities regulatory rules of the Company's listing jurisdiction, or the Articles of Association, or confirmed by an ordinary resolution at a shareholders' meeting that it may have a material impact on the Company and shall be passed by a special resolution.

Shareholders (including proxies) shall exercise voting rights based on the number of shares with voting rights held by them, with each share entitled to one vote. On a poll taken at a meeting, shareholders (including proxies) entitled to two or more votes need not cast all his votes in the same way of pros, cons or abstention.

When material issues affecting the interests of minority shareholders are considered at the shareholders' meeting, the votes of minority shareholders shall be counted separately. The results of such separate vote counting shall be disclosed promptly.

The shares held by the Company carry no voting rights and are excluded from the total count of voting shares present at the shareholders' meeting.

Pursuant to the applicable laws, administrative regulations, departmental rules, normative documents, and securities regulatory rules of the Company's listing jurisdiction, if a shareholder is required to abstain from voting on a specific resolution or is limited to casting a vote solely for or against such resolution, any votes cast by the shareholder (or the proxy) in contravention of these stipulations shall be excluded from the voting outcome.

If a shareholder acquires the Company's voting shares in breach of the stipulations outlined in paragraphs 1 and 2 of Article 63 of the Securities Law, the portion of shares exceeding the prescribed limit shall be deprived of voting rights for 36 months following the acquisition and excluded from the aggregate count of voting shares present at the shareholders' meeting.

The Board, independent Directors, shareholders holding more than 1% of the voting shares, or investor protection institutions established under applicable laws, administrative regulations, or CSRC provisions, may publicly solicit voting rights from shareholders. The solicitation of shareholders' voting rights shall fully disclose the specific voting intention and other information to the solicited parties. It is prohibited to solicit shareholders' voting rights by means of payment or disguised payment. Except for statutory conditions, the Company shall not set a minimum shareholding limit for gathering voting rights.

When connected transactions are considered at a shareholders' meeting, connected shareholders shall abstain from voting, and their represented shares shall not be included in the total valid votes. The announcement of the shareholders' meeting resolution shall fully disclose the votes of non-connected shareholders. When connected transactions are considered at a shareholders' meeting, connected shareholders shall proactively disclose their connected relationship to the shareholders' meeting and voluntarily abstain from voting. In the event a shareholder fails to proactively disclose the connected relationship and abstain from voting, other shareholders may demand such disclosure and recusal. Where conclusive evidence demonstrates that a connected shareholder should abstain from voting, the shares held by such shareholder shall be excluded from the total number of shares with valid voting rights in the deliberation of connected transactions.

THE BOARD

Directors

Directors shall be elected or replaced by the shareholders' meeting, with each term lasting three years, and independent Directors shall be subject to a maximum consecutive tenure of six years. Directors may be re-elected upon the expiration of their term of office and may be removed from their position prior to the end of their term by an ordinary resolution of the general meeting.

A Director's term of office shall commence upon assumption of duties and extend through the conclusion of the current Board's tenure. If a Director's term of office expires without timely re-election, until the re-elected Director takes office, the incumbent Director shall continue to fulfill his/her duties in accordance with applicable laws, administrative regulations, departmental rules, and the Articles of Association.

A Director appointed by the Board to fill a casual vacancy on the Board or as an addition to the Board shall hold office only until the first annual shareholders' meeting of the Company after his/her appointment and shall then be eligible for re-election.

Senior management may concurrently serve as a director, provided that the aggregate number of directors who concurrently serve as senior management and directors who are employee representatives shall not exceed one half of the total number of directors of the Company. The board of directors shall have employee representatives of the Company. Employee representatives on the board of directors shall be elected by the Company's employees through the employee congress, employee assembly or other democratic forms, and shall assume their positions from the date of their election without the need to submit to the shareholders' meeting for consideration.

The roster of Director nominees shall be incorporated into the proposal presented to the shareholders' meeting for examination and approval.

Directors shall comply with the provisions of laws, administrative regulations, the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association, shall bear the duty of loyalty to the Company, shall take measures to avoid any conflict between their own interests and the interests of the Company, and shall not use their powers to gain improper advantage. Each director has the following obligations of loyalty to the Company:

- (i) Shall not expropriate the Company's property and misappropriate the Company's funds;
- (ii) Shall not open any account in his own name or in others' name for the deposit of the Company's funds;
- (iii) Shall not accept bribes or other illegal income by advantage of its duties;
- (iv) Shall not directly or indirectly sign any contract or deal with the Company before reporting to the Board or the shareholders' meeting and passing the resolution at the Board meeting or the shareholders' meeting in accordance with the provisions of the Articles of Association;
- (v) Shall not, by taking advantage of their functions, obtain, whether for themselves or for others, such business opportunities that should have been procured by the Company, unless reported to the Board or the shareholders' meeting and approved by a resolution of the shareholders' meeting, or the Company is not able to take advantage of the business opportunity in accordance with the laws, administrative regulations or the provisions of the Articles of Association;

- (vi) Shall not engage in any type of business which is the same as or similar to that of the Company whether for themselves or for others without reporting to the Board or the shareholders' meeting and passing a resolution at the shareholders' meeting;
- (vii) Shall not personally accept commissions derived from others for transactions with the Company;
- (viii) Shall not disclose confidential information of the Company without authorization;
- (ix) Shall not damage the interests of the Company by taking advantage of his/her connections with the Company;
- (x) Other faithful obligations as required by the laws, administrative regulations, departmental rules, the securities regulatory rules of the place where the Company's shares are listed and the Articles of Association.

Income gained by Directors in violation of the aforesaid provision shall belong to the Company; if any losses are caused to the Company thereby, Directors shall bear the appropriate liabilities for damages. The provisions in item (iv) above shall apply to contracts or transactions entered into by close relatives of Directors or the senior management, enterprises directly or indirectly controlled by Directors or the senior management or their close relatives, and associates with whom Directors or the senior management have other related relationships.

Directors shall comply with applicable laws, administrative regulations, securities regulatory rules of the Company's listing jurisdiction, and the Articles of Association, while fulfilling their duty of diligence towards the Company and shall perform their duties with the reasonable care normally expected of a manager in the best interests of the Company. Directors shall perform the following duty of diligence to the Company:

- (i) To exercise the Company-conferred rights with prudence, diligence, and care, ensuring that its commercial activities comply with State laws, administrative regulations, and economic policy requirements, and remain within the business scope stipulated in the business license;
- (ii) To treat all shareholders fairly;
- (iii) To keep informed of the operation and management conditions of the Company in a timely manner;
- (iv) To sign a written confirmation of the Company's securities offering documents and periodic reports. To ensure the information disclosed by the Company is true, accurate, and complete; in cases where they cannot guarantee the authenticity, precision, and completeness of the securities offering documents and periodic reports, or if they hold any objections, they are required to express their opinions and provide a rationale in the written confirmation;

- (v) To truthfully provide relevant status and information to the audit committee, and not obstruct the audit committee from performing their duties;
- (vi) Other obligations of diligence stipulated in applicable laws, administrative regulations, departmental rules, securities regulatory rules of the Company's listing jurisdiction, and Articles of Association.

Directors may resign prior to the expiration of their term of office. The resigning director shall submit a written resignation report to the Company, unless the director's resignation report specifies a later effective time for the resignation, in which case the resignation shall take effect on the day when the Company receives the resignation report, and the Board of the Company shall disclose the circumstances within two business days. Unless otherwise provided, the existing Directors shall continue to perform their duties as directors in accordance with relevant laws and regulations, the rules, securities regulatory rules of the Company's listing jurisdiction, and the Articles of Association before the newly elected Directors take office in the event of any of the following stipulated circumstances:

- (i) Where the term of office of directors has expired but new directors have not been duly elected in a timely manner, or where the resignation of directors during their term results in the number of Board members falling below the statutory minimum;
- (ii) Where the resignation of a member of the audit committee results in the audit committee being less than the minimum number of members required by law, or there is a shortage of accounting professionals;
- (iii) Where the resignation of an independent director results in the proportion of independent directors on the Board of the Company or special committees not being in compliance with laws and regulations or the Articles of Association, or there is a lack of accounting professionals among the independent directors.

The Company shall establish a management system for directors resignation, clearly specifying the accountability and compensation measures for unfulfilled public commitments and other outstanding matters. Where the resignation of a director takes effect or his or her term of office expires, he/she shall complete all transfer procedures with the Board. The director is still not free from the duty of loyalty to the Company and shareholders, which will not be certainly lifted upon the expiration of the term and remains effective during the reasonable period specified in this Articles of Association. The liability that a director bears during the term of office due to the performance of his/her duties shall not be waived or terminated upon leaving office.

The period during which a director shall remain liable after the effective date of his/her resignation or the expiration of his/her term of office shall be two years after the effective date of his/her resignation or the expiration of his/her term of office, provided that the obligation of confidentiality in respect of the Company's secrets (including, but not limited to, technological and commercial secrets) shall be continued after his/her departure from the office until the disclosure of the relevant information.

The Board

The Company shall establish a board. The board shall comprise nine directors, including one chairman, one independent director and one employee representative director. Chairman shall be elected by the Board with approval of more than half of all the directors.

The Board shall exercise the following functions and power:

- (i) To convene the shareholders' meeting and present reports on its work to the shareholders' meeting;
- (ii) To implement the resolutions of the shareholders' meeting;
- (iii) To determine the Company's business operation plans and investment plans;
- (iv) To develop the Company's proposals for profit distribution and loss recovery plans;
- (v) To formulate plans for increasing or decreasing the Company's registered capital, issuing bonds or other securities, and pursuing the Company's listing;
- (vi) To develop plans for major acquisitions, share buy-backs, mergers, divisions, dissolution, or changes to the form of the Company;
- (vii) To determine outbound investments, acquisitions, asset disposals, asset mortgages, external guarantees, entrusted wealth management, connected transactions, and external donations of the Company, within the authority granted by the shareholders' meeting;
- (viii) To establish the Company's internal management structure;
- (ix) To decide on the appointment or dismissal of the General Manager, the Board Secretary, and other senior management personnel of the Company, and to determine their remuneration, incentives, and penalties; to decide on the appointment or dismissal of senior management members, such as the Deputy General Manager or Financial Officer, based on nominations by the General Manager, and to determine their remuneration, incentives, and penalties;
- (x) To formulate the fundamental administrative systems of the Company;
- (xi) To develop amendment proposals for the Articles of Association;
- (xii) To manage the information disclosure of the Company;
- (xiii) To propose to the shareholders' meeting the engagement or replacement of the accounting firm responsible for auditing the Company;

- (xiv) To review the General Manager's performance reports and conduct evaluations of their executive duties; and
- (xv) Other functions and power granted by applicable laws, administrative regulations, departmental rules, the securities regulatory rules of the Company's listing jurisdiction, the Articles of Association or the shareholders' meeting.

Matters that fall outside the scope of authorization granted by the shareholders' meeting shall be submitted to the shareholders' meeting for examination and approval. Where such matters require review and approval by the CSRC and its local office, they shall take effect only upon obtaining the requisite approval.

The Board shall establish the authority for outbound investments, acquisitions, asset disposals, asset mortgages, external guarantees, entrusted wealth management, connected transactions, and external donations, while implementing rigorous inspection and decision-making procedures. For significant investment projects, the Board shall convene relevant experts and professionals to conduct reviews and submit reports to the shareholders' meeting for approval.

Meetings of the Board are categorized into regular and extraordinary ones. The Board shall hold at least one meeting per quarter, which shall be organized by the Chairman of the Board. All Directors shall be notified in writing 14 days prior to the scheduled regular Board meeting.

A extraordinary Board meeting can be convened when proposed by shareholders representing more than one tenth of the voting rights, more than one-third of the directors or audit committee. The Chairman shall convene and preside over the Board meeting within ten days after receiving the proposal.

A Board meeting shall be not held unless more than half of the Directors are present. The resolution of the Board shall be approved by a majority of all Directors. Each Director is entitled to one vote on resolutions to be approved by the Board. Directors shall attend Board meetings in person.

Should a Director be unable to attend a meeting for any reason, he or she may, through a written power of attorney, designate another Director to act as a proxy. The power of attorney shall explicitly delineate the proxy's name, the specific matters to be addressed, and the extent and duration of the authority conferred, and shall bear the signature and seal of the appointing Director. The proxy shall exercise the rights of a Director within the scope of the authorization. If a Director fails to attend a Board meeting or appoint a proxy, he/she shall be deemed to have waived his/her right to vote at that meeting. An independent Director is prohibited from delegating a non-independent Director to attend a meeting on his/her behalf. Similarly, a non-independent Director is not permitted to accept such a delegation from an independent Director.

GENERAL MANAGER AND OTHER SENIOR MANAGEMENT**General Provisions**

The Company shall have one General Manager who shall be appointed or dismissed by the Board. The Company shall have one to six Deputy General Managers who shall be appointed or dismissed by the Board.

The provisions of the Articles of Association on the faithful obligations and diligence obligations of Directors shall equally apply to other senior management personnel.

The General Manager shall be liable to the Board and exercise the following functions and powers:

- (i) To oversee the operation and management of the Company, organize the implementation of the Board's resolutions, and report on his or her work to the Board;
- (ii) To organize the implementation of the Company's annual business plan and investment scheme;
- (iii) To prepare and propose the setup of the Company's internal management structure;
- (iv) To formulate the fundamental management systems of the Company;
- (v) To develop specific rules and regulations of the Company;
- (vi) To propose to the Board the appointment or dismissal of the Deputy General Manager and the Financial Officer of the Company;
- (vii) To appoint or dismiss management personnel, excluding those whose appointments or dismissals fall under the Board's authority;
- (viii) To review, sign, or authorize the review and signing of the following external documents of the Company: important documents, except for those that must be signed by the Chairman, which the General Manager is authorized to sign; all legal documents that the Board and the Chairman are authorized to sign; regular project documents, based on the division of responsibilities within the Company, to be signed by the senior management member or a specific operator designated by the General Manager; other documents that require the General Manager's signature; and
- (ix) Other functions and power conferred by the Articles of Association or the Board.

Chief Risk Officer

The Company has a Chief Risk Officer (CRO), who is responsible for supervising and inspecting the legal compliance of the Company's operational and management activities, as well as the status of risk management. The CRO reports directly to the Board of the Company.

The CRO has the following functions and power necessary for the performance of his/her duties:

- (i) To attend or sit in on meetings directly related to the execution of his/her responsibilities;
- (ii) To inspect relevant documents, files and information of the Company;
- (iii) To engage in discussions with relevant personnel of the Company, as well as with representatives of organizations providing audit, legal, and other intermediary services;
- (iv) To understand the execution of the Company's business activities; and
- (v) Other functions and power stipulated in applicable laws, administrative regulations, departmental rules, or the Articles of Association.

Secretary of the Board

The Company shall appoint a Secretary of the Board, whose responsibilities include the preparation for shareholders' meetings and Board meetings, document safekeeping, shareholder information management and information disclosure handling.

FINANCIAL AND ACCOUNTING SYSTEMS, DISTRIBUTION OF PROFITS, AND AUDITS**Financial and accounting systems**

The Company shall formulate its financial and accounting systems pursuant to the provisions of applicable laws, administrative regulations and the relevant State authorities.

The Company shall submit and disclose its annual report to the dispatched agencies of the CSRC and the stock exchange where the Company's shares are listed within four (4) months following the end of each financial year, and submit and disclose its interim report to the dispatched agencies of the CSRC and the stock exchange within two months after the conclusion of the first half of each financial year. The above-mentioned annual reports and interim reports shall be prepared in accordance with relevant laws, administrative regulations and securities regulatory rules of the Company's listing jurisdiction.

The Company shall not maintain books of accounts other than those provided for by law. The funds of the Company shall be not deposited into an account established in the name of any individual.

In distributing the after-tax profit of the current year, the Company shall allocate 10% of the profit to its statutory reserve fund. However, if the cumulative amount of the statutory reserve fund exceeds 50% of the Company's registered capital, no further appropriations are required.

If the Company's statutory reserve fund is insufficient to cover the losses of the previous year, the current year's profits shall first be used to offset such losses before allocating funds to the statutory reserve fund as outlined above. After allocating the statutory reserve fund from the after-tax profits, the Company may, with the approval of the shareholders' meeting, withdraw a discretionary reserve from the remaining profits. Following the offset of any losses and the appropriation to reserve funds, the remaining balance of the after-tax profits shall be distributed to shareholders in proportion to their shareholdings, unless otherwise specified in the Articles of Association. The portion of the Company's profit designated for cash distribution to shareholders shall comply with the applicable laws and regulations. Additionally, the implementation of the profit distribution plan shall ensure that the Company's risk control indicators, including net capital, remain above the early warning thresholds established by the CSRC.

If the shareholders' meeting, in violation of the Company Law, distributes profits to shareholders, the shareholders shall return the unlawfully distributed profits to the Company; if there is any loss so caused to the Company, the shareholders, responsible directors and senior management shall be liable for indemnification.

Shares held by the Company itself shall not participate in the distribution of profits.

The Company shall appoint one or more receiving agents for H shareholders in Hong Kong. The receiving agents shall, on behalf of the relevant H shareholders, collect and hold the dividends and other amounts payable by the Company in respect of the H shares, pending their disbursement to such H shareholders. The receiving agents designated by the Company shall adhere to the applicable laws, regulations, and securities regulatory rules of the Company's listing jurisdiction.

The objective of the Company's cash dividend policy shall be as follows: The Company has adopted a consistent and stable dividend distribution policy, which prioritizes providing investors with reasonable returns on investment while ensuring the Company's sustainable development. The Company shall develop its annual profit distribution plan for the year, taking into account its profitability, operational and production development requirements, as well as the need to provide shareholders with reasonable investment returns, while ensuring the continuity and stability of its profit distribution policy. If the Company chooses to distribute dividends in the form of cash, stock, or a combination thereof, it shall prioritize cash dividends. Furthermore, the amount of profit distributed in cash each year shall not be less than 10% of the distributable profit realized in that year.

Internal Audits

The Company shall implement an internal audit system, which defines the leadership structure, duties and powers, personnel allocation, funding assurance, application of audit results and accountability for internal audit work. The internal audit system of the Company shall be implemented and disclosed externally upon the approval of the Board.

Employment of an Accounting Firm

The Company shall engage an accounting firm that complies with the provisions of the Securities Law and the securities regulatory rules of the Company's listing jurisdiction to audit its financial statements, verify net assets, and provide other relevant consulting services. The term of employment of the accounting firm shall be one year, which is renewable. The appointment or dismissal of an accounting firm by the Company shall be submitted to the Board for consideration after being approved by more than half of all members of the audit committee and shall be determined by the shareholders' meeting, the board shall not appoint any accounting firm prior to a decision made by the shareholders' meeting. The Company guarantees to provide the engaged accounting firm with accurate and complete accounting vouchers, ledgers, financial statements, and other relevant accounting materials. The Company shall not refuse, conceal, or falsify any such information.

The audit fee of the accounting firm shall be decided by the shareholders' meeting. When the Company dismisses or decides not to renew the engagement of the accounting firm, it shall provide a 30-day prior notice to the accounting firm. Additionally, the accounting firm shall have the right to present its opinions at the shareholders' meeting where the voting process regarding its dismissal is conducted.

In the event that the accounting firm submits its resignation, the Board shall notify the shareholders' meeting of any irregularities identified within the Company.

MERGER, DIVISION, CAPITAL INCREASE AND REDUCTION, DISSOLUTION, AND LIQUIDATION**Merger, division, and capital increase and reduction**

In the case of a merger, parties to the merger shall execute a merger agreement and prepare the balance sheets and a schedule of assets. The Company shall notify its creditors within ten (10) days from the date of adopting the merger resolution and shall publish a merger announcement in the newspaper or the National Enterprise Credit Information Publicity System within thirty (30) days. The creditors may demand that the Company repay its debts or provide corresponding guarantees within thirty (30) days of receiving the notice or, if no notice was received, within forty-five (45) days of the announcement's publication.

In the event of the Company's division, its assets shall be apportioned accordingly. In the event of a division, the Company shall prepare balance sheets and a schedule of assets. The Company shall notify its creditors within ten (10) days from the date of adopting the division resolution and shall publish a division announcement in a newspaper or the National Enterprise Credit Information Publicity System within thirty (30) days. The post-division companies shall be jointly liable for the debts of the pre-division company.

Any increase or reduction of the Company's registered capital shall be duly registered with the competent company registry in accordance with applicable laws. In the event of a reduction in the Company's registered capital, the Company shall prepare a balance sheet and a schedule of assets. The Company shall notify its creditors within ten (10) days from the date of adopting the resolution to reduce its registered capital and shall publish an announcement of such reduction in a newspaper or the National Enterprise Credit Information Publicity System within thirty (30) days. The creditors may demand that the Company repay its debts or provide corresponding guarantees within thirty (30) days of receiving the notice or, if no notice was received, within forty-five (45) days of the announcement's publication. Where the Company reduces its registered capital, it shall reduce the amount of capital contribution or shares in accordance with the proportion of shares held by shareholders, except as otherwise provided by laws or the Articles of Association.

Dissolution and liquidation

The Company shall be dissolved under any of the following circumstances:

- (i) When the term of business specified in the Articles of Association expires or any other cause for dissolution as stipulated in the Articles of Association arises;
- (ii) The shareholders' meeting resolves to dissolve the Company;
- (iii) The dissolution is required due to the merger or division of the Company;
- (iv) The Company is revoked of business license according to law, ordered to close or canceled; and
- (v) Where the Company is experiencing severe operational difficulties, and its continued existence would cause substantial prejudice to shareholders' interests, any shareholder holding 10% or more of the voting rights may petition the people's court for dissolution if the matter cannot be resolved through other means.

Under the conditions set forth in item (i), (ii), and where the property has not yet been distributed to shareholders, the Company may subsist by amending the Articles of Association or by resolution of the shareholders' meeting. The amendment to the Articles of Association according to the preceding paragraph or pursuant to the resolution of the shareholders' meeting, shall be passed by more than two-thirds of the voting rights held by shareholders present in the shareholders' meeting.

In the event of dissolution pursuant to item (i), (ii), (iv) or (v) above, it shall be liquidated. The directors shall be the Company's liquidators and a liquidation committee shall be set up within fifteen (15) days from the date upon which the cause of dissolution arises. The liquidation committee shall consist of the directors, unless the shareholders' meeting resolves to elect another person. The liquidation obligors shall bear the liability for losses suffered by the Company or creditors due to their failure to perform the obligations of liquidation in a timely manner.

The liquidation committee shall exercise the following functions and powers during liquidation:

- (i) To thoroughly examine the assets of the Company, and prepare a balance sheet and a schedule of assets respectively;
- (ii) To notify creditors through written notice or public announcement;
- (iii) To handle the Company's remaining affairs in connection with the liquidation;
- (iv) To settle all outstanding tax liabilities, including those arising during the liquidation process;
- (v) To settle all outstanding claims and debts;
- (vi) To allocate of the residual assets following satisfaction of all Company debts; and
- (vii) To represent the Company in civil litigation proceedings.

The liquidation committee shall notify all creditors within ten (10) days from the date of its establishment and shall publish a liquidation announcement in a newspaper or the National Enterprise Credit Information Publicity System within sixty (60) days. Creditors shall file their claims with the liquidation committee within thirty (30) days of receiving notice or, if no notice was received, within forty-five (45) days of the announcement's publication. When filing claims, creditors shall specify the particulars of their claims and provide supporting documentation. The liquidation committee shall register the creditors' rights. During the verification of creditor claims, the liquidation committee is prohibited from disbursing payments to creditors.

Upon completion of a comprehensive review of the Company's assets and the preparation of a balance sheet and a schedule of assets, the liquidation committee shall formulate a liquidation plan, and submit such plan to the shareholders' meeting or the People's Court for confirmation. The remaining assets of the Company, after the payment of liquidation expenses, employees' wages, social insurance contributions, statutory compensation and outstanding taxes and the settlement of the Company's debts, shall be distributed among the shareholders pro rata to their respective shareholdings. During liquidation, the Company remains a legal entity but cannot engage in activities unrelated to the liquidation process. The Company's assets shall not be distributed to shareholders until all outstanding liabilities have been fully settled in compliance with the aforementioned provisions.

After liquidation, the liquidation committee shall prepare a liquidation report and present it to the shareholders' meeting or the People's Court for approval. Following confirmation, the committee shall file the report with the Company's registry to apply for the deregistration of the Company and announce its termination.

Members of the liquidation committee shall perform their obligations of liquidation and bear duties of loyalty and diligence. Members of the liquidation committee shall bear the liability for losses suffered by the Company due to their negligence to perform the obligations of liquidation; members of the liquidation committee shall bear the liability for losses suffered by creditors due to their intentional or grossly negligent conducts.

AMENDMENT TO THE ARTICLES OF ASSOCIATION

The Company shall amend its Articles of Association under any of the following circumstances:

- (i) The provisions of the Articles of Association conflict with the revised Company Law, relevant laws, administrative regulations, or securities regulatory rules of the Company's listing jurisdiction;
- (ii) The Company has undergone modifications, resulting in inconsistencies with the provisions documented in the Articles of Association; and
- (iii) The shareholders' meeting decides to amend the Articles of Association.

The amendments to the Articles of Association adopted by a resolution of the shareholders' meeting shall be submitted to competent authorities for approval if so required. For any change in business registration, application shall be made for such change according to law.

Where amendments to the Articles of Association constitute information required to be disclosed under applicable laws, regulations, and securities regulatory rules of the Company's listing jurisdiction, they shall be announced in compliance with the relevant provisions.

Save as aforesaid, as at the Latest Practicable Date, there were no other intellectual property rights which were material in relation to our Group's business.

C. FURTHER INFORMATION ABOUT OUR DIRECTORS AND SUBSTANTIAL SHAREHOLDERS

1. Disclosure of interests of our Directors and Chief Executive

Save as disclosed below, immediately following the completion of the Global Offering (assuming that the Over-allotment Option is not exercised), so far as our Directors are aware, none of our Directors or chief executive has any interests or short positions in our Shares, underlying shares and debentures of our Company or any associated corporations (within the meaning of Part XV of the SFO) which will have to be notified to our Company and the Hong Kong Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests or short positions which they are taken or deemed to have under such provisions of the SFO) or which will be required, pursuant to Section 352 of the SFO, to be recorded in the register referred to therein or which will be required to be notified to our Company and the Hong Kong Stock Exchange pursuant to the Model Code for Securities Transactions by Directors of Listed Issuers contained in the Hong Kong Listing Rule.

Interest in associated corporation of our Company

<u>Name</u>	<u>Name of associated corporation</u>	<u>Nature of interest</u>	<u>Committed capital contribution amount in the associated corporation⁽¹⁾ (RMB million)</u>	<u>Percentage of equity holding in the associated corporation</u>
Dr. Luo Xufeng	Dongyang Henghua LLP	Beneficial owner	15.9	21.65%
Mr. Jia Xiaolong	Dongyang Henghua LLP	Beneficial owner	0.9	1.23%

Note:

- (1) The percentage is based on the total committed capital contribution amount of Dongyang Henghua LLP as at the Latest Practicable Date (i.e. RMB73.44 million).

2. Substantial Shareholders

For information on the persons who will, immediately following the completion of the Global Offering have interests or short positions in our Shares or underlying Shares which would be required to be disclosed to us and the Stock Exchange under the provisions of Divisions 2 and 3 of Part XV of the SFO, or who will directly and/or indirectly, be interested in 10% or more of the nominal value of any class of share capital carrying the rights to vote in all circumstances at shareholders' meetings of our Company, see "Substantial Shareholders."

3. Particulars of Directors' Contracts

Each of our Directors proposes to enter into a service contract or appointment letter with our Company. The principal particulars of these service contracts and appointment letters comprise (a) the term of the service; (b) subject to termination in accordance with their respective term; and (c) a dispute resolution provision. The service contracts and appointment letters may be renewed in accordance with the Articles and the applicable laws, rules and regulations.

Save as disclosed above, none of the Directors has or is proposed to enter into a service contract with any member of our Group, other than contracts expiring or determinable by the relevant employer within one year without the payment of compensation (other than statutory compensation).

4. Remuneration of Directors

See “Directors and Senior Management” and “Appendix I – Accountant’s Report – II Notes to the Historical Financial Information – Note 13(2)” for the remuneration or benefits in kind paid to our Directors for each of the three years ended December 31, 2024 and the six months ended June 30, 2025, being the latest balance sheet date of our consolidated financial statements as set out in the Accountant’s Report in Appendix I to this prospectus, and up to the date of this prospectus.

During the Track Record Period, no fees were paid by our Group to any of the Directors or the five highest paid individuals as an inducement to join us or as compensation for loss of office.

5. Disclaimers

Save as disclosed in this prospectus:

- (a) none of our Directors or chief executive of our Company has any interests or short positions in the shares, underlying shares and debentures of our Company or our associated corporations (within the meaning of Part XV of the SFO) which will be required to be notified to our Company and the Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests or short positions which he is taken or deemed to have taken under such provisions of the SFO) or which will be required, pursuant to Section 352 of the SFO, to be entered in the register referred to in that section, or which will be required, pursuant to the Model Code for Securities Transactions by Directors of Listed Issuers, to be notified to our Company and the Stock Exchange, once the Shares are listed on the Stock Exchange;
- (b) so far as is known to any Director or chief executive of our Company, no person has an interest or short position in the Shares and underlying Shares which would fall to be disclosed to our Company and the Stock Exchange under the provisions of Divisions 2 and 3 of Part XV of the SFO, or is, directly or indirectly, interested in 10% or more of the nominal value of any class of share capital carrying rights to vote in all circumstances at shareholders’ meetings of any other member of our Group;

- (c) none of our Directors nor any of the persons listed in “D. Other Information – 4. Qualifications and Consents of Experts” below is interested in the promotion of, or in any assets which have been, within the two years immediately preceding the issue of this prospectus, acquired or disposed of by or leased to any member of our Group, or are proposed to be acquired or disposed of by or leased to any member of our Group;
- (d) none of our Directors nor any of the persons listed in “D. Other Information – 4. Qualifications and Consents of Experts” below is materially interested in any contract or arrangement with our Group subsisting at the date of this prospectus which is unusual in its nature or conditions or which is significant in relation to the business of our Group as a whole;
- (e) save in connection with Underwriting Agreements, none of the persons listed in “D. Other Information – 4. Qualifications and Consents of Experts” below has any shareholding in any member of our Group or the right (whether legally enforceable or not) to subscribe for or to nominate persons to subscribe for securities in any member of our Group; and
- (f) save as contemplated under the Underwriting Agreements, none of our Directors or their respective associates (as defined under the Listing Rules), or Shareholders who are interested in more than 5% of the issued share capital of our Company has any interest in our Company’s five largest customers and five largest suppliers.

D. OTHER INFORMATION

1. Estate Duty

Our Directors have been advised that no material liability for estate duty under the PRC laws is likely to fall on our Company or its subsidiaries.

2. Litigation

During the Track Record Period and up to the Latest Practicable Date, saved as disclosed in this prospectus and so far as our Directors are aware, no litigation, arbitration proceedings or claim of material importance (to our Group’s financial condition or results of operation) is pending or threatened against any member of our Group

3. Sole Sponsor

The Sole Sponsor has made an application on behalf of our Company to the Stock Exchange for the listing of, and permission to deal in, the H Shares to be issued pursuant to the Global Offering upon completion of the Global Offering. All necessary arrangements have been made to enable our H Shares to be admitted into CCASS.

The Sole Sponsor satisfies the independence criteria applicable to sponsors set out in Rule 3A.07 of the Listing Rules.

The Sole Sponsor will receive an aggregate fee of US\$800,000 for acting as the sponsor for the Listing.

4. Qualifications and Consents of Experts

The following are the qualifications of the experts (as defined under the Listing Rules and the Companies (Winding Up and Miscellaneous Provisions) Ordinance) who have given opinions or advice which are contained in this prospectus:

<u>Name</u>	<u>Qualification</u>
CITIC Securities (Hong Kong) Limited	Licensed corporation to conduct Type 4 (advising on securities), Type 6 (advising on corporate finance) regulated activities as defined under the SFO
Confucius International CPA Limited	Certified Public Accountants and Registered Public Interest Entity Auditor
King & Wood Mallesons	Legal adviser to the Company as to PRC Law
Frost & Sullivan (Beijing) Inc., Shanghai Branch Co.	Independent industry consultant

Each of the experts named above has given and has not withdrawn their respective written consents to the issue of this prospectus with the inclusion of their reports and/or letters and/or legal opinion (as the case may be) and references to their names included in the form and context in which it respectively appears.

As of the Latest Practicable Date, none of the experts named above has any shareholding interests in our Company or any of our subsidiaries or the right (whether legally enforceable or not) to subscribe for or to nominate persons to subscribe for or to nominate persons to subscribe for securities in any member of our Group.

5. Promoters

The promoters of our Company as of the time of our Company's conversion into a joint stock company with limited liability on October 18, 2012, is as follows:

<u>No.</u>	<u>Name</u>
1.	Hengdian Holdings
2.	Nanhua Development
3.	Dongyang Feida Chemical Co., Ltd. (東陽市飛達化學有限公司)
4.	Dongyang Zhenghong Chemical Co., Ltd. (東陽市正宏化工有限公司)
5.	Beijing Yiguang Investment Management Co., Ltd. (北京怡廣投資管理有限公司)

Save as disclosed in the section headed “Financial Information – Dividend”, within the two years immediately preceding the date of this prospectus, no cash, securities, amount or benefit has been paid, allotted or given, or has been proposed to be paid, allotted or given, to any of the promoters named above in connection with the Global Offering or the related transactions described in this prospectus.

6. Compliance Adviser

Our Company has appointed Innovax Capital Limited as the compliance adviser upon the Listing in compliance with Rule 3A.19 of the Listing Rules.

7. Taxation of Holders of H Shares

The sale, purchase and transfer of H Shares are subject to Hong Kong stamp duty if such sale, purchase and transfer is effected on the H Share register of members of our Company, including in circumstances where such transaction is effected on the Stock Exchange. The current rate of Hong Kong stamp duty for such sale, purchase and transfer on each of the purchaser and the seller is 0.1% of the consideration or, if higher, the fair value of the H Shares being sold or transferred.

8. Preliminary Expenses

We have not incurred any material preliminary expenses in relation to the incorporation of our Company.

9. No Material Adverse Change

Our Directors confirm that, save as disclosed in this prospectus, there has been no material adverse change in the financial or trading position or prospects of our Group since December 31, 2024 (being the date to which the latest audited consolidated financial statements of our Group were prepared).

10. Binding Effect

This prospectus shall have the effect, if an application is made in pursuance of this prospectus, of rendering all persons concerned bound by all of the provisions (other than the penal provisions) of Sections 44A and 44B of the Companies (Winding Up and Miscellaneous Provisions) Ordinance insofar as applicable.

11. Bilingual Document

The English language and Chinese language versions of this prospectus are being published separately, in reliance upon the exemption provided by Section 4 of the Companies (Exemption of Companies and Prospectuses from Compliance with Provisions) Notice (Chapter 32L of the Laws of Hong Kong).

This prospectus is written in the English language and contains a Chinese translation for information purpose only. Should there be any discrepancy between the English language of this prospectus and the Chinese translation, the English language version of this prospectus shall prevail.

12. Miscellaneous

Save as disclosed in this prospectus:

- (a) within the two years immediately preceding the date of this prospectus:
 - (i) save as disclosed in “– 2. Changes in the Share Capital of Our Company” and “– 3. Changes in the Share Capital of Our Subsidiaries”, neither we nor any of our subsidiaries has issued or agreed to issue any share or loan capital fully or partly paid up either for cash or for a consideration other than cash;
 - (ii) no share or loan capital of our Company or any of our subsidiaries is under option or is agreed conditionally or unconditionally to be put under option;
 - (iii) save as in connection with the Underwriting Agreements, no commissions, discounts, brokerage or other special terms have been granted in connection with the issue or sale of any shares or loan capital of any member of our Group;
 - (iv) no commission has been paid or payable (except commission to sub-underwriters) to any persons for subscription, agreeing to subscribe, procuring subscription or agreeing to procure subscription of any shares of our Company or any of our subsidiaries;
 - (v) no founder, management or deferred shares of our Company or any of our subsidiaries have been issued or agreed to be issued; and
 - (vi) there is no arrangement under which future dividends are waived or agreed to be waived.
- (b) our Directors confirm that:
 - (i) there has not been any interruption in the business of our Company which may have or have had a material adverse effect on the financial position of our Company in the 12 months immediately preceding the date of this prospectus; and
 - (ii) our Company has no outstanding convertible debt securities or debentures.
