The Company is an investment holding company. The Group is principally engaged in the manufacture and sale of adhesives, primers, hardeners and other adhesive related products used by footwear manufacturers.

In the opinion of the Directors, All Reach Investments Limited, a company incorporated in the British Virgin Islands, is the immediate and the ultimate parent and Mr. Jeong Un is the ultimate controlling party of the Company.

### 2. BASIS OF PREPARATION

These condensed consolidated financial statements for the six months ended 31 March 2026 have been prepared in accordance with International Accounting Standard 34 *Interim Financial Reporting* as issued by the International Accounting Standards Board (“**IASB**”). These consolidated financial statements also comply with the applicable disclosure provisions of the Rules Governing the Listing of Securities on the Stock Exchange, as well as the applicable disclosure provisions of the Listing Manual (Section B: Rules of Catalist) of the SGX-ST.

These condensed consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended 30 September 2025. The accounting policies (including the significant judgements made by management in applying the Group’s accounting policies and the key sources of estimation uncertainty) and methods of computation used in the preparation of the condensed consolidated financial statements are consistent with those used in the annual consolidated financial statements for the year ended 30 September 2025.

These condensed consolidated financial statements have been prepared under the historical cost convention, except for the investment properties and financial assets at FVTOCI, which are carried at fair values.

### 3. ADOPTION OF NEW AND REVISED IFRS ACCOUNTING STANDARDS

#### New and revised IFRS Accounting Standards in issue but not yet effective

Up to the date of issue of these condensed consolidated financial statements, the IASB has issued a number of new standards and amendments to standards and interpretation, which are not effective for the six months ended 31 March 2026 and which have not been adopted in these financial statements. The Group has not early applied the following which may be relevant to the Group:

	<b>Effective for accounting periods beginning on or after</b>
IFRS 18 – Presentation and Disclosure in Financial Statements	1 January 2027
Amendments to IFRS 10 and IAS 28 – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	To be determined by the IASB

The directors of the Company are in the process of making an assessment of what the impacts of these new standards, amendments to standards and interpretation are expected to be in the period of initial application. So far it has concluded that the adoption of them is unlikely to have a significant impact on the condensed consolidated financial statements, except for the following:

#### ***IFRS 18 “Presentation and Disclosure in Financial Statements”***

IFRS 18 will replace IAS 1 “Presentation of financial statements”, introducing new requirements that will help to achieve comparability of the financial performance of similar entities and provide more relevant information and transparency to users. Even though IFRS 18 will not impact the recognition or measurement of items in the condensed consolidated financial statements, IFRS 18 introduces significant changes to the presentation of financial statements, with a focus on information about financial performance present in the statement of profit or loss, which will affect how the Group present and disclose financial performance in the financial statements. The key changes introduced in IFRS 18 relate to (i) the structure of the statement of profit or loss, (ii) required disclosures for management-defined performance measures (which are referred to alternative or non-GAAP performance measures), and (iii) enhanced requirements for aggregation and disaggregation of information.

The directors of the Company are currently assessing the impact of applying IFRS 18 on the presentation and the disclosures of the condensed consolidated financial statements.

#### 4. USE OF JUDGEMENTS AND ESTIMATES

The preparation of these condensed consolidated financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing these condensed consolidated financial statements, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were primarily consistent as those that applied to the audited consolidated financial statements for the year ended 30 September 2025.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Information about key sources of estimation uncertainty that have the most significant effect on the amounts recognised in the financial statements is summarised as follows:

- (a) Measurement of expected credit loss of trade and bills receivables
- (b) Assessment of allowance for slow-moving inventories and net realisable value of inventories

#### 5. FAIR VALUE MEASUREMENTS

The carrying amounts of the Group's financial assets and financial liabilities as reflected in the condensed consolidated statement of financial position approximate their respective fair values.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following disclosures of fair value measurements use a fair value hierarchy that categorises into three levels the inputs to valuation techniques used to measure fair value:

- Level 1 inputs: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.
- Level 2 inputs: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 inputs: unobservable inputs for the asset or liability.

The Group's policy is to recognise transfers into and transfers out of any of the three levels as of the date of the event or change in circumstances that caused the transfer.

The following table shows the carrying amounts and fair value of financial assets, including their levels in the fair value hierarchy. It does not include fair value information for financial assets not measured at fair value if the carrying amount is a reasonable approximation of fair value.

No analysis of segment assets and liabilities is presented because the CODMs do not base on such analysis for resource allocation and performance assessment.

In recent months, continued instability in the Middle East has impacted cost fluctuations in the global energy market and supply chain, potentially leading to volatility in raw material costs and logistical conditions. Therefore, the Group will adopt a highly prudent approach to ensure its corporate development for the year ending 30 September 2026. The Group will continue to focus on the cost control, operational efficiency, and closely monitor the working capital management. Simultaneously, the Group will also closely monitor the latest developments in the footwear manufacturing industry and its core business, as well as the latest developments in the instability in the Middle East and the adhesive-related market, and adjust its business strategies from time to time if required.

## **BUSINESS REVIEW AND PROSPECTS**

### **Businesses**

For the six months ended 31 March 2026, the Group was principally engaged in the manufacture and sale of adhesives, primers, hardeners and other adhesive related products used by footwear manufacturers. The Company has also sought a dual primary listing and its Shares have been successfully listed on the Catalist Board of the SGX-ST since 3 December 2025.

Over the past years, the Group has, following the footsteps of its customers, diversified its production bases into the South-east Asia to better cope with the increasing demands from the region which in turn enhances the competitiveness of the Group. As at 31 March 2026, the Group had four manufacturing plants in the PRC, Vietnam and Indonesia respectively. After the acquisition of a piece of land in Indonesia (the “**Land**”) for industrial use in April 2022 (as disclosed in the Company’s announcement dated 13 April 2022), the Group has completed the construction of the new manufacturing plant on the Land as disclosed in the Company’s announcements dated 24 April 2024 and 25 April 2024 respectively. The Group is in the process of application of relevant manufacturing licences in Indonesia which is expected to be completed in first half of calendar year 2026.

As further disclosed in the Company’s announcement dated 19 November 2024, the Group contracted to acquire machineries and production equipments; and certain pipeline, instrument and electrical works for the new manufacturing plant on the Land. With the above development, the Group believes that it would better serve its customers by improving its costs competitiveness and freight time advantages, and further solidify its core business. If necessary, the Group will consider to further expand its existing manufacturing facilities and implement any new manufacturing plants to satisfy its prestige customers’ needs.

### **Cost control**

The Group will continue to carefully review and extensively evaluate the current situation of costs and resources deployment. In response to the uncertainties arising from the continued instability in the Middle East, the Group will consider to strengthen its control over the operational costs proactively and effectively in the short term.

### **Research and development**

The Group is always environmental-oriented, continuously dedicated to developing high-quality products that meet market needs, and closely monitors future market trend, constantly researching and developing products that meet the future development needs of the industry. In addition to its own research and development team, the Group also cooperated with several internationally well-known chemical corporations (including those from Germany and Japan) to develop new products and entered into technology cooperation agreements with several sophisticated technology experts in the industry (including those from countries and regions such as Japan, Taiwan and Hong Kong). It is expected that the above measures will strengthen the Group’s R&D capabilities, thereby maintaining its leading technological position in the industry.

## **Prospects and commentary of significant trends and competitive conditions of the industry**

Short to medium term outlook: In view of the uncertainties arising from the continued instability in the Middle East, it is difficult for the Board to predict the sales performance of the Group for the year ending 30 September 2026.

Medium to long term outlook: As the global demand for footwear is still growing continually, more stringent requirement from the manufacturers for the quality of adhesives would gradually eliminate industry players with less competitiveness and the demand for the use of environmental water-based adhesive products by footwear brands and manufacturers will still be growing, the effect of the previous regional deployments of the Group has become prominent in response to the market changes. The Group has been maintaining partner relationship with its prestige customers for a number of years. As such, the Board expects that the growth of the Group's sales in the medium to long term will remain stable. The Group will continue to devote necessary resources to further increase its market share if feasible.

Leveraging on the Group's solid experience accumulated over the years, its high quality products recognised by the market and its competence in research and development capabilities, the Group will continue to commit to its core business. The Group will also consider to invest and develop its OEM business in a proactive manner in order to broaden its revenue base.

Looking ahead, the Board will remain prudent about the prospects of the Group's core business in the long term. The Group will follow a very cautious approach to ensure corporate sustainability for the year ending 30 September 2026. The Group will continue to focus on cost management, operational efficiency and monitor its working capital management closely. The Group will also closely monitor the latest developments in the footwear manufacturing industry and its core business, as well as the latest developments in the instability in the Middle East and the adhesive-related market, and adjust its business strategies from time to time if required.
