c. Principles of consolidation

The Group adopted SFAS 110, “Consolidated Financial Statements”, except for the following items that were applied prospectively:

- (i) Losses of a subsidiary that result in a deficit balance to non-controlling interests (“NCI”);
- (ii) Loss of control over a subsidiary;

c. Principles of consolidation (Continued)

Losses of a non-wholly owned subsidiary are attributed to the NCI even if that results in a deficit balance. In case of loss of control over a subsidiary, the Company:

- Derecognises the assets (including goodwill) and liabilities of the subsidiaries;
- Derecognises the carrying amount of any NCI;
- Derecognises the cumulative translation differences, recorded in equity, if any;
- Recognises the fair value of the consideration received;
- Recognises the fair value of any investment retained;
- Recognises any surplus or deficit in profit or loss; and
- Reclassifies the parent's share of components previously recognised in other comprehensive income to profit or loss or retained earnings, as appropriate.

NCI represent the portion of the profit or loss and net assets of the subsidiaries not attributable, directly or indirectly, to the Company, which are presented in the consolidated statement of profit or loss and other comprehensive income and under the equity section of the consolidated statement of financial position, respectively, separately from the corresponding portion attributable to the equity holders of the parent entity.

本公司於附屬公司的所有權權益變動(倘不導致失去控制權)乃作為權益交易入賬。本公司及非控股權益的賬面值會予以調整，以反映彼等於該附屬公司的相關權益變動。非控股權益的調整金額與已付或已收代價的公允價值之間的任何差額，乃直接於權益中確認並歸屬於母公司擁有人。

附屬公司

綜合財務報表呈列本集團的業績，猶如其組成單一實體。

附屬公司的財務報表自控制權開始之日起計入綜合財務報表，直至控制權終止之日為止。附屬公司的會計政策已於必要時作出變更，以使其與本集團採納的政策一致。

附屬公司非控股權益應佔的虧損會分配至非控股權益，即使此舉會導致非控股權益出現虧絀結餘。非控股權益於綜合財務狀況表的權益內呈列，並與母公司擁有人應佔權益分開呈列。

於失去控制權時，本集團會終止確認該等附屬公司的資產及負債、任何非控股權益以及與該等附屬公司相關的其他權益部分。因失去控制權而產生的任何盈餘或虧損均於損益中確認。倘本集團保留於前附屬公司的任何權益，則該權益按失去控制權當日的公允價值計量。

c. Principles of consolidation (Continued)

Changes in the Company ownership interest in a Subsidiary that do not result in loss of control are accounted for as equity transactions. The carrying amounts of the Company and non-controlling interest are adjusted to reflect the changes in their relative interests in the Subsidiary. Any differences between the amount by which the NCI are adjusted and the fair value of consideration paid or received is recognised directly in equity and attributed to the owners of the parent entity.

Subsidiaries

The consolidated financial statements present the results of the Group as if they formed a single entity.

The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

Losses applicable to the non-controlling interests in a subsidiary are allocated to the non-controlling interests even if doing so causes the non-controlling interests to have a deficit balance. Non-controlling interests is presented in the consolidated statements of financial position within equity, separately from the equity of the owners of the parent.

Upon the loss of control, the Group derecognise the assets and liabilities of the subsidiaries, any non-controlling interests and the other components of equity related to the subsidiaries. Any surplus or deficit arising on the loss of control is recognised in profit or loss. If the Group retains any interest in the previous subsidiaries, then such interest is measured at fair value at the date that control is lost.

與非控股權益的交易

與非控股權益的交易乃作為與擁有人以其擁有人身份進行的交易入賬，因此，該等交易不會確認商譽。對非控股權益的調整乃基於附屬公司淨資產的應佔金額。

於綜合賬目時對銷的交易

Transactions with non-controlling interests

Transactions with non-controlling interests are accounted for as transactions with owners in their capacity as owners and therefore no goodwill is recognised as a result of such transactions. The adjustments to non-controlling interests are based on a proportionate amount of the net assets of the subsidiaries.

Transactions eliminated on consolidation

Intercompany balances and transactions, and any unrealised income and expenses arising from intercompany transactions, are eliminated in preparing and presenting the consolidated financial statements. Unrealised gains arising from transactions with associates are eliminated against the investment to the extent of the Group's interest in the investee.

Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

Goodwill

Goodwill represents the excess of the cost of an acquisition of subsidiaries or associated companies over the fair value at the date of acquisition of the Group's share of their identifiable net assets, including contingent liabilities, at the date of acquisition. Acquisition cost are measured as assets acquired, equity instruments issued or liabilities incurred or assumed at acquisition date, plus direct attributable cost related to the acquisition.

商譽(續)

商譽資本化為無形資產，其賬面值的任何減值均於損益中扣除。倘可識別資產、負債及或有負債的公允價值超過已付代價的公允價值，該超額部分於收購日期悉數計入損益。

出售附屬公司及聯營公司的收益或虧損包括與所出售實體相關的已資本化商譽的賬面值。

商譽每年進行減值測試，或倘有跡象顯示商譽可能減值，則進行更頻密的測試。

就商譽減值測試而言，商譽會分配至預期可從業務合併的協同效應中獲益的本集團各現金產生單位(「現金產生單位」)。

當現金產生單位(包括商譽)的賬面值超過其可收回金額時，減值虧損於損益中確認。現金產生單位的可收回金額為其公允價值減銷售成本與其使用價值兩者中的較高者。

評估使用價值時，採用除稅前折現率將預計未來現金流量折算至其現值，該折現率反映當前市場對金錢時間價值及該項資產的特有風險的評估。

減值虧損總額首先分配以減少分配至現金產生單位的商譽賬面值，然後按比例根據現金產生單位中各資產的賬面值分配至現金產生單位的其他資產。

商譽的減值虧損不可於其後期間撥回。

Goodwill (Continued)

Goodwill is capitalised as an intangible asset with any impairment in carrying value being charged to profit or loss. Where the fair value of identifiable assets, liabilities and contingent liabilities exceed the fair value of consideration paid, the excess is credited in full to the profit or loss on the acquisition date.

Gain or losses on disposal of subsidiaries and associates include the carrying amount of capitalized goodwill relating to the entity sold.

Goodwill is tested for impairment annually, or more frequently if there is indication that the goodwill may be impaired.

For the purpose of impairment testing of goodwill, goodwill is allocated to each of Group' cash-generating-units ("CGU") expected to benefit from synergies of the business combination.

An impairment loss is recognised in the profit or loss when the carrying amount of CGU, including the goodwill, exceeds the recoverable amount of the CGU. The recoverable amount of the CGU is the higher of the CGU's fair value less cost to sell and value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset.

The total impairment loss is allocated first to reduce the carrying amount of goodwill allocated to the CGU and then to other assets of the CGU pro-rated on the basis of the carrying amount of each asset in the CGU.

Impairment loss on goodwill is non-reversible in the subsequent period.

Business combination

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Group. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

In assessing control, the Group takes into consideration of potential voting rights that are currently exercisable.

The consideration transferred does not include amounts related to the settlement of preexisting relationships. Such amounts are generally recognised in profit or loss.

Costs related to the acquisition, other than those associated with the issue of debt or equity securities, that occur in connection with Group's business combination are expensed as incurred. Any contingent consideration is recognised at fair value at the acquisition date. If the contingent consideration is classified as equity, it is not re-measured and settlement is accounted for within equity. Otherwise, subsequent changes to the fair value of the contingent consideration are recognised in profit or loss.

As at the reporting dates, the Group's has no other financial liabilities other than those classified as amortised cost. The Group's determines the classification of its financial liabilities at initial recognition. The Group determines the classification of its financial liabilities at initial recognition.

Other financial liabilities are subsequently measured at amortised cost, using the effective interest method. Gains and losses are recognised in profit and loss when the liabilities are derecognised, and through the amortization process.

The Group financial liabilities consist of trade payables, accrued expenses, lease liabilities, and bank loan.

3) *Derecognitions*

A financial asset is derecognised when the rights to receive cash flows from the asset have expired.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received and any cumulative gain or loss that had been recognised in other comprehensive income is recognised in profit or loss.

所有以常規方式買賣的金融資產均於交易日(即本集團承諾買賣資產之日)確認或終止確認。

常規方式買賣指須於有關市場的法規或慣例通常訂明的期間內交付資產的金融資產買賣。

4) 抵銷金融工具

當且僅當本集團擁有抵銷該等金額的合法權利，並擬按淨額基準結算或同時變現資產及結算負債時，金融資產與負債方會予以抵銷，而淨額則於綜合財務狀況表中呈列。

All regular way purchases and sales of financial assets are recognised or derecognised on the trade date, which is the date that the Group commits to purchase or sell the asset.

Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace concerned.

4) Offsetting financial instruments

Financial assets and liabilities are set-off and the net amount is presented in the consolidated statements of financial position when, and only when, the Group has the legal right to set off the amounts and intends either to settle on a net basis or realise the asset and settle the liabilities simultaneously.

Income and expenses are presented net only when permitted by accounting standards.

5) Impairment of financial assets

In SFAS No. 109 “Financial Instruments”, impairment loss provision of financial assets measured at expected credit losses model (“ECLs”) and applied for financial assets which measured at amortized cost or FVOCI. The impairment method applied depends on whether there has been a significant increase in credit risk.

一般方法

預期信貸虧損於兩個階段進行確認。對於自初始確認以來信貸風險並無顯著增加的信貸敞口，會就未來12個月內可能發生的違約事件所產生的信貸虧損(12個月預期信貸虧損)計提預期信貸虧損撥備。對於自初始確認以來信貸風險已顯著增加的信貸敞口，須就該風險敞口於剩餘年期內的預期信貸虧損計提虧損撥備，不論違約事件於何時發生(全期預期信貸虧損)。

於各報告日期，本集團評估自初始確認後金融工具的信用風險是否顯著增加。於作出評估時，本集團採用金融工具預期年內發生違約的風險變動，而非預期信貸虧損(「預期信貸虧損」)金額的變動。為作出該評估，本集團將金融工具於報告日期發生違約的風險與其於初始確認日期發生違約的風險進行比較，並考慮於報告日期可合理獲取且無需過多成本或努力的有關過往事件、當前狀況及未來經濟狀況預測的合理且有理據的資料，該等資料表明信貸風險自初始確認以來已顯著增加。當合約付款逾期超過30天，本集團認為信貸風險已顯著增加。

General Approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

At each reporting date, the Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Group uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses (“ECL”). To make that assessment, the Group compares the risk of a default occurring on the financial instrument as of the reporting date with the risk of a default occurring on the financial instrument as of the date of initial recognition and consider reasonable and supportable information, that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions, that is indicative of significant increases in credit risk since initial recognition. The Group considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

5) 金融資產減值(續)

一般方法(續)

合約已逾期還款90天，則本集團認為金融資產違約。然而，在若干情況下，倘內部或外部資料反映，在計及本集團持有的任何信用增級措施前，本集團不大可能悉數收到未償還合約款項，則本集團亦可認為金融資產違約。

當並無收回合約現金流量的合理預期時，金融資產會被撇銷。

按攤銷成本計量的金融資產須按一般方法計提減值，除貿易應收款項應用下文詳述的簡化方法外，預期信貸虧損的計量於下文詳述的階段進行分類。

第1階段—信貸風險自初始確認以來並未出現顯著增加的金融工具，虧損撥備按相等於12個月預期信貸虧損的金額計量；

第2階段—信貸風險自初始確認以來出現顯著增加但並非信用減值金融資產的金融工具，虧損撥備按相等於全期預期信貸虧損的金額計量；

第3階段—於各有關期間末已信用減值(但並非買入或源生時已信用減值)的金融資產，虧損撥備按相等於全期預期信貸虧損的金額計量。

General Approach (Continued)

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for trade receivables which apply the simplified approach as detailed below.

Stage 1 – Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs;

Stage 2 – Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs;

Stage 3 – Financial assets that are credit-impaired at the end of each of the Relevant Periods (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs.

簡化方法

本集團採用「簡化法」計量預期信貸虧損，即對所有貿易應收款項及無重大融資成分的合約資產使用全期預期信貸虧損撥備，並對所有其他金融資產採用「一般法」。一般法包含對交易對手信貸風險自初始以來任何顯著增加的審查。預期信貸虧損審查包括有關違約風險及預期虧損率的假設。為計量預期信貸虧損，貿易應收款項已根據類似的信貸風險特徵及逾期天數進行分組。本集團已設立根據其過往信貸虧損經驗計算的撥備矩陣，並按本集團特定的前瞻性因素及經濟環境作出調整。

g. 現金及銀行存款

現金及銀行存款包括手頭現金及未用作抵押品且未受使用限制的銀行存款。

h. 貿易及其他應收款項

貿易應收款項指在日常業務過程中因銷售貨物或提供服務而應收客戶的款項。

其他應收款項指因日常業務過程以外的交易而應收第三方或關聯方的款項。

Simplified Approach

The Group applies the “simplified approach” to measuring ECL which uses a lifetime expected loss allowance for all trade receivables, and contract assets without significant financing components and the “general approach” for all other financial assets. The general approach incorporates a review for any significant increase in counterparty credit risk since inception. The expected credit loss reviews include assumptions about the risk of default and expected loss rates. To measure the ECL, trade receivables have been grouped based on similar credit risk characteristics and the days past due. The Group establishes a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the Group and the economic environment.

g. Cash and banks

Cash and bank consist of cash on hand and in banks that not used as collateral and not restricted in the usage.

h. Trade and other receivables

Trade receivables is amount due from customers for goods sold or services performed in the ordinary course of business.

Other receivables are amounts due from third parties or related parties for transactions outside of the ordinary course of business.

倘預期於一年或以內(或倘業務的正常營運週期較長，則於該週期內)收回，則分類為流動資產。否則，則呈列為非流動資產。

貿易及其他應收款項初步按公允價值確認，其後採用實際利率法按攤餘成本減任何減值撥備計量。(附註2f)。

貿易及其他應收款項的可收回性會持續檢討。已知無法收回的應收款項透過直接扣減賬面值撇銷。當有客觀證據表明本集團將無法根據應收款項的原始條款收回全部或部分到期款項時，會使用撥備賬戶。

就貿易應收款項及其他應收款項於損益中「其他－淨額」內確認的減值虧損金額。當已確認減值撥備的貿易及其他應收款項於其後年度變為無法收回時，會與撥備賬戶撇銷。其後收回的過往撇銷金額於損益中計入「其他－淨額」。

h. Trade and other receivables (Continued)

If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

Trade and other receivables are recognized initially at fair value and subsequently measured at amortised cost using the effective interest method, less any provision for impairment (Note 2f).

Collectability of trade and other receivables is reviewed on an ongoing basis. Receivables which are known to be uncollectible are written off by reducing the carrying amount directly. A provision account is used when there is objective evidence that the Group will not be able to collect all or a portion of amounts due according to the original terms of the receivables.

The amount of the impairment loss recognized in profit or loss within “others – net” for trade receivables and for other receivables. When a trade and other receivable for which an impairment provision had been recognized becomes uncollectible in a subsequent year, it is written off against the provision account. Subsequent recoveries of amounts previously written off are credited against “others – net” in profit or loss.

i. Inventories

Gold inventories consist of ore in stockpiles, goods in process and finished goods, valued at the lower of cost or net realizable value. Cost is determined using the weighted average method, which includes mining costs, direct labor costs, other direct costs, and an allocation of a portion of variable and fixed indirect costs related to mining activities. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Inventories which consist of spare parts and supplies are valued at the lower of cost or net realizable value.

The cost of spare parts is determined based on the weighted average method. A provision for obsolete and slow moving inventory is determined on the basis of estimated future usage or sale of individual inventory items.

j. Property, plant and equipments

Components of property, plant and equipments are initially recognised at cost. As well as the purchase price, cost includes directly attributable costs and the estimated present value of any future unavoidable costs of dismantling and removing items.

The Group has applied the cost model in subsequent recognition for its property, plant and equipments.

Property, plant and equipments, other than land are recognised at cost less accumulated depreciation and accumulated impairment losses. Property, plant and equipments were depreciated using the straight-line method for a certain percentage of the acquisition price.

| 辦公室設備 | 4 |
| 機器及設備 | 4 |

礦區的採礦基礎設施及廠房乃採用產量單位法折舊。

重型設備乃按其估計營運年限以小時使用率基準折舊。

折舊開支於其產生的財政期間計入損益。

剩餘價值、可使用年限及折舊方法於各報告期末進行審閱，並在適當時作前瞻性調整。倘存在減值跡象，資產的賬面值會被評估並即時撇減至其可收回金額。

出售物業、廠房及設備的收益或虧損乃透過比較所得款項與賬面值釐定，並計入經營損益。

在建工程

在建工程指在建的物業、廠房及設備，按成本列賬且不予折舊。當工程大致完成且資產可作其預定用途時，累計成本會被重新分類至相應的物業、廠房及設備賬戶並予以折舊。

| | Year |
|-------------------------|-------|
| Building | 10-20 |
| Vehicles | 4-8 |
| Office equipments | 4 |
| Machinery and equipment | 4 |

Mining infrastructure and plant in mining area are depreciated using the unit-of production method.

Heavy equipment are depreciated using hourly utilization basis over their estimated operating life.

Depreciation expenses are taken to profit or loss during the financial period in which they are incurred.

The residual value, useful life and depreciation method are reviewed at the end of each reporting period, and adjusted prospectively, if appropriate. Where an indication of impairment exists, the carrying amount of the asset is assessed and written down immediately to its recoverable amount.

Gains or losses on disposal of property, plant and equipments are determined by comparing proceeds with the carrying amount and are included in profit or loss from operations.

Construction in progress

Construction in progress represents property, plant and equipments under construction which is stated at cost and is not depreciated. The accumulated costs are reclassified to the respective property, plant and equipments account and are depreciated when the construction is substantially complete and the asset is ready for its intended use.

k. Exploration and evaluation assets

Exploration and evaluation activity involves the search for mineral resources after the Group has obtained legal rights to explore in a specific area, determination of the technical feasibility and assessment of the commercial viability of an identified resource.

Exploration and evaluation activity includes among others:

- Obtaining right to explore;
- Topography, geology, geochemical and geophysical studies;
- Exploratory drilling;
- Trenching;
- Sampling;
- Technical and commercial feasibility on mining of mineral resources.

Exploration and evaluation expenditure related to an area of interest is written off as incurred, unless it is capitalised and carried forward, on an area of interest basis, provided one of the following conditions is met:

1. The rights of tenure of an area are current and it is considered probable that the costs will be recouped through successful development and exploitation of the area of interest or, alternatively, by its sale; or
2. Exploration activities in the area of interest have not yet reached the stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves and active and significant operations in or in relation to the area of interest are continuing.

Exploration and evaluation assets are subsequently measured using the full costing method.

Identifiable exploration and evaluation assets acquired in a business combination are recognised initially as assets at fair value on acquisition and subsequently at cost less impairment charges. Exploration and evaluation expenditure incurred subsequent to the acquisition of an exploration asset in a business combination is accounted for in accordance with the policy outlined above.

When technical and commercial feasibility of mining of mineral resources are demonstrable, exploration and evaluation assets are reclassified as “mines under construction” at “mine properties” account.

Expenditure incurred before the entity has obtained the legal right to explore a specific area is expensed as incurred.

Exploration and evaluation assets are assessed for impairment when facts and conditions indicate that the carrying amounts exceed recoverable amounts.

l. Mining properties

Development expenditure incurred by or on behalf of the Group is accumulated separately for each area of interest in which economically recoverable resources have been identified. Such expenditure comprises costs directly attributable to the construction of a mine and the related infrastructure and excludes physical assets and land rights (i.e. right to build, right to cultivate and right to use), which are recorded as property, plant and equipment.

No depreciation is recognized for “mines under development” until they are reclassified to “mines in production” as mining properties.

Mining properties are depreciated using the unit of production method based on gold reserve.

Amortisation is calculated by applying the ratio of contained gold in ore mined during the period to the total gold reserves, based on the latest reserve reports.

Identifiable mining properties acquired in a business combination are initially recognized as assets at their fair value. Development expenses incurred subsequent to the acquisition of the mining properties are accounted for in accordance with the policy outlined above.

“Mines under development” and “mines in production” are tested for impairment in accordance with the policy described in Note 2n.

m. Reclamation and mine closure

Group recognizes the present value of estimated costs of legal and constructive obligations required to restore the condition of mining area caused by mining operations in the period in which the obligation is incurred. The reclamation and mine closure activities include dismantling and removing structures, rehabilitating mines and tailings dams, dismantling operating facilities, closure of plant and waste site, and restoration, reclamation and revegetation of affected areas.

The obligation normally arises when the asset is installed or the ground/environment is disturbed in mining operations area. At the initial recognition of the liability, the present value of the estimated costs is capitalized by increasing the carrying amount of the related mining assets to the extent that it was incurred as a result of the development/construction activities in the exploration and development mining areas.

m. Reclamation and mine closure (Continued)

Any reclamation and mine closure obligations that arise through the production phase are expensed as incurred. Over time, the discounted liability is increased for the change in present value based on the discount rates that reflect current market assessments and the risk specific to the liability. The periodic unwinding of the discount is recognized in the consolidated statement of comprehensive income as a finance cost.

Additional disturbances or changes in reclamation and mine closure costs are recognized as additions or changes to the corresponding assets and reclamation and mine closure liability when they occur.

Changes to estimated future costs are recognized in the consolidated statement of financial position by either increasing or decreasing the reclamation and mine closure liability and the related asset if the estimated costs of reclamation and mine closure were originally recognized as part of an asset measured in accordance with SFAS 216 (Annual Improvement 2015), "Fixed Assets". Any reduction in the reclamation and mine closure liability and deduction from the related asset may not exceed the carrying amount of that asset. If it does exceed the carrying value of the related asset, such excess is immediately recognized in the consolidated statement of profit or loss and other comprehensive income.

If the change in estimates results in an increase in the reclamation and mine closure liability and, an addition to the carrying value of the related asset, Group assesses the impairment, if there is indication of impairment of such assets.

n. 非金融資產減值(不包括遞延所得稅資產)

SFAS第236號(2014年修訂版)規定了本集團應採用的程序，以確保其資產的賬面值不超過其可收回金額。倘資產的賬面值超過透過使用或出售該資產將收回的金額，則其賬面值高於其可收回金額。在此情況下，該資產被視為已減值，且該經修訂的SFAS要求實體確認減值虧損。該經修訂SFAS亦指明實體應何時撥回減值虧損並規定了披露要求。

採納SFAS第236號(2014年修訂版)規定至少每年對商譽進行減值測試，並在有減值跡象時更頻繁地進行測試。

本集團於各報告日期評估是否有任何跡象顯示資產可能已減值。倘存在任何該等跡象，或當需要對資產進行年度減值評估時，本集團會估計該資產的可收回金額。

資產的可收回金額為資產或現金產生單位的公允價值減出售成本與其使用價值中的較高者，並就個別資產釐定，除非該資產產生的現金流入在很大程度上並非獨立於其他資產。

評估使用價值時，採用除稅前折現率將預期由資產產生的估計未來現金流量折算至其現值，該折現率反映當前市場對金錢時間價值及該項資產的特有風險的評估。評估公允價值減出售成本時，會使用適當的估值模型。

n. Impairment of non-financial assets (excluding deferred tax assets)

SFAS 236 (Revised 2014) prescribes the procedures to be employed by the Group to ensure that its assets are carried at no more than their recoverable amount. An asset is carried at more than its recoverable amount if its carrying amount exceeds the amount to be recovered through use or sale of the asset. If this is the case, the asset is described as impaired and this revised SFAS requires the entity to recognise an impairment loss. This revised SFAS also specifies when an entity should reverse an impairment loss and prescribes disclosures.

The adoption of SFAS 236 (Revised 2014) required the impairment test of goodwill at least once a year and more frequently when indications for impairment exist.

The Group assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, or when annual impairment assessment for an asset is required, the Group makes an estimate of the asset's recoverable amount.

An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets.

In assessing value in use, the estimated future cash flows expected to be generated by the asset are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In assessing fair value less costs to sell, an appropriate valuation model is used.

倘資產的賬面值超過其可收回金額，該資產會撇減至其可收回金額。

減值虧損於損益中確認，除非相關資產按重估金額列賬，在該情況下，減值虧損被視為重估減值。

於各報告日期，會評估是否有任何跡象顯示先前確認的減值虧損可能不再存在或可能已減少。

先前已確認的減值虧損，僅於自上次確認減值虧損以來用以釐定資產可收回金額的估計有變時，方可撥回。在此情況下，資產的賬面值會增加至其可收回金額。

該增加額不得超過假設先前未確認減值虧損而應已釐定的賬面值(扣除折舊)。該撥回於損益中確認，除非資產按重估金額計量，在該情況下，撥回被視為重估增值。

n. Impairment of non-financial assets (excluding deferred tax assets) (Continued)

Where the carrying amount of an asset exceeds its recoverable amount, the asset is written down to its recoverable amount.

Impairment losses are recognised in profit or loss unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased.

A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case, the carrying amount of the asset is increased to its recoverable amount.

That increase cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised previously. Such reversal is recognised in profit or loss unless the asset is measured at revalued amount, in which case the reversal is treated as a revaluation increase.

o. Taxation

Current tax

Current income tax assets and or liabilities comprise those obligations to, or claims from Tax Authorities relating to the current or prior reporting period, that are unpaid at the consolidated statements of financial position date. They are calculated according to the tax rates and tax laws applicable to the fiscal periods to which they relate, based on the taxable profit for the year.

All changes to current tax assets or liabilities are recognised as a component of income tax expense in the consolidated statements of profit or loss and other comprehensive income.

Deferred tax

Deferred tax assets and liabilities are recognised for temporary differences between the financial and the tax bases of assets and liabilities at each of the reporting date.

Deferred tax assets are recognised for all deductible temporary differences to the extent that it is probable that future taxable profit will be available against which the deductible temporary difference can be utilised.

Deferred tax liabilities are recognised for all taxable temporary differences. Future tax benefits, such as the carry-forward of unused tax losses, are also recognised to the extent that realisation of such benefits is probable.

The amount of the asset or liability is determined using tax rates that have been enacted, or substantively enacted by the reporting date and are expected to apply when the deferred tax liabilities/(assets) are settled/(recovered).

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost, any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

Costs incurred to obtain loan facilities are recognized as transaction costs of the borrowing to the extent that it is probable that some or all of the facility will be drawdown. In this case, the costs of obtaining the borrowing are deferred until the loan is drawn. To the extent that there is no evidence that it is probable that some or all of the facility will be drawdown, the costs of obtaining the borrowing are capitalized as a prepayment for liquidity services and amortized over the related facility period.

Borrowing costs incurred for the construction of any qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed in profit or loss.

s. Provision, contingent liabilities and contingent asset

Contingent liabilities are not recognized in the consolidated financial statements. They are disclosed in the notes to the consolidated financial statements unless the possibility of an outflow of resources embodying economic benefits is remote.

Contingent assets are not recognized in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements when an inflow of economic benefits to the Company is probable.

Provisions are recognized when Group has a legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation and a reliable estimate of the amount can be made.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of economic resources will be required to settle the obligation, the provision is reversed.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate, where appropriate, to reflect the risk specific to the liability.

The increase in the provision due to the passage of time is recognized as a finance cost, when discounting is used.

為評估合約是否給予控制已識別資產使用的權利，本集團會評估：

- 合約涉及使用已識別資產—這可以是明確或隱含地指明，且應為實體上可區分，或代表實體上可區分資產的絕大部分產能。倘供應商擁有實質性替代權，則該資產並非已識別資產；
- 本集團有權在整個使用期內從使用該資產中獲得絕大部分經濟利益；及
- 本集團有權主導已識別資產的使用。當本公司擁有與改變資產使用方式及目的最為相關的決策權時，即擁有此權利。在若干情況下，倘有關資產使用方式及目的的所有決策均已預先釐定，則本集團在以下任一情況下有權主導資產的使用：
 - 本集團有權營運該資產；及
 - 本集團設計資產的方式已預先釐定其使用方式及目的。

於包含租賃部分的合約開始或重估時，本集團根據各租賃部分的相對獨立價格將合約中的代價分配至各租賃部分。

u. Lease

At the inception of a contract, the Group assesses whether the contract is, or contains a lease. A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- The contract involves the use of an identified asset – this may be specified explicitly or implicitly and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has the substantive substitution right, then the asset is not identified;
- The Group has the right to obtain substantially all the economic benefits from use of the asset throughout the period of use; and
- The Group has the right to direct the use of the identified asset. The Company has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In certain circumstances where all the decisions about how and for what purpose the asset is used are predetermined the Group has the right to direct the use of the asset if either:
 - The Group has the right to operate the asset; and
 - The Group has designed the asset in a way that predetermined how and for what purpose it will be used.

At inception or on re-assessment of a contract that contains a lease component, the Group allocates consideration in the contract to each lease component on the basis of their relative stand-alone prices.

u. Lease (Continued)

At initial recognition, the Group recorded the right-of-use asset and lease liability.

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payment made at or before the commencement date, plus any initial direct cost incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset to the condition required by the terms and conditions of the lease, less any lease incentives received.

The right-of-use asset is depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The lease liability is initially measured at the present value of the lease payments that are not yet paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- Fixed payments, including in-substance fixed payments;
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- Amounts expected to be payable under a residual value guarantee;

- 本集團合理確定將行使的購買期權下的行使價、倘本集團合理確定將行使續租期權的可選續租期內的租賃付款；及

倘未來租賃付款因指數或利率變動而變動、本集團對根據剩餘價值擔保的預期應付金額估計有變，或本集團改變其對是否行使購買、續租或終止期權的評估，則租賃負債須重新計量。

當租賃負債以此方式重新計量時，會對使用權資產的賬面值作出相應調整，或倘使用權資產的賬面值已減至零，則計入損益。

- The exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option; and
- Penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

Lease liability remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Short-term leases and leases of low-value assets

The Group has elected not to recognize right-of use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Group recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

Leases of property, plant and equipment

The Group leases certain of property, plant and equipment that classified as lease assets under property, plant and equipment.

The amount of lease that initially recognized as a property, plant and equipment is the lower of the fair value of the leased asset and the present value of the minimum lease payments payable over the term of the lease. The corresponding lease commitment is shown as a liability. Lease payments are analyzed between capital and interest. The interest element is charged to profit or loss over the period of the lease and is calculated so that it represents a constant proportion of the lease liability.

Lease assets under property, plant and equipment are depreciated using hourly utilization basis over their estimated operating life.

3. 重大會計判斷、估計及假設

編製本集團的綜合財務報表須運用若干主要會計估計。亦要求本公司及附屬公司管理層於應用本集團會計政策時作出判斷。編製綜合財務報表時作出重大判斷及估計的領域及其影響。

在應用本集團的會計政策的過程中，除涉及估計者外，管理層作出以下對綜合財務報表所確認的金額具有最重大影響的判斷：

1) 所得稅

本集團面臨所得稅風險。在釐定所得稅撥備時涉及重大判斷。於日常業務過程中，有若干交易及計算的最終稅務釐定存在不確定性。

本集團就預期稅務問題確認負債，乃基於對是否會產生額外稅項的估計。

倘該等事項的最終稅務結果與最初確認的金額不同，則該等差異將在作出該釐定的期間產生影響。

2) 物業、廠房及設備的可使用年限

預期使用水平的變動及技術發展可能影響該等資產的經濟可使用年限及其剩餘價值。

管理層估計該等物業、廠房及設備的可使用年限為4至20年。此乃業內應用的常見預期使用年限。

3. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of Group's consolidated financial statements requires the use of certain critical accounting estimates. It also requires the Company and subsidiaries management to exercise judgement in applying Group's accounting policies. The areas where significant judgements and estimates have been made in preparing the consolidated financial statements and their effect.

In the process of applying Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

1) Income taxes

Group has exposure to income taxes. Significant judgement is involved in determining the provision for income taxes. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business.

The Group recognizes liabilities for expected tax issues based on estimates of whether additional taxes will be due.

Where the final tax outcome of these matters is different from the amounts that were initially recognized, such differences will impact in the period in which such determination is made.

2) Useful lives of property, plant and equipment

Changes in the expected level of usage and technological developments could impact the economic useful lives and the residual values of these assets.

Management estimates the useful lives of these property, plant and equipment to be between 4 to 20 years. These are common life expectancies applied in the industry.

2) 物業、廠房及設備的可使用年限(續)

因此，未來的折舊費用可能會被修訂。本公司於報告期末的物業、廠房及設備的賬面值於綜合財務報表附註7披露。

3) 遞延稅項資產

就所有未動用稅項虧損確認遞延稅項資產，惟以很可能獲得應課稅溢利用以抵扣該等虧損為限。

釐定可確認的遞延稅項資產金額時，需要管理層根據未來應課稅溢利的可能時間及水平，連同未來的稅務規劃策略作出重大估計。

4) 金融工具的公允價值

本集團採用估值技術釐定無報價金融工具的公允價值。

該等技術受所用假設(包括貼現率及未來現金流量估計)的重大影響。

就此而言，所得的公允價值估計不一定能透過與獨立市場比較而證實，且在許多情況下可能無法即時變現。

5) 僱員福利

本集團營運的界定福利計劃的成本、資產及負債乃採用依賴精算估計及假設的方法釐定。主要假設的詳情載於綜合財務報表附註16。

2) Useful lives of property, plant and equipment (Continued)

Therefore, future depreciation charges could be revised. The carrying amount of The Company's property, plant and equipments at the end of the reporting period is disclosed in Note 7 to the consolidated financial statements.

3) Deferred tax assets

Deferred tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised.

Significant management estimate is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

4) Fair value of financial instruments

The Group determines the fair value of financial instruments that are not quoted, using valuation techniques.

Those techniques are significantly affected by the assumptions used, including discount rates and estimates of future cash flows.

In that regard, the derived fair value estimates cannot always be substantiated by comparison with independent markets and, in many cases, may not be capable of being realised immediately.

5) Employment benefits

The costs, assets and liabilities of the defined benefit schemes operating by Group are determined using methods relying on actuarial estimates and assumptions. Details of the key assumptions are set out in Note 16 to the consolidated financial statements.

5) 僱員福利(續)

本集團就假設的適當性徵詢獨立精算師的意見。所用假設的變動可能對綜合損益及其他全面收益表以及綜合財務狀況表產生重大影響。

6) 採礦復墾撥備

第78/2010號政府規例涉及採礦許可證(IUP)－勘探及生產的復墾及閉礦後活動，而印尼能源及礦產資源部第26/2018號部長令涉及礦產及煤炭開採業務中的復墾及閉礦後活動。

於生產階段將就受擾亂地區的整治而產生的修復、復墾及環境開支，於因擾亂而產生的責任隨開採進度而產生時計入銷售成本。

受擾亂地區的復墾以及採礦資產及其他長期資產的退役將於未來數年進行，而確切要求不斷變化以滿足政治、環境、安全及公眾期望。因此，於各財務狀況表日期為結算責任所需的未來現金流量的時間及金額存在重大不確定性。預期未來成本的變動可能對公司的財務報表產生影響。

7) 礦產儲量

證實及概略儲量是可從本集團的礦產中經濟及合法地開採的礦物量的估計。本集團根據澳大利亞拉西亞JORC的礦產資源量及礦石儲量報告規範(「JORC規範」)所載的原則釐定及報告其礦產儲量。

5) Employment benefits (Continued)

The Group takes advices from independent actuaries relating to the appropriateness of the assumptions. Changes in the assumptions used may have a significant effect on the consolidated statements of profit or loss and other comprehensive income and the consolidated statements of financial position.

6) Provision for mining rehabilitation

The Government Regulation No. 78/2010 deals with reclamation and post-mining activities for both Mining License Permit (IUP) – Exploration and Production and the Ministerial Decree of ESDM No. 26/2018 deals with reclamation and post-mining activities in the mineral and coal mining business.

Restoration, rehabilitation and environmental expenditure to be incurred related to the remediation of disturbed areas during the production phase are charged to cost of sales when the obligation arising from the disturbance occurs as extraction progress.

The reclamation of disturbed areas and decommissioning of mining assets and other long lived assets will be undertaken during several years in the future and precise requirements are constantly changing to satisfy political, environmental, safety and public expectations. As such, the timing and amounts of future cash flows required to settle the obligation at each of the statement of financial position dates are subject to significant uncertainty. Changes in the expected future costs could have an impact on the Company's financial statements.

7) Mineral reserves

Proven and probable reserves are estimates of the amount of mineral that can be economically and legally exploited from the Group's mining properties. The Group determines and reports its mineral reserves under the principles incorporated in the Code for Reporting of Mineral Resources and Ore Reserves (the "JORC Code") of the Australasian JORC.

3. 重大會計判斷、估計及假設(續)

7) 礦產儲量(續)

為估計礦產儲量，須就多項地質、技術及經濟因素(包括產量、生產技術、剝採比、生產成本、運輸成本、礦物需求及價格以及匯率)作出假設。估計礦產儲量的數量及／或礦物含量需要透過分析鑽孔樣本等地質數據來釐定礦體的大小、形狀及深度。此過程可能需要複雜而困難的地質判斷以詮釋數據。

由於各期間估計儲量所用經濟假設不同，加上作業過程產生額外地質數據，故儲量估計可能不時出現變動。所呈報儲量變動可能以多種方式影響本集團的財務業績及財務狀況，包括：

- a. 資產賬面值可能受估計未來現金流量變動影響。
- b. 倘開支按產量單位基準釐定或倘資產可用經濟年期改變，則計入損益的折舊、折耗及攤銷可能變動。
- c. 倘估計儲量變動影響預期時間或成本，則停產、現場恢復及環境撥備可能變動。
- d. 遞延稅項資產／負債賬面值可能因估計可收回稅務利益變動而改變。

3. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (Continued)

7) Mineral reserves (Continued)

In order to estimate mineral reserves, assumptions are required about a range of geological, technical and economic factors, including production quantities, production techniques, stripping ratio, production costs, transportation costs, demand and prices of mineral and exchange rates. Estimating the quantity and/or mineral content of mineral reserves requires the size, shape and depth of mineral bodies to be determined by analysing geological data such as drilling samples. This process may require complex and difficult geological judgements to interpret the data.

Because the economic assumptions used to estimate reserves change from period to period and because additional geological data is generated during the course of operations, estimates of reserves may change from period to period. Changes in the reported reserves may affect the Group's financial results and financial position in a number of ways, including the following:

- a. Assets carrying values may be affected due to changes in the estimated future cash flows.
- b. Depreciation, depletion and amortisation charged to profit or loss may change where such charges are determined on the units-of-production basis, or where the useful economic lives of assets change.
- c. Decommissioning, site restoration and environmental provisions may change where changes in estimated reserves affect expectations about the timing or cost of these activities.
- d. The carrying value of deferred tax assets/liabilities may change due to changes in estimates of the likely recovery of the tax benefits.

16. 僱員福利負債

於中期綜合財務報表確認的僱員福利負債金額及截至2026年3月31日止三個月期間的僱員福利開支乃根據本集團管理層的計算，而截至2025年12月31日的結餘則根據獨立精算師KKA Riana & Rekan於2026年出具的計算。

釐定僱員福利所用的主要假設如下：

| | | | |
|--------|------------------------|------------------|-----------|
| 貼現率 | Discount rate: | 6.75% | 6.75% |
| 薪金增長 | Salary increment: | 6.00% | 6.00% |
| 死亡率 | Mortality rate: | 100% TMI4 | 100% TMI4 |
| 傷殘率 | Disability rate: | 5% TMI4 | 5% TMI4 |
| 正常退休年齡 | Normal retirement age: | 56 | 56 |

釐定本集團僱員福利負債所用的主要假設如下：

- 貼現率下降將增加計劃負債。
- 本集團的退休金責任與薪金增長率掛鉤，較高的薪金增長率將導致較高的負債。

界定福利責任對主要加權假設變動的敏感度：

| | | | | |
|------|------------------|----|-------------|-------------|
| 貼現率 | Discount rate | 1% | (1,131,780) | 1,313,425 |

The main assumptions used in determination of employee benefits are as follows:

| | | |
|--|-----------------|-------------|
| | 2026年 | 2025年 |
| | 3月31日 | 12月31日 |
| | 31 March | 31 December |

| | 100% TMI4 | 100% TMI4 |
| | 5% TMI4 | 5% TMI4 |
| | 56 | 56 |

The principal assumptions used in determining the Group's employment benefits liabilities are as follows:

- A decrease in discount rate will increase plan liabilities.
- The Group's pension obligations are linked to salary growth rate, higher salary growth rate will lead to higher liabilities.

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions:

30. 金融工具及財務風險管理

本集團在其營運中面臨與金融工具有關的各種風險，主要為信貸風險、流動資金風險及市場風險(包括利率風險、匯率風險及商品價格風險)。本集團的主要金融工具包括現金及銀行存款、貿易應收款項、其他應收款項、其他非流動資產、貿易應付款項、應計開支、銀行貸款、關聯方貸款及租賃負債。考慮到印尼及國際金融市場的變化及波動，此風險已顯著增加。與該等金融工具相關的風險，以及本集團為降低該等風險而採用的風險管理策略概述如下。

a. 信貸風險

信貸風險指本集團的交易對手拖欠其合同義務，導致本集團蒙受財務虧損的風險。本集團的信貸風險主要來自現金及銀行存款、貿易應收款項、其他應收款項及其他非流動資產。

本集團透過持續監察應收款項結餘，以確保本集團的壞賬風險不重大，並透過僅將資金存入信譽良好的銀行來處理銀行存款，從而將信貸風險降至最低。

本集團的其他金融資產包括貿易應收款項、其他應收款項以及非流動資產。鑑於過往還款記錄良好，與貿易應收款項內應收關聯方款項相關的信貸風險被視為不重大。

就其他應收款項及非流動資產而言，信貸風險來自交易對手方的潛在違約，最大風險敞口等於該等金融工具的賬面值。本集團持續進行監察，以盡量降低信貸風險，目標是使本集團的預期信貸虧損風險不重大。

本集團有信心能夠控制及維持最低的信貸風險。截至2026年3月31日，最高信貸風險承擔為51,123,078美元(2025年12月31日：47,921,501美元)。

30. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Group is exposed to various risks in relation to financial instruments in its operations, mainly credit risk, liquidity risk and market risk (including interest rate risk, exchange rate risk, and commodity price risk). The Group's major financial instruments include cash and banks, trade receivables, other receivables, other non-current assets, trade payables, accrued expenses, bank loan, loan from related party and lease liabilities. This risk has significantly increased by considering the changes and volatility in financial market both in Indonesia and international. Risks in connection with such financial instruments, and the risk management strategies adopted by the Group to mitigate such risks are summarised as follows.

a. Credit risk

Credit risk refers to the risk that the Group's counterparties default on their contractual obligations resulting in financial losses to the Group. The Group's credit risk exposures are primarily attributable to cash and banks, trade receivables, other receivables and other non-current assets.

The Group minimizes credit risk from receivable balances by monitoring on an ongoing basis with the objective that the Group's exposure to bad debts is not significant and deposits with banks by placing their funds only in banks with good reputation.

The Group's other financial assets comprise trade receivables, other receivables, as well as non-current assets. The credit risk associated with amounts due from related parties within trade receivables is considered immaterial, given the positive repayment history.

For other receivables and non-current assets, the credit risk arises from potential defaults by counterparties, with the maximum exposure being equal to the carrying amounts of these financial instruments. The Group continue to minimize the credit risk by monitoring on an ongoing basis with the objective that the Group's exposure to expect credit loss is not significant.

The Group is confident in its ability to control and sustain minimal exposure of credit risk. The maximum credit risk exposure as at 31 March 2026 is US\$51,123,078 (31 December 2025: US\$47,921,501).

b. 流動資金風險

流動資金風險是本集團因資金短缺而難以履行財務責任的風險。

本集團透過密切監察金融負債(尤其是關聯方貸款)的償債付款時間表及其因日常營運而產生的現金流出，以監察其流動資金需求。管理層亦持續評估金融市場的狀況，以尋求獲得最佳資金來源的機會。

b. Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting financial obligations due to shortage of funds.

The Group monitor their liquidity needs by closely monitoring debt servicing payment schedule for financial liabilities, particularly the related party loans and their cash outflows due to day-to-day operations. Management also continuously assesses conditions in the financial markets for opportunities to obtain optimal funding sources.

The maximum liquidity risk exposure at the reporting date is as follows:

30. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (Continued)

c. Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign currency exchange rates.

The Group has transactional exchange rate risk exposures mainly arising from purchases by subsidiaries in currencies other than their functional currencies. The Group manages its foreign exchange exposure and, where necessary, mitigates the risk through appropriate hedging strategies in line with market conditions.

The following table shows the sensitivity to a reasonably possible change in foreign exchange rates against the United States Dollar, with all other variables held constant, on the loss before tax for the period/year ended 31 March 2026 and 31 December 2025. Five percent (5%) is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in exchange rates.

(除非另有說明，否則以美元呈列)

30. 金融工具及財務風險管理(續)

d. 利率風險

本集團的利率風險主要來自借款。按浮動利率發行的借款使本集團面臨現金流量利率風險。

本集團的政策是透過以較低利率為借款再融資，以管理其現金流量利率風險。

於2026年3月31日，倘借款利率上升/下降10個基點而所有其他變量保持不變，則期間虧損將減少/增加55,506美元(2025年3月31日：43,438美元)。

e. 金融工具的公允價值估計

金融資產及負債的公允價值必須為確認及計量或為披露目的而估計。

SFAS第107號「金融工具：披露」規定須按以下公允價值計量層級披露公允價值計量：

- (a) 相同資產或負債於活躍市場的報價(未經調整)(第一級)。
- (b) 除第一級所包括的報價外，可就資產或負債直接(如價格)或間接(源自價格)觀察的輸入數據(第二級)，及
- (c) 並非基於可觀察市場數據的資產或負債輸入數據(不可觀察輸入數據)(第三級)。

30. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (Continued)

d. Interest rate risk

The Group's interest rate risk mostly arises from borrowings. Borrowings issued at floating rates expose the Group to cash flow interest rate risk.

The Group's policy is to manage its cash flows interest rate risk by refinancing borrowings at a lower interest rate.

On 31 March 2026, if interest rate on borrowing has been 10 basis points higher/lower with all other variables held constant, loss for the period would have been lower/higher US\$55,506 (31 March 2025: US\$43,438).

e. Fair value estimation of financial instrument

The fair value of financial assets and liabilities must be estimated for recognition and measurement or for disclosure purposes.

SFAS No. 107, "Financial Instruments: Disclosures" requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- (a) Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- (b) Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (level 2), and
- (c) Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).
